I would like to ask the question, "Why should I enter Astral King?" There is nothing in Kentucky that I have any desire or any ambition to defeat. There is nothing in Missouri that I haven't defeated and been placed ahead of time and again. There is nothing in this State that I really consider in the Astral King class. We have stopped a lot of loud talk several times by offering to show horses for horse or dollar for dollar when these so-called exhibitors of champions got to talking too loud. We made that same proposition to Tulsa, or during that show, but the men making the talk were not game enough to come across and put down their money. There is not a horse before the public today that Astral King has not defeated and been placed ahead of. Not only one time, but several times. We retired him two years ago and we haven't shown him since. The only thing that would tempt us to get back into the show ring with him would be the call of some of these so-called champions. Astral King has won the Commissioner of Agriculture stake, the only horse owned outside of Kentucky that ever won it; that is, that was owned outside of the state at the time he won it. We will be there, and we will make somebody put up an awful good show if we don't win it with the get of Astral King. Astral King has not only done things himself, but he is siring the kind that does things.

Yours very truly,
JAS. HOUCHIN.

July 28, 1917.

COMMISSIONER COHEN REMOVES CASTLEMAN'S HIDE.

The following letters from Mat S. Cohen, to General John B. Castleman, and the Farmer's Home Journal, disclose many facts not mentioned in the General's unwarranted attack on Mr. Cohen. This stake is going to do more than its sponsors had anticipated. It is going to bring about a reorganization of the American Saddle Horse Breeders' Association, a fact which will come as refreshing news to the breeders of the entire country:

In your issue of July 28th, under caption "No contribution unless registration required," signed by General John B. Castleman, and included in said article is General Castleman's letter to me of July 11th. Since the genial General published his communication to me, I am enclosing copy of my reply to the letter of General Castleman, which was published and which I will ask you to please publish in your issue of August 4th, also my reply to General Castleman's article of July 28th issue.

In the very beginning of the General's article, he realized that he did not have any equitable grounds upon which to justify his attitude, or any excuse for his refusal to permit the American Saddle Horse Breeders Association to do its duty in this serious crisis, and therefore, resorts to personalities by expressing mortification over the fact that I am Commissioner of Agriculture. In reply to this, beg to say that I was elected without his aid or consent by a majority vote of the people at the November election in 1915, and further, that I am going to perform the duties of that office until January, 1920, without fear or favor and regardless of whether my acts meet with the approval of General Castleman.

General, are you really in earnest when you say you are mortified and chagrined? If so, why did you, this past May, send me a card to the Pendennis Club of Louisville, offering to me the many privileges and pleasures of that club for a period of ten days as your guest? No, General, you are only mortified because you cannot use me.

Again, General, you attempt impugning my truthfulness when you state "in discouraging the custom of discrediting his veracity"; don't you think you are permitting your imagination to carry you too far? If not, then I say to you that your charge is deliberately and maliciously false.

Again, you say no one of the record associations included in the National Society of Record Associations would permit even a Commissioner to set aside its rules, etc. Why, General, the Trotting Horse Breeders Association and the Thoroughbred Breeders Association permit their breeds exhibited at the Kentucky State Fair without the Kentucky State Fair requiring registration. The same is true of the Jack Breeders Association, while Jersey, Guernsey, Ayreshire, Swine and Sheep Associations only require entries traceable to registered stock.

You further state that the Kentucky State Fair denies your association co-operation. Don't you know that is an untruth, because, the Kentucky State Fair has always, and does now require entries in the American Horse Breeding classes to be registered in the American Saddle Horse Breeders Association Register; besides, for the American Saddle Horse Breeders' trophy which is given for stallion and mares, three years old and under, the Kentucky State Fair specifically states that all entries must be entered in the American Saddle Horse Breeders Association. Yet, that does not seem to satisfy your narrow, selfish, unsportsmanlike and unpatriotic demand. What about having two more feet and some bristles to be a real hog?

You refer to what the World's Fair in Chicago in 1893 did, also the Universal Exposition at St. Louis in 1904, adding that the latter stamped its great official catalogue with the portrait of the American Saddle Horse (and with no other). Were we living under war conditions then? General, why don't you tell the readers of the Farmers' Home Journal whose horse that was and who was mounted upon that horse, and how it all happened to be stamped upon that great official catalogue?

You say the American Saddle Horse Breeders Association has been liberal with Kentucky. No, not by a jugful. The Association is nearly twenty-five years old and has received from Kentucky breeders many thousands of dollars, yet, not a word, a line, a letter, or a bulletin has the American Saddle Horse Breeders Association published in behalf of its registrations, exploiting their many virtues and doing something to advance the breed. No, it has taken every dollar for registration fees it could possibly get and has left the owners to do their own boosting for that breed. It is true the Association has been good to some Kentuckians, especially those who have the good-fortune to be on the Association's pay-roll; but as far as the Association helping those who have, year after year, poured their hard-earned cash into its coffers, through the channels of registration fees, it has failed utterly and now, when the universal cry and imperative need calls for increased production of all classes and kinds, you, as President of the American Saddle Horse Breeders Association, fail and refuse to permit or even to encourage those who have supplied the ingredients for the American Saddle Horse Breeders Association's pie, to do their duty in this serious crisis and to prepare themselves for the after-the-war demands which will be made upon them. And by so doing, you should be branded a "slacker" in all that the word implies.

You state that fairs are intended for State exhibitions and not largely to exhibit the American Saddle Horse, and unless conducted as a State exhibition, the State should not lend its support. Have you seen the 1917 catalogue? If not, let me assure you that the 1917 Kentucky State Fair is giving over $25,000 in prizes for exhibits, other than for the American Saddle Horse, including large sums for beef cattle, dairy cattle, swine, sheep, poultry, woman's department, seeds, grains and vegetables, which includes a $1,000 prize for the best display of agricultural products grown in any one county in Kentucky during 1917. All of this was unanimously endorsed by the State Board of Agriculture, which is composed of seven progressive, loyal, patriotic gentlemen, who are alive and alert to the imperative demands of the hour, and the necessary action needed to stimulate this production. No, General, you cannot hurt the State Board of Agriculture or the Kentucky State Fair by your underhand insinuations. The State Board of Agriculture and the Kentucky State Fair are doing their mite and their "bit" in carrying out the propaganda in response to the demands made upon America by President Wilson for a greatly increased production of everything possible to increase.

Get in the game, and don't continue as a "slacker." Do your bit and you will forget that "mortification" which you alone seem to be suffering from.

General John B. Castleman,
My dear General:—

I have your communication of the 11th instant relative to the $10,000 saddle horse exhibit at the Kentucky State Fair, September 10th to the 15th, 1917, setting forth your reasons for the American Saddle Horse Breeders' Association's refusal to contribute to this magnificent exhibit, and which you admitted in conversation with me in your office, that the giving of same would add a greater stimulus to the breeding industry than it had received for many years.

You also stated I am on record favoring a proposition for requiring registration. You also refer to the event as a $10,000 exhibit for "mongrel bred horses" and further on add that no stake can have an exhibit which will induce so much interest as that secured by the exhibition of the American Saddle Horse.

To your first and third charge, I offer no denial, but, my dear General, there is a vast difference between Mat. S. Cohen voting as an individual, as a member of the American Saddle Horse Breeders Association on matters pertaining to the life and death of the Association, and Mat. S. Cohen voting as President of the Kentucky State Fair, to take money from the tax payers of Kentucky, whose support makes possible the giving of the Kentucky State Fair and use same to foster, build up and keep alive any one especial or specific organization; or, to be plainer still, use the power of my office in making the Kentucky State Fair a feeder for the American Saddle Horse Association. No, never.

As to the exhibit being one of mongrel bred horses, I deny this most emphatically and say to you that the very cream de la cream of the American Bred Saddle Horse, of which over 95% are registered in the American Saddle Horse Breeders Association, will compose this exhibit—among which will be such celebrities as My Major Dare, Kentucky's Choice, Marshall Chief, Astral King, Easter Cloud, Cascade, Nickolette, Fair Maiden, Paddy McDonald, Blanche King, Crimson Chief and perhaps Richelieu King and a host of others of renowned breeding and show horse fame, and when you label or insinuate a contest composed of such horses as an exhibit of "mongrels," it is time for the American Saddle Horse Breeders Association to liquidate and a new association be organized that will realize the necessity of doing all in its power to stimulate the breeding industry and increasing the production, which, under the existing war conditions, makes such most paramount and most imperative.

As to the charge that a successful exhibit cannot be given without the American Saddle Horse, you are exactly right, especially in Kentucky. But who is trying to give a show without them? Do you mean to say that unless the saddle horses exhibited at the Kentucky State Fair are registered in the American Saddle Horse Breeders Association, that they are not American Saddle Horses? Why, my dear General, every saddle horse bred in Kentucky, whether registered or not, is an American Saddle Horse, and you know it.

But why parley and fuss and hunt for an excuse for the American Saddle Horse Breeders Association in justification of its position and decision in this matter? The people who have bred and registered their horses for twenty years in the American Saddle Horse Breeders Association look to that Association to do its part, its mite and its duty in these trying hours, and you know, down deep in your manly heart, that in refusing this just, reasonable and deserving request, the American Saddle Horse Breeders Association refuses and fails to promote and advance the interests of an industry which virtually affects every stallion and mare owner in America, not to mention the patriotic duty we owe to those who are today fighting and who will continue to fight until success crowns their efforts for that godly cause, a world's freedom.

Yours very truly,
MAT S. COHEN,

Notes and News

Don't forget,—
Monday, August 20,
Entries close for Breeders' Meeting.
Over $15,000 in purses at Bakersfield Fair.

✤ ✤ ✤

At Petaluma, Will Durfee gave Manrico (3) 2:07½ his first 2:10 performer in the four-year-old pacer, Rico 2:07¼. The granddam of Rico is Subito, dam of White Sox, p. 2:04¼.

✤ ✤ ✤

Al Schwartz's good mare Miss San Francisco took a record of 2:11 at the Petaluma meeting. This makes another high class trotter for San Francisco 2:07¾.

✤ ✤ ✤

Spriggan met with some bad luck in the M. & M. Stake at Detroit, Mich.; he finished third in both the third and fourth heats but had no rank in the summary. The horse is steadily improving and it will not be surprising if before long he heads a good-looking summary.

✤ ✤ ✤

The Oakland Driving Club is holding matinee races regularly every Sunday at the Bay View track. These events are well attended and Secretary A. L. Hinds reports that new members are coming in every meeting, which means new horses in the game and revived interest in the light harness sport. Such reports are very encouraging and gratifying in these days of automobiles and motorcycles.

✤ ✤ ✤

Baxter Lou 2:11½ in Marvin Childs' stable will bear watching. He is coming fast and when he strikes the Great Western Circuit it will take a real high-class one to beat him. Marvin Childs has a high number in the recent army draft and will present himself for examination this week; he is more than willing to serve but it is doubtful if he will pass the physical examination.

✤ ✤ ✤

In her record breaking performance at the Woodland race meeting Esperanza actually took five new world's records over a half mile track, as follows: the fastest mile in a race; the fastest first heat; the fastest third heat; the fastest three heats in a race, and the fastest three heats in a race by a mare. She also tied Sweet Marie's record of 2:08 for the fastest second heat in a race over a half mile track.

✤ ✤ ✤

William, p. 1:58½ is fast getting into form for his first trainer, and the man who gave him his record in 1915, Billy Marvin. On a recent Friday he worked in 2:04¾, the mile being evenly rated. The great pacer is working like a machine, and within a few weeks will be ready to either give exhibitions or tackle the free-for-allers. His re-appearance on the turf will add zest to the fast paces, and will give Single G. 2:00 a rival that will test his speed and class.

✤ ✤ ✤

Over 7,000 spectators witnessed the duel between Single G. and Ben Earl at Youngstown, O., on July 12. This is said to be the largest number of paid admissions at a half-mile track race meeting in recent years. Seventy-five cents admission was charged, and the Youngstown association is convinced that people will go to the races if the right kind of attraction is offered and plenty of publicity is given.

✤ ✤ ✤

At Woodland, Cal., on July 27, White Sox, Will Durfee's little pacing mare, proved herself to be the half-mile track pacing queen of the West; she paced the three fastest consecutive miles ever stepped over a two-lap course west of the Rockies. She was clocked in 2:07¼, 2:06½ and 2:07¼, bettering the three heat achievement of Harold Cohen's Vera Hal over the Riverside half mile track in 1915. Vera Hal's time was 2:06¾, 2:07½ and 2:07½.

Not content with breaking only California and Pacific Coast racing records, Will Durfee wound up the week by claiming a world's record. It was done in the free-for-all trot with Esperanza, the mare which won all the futurity stakes in California in her three-year-old form. The records were, the fastest single heat and the best three heats ever trotted ovr a half-mile track in a race, beating a mark made in 1916 at Des Moines, Iowa. Every horseman at the track gasped when the first heat of the trot was announced in 2:07½ for they all knew that no horse had ever trotted a mile on a hafl-mile course in a race in less than 2:08. When the second heat was made in 2:08 a thrill spread over those at the track who could appreciate such a feat. Then the third heat came in the same time as the second and many were searching the records for the world's record; when it was found, they discovered that the race just completed was so far ahead of it that it was astonishing. The old record was made on August 30, 1916, by Miss Densmore, which trotted two heats in 2:08½ and 2:09¼ and los the third heat to Princess Welcome in 2:09½. Esperanza is a bay mare foaled 1911 by Carlokin; dam My Irene S. by Petigru; second dam Johanna Treat by Thomas Rysdyk.

Marvin Childs of Omaha, Neb., has sold to F. D. Woodland of Youngstown, Ohio, the pacing mare Greatness (4) 2:10¼. The mare has a trial of 2:06 and is eligible to the slow classes.

✤ ✤ ✤

Those two star mares of 1916, Lucille Spier and Wilkes Brewer, were disappointments in the M. & M. at Detroit, neither showing any of their form of last season. The former had good manners, but none of the stake-winning kind of speed, while the latter was very unsteady.

✤ ✤ ✤

Peter's Queen ,the Peter the Great mare which was shipped last spring by Geo. F. Lowery, has been sold to Stoughton Fletcher. Mr. Lowery received some money and the bay horse Laramie Lad 2:08¼ in exchange for her and afterwards sold Laramie Lad for a very satisfactory price.

✤ ✤ ✤

Reports from Ukiah say that on the opening day of the races the largest crowd that was ever seen on the Ukiah half-mile track was in attendance. This is some consolation to the promoters of the California Racing Circuit, as heretofore the attendance at the other towns has been very light, notwithstanding the fact that the racing has been of a very high class order and deserving of far better patronage than it has received up to this date.

✤ ✤ ✤

Members of the San Francisco-California Driving Club decided at their weekly meeting to postpone the matinee that was scheduled at the Park Stadium until Labor Day. The amateur drivers are anxious to rest up their charges in preparation for the big events that are coming. The biggest matinee of the season is on the card for Labor Day, September 3. An attractive program will be arranged to interest the crowd at the Stadium. The State Fair races at Sacramento on September 8 to 15 will also attract a number of local trotters and pacers.

✤ ✤ ✤

W. Horace Hoskins, dean of the New York State Veterinary College, has written a letter to Major Gerald Griffin, head of the Army Veterinary Service, suggesting that the Government go in and conscript city horses for service abroad without regard to ownership, class, breeding or anything else.

A city horse, the dean says, is as a rule seasoned and noise broke. He goes any place and don't get excited. The Government is now purchasing "green horses" from the country. They start abroad in a perishable condition and are failures. As the Government needs about 650,000 horses he thinks it would be a good idea to give a green horse in exchange for a seasoned animal and six months later get that. Of course there would always be a satisfactory "boot" for the owner.

OAKLAND DRIVING CLUB.

July 29.—First Race; mile heats.

Andy O.	(W. M. Ray)	2	1	2
J. P. C.	(J. Doran)	1	2	3
Sam	(Mr. Newbaumer)	3	3	1

Time—2:50, 2:55, 2:58.

Second Race; half-mile heats.

The Eel	(J. D. Johnstone)	2	1	1
Dolly Gray	(Joe Murphy)	1	3	2
Ester Queen	(W. E. Wyber)	3	2	3

Time—1:17, 1:16, 1:16.

Third Race; free-for-all; mile heats.

Grand W.	(A. L. Hinds)	1	1
Oakland Boy	(F. Hahn)	2	2

Time—2:25, 2:32.

Fourth Race; half-mile heats.

Shorty	(Al Hanks)*	1	1	1
Cleo Verne	(Mrs. Carlisle)	2	2	3
Firebaugh	(Edstrom)	3	3	2

Time—1:10, 1:14, 1:12.

Aug. 6.—2:35 class mixed; half-mile heats.

Willie K.	(Bangs)	1	2	1
Dolly Gray	J. Murphy)	3	1	3
Minnie H.	(B. Hanley)	2	3	2

Time—1:21, 1:16, 1:14.

2:30 class mixed; mile heats.

Oakland Boy	(F. Hahn)	1	1	2
Grand W.	(A. L. Hinds)	2	2	1
Allegro	(G. Schreiber)	3	3	3

Time—2:33, 2:30, 2:26.

2:25 pace; mile heats.

Queenie Direct	(T. L. Carey)	3	1	1
Cleo Verne	(Mrs. Carlisle)	1	3	2
Shorty	(Al Hanks)	2	2	3

Time—2:25, 2:24, 2:25.

2:35 pace; half-mile heats.

Firebaugh	(E. Stinson)	1	1	1
Just Mack	(E. Edstrom)	2	2	2

Time—1:12, 1:09, 1:11.

2:40 class mixed; mile heats.

J. P. C.	(J. Doran)	1	1	1
Strom Lovelace	(A. Svasvend)	2	2	2
Sam	(O. Newbaumer)	3	3	3
The Lemon	(Al Hanks)	4	4	4

Time—2:45, 2:47, 2:50.

Ventura will give a race meeting of three days this fall in connection with their county fair, which will be held on October 24 to 27 inclusive, immediately following Hemet. The intention is to have three days of harness racing and they have about $2,000 to be distributed in purses for two harness races each day. Mr. Thos. McCormick is President and J. W. McGlinchy Secretary of the Seaside Park Driving Club at Ventura, and Mr. McCormick will have full charge of the racing at the County Fair.

✤ ✤ ✤

That was an unique occurrence at Roanoke, Va., July 4, when three colts out of the same mare were all given records. The trio were O. K. Todd (2) 2:28½, Red Border (3) 2:23, and Border Mandy (4) 2:26, all out of Young Mandy, by Scio, son of Conductor 2:14¼. The first named is by Lord Todd 2:29½ and the other two by Border Knight 2:12¼.

ENTRIES FOR HEMET RACES.

The following list of entries closed last week. Entries for the free-for-all trot, the three-year-old pace, and the three-year-old trot will be closed on September 1:

Free-for-All Pace.

Mono Ansel, Blosser & Finley; Ben Corbett Jr., Blosser & Finley; Emmaline Dillon, A. F. Conners; White Sox, C. J. Berry; Rico, C. J. Berry; College Gent, P. J. Carson; Strathtell, P. J. Carson; Teddy Bear, C. F. Silva; Bondalin, C. F. Silva.

2:11 Pace.

Bondalin, C. F. Silva; Teddy Bear, C. F. Silva; Strathtell, P. J. Carson; College Gent, P. J. Carson; Rico, C. J. Berry; White Sox, C. J. Berry; Prince Zolock, H. H. Gardner; Lock Logan, J. E. Montgomery; Mono Ansel, Blosser & Finley; Pope Hartford, Blosser & Finley.

2:15 Pace.

John Malolm, C. F. Silva; Rico, C. J. Berry; Julia M., D. W. Wallis; Paul, H. H. Helman; Hall Logan, J. E. Montgomery; J. C. L., M. L. Woy; Directress Mack, T. J. Ryan; R. W., R. W. Earl.

2:20 Pace.

Directress Mac, T. J. Ryan; J. C. L., M. L. Woy; Hall Logan, J. E. Montgomery; Warren Dillon, H. H. Helman; Sheldon B., I. L. Borden; Villa, D. W. Wallis; Miss Rico, C. J. Berry; Oro Fino, Wm. Loftus; Becky Onward, C. W. McMillan; Caroline Custer, C. R. June; Pactolus Chief, C. R. June; Gay Tommy, J. R. Lambert; Fritz the Dutch, James Centeny.

2:14 Trot.

The Demon, E. A. Stockton; Bon Cres, J. J. Campbell; Allie Lou, Hemet Stock Farm; Pegasus, I. L. Borden; Virginia Barnette, C. J. Berry; San Felipe, C. F. Silva; Eloise Dell, C. F. Silva; The Proof, Chas. H. Spencer.

2:17 Trot.

Sweet Bow, W. J. Ivey, Agent; Don de Lopez, Hemet Stock Farm; Geo. M. Patterson, Homer Rutherford; Lulu B., M. L. Woy; Carlos, I. L. Borden.

2:20 Trot.

Sweet Bow, W. J. Ivey, Agent; The Demon, E. A. Stockton; Sadie View, Louis Sands; Miss Frisco, Al Schwartz; Miss Macklie, M. L. Woy; Zeta Lucille, F. E. Ward; The Raisin Express, C. M. Clark; Great Policy, Simas & Brolliar; Pegasus, I. L. Borden; Byron, Wm. Durfee; Manuelito, Wm. Durfee; Cadet, J. Carson.

New York, August 8.—Eddie Dugan, one of the leading jockeys in the country ten years ago, is in Bellevue Hospital suffering from an injury to his back which the doctors believe resulted from a fall at some time during his racing days.

He was admitted on July 12, and indications point to his being confined there for several weeks if not longer. He is in Ward B-2.

Eddie Dugan, a little freckled face youth, came out from his home in Oakland in 1907 and soon became the rival of Walter Miller, who at that time was at the height of his riding career. He was a natural jockey with a good pair of hands and a nice seat, and it was not long before he was recognized as one of the best in the country.

Harry Payne Whitney had first call on his services in 1908, while R. T. Wilson had second call, and the boy was ever in demand.

When racing was stopped in this country in 1910, Dugan went abroad, where he has been riding off and on ever since. He tried to "come back" in this country in the spring of 1915, but seemed to have lost his old-time skill, and received few mounts. He then went to Russia and only recently returned.

The following paragraphs were clipped from a Peoria, Ill., paper and may interest the California trainers and owners. Mr. Lowery is about the only representative that California has this year on the Grand and Great Western Circuits. At Peoria last week he and Marvin Childs had a banner week, winning first money with each of the horses mentioned in the article:

Several old-time race track men assembled at the Arion hotel last night in honor of the arrival in this city of George W. Lowery, the well known San Francisco stable owner, who is here with Spriggan, the California horse who won the $20,000 Panama-Pacific purse at San Francisco several years ago.

With this far famed racer Lowery also has the horses Ben Earl and Baxter Lou, harness nags which have achieved fame in the racing world. All three will be entered in the races now being held in this city.

The party was in the nature of a surprise for Mr. Lowery. Around the tables were friends of Mr. Lowery, some of whom he had not met for years.

H. W. Pohl, of Mendota, acted as master of ceremonies. Reminiscent tales of old times were rehearsed and speeches made by several present.

During the intervals of speech-making the Arion quartet rendered several vocal selections. Several instrumental selections were also played by members of the Moose band.

At the conclusion of the affair Mr. Lowery was escorted to the Niagara hotel by the Moose band.

Lowery is well known to Peoria sports and has a host of friends in this city. He will remain here until Saturday.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

August 10, 11, 12—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 13—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

BRIEF HISTORY OF THE G. A. H.

1900—74 entries. Held at Interstate Park, N. Y., June 14th. R. O. Heikes (22 yards) winner, 91 out of 100.

1901—75 entries. Held at Interstate Park, N. Y., June 18th. E. C. Griffith (19 yards) winner, 95 out of 100.

1902—91 entries. Held at Interstate Park, N. Y., May 8th. C. W. Floyd (18 yards) winner, 94 out of 100.

1903—192 entries. Held at Kansas City, Mo., April 16th. M. Diefenderfer (16 yards) winner, 94 out of 100.

1904—336 entries. Held at Indianapolis, Ind., June 23rd. R. D. Guptill (19 yds.) winner, 96 out of 100.

1905—352 entries. Held at Indianapolis, Ind., June 29th. R. R. Barber (16 yards) winner, 99 out of 100.

1906—290 entries. Held at Indianapolis, Ind., June 21st. F. E. Rogers (17 yards) winner, 94 out of 100.

1907—495 entries. Held at Chicago, Ill., June 20th. Jeff J. Blanks (17 yards) winner, 96 out of 100.

1908—362 entries. Held at Columbus, Ohio, June 25th. Fred. Harlow (16 yards) winner, 92 out of 100.

1909—457 entries. Held at Chicago, Ill., June 24th. Fred. Shattuck (18 yards) winner, 96 out of 100.

1910—383 entries. Held at Chicago, Ill., June 23rd. Riley Thompson (19 yards) winner, 100 out of 100.

1911—418 entries. Held at Columbus, O., June 22d. Harve Dixon (20 yards) winner, 99 out of 100.

1912—377 entries. Held at Springfield, Ill., June 20th. W. E. Phillips (19 yards) winner, 96 out of 100.

1913—501 entries. Held at Dayton, O., June 19th. M. S. Hootman (17 yards) winner, 97 out of 100.

1914—515 entries. Held at Dayton, O., September 10th. Woolfolk Henderson (22 yards) winner, 98 out of 100.

1915—884 entries. Held at Chicago, Ill., August 19th. L. B. Clarke (18 yards) winner, 96 out of 100.

1916—683 entries. Held at St. Louis, Mo., August 24th. J. F. Wulf (19 yards) winner, 99 out of 100.

THE GRAND AMERICAN.

The Grand American Handicap Trapshooting Tournament—the blue ribbon event of trapdom, and the greatest of all sporting events—will take place over the South Shore Country Club in Chicago, Ill., beginning on Monday, August 20, and concluding on Friday, August 24.

The Grand American Handicap, as it is more commonly called, is to trapshooters what the world's series is to baseball; the Davis Cup to tennis; the international matches to golf and cricket, and is an even bigger event than any of these. It has often been referred to as the trapshooters' world's series. Those who have never attended the Grand American Handicap would marvel at its magnitude.

The assertion that it is a greater event than the classic baseball world's series, the international golf and cricket matches, or the Davis Cup series, is a broad one, but it can be proven the third week in August if any one cares to do any probing.

Here is a sporting event that attracts more than 800 men and women—business men and athletic women—from every part of the United States. They are all active contestants. They defray their own expenses, pay entrance fees in all events, and have numerous other bills to meet, and enjoy the sport. The entrance money, of course, comes back to the shooters, but they all do not share in the return.

For a dozen years or so the Grand American Handicap was at live birds. Agitation in many States against live-bird shooting caused the change to clay targets, and the change has never been regretted.

INDIANS AT THE TRAPS.

First Day, July 23.

J. G. Clemson won the Indian blanket in the first day's shooting of the Pacific Indians' tournament at the Portland Gun Club traps on July 23d, after tying with F. C. Riehl, H. E. Poston and Frank Troeh in a special handicap 25-target event. Each shooter broke 24 out of 25, shooting for the blanket under the hit-and-out system. First all missed, then all hit, and Clemson repeated, while the rest failed to scatter a bird, Clemson thereby winning the blanket.

Clemson shot from a 16-yard handicap, while the rest of the shooting Indians were standing at the 21-yard mark.

H. E. Poston, L. H. Reid and Frank Troeh tied for high honors of the day at 150 targets, each dropping four and turning in a mark of 146 kills.

The scores follow:

	T'l.	Yds.	Special Hdcp. Trgt
H. E. Poston	146	21	24
W. P. Anderson	139	21	20
L. H. Reid	146	21	21
H. Fleming	136	20	18
A. Blair	136	20	18
H. R. Everding	138	20	18
J. W. Seavey	142	21	23
E. H. Keller	123	19	18
W. McCornack	120	16	19
M. Siddall	123	16	23
C. J. Schilling	132	..	..
A. R. Johnson	131	19	17
R. W. Phipps	132	19	22
J. E. Reid	136	20	17
Joe Bacher	116	16	17
P. Holohan	140	21	22
G. B. Joslin	139	20	17
Frank Troeh	146	21	24
C. E. McKelvey	139	20	21
P. P. Nelson	137	20	22
Mrs. Ada Schilling	140	21	19
Dave Bales	96	..	..
M. A. Rickard	137	20	19
R. W. Kinzer	133	19	21
J. B. Lewis	130	16	23
E. B. Morris	133	19	22
J. G. Clemson	103	16	24
D. W. Fleet	136	20	14
A. A. Riehl	133	19	19
Gladys Reid	134	20	22
Fred Landwehr	133	19	17
L. S. Barnes	111	16	21
George Miller	141	21	21
George Baker	119	16	22

Mrs. D. Bales	69	..	..
F. D. Stoop	133	19	19
F. C. Riehl	140	21	24
W. J. Derthick	121	16	18
Jeff Scott	124	..	..
Joe Martin	97	16	20
G. E. Gilmore	112	16	20
J. P. Bull	136	20	20
A. Bowker	133	19	18
L. L. Burtenshaw	116	..	..

Second Day, July 24.

A special event of 25 targets, shooters standing between two traps, and at the call of "pull" a blue-rock would fly out of either trap, was the feature of the second day's shooting on Tuesday, July 24th.

J. W. Seavey, of Portland; G. B. Joslin, of Palouse, Wash.; D. W. Fleet, of Montesano, Wash.; H. E. Poston, of San Francisco, and W. B. Taft, of Seattle, all tied for high honors in this event. W. B. Taft won the shoot-off.

A handicap event of 25 targets for prizes donated by "Tyee-et-Chum" Everding was won by Frank M. Troeh, J. W. Seavey, L. H. Reid, F. C. Riehl and R. P. Riggs. All these registered 25 shots perfect.

In the miss-and-out shoot between the ten high shooters of Monday and Tuesday, Frank M. Troeh, of Vancouver, Wash., better known as "Tyee Delate Pot," which means "the good shot," won the event, with Jeff Scott, of Wallace, Idaho, second. The prizes were two bobcat rugs. The scores:

H. E. Poston 136, William P. Anderson 137, L. H. Reid 143, Hugh Fleming 129, A. Blair 146, H. R. Everding 132, J. W. Seavey 146, E. H. Keller 134, W. McCornack 136, M. Siddall 134, C. J. Schilling 128, A. R. Johnson 131, R. W. Phipps 136, J. E. Reid 124, Joe Bacher 119, P. J. Holohan 138, G. B. Joslin 129, F. M. Troeh 145, C. E. McKelvey 140, P. P. Nelson 133, Mrs. A. Schilling 131, Dave Bales 117, M. A. Rickard 127, R. W. Kinzer 136, J. B. Lewis 129, E. B. Morris 133, J. G. Clemson 92, D. W. Fleet 129, A. A. Riehl 131, Gladys Reid 136, F. Landwehr 131, L. S. Barnes 134, W. B. Taft 121, G. Miller 140, G. B. Baker 127, F. O. Joy 103, A. Bowker 129, G. Hambright 135, C. M. Johnson 115, F. D. Stoop 137, F. C. Riehl 140, J. Bull 144, J. Scott 121, J. Martin 53, G. Gilmore 131, Mrs. D. Bales 53.

Golden Gate Club.—The Golden Gate Gun Club has issued its official scores for the members competing in the first class of their five regular shoots, which have been taking place through the months of March, April, May and June.

The program of the Golden Gate Club allows all members who have competed in these shoots, to shoot for the R. H. Everding and Charles Lindermann trophies, under a handicap meet of fifty targets. The handicap distances to extend from sixteen to twenty-three yards, first high gun to take choice of trophies and the second high the remaining.

The board of directors of the club will have charge of the event and it is scheduled to take place September 16, immediately following the regular club shoot.

Following are the score of the last five regular shoots:

CHAMPION CLASS.

A. Flickinger—					
Event 1	20	19	19	20	20—98
Event 3	10	9	9	9	10—47
Ted Handman—					
Event 1	20	19	18	20	26—97
Event 3	10	10	10	10	9—49
Toney Prior—					
Event 1	20	19	18	20	19—96
Event 3	10	10	10	..	9—39
B. Worthen—					
Event 1	18	20	16	20	18—92
Event 3	9	10	10	9	9—47
H. Stelling—					
Event 1	18	17	17	20	19—91
Event 3	6	10	10	10	10—46
H. R. Phinney—					
Event 1	19	19	18	17	18—91
Event 3	10	10	9	9	9—47
W. E. Cooley—					
Event 1	18	17	19	17	20—89
Event 3	10	10	9	9	10—48
Dr. Ed Topham—					
Event 1	15	..	18	17	19—61
Event 3	8	..	9	8	9—34

In the Challenge event Prior has 6 wins to his credit, Handman has 4, Stelling 3 and Avery, Cooley, Terry, Wilkes and Worthen each have 1.

FIRST CLASS.

George Thomas—					
Event 1	18	18	20	19	20—95
Event 3	7	10	9	9	9—44
Al Durney—					
Event 1	20	18	16	17	18—89
Event 2	10	10	10	10	10—50
W. H. Price—					
Event 1	16	18	17	17	19—87
Event 2	10	10	9	9	9—47
A. J. Williams—					
Event 1	16	19	16	18	18—87
Event 2	9	10	..	9	10—38
C. A. Merrill—					
Event 1	15	16	17	12	13—75
Event 2	7	9	9	6	8—39
Ed Garratt—					
Event 1	20	17	29	17	..—74
Event 2	9	9	9	9	..—36
Frank Webster—					
Event 1	20	19	14	..	19—72
Event 2	8	8	4	..	10—30
H. C. Golcher—					
Event 1	18	16	18	17	..—69
Event 2	8	8	9	9	..—34
E. B. Thorning—					
Event 1	15	17	12	18	..—65
Event 2	8	15	10	8	..—41
H. C. Peet—					
Event 1	..	..	18	19	15—52
Event 2	..	..	..	..	10—10

SECOND CLASS.

J. C. Brickell—					
Event 1	16	..	16	19	15—66
Event 3	8	..	9	10	7—34
Charles Lindermann—					
Event 1	17	19	19	18	19—92
Event 3	9	9	9	9	9—45
T. W. Parsons—					
Event 1	18	15	18	17	17—85
Event 3	8	8	8	7	6—37
Captain Du Bray—					
Event 1	17	..	17	16	18—68
Event 3	10	..	9	5	8—32
J. H. Jones—					
Event 1	19	17	14	15	..—65
Event 3	9	8	6	5	..—28
A. Stoneberger—					
Event 1	16	18	18	19	18—89
Event 3	9	8	10	8	10—45

THIRD CLASS.

H. A. Ray—					
Event 1	17	19	17	17	17—87
Event 3	9	10	10	9	10—48
A. M. Gearhart—					
Event 1	17	15	17	19	15—83
Event 3	7	9	7	9	6—38
L. L. Fuller—

George Vesper—					
Event 1	..	..	15	15	17—47
Event 3	..	..	5	8	10—23

In the Sierra Nevadas.—A lake which has been stocked by the Fish and Game Commission.

EXHIBITION OF TRY-GUNS AT THE GRAND AMERICAN HANDICAP.

One of the important features of the coming Grand American Handicap which will be held in Chicago next week, will be a display of try-guns.

Try-guns, while new to many shooters, are not an entirely new idea. Englishmen have had shooting schools for some time in which were to be found try-guns for fitting prospective purchasers of guns. For several years shooting salesmen of the Du Pont Company have carried them and have been giving all those who wish a chance to get properly measured.

Many have taken advantage, and thus the number of "misfit" shooters has decreased. Still others would be better shooters if they took advantage of the opportunity. The great influx of men, and even the fair sex, into the Trapshooting Army has brought guns of all sizes and styles into play. John Brown has a gun, which seems to suit him; Bill Jones likes it and buys the same kind. Such purchasing has caused the "misfits."

Star baseball players have their bats and gloves made for their individual use. This is especially true of bats. Players have their grip, manner of swing and other individualities noted or measured and the bat made accordingly. So it is with clothes; a 150-pound man couldn't wear the suit a 230-pound man could, and yet at the trapshooting club they use the same size and style of gun.

At Chicago all the Du Pont shooter salesmen will be present, including the try-gun expert, Jack Fanning. "Jack" has made a thorough study of the try-gun, and shooters visiting the G. A. H. should have a talk with him and learn just where they "fall down" in the shooting game. He or the other Du Pont salesmen will be pleased to explain the try-gun in detail and measure all shooters. Having your measurement taken does not necessarily mean that you have to buy a new gun,—it just assures you of the cause of your shooting difficulties and their remedy.

A short synopsis of how a shooter is measured with a try-gun is as follows: First, the adjustability of the try-gun as to length of stock, cast off and drop of comb and heel, is explained. After advising the breadth, height and usual shooting position of the shooter governs his measurements, the expert takes up separately the different parts of a gun that should fit the shooter. First, he measures the length of stock required by resting the butt of the gun in the bend of the arm, finding at what length the fore-finger comfortably reaches the trigger. Then the expert has the shooter take the gun in his natural shooting position. studies carefully the position of the butt and the comb; makes the necessary adjunstments until the butt finally fits the shooter's shoulder and the heel has the correct drop.

The comb is a harder proposition. The shooter's eye has to be sighted, and attention paid to the way he "cheeks the gun." The expert then adjusts the comb several times until it fits snugly to the shooter's cheek, making sure that it is impossible for the shooter to hide his sighting eye behind the breech of the gun. To note these points, he stands in front of the shooter, making proper adjustments. He also observes whether or not the stock must be cast-off; if so, he turns the stock to one side, and makes a slight alteration in the setting of the comb.

After satisfying himself that the gun is a correct fit for the shooter, the stock is locked. This completes the task and the shooter has the measurements for a gun that fits properly and enables him to shoot better at the traps or afield.

Since the opening of the deer season a little over a week ago five hunters have been arrested in districts 2 and 3 for killing "spiked bucks." In Redwood City, Monterey, Healdsburg, San Rafael and Napa County men have been taken.

TIPS IN RIFLE SHOOTING.

It is said that there are many roads to heaven and it is certainly true that there are many ways of becoming a good rifle shot.

Perhaps some of our readers will be interested in a few hints on the subject.

In rifle shooting as in any other sport, the most important qualification that any man can have is a fixed determination to succeed. No matter how steady you are or what good eyes you have, the chances are that you will never become really proficient if you go at it in a half-hearted way. Make up your mind that you are going to make progress. Try with every shot that you fire to get experience that will be valuable on the next shot.

When you take up the sport you should make it a point to join a rifle club. The members who are good shots will always be glad to help you over the rough spots and there are plenty of them. It may be that the shooting bug has crawled into your system from the pages of one of the sporting magazines. Naturally the first impulse is to go at once to the nearest dealer's store and buy a rifle, but you will find that it will pay you to join a rifle club first and buy yourself a shooting outfit only after you have had an opportunity to talk to some of the members and listened to their suggestions. This is worth while, for it may keep you from spending a lot of money on a rifle that is not suited to the branch of target work you want to take up.

After you have secured the rifle the next step is to start practice, and it is at this point that many men make a big mistake. The first flush of enthusiasm is very likely to result in too much shooting with a consequent falling off in the interest which is so important to success. This particular trouble is not peculiar to rifle shooting, for any sport can be run into the ground if followed too strenuously. Practice taken regularly and consistently without too many shots on any particular night or during any week will surely make for continuous progress.

As said above, each shot fired should teach you something, and by that is meant that you ought to study out for yourself just what error caused the bullet to miss the bull's-eye, for it is the carefully studied poor shots that give you real information. Get the habit of calling your shots before you look at the target. It is a help because it counteracts the flinching habit and forces you to center your attention on the position of the sights at the moment of discharge.

Snapping practice is also very valuable for the reason that it shows clearly whether you are pulling the trigger without jarring the weapon out of line.

O. N. Ford Wins in East.—O. N. Ford of San Jose, Cal., who is enjoying his annual trapshooting tour in the Middle West, visited Mason City, Ia., on July 10 and 11, and participated in the annual registered tournament of the Cerro Gordo Gun Club. Ford landed high average, breaking 284x300. Ford also was tied for high gun in the 50-bird special the first day, and was one of the five top men in the Red Cross event; he broke 49x50 in each race.

The first day, Ford broke 146 of the 150 registered targets. Charles Hummel of La Porte City, and Andy Huntley of Clarion, tied for second, each breaking 144.

The high score on the second day's registered program was 138x150, and Ford shared the top perch with Hummel and G. H. Anderson of Estherville. E. H. Castle of Charles City won the special 50-bird race the second day, shattering 49.

Fred Gilbert of Spirit Lake, and L. D. Russell of Des Moines, shot a draw for professional honors. Each man broke 282x300 registered targets.

Ted Handman, the boy wonder, achieved the honor of turning in the highest score in the country for the 75 jer cent proficiency medals of the A. A. T. A. during the past month. His score was 480 out of 500.

THE BROWN BEARS OF ALASKA.

Group of Immense Animals, Are Largest in Existence, Some Weighing 1500 Pounds.

The Alaskan brown bears form a group of immense animals which are not only the largest bears in existence, but the largest carnivora in the world. They are limited to the coast and islands of Alaska from the head of Norton Sound to the Sitka Islands, the largest specimens being found on Kaiiak Island, where some individuals have been killed which weighed 1,500 pounds. By some writers they are likened to the great cave bears which terrorized primitive man in the "old stone age" of Europe.

The Alaskan brown bears are, as a rule, good-natured and inoffensive, the taint of a man's footsteps or the faint odor of their enemy borne on the breeze being enough to send them scurrying away in a panic. They are, therefore, hard to get acquainted with, but when a man has suddenly surprised them, or brought them to close quarters, they willingly shake hands with him. It may be added that after the formal introduction there is usually a period of mourning in the man's family, who upon investigation find that it is no job for the undertaker.

Notwithstanding the enormous size of this bear it spends much of its time hunting small game such as mice, ground squirrels and gophers, which it digs from their burrows with great skill and rapidity. During the salmon season they live high, and feed on the fat of the land, or more properly, the fat of the waters. Then they make up for all the barren days of mice diet and grow fat and lazy.

They are classified as carnivorous, but they go in for a variety of diet, and in the summer and fall they become herbivorous. When the coarse grass and sedge appears they go down into the lowland flats and graze like cattle.

Although Alaska was occupied by the Russians for many years, and has been the property of the United States since 1867, the existence of these bears was not definitely known until 1898.

Speaking about bears recalls the fact that the polar, or great ice bear, is one of the most interesting members of the ursine family. In fact, all bears are interesting; there is something about the big lumbering creatures that always draws the crowds at the zoos, and from the time of the caveman down to the present they have represented, in the popular mind, great strength and ferocity.

As a matter of fact, the bear does not deserve this reputation, for it is a shy and inoffensive animal, never seeking a quarrel with man and fighting only in defense of itself or young.

The polar bear spends most of its life on the great ice packs of the arctic regions, and by ranging widely it finds enough food to support its huge body even in such a barren region.

It spends much of its time in the water, swimming from one ice floe to another, but it captures seals and other prey on the ice, being a slow swimmer. The moving-picture camera has developed the fact that, in swimming, the polar bear does not use its hind legs.

These animals are devoted to their young and fight viciously in their defense. When a mother bear is swimming away from danger the cub seizes her by the tail and is towed along, but when there is no danger, she cuffs it away and thus teaches it a lesson of self-reliance.

Bears Exempt.—Carl Westerfeld, executive officer of the State Fish and Game Commission, says that many people do not know that the last Legislature passed a law protecting all bear between March 1 and November 1.

As a result, complaints are being received of deer hunters who are shooting an occasional stray bear.

He is sending out warning that the penalty for this is a fine of from $10 to $100 or imprisonment of from ten to 100 days, or both.

Sportsmen's Row

Novelty Shooting Proves Difficult.—Many a veteran was completely shut out in the novelty and easy money shoot, held Sunday morning, the 5th, at the Vernon Gun Club, Los Angeles. The star gunners all took a tumble in their averages at this new style of tournament. The first 25 birds were thrown from a joker trap, the third frame was doubles and the fourth was overhead shooting, making 100 targets in all, fired at from 16 yards.

Stanton A. Bruner, the club's secretary, broke high gun, but failed to make a good enough score to take down the easy money that was up. Twenty-five dollars was up for 80 per cent of the combination of traps, $35 for 85 per cent, $50 for 90 per cent, and $100 for 100 per cent. The best Bruner could do was 70 per cent.

Guy Holohan, the Du Pont professional, broke second high with 67 per cent. The second Hoegee trophy was won by Dr. L. M. Packard, after tieing with C. H. Mohler, with 63 per cent. Mohler took the third trophy.

✤ ✤ ✤

The deer season in Southern California will not open until Stptember 1st.

✤ ✤ ✤

Buck Jumps Into Sea.—From Jenner, Sonoma county, comes the story of a buck which, being pursued by hunters, reached the rocky shore line and sprang from the cliffs into the sea, making for a rock near shore. Farley Abshire and Charles Black killed the animal and skinned it, and then invited a big crowd of the campers at Jenner to a venison feast.

✤ ✤ ✤

Important Events During August.—The blue ribbon event of sportdom—the Grand American Trapshooting Tournament—takes place during August.

It is one of the 66 tournaments registered by the Interstate Association for the Encouragement of Trapshooting to take place during "dog days." These 66 tournaments are listed in 22 States and Canada. Registered tournaments in no way tell of the number of trap events that are held in the country. The registered events are the ones in which the Interstate Association gives aid.

The Grand American and the two Canadian tournaments are the biggest of the month. The Grand American takes place at the South Shore Country Club, Chicago, Ill., during the week beginning August 20. The following week the Canadian National Exhibition will stage its second five-day shoot at Toronto, and on the 13th, 14th, 15th and 16th of the month the Dominion Game and Trapshooting Association will stage its annual shoot fest at Sandwich, Ont.

✤ ✤ ✤

A Record Swordfish.—It took W. C. Boschen of New York City two hours and thirty-five minutes to land a record broadbill swordfish weighing 463 lbs., while fishing in the Santa Catalina waters on the 5th inst. The previous record for a swordfish of this description was 422 pounds, caught several seasons ago off Catalina by A. C. Parsons of San Francisco.

Last week C. P. Halstead fought a swordfish for five hours and ten minutes, but was finally compelled to cut the line. Many of the big fish enthusiasts are coming to Catalina waters as a result of the excellent fishing there for swordfish,—from the other side of the continent A. W. Hooper of Boston, Zane Grey and W. C. Boschen of New York,—all noted fishermen.

✤ ✤ ✤

Deputy Harry Becker and Senator Rigdon were busy saving stranded trout in San Luis Obispo creeks last month. They believe they saved only 2½ per cent with their specially constructed net, though they rescued at least a quarter of a million stranded fish, which will give an idea of the number that perished. It is such conditions that give the Game Commissioners' hatcheries work night and day to maintain an attractive supply of fish for the annually increasing army of anglers, of whom there are nearly 27,000 already registered this season.

✤ ✤ ✤

The annual fall run off San Francisco harbor has been in progress for the last three weeks, and fishing is particularly good off shore just at the present time. Al Wilson took about 30 fish last Sunday and a number of other boats brought in catches ranging from a few fish up to 30 and 40. While the fish are plentiful this year, they are running unusually small in size, an 18 or 20-pounder being considered a big one. Good fishing for salmon in Raccoon Straits and as far up as Red Rock may be expected within a week or two. Fish caught inside are on their way to the spawning grounds and usually run larger than those taken outside the bay.

✤ ✤ ✤

Of the shipment of 100,000 brook trout eggs sent to the Japanese Government for the lakes and rivers of Chosen, 608 eggs died in transit; the remainder began to hatch two or three days after their receipt, and the young fish are doing well.

WHERE TO GO FISHING.

Fishing is at its height in nearly all of the Sierra Nevada resorts. Reports of conditions have been received from the following places:

Gilroy—Local anglers are getting good fishing in the streams of this region; while the catches are not big many fish are being caught.

Capitola—Salmon fishing very poor in Monterey bay during the past week.

San Luis Obispo—Bass, steelhead, and rainbow trout fishing in this locality continues to be good.

Kearsarge—Owens Valley, both stream and lake fishing excellent; fishermen are welcome and arrangements for camping and packhorses can easily be arranged. Salmon eggs and worms best bait on creeks, and spinners and flies best on lakes.

Springville—Limit catches are the regular thing on Big Kern river and its branches. Deer are also very plentiful.

Hot Springs, Tulare County—Fishing in creeks not very good owing to low water, but good fishing is to be had in the Kern river. Deer are very numerous in this section.

Huntington Lake—Salmon eggs, grub worms, and flies are all bringing limit catches.

Bass Lake, Madera County—Not much fishing here yet this season; fishing is good both for bass and large rainbow.

Chinese—Fishing in this neighborhood is fair, but farther up and at Hetch Hetchy fishing is excellent.

Angels—No trouble to catch the limit on the Stanislaus, plain coachman and gray hackle doing the work.

Blue Canyon—Weather ideal, fishing poor.

Emigrant Gap—Trout fishing now at its best; limits are taken without any trouble. Fishing best in Yuba river, also good fishing in North Fork of the American river.

Cisco—Weather perfect, good fishing in both lakes and rivers.

Soda Springs—Fishing continues good with fly, grub, and worms in both lakes and in Yuba river.

Truckee—Weather cold, water low, fishing not at its best.

Donner Lake—Fishing not very good.

Emerald Bay—Large size native trout and limits of brook trout are being taken.

Lake Independence—Stream fishing good, limits of fish all over 14 inches have been caught during the past week.

Boca—Weather ideal, water normal, fishing good but fish are small.

Floriston—River clear and fishing excellent; one-pound rainbows are very numerous.

Verdi, Nev.—Fishing very poor.

Lower Truckee River and Pyramid Lake—Fishing in Truckee is improving, big fish being caught in Pyramid Lake.

Westwood—Good fishing in Big Lake, stream fishing not very good.

Willows—Good fishing at government dam.

Redding—Fishing not very good; deer prospects good; very few doves.

Sims—Fishing not as good as formerly but fairly good fishing may still be had.

Sisson—Weather clear and warm; good catches are being made in all streams.

Klamath Falls—Fishing good in lake and streams; fish are taking fly and spinner in good shape. Trolling on Upper Klamath and Four Mile Lake is the best for many years.

Lake Tahoe—The two-mile restricted district on the streams entering into Lake Tahoe was opened for fishing August 1. The reports from those who have already tried the new fishing reserves indicate that there will be two months or more of good sport. Lake fishing has also been exceptionally good the last week. Many large catches have been made by novices.

THE DEL MONTE SHOOT.

At the Del Monte Tournament on the 10th, 11th and 12th there were thirty-eight contestants. Everybody had a good time, not only the shooters, but the spectators as well. It was in every respect a meeting of congenial spirits and enthusiastic trapshooters.

The following is the score of the high guns:—

PROFESSIONALS

	Shot at.	Broke
H. E. Poston, San Francisco	600	565
L. S. Hawxhurst, San Francisco	600	552
C. H. Knight, San Francisco	600	548
W. R. Ellis, San Francisco	600	531
W. A. Joslyn, San Francisco	600	530
C. A. Haight, San Francisco	600	525
W. J. Terry, San Francisco	400	357
W. F. Willett, San Francisco	500	466

AMATEURS

H. Lorenson, Newman	600	569
O. N. Ford, San Jose	600	564
G. H. Anderson, San Jose	600	552
Wm. Varien, Pacific Grove	600	551

INTERSTATE ASSOCIATION TROPHIES

J. B. Brady, Oakland	100	91
Geo. Anderson, San Jose	100	88
H. Everding, Portland	100	86
F. K. Burnham, Martinez	100	84

A quarter of a million trout from Sisson hatchery were received in Redding, Cal., a few days ago and were planted in the streams of Shasta county by local fishing enthusiasts. The streams stocked were Boulder Creek, Brandy Creek, Crystal Creek, Clear Creek, Kosk Creek, Nelson Creek, Hatchet Creek, Montgomery Creek, Cow Creek, South Cow Creek, Old Crow Creek, Clendenen Creek, Clover Creek and Bear Creek.

✤ ✤ ✤

Ten thousand rainbow trout, some of them seven inches long, were recently deposited in the Truckee River, near Reno, by the Nevada Fish Commission. The fish were brought from the Verdi hatchery in fifteen big cans and were all over one year old. None of them was less than three inches long. The planting of the fish was supervised by James Vogt, superintendent of the hatchery, assisted by James P. O'Brien, fish commissioner. This consignment was the first of 100,000 fish that will be planted in the Trukee between Reno and Verdi. Several hundred thousand more will be placed in other streams through the state during the summer.

FORTUNES LEFT TO DOGS.

Unless his death occurred recently, the richest dog in the world is said to be Billy, which belongs to an American mining magnate. Billy is a big dog, and on one occasion he was piloting his master and his mate to their cabin in the mountains, when the latter was so sure that a certain turning was the right one that he left Billy and his master to go their own way and he took his, giving the dog a parting kick to show his contempt for his intelligence, according to London Tit-Bits. But the dog was right and presently conducted his master to the cabin, and then, in spite of the kick, set out to find the other man. He found him utterly lost and at his last gasp almost, and led him back. So grateful was he that he presented the dog, after he had "struck it rich," with a gold-studded collar, and opening a banking account in his name, which will only be distributed to give him a fitting funeral.

By the will of a Russian princess who died last year £5,000 was left to her toy terrier, Gypsy. Either from grief or the burden of wealth, the dog died six months after his mistress, and as he could not contrive to live at the rate of $25,000 per annum most of the money was intact and the judges were occupied in finding the next of kin, which to all appearance, seemed to be a certain puppy.

A lady who recently died left £300 each to her coachman and his wife, and the former was also left her horses, dogs, parrots, and other animals, together with £5 a week as long as any of the animals may be living and he shall humanely feed, maintain and care for them.

There was a great case in Salzburg just before the war, when the relatives of Mme. Czabo contested the legality of her will, which left £12,000, together with her house, horses and carriages, to her pet lap dog, a little Brussels Griffon. It was stipulated that the establishment should be maintained just as if she were alive. Seeing that during her lifetime the Hungarian lady had had a special room filled with sofas and cushions for her pampered pet, a room into which nobody might intrude, and that she herself daily fed the little brute on the most expensive luxuries and took him out for drives, and that he also wore a gold collar and drank out of silver vessels, this task was no small one, and the relatives kicked, as well they might.

A Venetian also left 60,000 florins for the maintenance of his three dogs.

"Good Dog."—The following very interesting story was told of a sheep dog of Armadillo county, Arizona, during the hearing on the bill in the New York State Legislature, which would require all dogs to be licensed, and allow any one to shoot an unlicensed animal.

Jim was left alone in charge of a flock of 2,000 Arizona sheep while his master was driven off by a band of raiders. When the master got back Jim had not only protected the 2,000 sheep, but by herding into the flock every stray one he found had increased the number to 6,000.

Indians Elect Officers.—The tenth annual meeting of the Pacific Indians was held July 23 at the Imperial Hotel, Portland. By unanimous vote F. C. Riehl was made secretary-custodian. Mr. Riehl has been secretary of the Indians for twenty years, part of that time being passed in the East.

The eleventh annual shoot will be held at Crescent Lake, Wash. This will bring the Indians out among the tall and uncut timber of the Olympia Forest Reserve, where they expect to pass a real vacation, and, true to their name, keep away from the bright lights of the city.

Frank D. Stoop, of Kalispell, Mont.; J. G. Clemson of Portland; George B. Baker and J. B. Lewis, of Seattle; W. P. Anderson of Bellingham, Wash., and Jeff Scott, of Wallace, Idaho, were made members of the Indians. The officers for the coming year were unanimously re-elected, as follows:

Tyee sachem, E. H. Keller; klone tyee sachem, M. A. Rickard; herald-custodian, F. C. Riehl.

Tournament committee: C. E. McKelvey, for Washington; A. W. Strowger, for Oregon; A. G. Adelmann, for Idaho; H. E. Poston, for California.

The Clase of a Perfect Day in Humboldt County.

FOREST FIRES QUICKLY DISCOVERED.

San Francisco, July 28.—The comparatively little damage done by the hundred fires that have occurred so far this season on the National Forests in California is due largely to the fast work in discovering and reporting them by the lookout men, according to Forest officers. The National Forests are constantly under the eyes of trained watchers stationed on high peaks during the fire season. There are 85 lookouts in the National Forests in this State. Their work demands ability to concentrate, keen eyesight, quick judgment. No lookout man is considered efficient who does not discover, locate, and size up a fire within three minutes from the time the smoke first appears above the tree tops. Two minutes more are allowed him to get the dispatcher on the telephone and deliver his report. The standard of the Forest Service demands that the dispatcher in turn shall not be longer than two minutes in communicating with the ranger nearest the fire, delivering instructions, and starting the fire suppression force in motion.

This takes much practice on the part of the lookout man particularly, and in order to keep him up to the mark and to test out his speed and accuracy, Forest inspectors occasionally set false fires or smudges. The lookout's job is said to be one of the loneliest in the world, and is comparable to that of the lighthouse keeper on a rockbound coast, with this difference: the lookout man is under a strain 16 or 18 hours a day watching for fires. He is hired for the summer months only, and is usually a homesteader, miner, or prospector during the rest of the year.

The lookout houses are built on peaks from 6,000 to 10,000 feet high, usually miles from the nearest human habitation. They are often exposed to the full force of the winds and storms. Several houses have been struck by lightning during recent years, although they are studded with lightning rods. When Mt. Lassen first broke into eruption a few years ago, the lookout house on the rim of the crater was smashed into kindling wood.

The house is seldom more than a one-room square box, its sides largely of glass and its furnishings so arranged that even while cooking and eating the occupant is able to keep his eyes on the forest. Supplies are packed in to the lookout weekly by the Forest rangers. Water and wood he must obtain for himself, and at night. Watch is not kept for fires during the hours of darkness. The lookout's means of communication are the telephone and heliograph, and travelers through the forest, attracted by mirror-like flashes of light on some high peak, may be observing a lookout man reporting fire by "sun talk" or receiving the latest gossip of camp and range.

The discovery of fire by stationary lookouts is a comparatively recent development in the National Forests. Before this method was used, it often happened that fires burned for days before discovery. It is now seldom that a fire is not discovered within a few minutes after its origin. Further developments in the fire discovery and suppression system of the Forest Service are expected. The wireless telegraph has been installed in one Forest in the Southwest, and a lookout man circling above the Forest in an aeroplane, it is said, was used to great advantage last summer in the East. At the conclusion of the war, with thousands of trained aviators and machines available, it is expected that the aeroplane method of fire detection may become common in the National Forests of California.

The secretary of the Dog Owners' Defense League in England estimates the value of the dogs at present in Great Britain at £37,000,000 (about $185,000,000).

San Jose Gun Club Shoot.—Quite a crowd of enthusiastic marksmen attended the regular shoot of the San Jose Rifle and Pistol Club at their range near Alum Rock, on Sunday, the 5th. Bodenschatz was high gun of the day with a fine score of 448.

Medal winners—First, Bodenschatz, 225, 223; second, Carroll, 219, 210; third, Gilbert, 203, 201; fourth, Campbell, 193, 192; fifth, Murray, 185, 170; sixth, Bull, 168, 162. Several others did not finish.

First round of pistol scores by members of the club: Bodenschatz, 82, 78, 76, 72; Carroll, 79, 77, 75, 72; Gilbert, 74, 73, 70, 69; Murray, 71, 65, 60, 54. To be finished next meeting, August 19.

A number of marksmen not members of the club accepted the invitation for all marksmen to try their skill on the range. Many excellent rifle and pistol shots were made by the visitors, for whom in the future there will be a regular match arranged.

ENTRIES GRAND AMERICAN HANDICAP.

E. Reed Shaner, Secretary of the Interstate Association, writes that there has been a grand total of 995 entries received up to August 6th, the date of his letter. As entries received in envelopes bearing postmarks of August 4th will be eligible and entries are being made from all over the United States, it is likely that many more entries will be received to swell the list.

Large Buck Killed in San Rafael.

While hunters strolled miles away from San Rafael to secure the fleet deer, it remained for Herman Schmit of San Rafael to kill a deer not ten minutes' walk from the County Court House. He strolled up back of the Hitchcock Military Academy and in half an hour returned to him home with a splendid buck. In fact, it was the largest deer killed on the opening day.

Trapshooters are still contributing to the A. A. T. A. fund to purchase a complete ambulance unit for the United States. So far $5,191 has been raised. Much more is needed and it behooves the sportsmen to get busy and help the good cause along. Clubs that have not staged Red Cross events should get busy right away and those that can afford should make donations. Trapshooters do not want to fall down in showing that they are patriotic and wanh to do their "bit."

Trade Notes.

G. T. Meloy, was high gun at the La Crosse Gun Club on July 15th. He broke 147 out of 150 clays, shooting at the "Perfect Combination" of a Remington Pump Gun and Nitro Club "Speed Shells."

The Sleepy Eye Rod and Gun Club had a good turnout at their shoot on July 22. Dr. F. H. Allen was high amateur with 149x150. He shot Nitro Club "Speed Shells."

At the Burnham Gun Club on July 19th Ed. Hellyer Jr. was high gun. He broke 149 out of 150 with Arrow Shells.

The Geneva Rod and Gun Slub had a good turnout on July 12th, when 50 followers of the clay saucer faced the traps. A. C. Skutt was high gun with 146x150. He shot the "Perfect Combination," a Remington Pump Gun and Nitro Club "Speed Shells."

Forty-five shooters faced the traps at the Bradford Gun Club, on July 19th. Max Kneussl, shooting Nitro Club "Speed Shells," was high gun with a score of 145x150.

Missing but three of his quota of 150 clays, Al Koyen won high amateur average at the Bedford Gun Club on July 20th. He used Nitro Club "Speed Shells."

The Red Cross tournament of the Pastime Gun Club, held on July 15th, brought forth a good turnout of trapshooters. J. W. Hartwick was high gun with 94x100. He shot the "Perfect Combination," a Remington Pump Gun and Nitro Club "Speed Shells."

J. F. Fisher was high amateur at the Goldfield Gun Club on July 17. He broke 145 out of 150 clays with Nitro Club "Speed Shells."

Shooting the "Perfect Combination," Wm. Shean broke 192 out of 200 rocks at the Anamosa Gun Club on July 23rd. He was high gun for the day.

There has been organized in Los Angeles a branch of the American Red Star Animal Relief Society. Its purpases are to raise funds to care for wounded horses and dogs, after they have "dont their bit" on the fields of battle. Also to provide inspectors and veterinary units whose duty will be along the lines of the Red Cross corps, except that the animals will be the recipients of relief instead of humans.

✤ ✤ ✤

It is very likely that the San Mateo Kennel Club will hold its annual dog show September 9 in San Mateo. Walter W. Stettheimer, president of the club, is dickering in the East for a judge that is capable of passing on all breeds and at the same time will meet with the popular approval of the fancy.

✤ ✤ ✤

The Oakland Kennel Club will hold a dog show this fall, and President P. N. Hanrahan of the club will announce the date immediately after the dates of the San Mateo show are known.

Hon. Dave T. Matlock, of Winchester, Ky., has purchased Lord Highland from Horace Gay.

DO YOU FEED SCRUB STOCK?

Along with the high prices farmers are now realizing for their livestock comes the high priced feed necessary to make the stock ready for market. The greater cost of maintenance of breeding animals and the fattening of market animals must be followed by a satisfactory return on the market, else the breeder and feeder must cease to produce and feed. Returns that completely over-balance the cost of production in fattening are not to be had from inferior animals. No manufacturer would attempt to make an inferior, low grade product from high priced raw materials in this time of expensive labor and working equipment. Regardless of this fact, the farmer, who in truth is one of the world's greatest manufacturers, sometimes overlooks this particular point and feeds scrub animals on high priced feed. This kind of practice is gradually eliminating a certain type of livestock farmer, thus giving the better class of breeders and feeders an opportunity for greater returns from the better class of livestock they produce.

In spite of the outstanding advantages to be observed in the production of livestock of well established classes and types, there are on the market today more "misfits" and inferior grades than animals of superior market qualifications, and it is impossible to estimate the loss to the producer due to this condition. The parent stock used on farms is responsible for this state of affairs.

The need of the markets can be met only by a general improvement within the herds and flocks on general livestock farms.

This improvement may be brought about, according to S. T. Simpson of the University of Missouri College of Agriculture, by the use of the purebred sire and the careful culling of breeding herds and flocks. Ample proof of the efficiency of these methods may be had by close observation of practices followed by the most progressive and financially successful livestock men.

OPEN MARKET PURCHASE AUTHORIZED OF ANIMALS NEEDED BY GOVERNMENT.

The Quartermaster General of the Army authorizes the following:

The Secretary of War has approved of the purchase in the open market of the future specification animals needed by the Government for war purposes.

1. Any responsible dealer, breeder, or farmer who is capable of supplying the Government with one or more carloads of animals at a sanitary place, suitable for feeding, inspecting, branding, and loading them on cars, is invited to furnish the following information to the purchasing officers in the remount zone in which he is located or proposes to supply animals:

(a) The number of mature specification animals of each of the following classes that he can supply: Cavalry and riding horses, light artillery horses, heavy artillery horses for siege batteries, wheel mules, lead mules, and pack mules.

(b) The price per animal at which he will enter into an agreement to supply animals of each class to the Government if called upon to do so.

(c) The places where he proposes to offer animals for inspection by Army purchasing boards.

2. Full particulars as to the specifications of animals, method of inspection, and requirements of inspection plants will be furnished on application to the purchasing officer of any one of the zones.

4. No agreement to furnish animals will be made with any dealer unless he is considered capable of supplying all the animals he offers to supply, without sub-letting or calling upon other agencies to assist him.

5. At least one purchasing board in each zone will be reserved for the inspection of animals offered by farmers and breeders in not less than carload lots.

6. A bond of 5 per cent of the total consideration will be required as part of the agreement on any order for more than a hundred animals. At the end of each day's business a voucher for the purchase price of all the animals bought that day will be furnished the seller. The total value of this voucher will be paid on presentation to the purchasing offier of the remount zone in which the animals are delivered.

7. Under agreements to furnish 100 animals or less no bond will be required, but 5 per cent of the purchase price will be deducted from the amount of the voucher for each day's business and will not be paid until all the animals are delivered.

BERKSHIRES MAKE NOTABLE SALES.

Two memorable sales of Berkshire swine were conducted in California the first week of this month: the Carruthers Farms' sale at Mayfield, August 1, and the Humphrey sale at Escalon, on August 2. Both sales were conducted under the auspices of L. E. Frost, of Chicago, who has done much for the progress of the breed on the Pacific Coast. The first day's sale averaged $177; the second day's sale, at Escalon, $85. The sales, I should say, were the most notable ever conducted anywhere, for the attendance was very small. When the writer arrived at the Carruthers sale ring there were only a hatful of people; but after the sale was started I realized, as did every one else present, that those who were present were there to secure some of the offering.

The sales were snappy, clean and above-board, and the offerings positively the best that will be sold this year.

Not only were prominent breeders of the coast interested in the offerings, but many prominent business men of the bay cities and of the state, who recently have gone into farming, and many farmers were soon recognized as bidders.

Chas. Talmadge, of Newport, Washington, owner of one of the most noted herds of swine on the coast, was one of the best buyers, in that he not only bought several, including the top of the Carruthers offering, at $1,175, but he was a hanger-on for the majority of the offerings. Mr. Talmadge got in Mayfield Champion, the top of the sale, one of the best boars ever sold in the United States. He will put him at the head of a show string which he will send to the Middle West fairs, winding up at the National Swine Show, where he expects to win the Berkshire championship with this recent purchase.

Frank Brush, banker and farmer-stockman, of Santa Rosa, was the last man to bid against Mr. Talmadge on the boar. He also got the top sow, Rockwood Lady 9th, for $585, after an amusing bidding contest with A. W. Foster, Dean Curtiss, Frank Talmadge and Murphy Bros., of Perkins.

Carruthers' Sales.

The names of the animals, the buyers and the prices paid at the Carruthers sale were as follows:

C. M. Talmadge, Newpart, Wash.—Mayfield Champion 223, 391, boar, $1,175.

Dean C. F. Curtiss, Ames, Iowa—Mayfield Rival 24th, 238, 183, boar, $150; Mayfield Lady 16th, 238, 168, sow, $75; Forest Grove Lady 4th, 238, 189, sow, $95.

Frank Brush, Santa Rosa—Rookwood Lady 100th, 210, 163, sow, $585; Mayfield Lady 10th, 238, 162, sow, $310.

Frank R. Steel, Grants Pass, Ore.—Rookwood Lady 89th, 207, 893, sow, $80; Forest Grove Baroness, 2nd, 206, 901, sow, $95.

Harry Murphy, Perkins—Rookwood Lady 83rd, 207, 887, sow, $105; Mayfield Laurel 10th and 11th, 238, 170 and 288, 171, sows, $105 for first and $125 for second; Mayfield Laurel 15th, 228, 172, sow, $205.

Charles Turner, San Jose—Rookwood Lady 79th, 207, 884, sow, $140; Penrith Belle 2nd, 183, 474, sow, $115; Mayfield Duchess 3rd, 238, 153, sow, $265; Forest Grove Frances 4th, 238, 188, sow, $85.

A. W. Foster, San Francisco and Hopland—Silberfa Duchess 17th, 212, 127, sow, $200.

John M. Ratto, San Francisco—Winona Masterpiece 7th, 209, 248, $105; Forest Grove Nellie 2nd, 238, 196, sow, $70.

A. B. Humphrey, Escalon—Mayfield Rival Lady, 238, 178, sow, $200.

V. A. Scheller, San Jose—Mayfield Baroness, 238, 158, sow, $110; Mayfield Duchess 4th, 238, 154, sow, $55; Mayfield Laurel 16th, 238, 173, sow, $100.

F. N. Woods, Jr., Menlo Park—Mayfield Baroness 2nd, 238, 159, sow, $80.

Merrill & Son, Morgan Hill—Mayfield Nellie 3rd, 238, 174, sow, $90.

W. H. Saylor, San Francisco and Nicolaus—Mayfield Duchess 5th, 238, 155, sow, $105.

Humphrey's Sales.

The names of the animals, the buyers and the prices paid at the Humphrey sale were as follows:

Napa State Hospital, represented by Manager Owen Duffy—A Fashion Longfellow boar not in the catalog, $75; Duke's Victor Belle 7th, 199, 682, sow, $80; Leader's Champion Belle, 230, 290, sow.

E. L. Thompson, Tipton, represented by Professor Gordon H. True of the University Farm, Davis.—Sunny Brook Maid 9th, 218, 413, sow, $150.

Homer Hewins, Calistoga—Escalon Artful Belle 4th, 237, 941, sow, $200; Leader's Artful Belle, 237, 968, sow, $90.

Joe Levy of Manteca—Escalon May, 1st and 3rd, 237, 992 and 237, 994, sows, $100 each; Escalon Premier Belle, 237, 926, sow, $100; Leader's Jennette 2nd, 237, 917, sow, $165; Escalon Rose, 2nd, 238, 284, sow, $40; young daughter of Grand Leader not in catalog, $75.

George A. Stingle, San Gabriel—Escalon Topsy, 237, 976, sow, $75; Pilot Queen, 238, 284, $60.

T. J. Meckfessel, Hanford—Belle Linden 2nd and 3rd, 237, 950 and 237, 951, each, $50; Fashion's Lassie 2nd, 237, 978, sow, $60; Escalon Blossom, 237, 938, sow, $65; Fashion Model 2nd, 237, 937, sow, $35.

Lem Cole, Oakdale—Escalon Dolly, 237, 990, sow, $50.

Frank Steel, Grants Pass, Ore.—Fashion Model, 237, 936, sow, $45; Fashion Star Princess 2nd, 288, sow, $45.

Frank Brush, Santa Rosa—Leader's Artful Belle 3rd, 237, 969, sow, $150.

C. M. Talmadge, Newport, Wash.—Litter sister to Leader's Artful Belle 3rd, $105; sow by Solano Emblem, bred to Fashion Longfellow 27th, $70; Escalon Missie, 238, 291, sow, $75.

A. E. Green, Courtland—Uncatalogued sow by Grand Leader, $75.

W. M. Carruthers, Mayfield—Escalon Bernice 1st and 2nd, 238, 288 and 238, 289, sows, $100 each.

It is sincerely hoped that every one of the California horses entered, will be shown in the $10,000 five-gaited World's Championship Stake, at Louisville, this autumn. The horses are in this class and if shown at Louisville will demonstrate that California has the goods to back up her claims.

THIRTY-SEVEN SACKS BARLEY TO ACRE.

Thirty-seven sacks of barley to the acre—such was this year's average yield of barley at the University of California Farm at Davis, as compared with fifteen sacks to the acre, the average in 1908. The increase is due to summer fallowing, rotation, good seed, and early seeding.

An enormous increase in the production of food in California would come about if the farmers of the State would take advantage of fthe improved grain-growing methods demonstrated by the University at the University Farm. To further this, special demonstrations will be given on ways of increasing grain yields, in the Farmers' Short Courses at the University Farm from September 24 to November 2.

One piece of land at the University Farm this year produced over sacks of barley to the acre—4,871 pounds to the acre. This piece of land had been continuously pastured or grain-farmed ever since it was first plowed. Last year it was summer-fallowed and kept cultivated to conserve the moisture, and seeded about December 15.

Sacramento, Cal.—Dairy products exhibits at this year's California State Fair, which promise to be even more comprehensive and instructive of improved methods than last year's excellent display, are given additional attention in a supplementary premium list just issued by the State Board of Agriculture.

In the supplementary list, T. H. Ramsay, director in charge of the dairy products department, places the guaranteed milk and cream class in three divisions instead of one, and offers extra premiums of cash and gold and silver medals in the added divisions.

As now arranged, premiums will be awarded on exhibits of raw and pasteurized products separately, on dealers' exhibits—five bottles each from five or more regular patrons of a dealer—and on exhibits of bottled milk, regardless of class, coming from dairies or dealers in the territory of one inspection department.

BLACKHAWK RANCH AT STATE FAIR.

Thirty-two head of prize winning English Shires, stallions, mares and foals, will be shown at the California State Fair's horse show this year by the Blackhawk Ranch of Diablo, California.

Twenty-two horses that took first prizes at last year's fair and three that were awarded championships are included in the entries.

The Blackhawk Ranch's exhibit at the Panama-Pacific International Exposition was awarded the gold medal and many of the same horses are in the State Fair exhibit. Three of these are: Anwick Arthur, who with his get won the premier championship at the P.-P. I. E. show, the highest honor that can be won in the show ring; Flawford Dairy III, sweepstakes mare over all breeds at the P.-P. I. E.; and Hawton Bounce, junior champion and reserve grand champion mare at the P.-P. I. E.

The horses will arrive in Sacramento in about two weeks, as soon as E. Lovell, manager of the ranch, has completed the elaborate decorations which are always a part of the Blackhawk Ranch's exhibits.

IN THE SAN JOAQUIN VALLEY, CALIFORNIA.

Every part of the Union is doing its best this year to increase production because of the world war, and when the returns are in, it will be found that the "bit" of the San Joaquin Valley of California in this respect has been done to the satisfaction of those who pass judgment upon the efforts of the several states to furnish supplies in order that Democracy may survive.

The empire known as the San Joaquin Valley of California, will do more than its share in feeding the world this year, for the very good reason that it can grow the foodstuff for that purpose.

The San Joaquin Valley contains 16,362 square miles, or 10,626,560 acres of land. It is 260 miles long and on an average more than 60 miles wide. It is larger than Massachusetts, Connecticut, Delaware and Rhode Island combined.

It is the largest geographical division of California. It contains the largest area of tillable land, the greatest number of farms, the largest tract of uniformly level land, and the largest area of irrigated land in California, and produces, commercially, a greater variety of crops than any equal area in America.

The counties of Calaveras, Fresno, Kings, Madera, Mariposa, Merced, San Joaquin and Stanislaus, are members of the San Joaquin Valley Counties' Association, and taken collectively are here considered as the San Joaquin Valley.

More than half of this land in the Valley, 5,153,169 acres to be exact, is in farms; 580,143 acres additional is public land unappropriated. The remainder of the Valley is largely mountain country, in which are to be found many of the natural wonders of the world, in which, in fact, two of the three national parks of California are located.

There are 17,446 farms in the San Joaquin Valley. The popular size for farms is from twenty to fifty acres.

The San Joaquin Valley leads the state in irrigation. More than one-third of the irrigated land of California is in the Valley; 929,447 acres actually irrigated, water being used on 11,584 farms. Facilities are already provided for the irrigation of 1,372,324 acres additional, while 1,827,378 acres more are capable of irrigation in new projects.

In the San Joaquin Valley $12,722,213 has been expended on irrigation projects, an average of less than $14 per acre for the land now actually irrigated. There are 1,914 miles of main irrigation ditches and 2,656 miles of laterals. There are also 113 flowing wells and 2,616 pumping plants providing water for irrigation.

The San Joaquin Valley produces, commercially, a greater variety of fruits than any other section of the United States or probably of the world.

Three-fourths of the figs produced in the United States are grown in the San Joaquin Valley.

Over 70 per cent, nearly three-fourths, of the raisins, or 120,000,000 pounds, grown in the United States, come from the San Joaquin Valley.

It produces more figs than any country in the world except Turkey, and more raisins than any country except Greece.

One-half of the grapes of California are grown in the San Joaquin Valley and nearly one-half of the peaches.

In the table below is shown the production in pounds of tropical fruits, nuts and grapes in the San Joaquin Valley:

Grapes	932,097,978 pounds
Figs	17,708,834 "
Olives	1,433,222 "
Almonds	910,482 "
English walnuts	62,983 "

In citrus fruits the production is given in boxes:

Oranges	160,058 boxes
Lemons	10,723 "

The San Joaquin Valley produces annually 5,165,950 bushels of orcard fruihts, as shown in the following table:

Peaches and nectaries	3,970,722 bushels
Apricots	490,610 "
Plums and prunes	519,527 "
Apples	120,942 "
Pears	41,129 "

There are more than 5,500,000 bearing fruit trees and more than 6,350,000 bearing grape vines in the San Joaquin Valley.

The San Joaquin Valley produces 38 per cent of the barley, 39 per cent of the oats, 21 per cent of the wheat, 59 per cent of the rye, 16 per cent of the corn, 32 per cent of the kafir-corn and milo-maize, 11 per cent of the dry beans, 27 per cent of the dry peas, 22 per cent of the hay and forage, 33 per cent of the potatoes, 75 per cent of the sweet potatoes, and 14 per cent of the vegetables of California.

The importance of the San Joaquin Valley in the production of cereal and vegetable foods is shown below:

Wheat	1,296,251 bushels
Oats	1,626,029 "
Rye	41,693 "
Barley	8,956,920 "
Corn	207,673 "
Kafir-corn and milo-maize	296,411 "
Dry beans	364,102 "
Dry peas	15,488 "

The San Joaquin Valley is the leading dairy section of California, producing 20,639,804 pounds of butter, or 37 per cent of the total production of California. It also produces 688,776 pounds of cheese.

The annual egg production of the San Joaquin Valley is 4,272,803 dozen. It also produces 1,250,887 pounds of honey and 18,902 pounds of bees wax.

In its production of livestock the San Joaquin Valley is second to no other section of California. According to the latest figures obtainable the following statistics are given:

Dairy cows	97,415
Cattle	490,948
Sheep	271,617
Hogs	169,708
Goats	15,345
Horses	94,325
Mules	21,595
Chickens	762,919
Bee colonies	24,343

The annual production in the San Joaquin Valley, exclusive of livestock, is shown in the following table:

Fruits and nuts	$ 8,384,799
Cereal grains	8,552,824
Grains and seeds (not cereal)	1,100,113
Hay and forage	8,033,680
Vegetables	2,881,084
Other crops	749,493
Dairy products	6,879,935
Poultry products (eggs)	1,068,201
Metals and minerals	11,616,005
Total	$49,266,134

The resources of the national and state banks of the San Joaquin Valley are $56,000,000. The amount of farm mortgages held in the Valley is $14,345,494, only a little over one-third of the annual production of the Valley, and less than one-third of the bank resources.

THE FARM

WHAT IS FARM MANURE WORTH?

Just what can the farmer pay for a ton of manure or for hauling and taking care of it varies with different conditions. For ten years the University of Missouri College of Agriculture has been investigating this question. Field tests have been made in thirteen different parts of the state. Different soils, seasons, and kinds of manure have been included under ordinary methods of farming.

In practically all cases eight tons of manure to the acre was applied once in four years and plowed under before the corn crop. No manure was applied on the following crop of oats, wheat and clover, but the yields were all recorded. The increase in crop yields caused by the use of eight tons of manure per acre, were as follows: 10½ bushels of corn, 5½ bushels of wheat, 4 bushels of oats, and about 7,000 pounds of hay. This is an average from sixty tests on corn and a somewhat less number on the other crops. Figuring these increases at normal prices they are worth about $16 or about $2 a ton for the eight tons of manure applied. With present prices which are almost double those of normal times, manure is worth correspondingly more, or about $4 a ton.

A COW OWNED BY THE STATE YIELDS 94 LBS. BUTTERFAT.

The State of California is a good farmer. A grade Holstein in the dairy herd of the Napa State Hospital produced 93.76 lbs. of butterfat during June, in the State Dairy Cow Competition being conducted by the University of California.

The average production of the cows in this University competition during June was 1,176 pounds of milk and 48.36 pounds of butterfat (the average distance from calving being 113 days). The production ranged from 19.40 to 93.76 lbs. of butterfat. The Napa State Hospital cow with the latter record won the McAllister & Sons' prize for the month of May. For June this prize was won by a Humboldt county dairyman, G. E. Trigg of Ferndale, one of his grade Jerseys having produced 80.46 pounds of butterfat. Two other grades which produced 93.76 and 86.82 pounds respectively were debarred from competition because of having won this prize once before.

Another Humboldt county dairyman, J. W. Coppini of Ferndale, President of the State Jersey Breeders' Association, won the Pacific Rural Press prize for June, since five grades in his herd produced 67,297 pounds of butterfat, the highest for the month. This makes the second time this prize has gone to Humboldt county, Mr. Trigg having won it last April for an average production of 82.37 pounds of fat for five grade Jerseys.

The pure-bred cows in this University competition are making excellent records. Three Holsteins and three Guernseys produced over 80 pounds of butterfat (equivalent to nearly a hundred pounds of butter) each during the month, in spite of the fact that most of them had been in milk several months.

The University reports that the showing the grade cows in the competition are making is very remarkable, and that it affords striking evidence of how the wealth of the dairymen of California can be increased by grading up their dairy cows, through the use of purebred bulls, of an ancestry with a high record of milk production.

Plan to Keep Tractor Busy.

As far as possible the tractor should be kept busy throughout the year under average farm conditions. Of course in some sections of the country where a particular money crop is emphasized the tractor is very valuable as a machine of concentration. For example say that a large harvest must be finished in a very limited space, or where the rainy season is such that the plowing and seed bed preparations must be rushed. Under these conditions the tractor is a money saver, even though it be used but 12 or 15 days in the year.

On the general farm, however, the tractor in turn must furnish power for the work of plowing, preparing the seed bed, planting some of the crops, harvesting, threshing, filling the silo, shredding corn fodder, building and repairing roads, grinding feed, sawing wood and lumber, pulling the stumps, heavy hauling and the like.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body — It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Carbs and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

RACE HORSES FOR SALE.
All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

How Others Succeed with SAVE-THE-HORSE

NOW GOOD FOR RACING.
Mr. Jacob White, Coldwater, Miss., R 3 Box 63, under date of June 6, 1917, wrote:—I am able to tell you my mare is well. I did not believe you could cure her, but thought I would try, and am proud to say you are the best doctors I ever saw. The best veterinarian in Tote County said she would not get well. Now I can ride her a mile in 2:00 and it don't bother her one bit. She had the worst splint I ever saw, but now she is sound again.

CURED THE SHOULDER.
George Charles, High Falls, N. Y., under date of Jan. 5, 1917, wrote:—Received your free book and thank you very much. I have used half a bottle of Save-The-Horse on my horse, and now his shoulder is O. K. I think there is no remedy as good as Save-The-Horse.

Ed. Peterson, McAllister, Wis., writes: The mare that was bothered with coffin joint lameness is cured, and we thank you for it, because it is Save-The-Horse that cured her. She works every day.

No blistering or loss of hair. Horse works.

Every bottle sold with Signed Contract to return money if remedy fails on Ringbone, Thoropin, SPAVIN, or ANY Shoulder, Knee, Ankle, Hoof or Tendon Disease.

Book, with Sample Contract and Advice, all FREE.

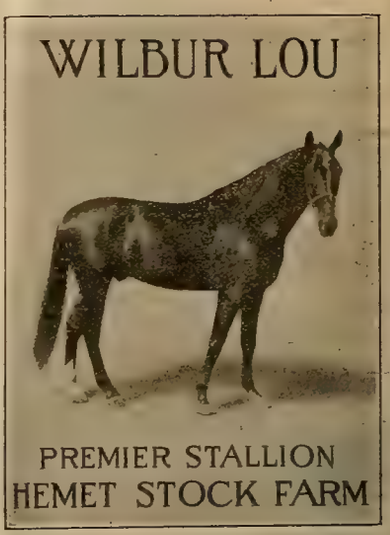
BREEDER and SPORTSMAN

VOLUME LXXI. No. 6. SAN FRANCISCO, SEPTEMBER 15, 1917. Subscription, $1.00 Per Year.

DON de LOPEZ 2:10¼
By Kinney de Lopez—Dam, Eradiate.
Winner at the State Fair; winner of 11 races in 1916.
Owned by Hemet Stock Farm, Hemet, Cal.

Farm and Horses for Sale--A Rare Opportunity

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.



Horses for Sale

WILBUR LOU (3) 2:10¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:13½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better,

—— including ——

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Winner of Occident Stake, 1917 California State Fair, value $3,000, and the State Fair Futurity. Entered in all colt stakes on the Coast.
HEMET QUEEN 2:16¼, champion yearling pacing filly.

Standard Colts, Fillies and Brood Mares For Sale

including the following promising youngsters:

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a four-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, READY TO RACE.
EVERYTHING AT THE FARM IS TO BE SOLD.

For particulars, photographs, etc., address

Lexington	Oct. 1 to 13
Atlanta	Oct. 15 to 20

BAKERSFIELD FAIR AND RACE MEETING.

With the Kern County Fair at Bakersfield less than a month away, the directors of this association are sending out a statement to the effect that their earlier forecast, which predicted a bigger fair than that of last year, will be borne out to the letter. This fact in itself insures extra effort on the part of the fair management, and the exhibitors who contribute towards the success of the fair, to make it an exposition that will long be remembered in the history of California fairs. As the time approaches when the gates are to open the officials in charge are receiving the most encouraging reports from every section of California and inquiries for space in the pavilions are already being received at this early date. In addition to the pavilion exhibits the dairying and live stock interests of Kern and other counties will be well represented with many competitors in the field.

As for the races, the P. C. T. H. B. Association has prepared a splendid programme, and there will be some of the keenest contests between trotters and pacers, in their respective classes, ever witnessed in California. Nothing will be left undone to make every afternoon's racing memorable and we can look for big crowds every day to cheer the winners and encourage the horsemen to do their best.

Deviating from its former policy of offering purses for harness horses only, the P. C. T. H. B. Association is also offering two opportunities each day for the runners, and to supplement this attractive feature the Golden Gate Thoroughbred Breeders' Association has donated a stake of $250 to be decided over one mile and a sixteenth. And in this connection there is no one feature yet discovered to compare with the sport of harness racing to pull the crowds to the fairs. Other lines and forms of amusement are accepted and enjoyed, but racing belongs to a fair as does no other one thing. The speed programme is paramount. It stands head and shoulders above anything and everything else. A county fair without horse racing is like a camp-meeting without a mourner's bench. There's nothing doing. An occasional organization, having listened to the croakers, has tried the experiment of giving a fair without the racing feature, but one dose has invariably been sufficient. Managers seldom care for a second experience. All these things have been said over and over again by the turf press, but like some other things, need constant reiteration, "lest we forget."

The entries for the Breeders' Meeting at Bakersfield appear in another column of this issue of the Breeder and Sportsman. All races filled except the free-for-all trot, which received but three entries; this event will be re-opened. While the fields for the different races are small, the class of horses is unusually good and quite a number of horses from Canada will contest against the local horses which have been performing on the California Circuit. The track at Bakersfield is now being prepared for the coming race meeting and when the bell rings for the first race, next month, there will be no better or safer track in the state of California.

FRESNO FAIR.

The tentative program for the eleventh annual Fresno District Fair, September 25 to September 29, was completed last week by C. G. Eberhart, manager for the fair association, and contains a list of events that are bound, he believes, to attract crowds to the fair grounds from all sections of the state. The county towns have not yet been given days at the fair, but dates will be arranged as soon as all of the towns have entered their exhibits in the special agricultural class for which a purse of $800 has been offered.

Tuesday, the opening day of the fair, will mark the running and harness races, as well as a long list of amusements and entertainments. It is the aim of the fair directorate to make the fair this year a big success, and attractions will be provided from the time the gate is opened in the morning until the last person leaves the grounds at night.

Wednesday is Fresno Day at the fair, and this year promises to break all attendance records unless it may be the records that will be established on Friday, the day of the Far Western Field and Track meet, or Saturday, the day of the automobile races.

THE HEMET STOCK FARM.

The late W. F. Whittier would have taken great pleasure in the performance of Zeta Lucille, by his premier stallion Wilbur Lou 2:10½. She won the classic Stanford-Occident Stake at the State Fair, beating the rest of the field like breaking sticks. Mr. Whittier, who became an enthusiastic breeder late in years, was a man of sound judgment, as is shown by the selection of the horses at the Hemet Stock Farm, and it is to be regretted that a man of his wealth and enthusiasm shouldn't have lived to have seen more of his stock come to the front as they undoubtedly will continue to do.

As will be seen by the advertisement in another part of this paper, the executors of the estate are offering the farm and horses for sale. As a matter of sentiment, they would like very much to find a purchaser who would buy both the farm and horses, and one who would no doubt carry out to a greater or less extent Mr. Whittier's ideas. There is probably no more beautiful spot or one more delightfully situated both in regard to picturesque surroundings, fertile soil, and attractive improvements, for carrying on the breeding of horses, than the Hemet Stock Farm. It has an abundance of water, an excellent half mile track, and is located where you can train horses throughout the year. Mr. Whittier was one of the heaviest operators in that section of the state and selected the site of the Hemet Stock Farm as being just the spot for a good place where you can raise not only the best horses in the world, but the finest fruits and flowers. It is an ideal spot for some wealthy eastern breeder to locate, who is a lover of horses and who wants to enjoy the climate and advantages of California. It is within easy motoring distance from Los Angeles, Pasadena, Riverside, and San Bernardino.

GOOD HORSES WANTED FOR WAR PURPOSES.

In an official bulletin, the War Department announces: "Open Market Purchase Authorized of Animals Needed by the Government for War Purposes." Under this announcement any responsible dealer, breeder, or farmer capable of supplying the Government with one or more carloads of animals is invited to furnish the information to Government purchasing officers in the proper remount zones in which he or they may propose to supply the animals. The following information must be furnished:

(a) The number of mature specification animals of each of the following classes that he can supply: Cavalry and riding horses, light artillery horses, heavy artillery horses for siege batteries, wheel mules, lead mules, and pack mules.

(b) The price per animal at which he will enter into an agreement to supply animals of each class to the Government if called upon to do so.

(c) The place where he proposes to offer animals for inspection by Army purchasing boards.

Full particulars as to the specifications of animals, method of inspection, and requirements of inspection plants will be furnished on application to the purchasing officer of any one of the zones.

The Government purchasing offices in the West, charged with the details of buying horses and mules for the Army, are as follows:

Depot quartermaster at Fort Keogh remount depot, Fort Keogh, Mont., for Idaho, Montana, Oregon, Utah, Wyoming, and Washington.

Depot quartermaster, Fort Reno remount depot, Fort Reno, Darlington, Okla., for Arizona, California, and Nevada.

Prior to August 15th a program of races for the Arizona State Fair was to a limited extent given publicity. That program has been changed, and the present classes and conditions, advertised in this issue of the Breeder and Sportsman, have been adopted in its place. All entries made under the old program have been cancelled, except entries of horses where classes and amounts of purses have not been changed. These entries will stand as originally made and horses will be eligible to start.

ENTRIES FOR P. C. T. H. B. A. RACE MEETING

In Conjunction with the Kern County Agricultural Association Fair, Bakersfield, Oct. 1 to 6 Inclusive.

No. 2—2:09 Trot, purse $1,000.

Thoroughbred Matters

Eleven thoroughbred yearlings bred by Edward Cebrian at his San Jose Stock Farm were sold by auction at Saratoga on the 18th of August. The sale realized $5,325, an average of $484.00:

Chestnut filly, by Rey Hindoo—Illusion, by Mesmerist; P. M. Burch	$ 200
Chestnut colt, by Tim Payne—Gottlieben, by Rubicon; J. O. Talbott	200
Bay filly, by Von Tromp—Du Barry, by St. George; A. K. Macomber	1,400
Brown colt, by Von Tromp—Rosegal, by Galveston; J. H. Whyte	1,100
Bay colt, by Rey Hindoo—La Sinaloa, by Emperor of Norfolk; J. Tranter	200
Chestnut colt, by Joe Carey—Armadora, by Gano; A. Neal	300
Chestnut filly, by Von Tromp—Andrewetta, by St. Andrew; G. Preece	225
Brown filly, by Von Tromp—Bonsetta, by Masetto; L. W. Garth	1,000
Brown filly, by Joe Carey—Alondra, by Emperor of Norfolk; J. O. Talbott	100
Chestnut filly, by Von Tromp—Jourdain, by Watercress; L. W. Garth	500
Bay filly, by Joe Carey—Glencoe Maid, by Emperor of Norfolk; F. H. Brunell	100

New York, Aug. 23.—One of the great features which has been assured for Tijuana, beginning on Thanksgiving Day, will be the speed contests. Already E. R. Bradley's Blind Baggage, W. P. Orr's Leochares, Billy Colton's Panzaretta and George W. Wingfield's Bank have been measured for the speed stakes.

The quartet makes up the fastest bit of horseflesh in America, or in the world, for that matter. Even out this way the mere mention of the contest brings forth the wildest discussion, with no small amount of argument for or against each candidate. Out Kentucky way, they believe that Blind Baggage is the fastest horse in training. He has been wonderfully successful this year, and as a matter of fact has developed over his last season's form.

Panzaretta is and has been queen of the American turf for several years now. Only this past season, she jumped into strong Eastern favor with a series of victories. The other day, when she won at Saratoga, after packing an impost of 135 pounds, the whole stand arose and cheered wildly when she returned to the winner's circle. It is doubtful if there ever was an animal in turf history which kept its popularity for such a long siege.

Last winter Leochares was regarded as one of the great sprinters of all time. He swept all before him, but he has staled off since. However, there is no question of his ability, and in form it will take the fastest to trim him.

Bank, the Western champion, is no slouch himself. He is a freak speed marvel. There is no telling how good the horse really was at one stage of the last Tijuana meeting. He would reel off quarters in championship time and handled his weight nicely. Some Kentuckians who knew the horse before he became the property of Mr. Wingfield, believe him to be the champion of the outfit.

James Wood Coffroth, president of the Tijuana Jockey Club, has practically completed his Eastern business trip. On all sides he was received warmly here and the general requests for reservations have assured him that he will have a thousand of the greatest horses in America. Only the better horses of the turf will be given stall reservation because of the large demand, which means the passing of the so-called "gypsy" from Tijuana.

From the speculative standpoint, President Coffroth will be amply fixed. The greatest layers of the Eastern country, Fred Beck, Tom Shaw, Henry Hanf, Eddie Callahan, Frank Banes, "Lob" Cohn, John Walters, Joe Bloom, Izzy Hamm, Tad Doggett, Ed Ryan, Arthur Herbert and John Sullivan, have signified their intention of coming, and with these layers on the block, the ring will resemble the strongest ring of the old days.

The popularity of racing has reached its height in America. Rich men of every walk in life have entenered the ranks during the past season, and as a result horseflesh is bringing fabulous prices. These men, too, long for activity, and this in a great measure is bound on boosting winter racing. Instead of hiding in a snow-covered training camp, they want to race, and if they can find sunshine for their sport, then so much the better. In a way, this speaks for Tijuana's success and its great boosting.

Many horsemen will start for the Coast directly at the close of Saratoga. The majority that start early will break the jump by stopping off at Reno, where a twenty-five day meet is to be held. Manager Jack Atkin's announcement of the selection of Eddie Tribe as starter has given the horsemen such a confidence as to promise a really fine meeting for the Nevada town. Then there are many horsemen who believe in getting their charges out West early and getting them acclimated and ready for the long meeting at Tijuana.

Californians visiting the metropolitan race courses in the East have been agreeably surprised to note the prominent part A. K. Macomber, the wealthy Burlingame sportsman, is playing as a patron of the thoroughbred. Leon Wing, who is at Saratoga enjoying the sport with James W. Coffroth, writes that Macomber with his string of turf stars is very popular with the elite racegoers and is making an enviable record in annexing the rich stakes and classics.

Macomber has invested over a quarter of a million in securing the best blood in this country and England. He is in the sport for sport's sake only, and the turf followers naturally wish him luck. There has been a sort of talk of establishing a horse-breeding farm at his home here in California, and it is pleasing to learn of his success in the East.

Wing writes as follows of his visit to the picturesque Saratoga track:

"We saw the running of the Alabama stakes yesterday for three-year-old fillies. Macomber won it with his grand imported mare Sunbonnet, by Sunstar, out of Marion Hood. On the dam side Marion Hood is a full brother to Polymelus, the greatest English sire and incidentally sire of Wingfield's $12,500 mare, Polestina. She is a wonderful runner, the superior of any filly I ever saw. She fairly won pulled up in the stake and ran past the opposition with little effort.

"Met Walter Jennings and had quite a chat with him. He is coming to California next winter and, although he will not train a string himself, he told me that Macomber had practically decided to ship a string to Tijuana. Jennings will be down to the track, however, on a visit, but is afraid that if he gets within striking distance of a horse he will fall right into work.

"They contine to do their betting on the lawn in front of the stand and in the clubhouse. They bet almost fabulous sums around here, and the biggest operators in the game are on the ground. Even as big a bookmaker as Tom Shaw has been outbooked this year by a fellow called Beck. Beck is said to handle $50,000 a day. He takes thousand-dollar bets as though they amounted to little or nothing.

"The other day a well-known Wall street speculator ran out on $107,000 worth of markers, the result of the day's operations. However, he has since made most of this good. But the New York system is still very bad and the layers are crying for the most part over the money they lost on run-outs.

"Johnny Loftus is probably the most popular rider out this way. Of course, he gets a crack at all the Macomber horses. 'Big Bill' Knapp and Roscoe Troxler, another pair of old men, are next in favor.

"Jim was received very warmly by the folks out here. Horsemen of much class and standing have promised to come West and, altogether, Tijuana is assured of a great meeting."

Word has been received that James W. Coffroth has patched up his differences with the California Fair and Racing Circuit promoters. It is reported that he has abandoned his plans to become the turf czar of the West, and is willing now to let the jockeys and thoroughbreds participate in the speed programme at the State Fair without having them buck the threat to be blacklisted at the Tijuana track.

There was a time when Coffroth set himself up as dictator. He drafted a rule and had it sent broadcast that no racing association west of Chicago, including even the California State Agricultural Society, could stage running races without first securing a sanction from the Tijuana Jockey Club and employing a steward from that organization at a salary of not less than $20 a day.

Immediately a controversy arose in the ranks of the horsemen. The little associations on the sulky circuit that had scheduled two running races daily as added attractions did not feel that they should shoulder the extra expense. There was the further resentment against a track located in Mexico trying to dictate as to how the races in California should be run.

Coffroth explained that the action was taken to safeguard the sport. He said that the little circuit running events were often "crooked" and the game suffered. The newly organized California Fair and Racing Association did not take that view, however, especially inasmuch as its members were not consulted or advised of the move in any way.

The running races were accordingly kept right on the pjrogrammes and were run off successfully. They were for only $100 or $150 purses, but the races filled and the spectators were treated to some exciting sport.

The real test of Coffroth's ambitions to be turf czar was to come at the State Fair race meeting, which opened September 8th and ran until September 15. More attractive purses were offered, and the Golden Gate Thoroughbred Breeders' Association set up a $500 handicap, with another stake of equal value to be scheduled. Horsemen were invited to make entries, and it would have developed into Coffroth bucking against the State Fair if he had stuck by his guns.

The Golden Gate Association was also busy. It did not take a fancy to Coffroth's ambitions and made application to the Jockey Club of New York, the parent turf body, for a charter, so as to control the game and perhaps force Tijuana to secure a sanction.

The Jockey Club heads in the East likely talked over the situation with Coffroth. The fight would have been a bad thing for the racing game in the West, and if it has been peacefully patched up it will be good news to the horsemen.

Ventura, Aug. 20.—By a vote of 6 to 3, the directors of the Ventura County Fair Association decided not to hold a county fair this year. J. W. Hitch, president, and other officers elected this year will hold over until next year.

"Curley" Brown, the Havana racing promoter, is expressing grave fears for the success of the Tijuana meeting, scheduled to get under way on Thanksgiving day. Owing to the war and the difficulty in securing passports to cross back and forth across the border from San Diego, spectators will have trouble reaching the Tijuana track, is the way Brown sums up the troubles that will confront James W. Coffroth just at a time when he is budding out in the turf sport.

This sympathy coming from Brown is quite touching. Here he is bemoaning Coffroth's bad luck, when as a matter of fact if Tijuana does not run or the horsemen get the impression that there will be trouble in crossing the border, the Havana track will profit in attracting the strings of thoroughbreds with the race followers who want to take in the sport during the winter. Brown would likely shed many tears if he could get others in the same sympathetic spirit.

Once before some other kind friends advised Coffroth that the Mexican Government would not permit the sport of racing to be promoted within its confines. It was rather widely circulated, with Consuls giving interviews and all that sort of thing. In the end Tijuana opened and not a peep came out of General Carsanza.

Perhaps this is a more serious situation, as Brown argues. Tijuana is situated so close to San Diego that the race track followers cross to and fro daily. Passports will be necessary to leave this country and there might be some difficulty on that score.

It is worthy of note, however, that Coffroth has gone to no little expense on his trip East in getting horsemen with their strings to make the long ship across the continent, and he would hardly be going ahead so far without ascertaining how he stands in the matter of getting spectators to his track. He undoubtedly is acquainted with conditions and would not wait for his rival promoter to pass along the word that Tijuana would not open.

In his letters from the East, Coffroth has contended that Tijuana will usher in a banner meeting on Thanksgiving day and he will doubtless not welcome Brown spoiling his vacation trip here by so much worrying over another track when he has so much business pertaining to his own Havana meeting.

Jack Atkins, who is handling the Reno race meeting for the Reno Business Men's Association, announced last week that Lee Rose will officiate as presiding judge, with Leon Wing and Sam McGibben as associates. The races started yesterday and will run twenty-five days, with the pari mutuel form of wagering.

✤ ✤ ✤

Celesta, George W. Wingfield's sensational thoroughbred mare that has been in retirement for a couple of seasons, will make her return to the turf at the Reno meeting which opens on September 14. Celesta has been put in training in George Berry's care, and is reported as showing her old-time speed.

✤ ✤ ✤

Mr. Jas. C. Nealon, Secretary of the Golden Gate Thoroughbred Breeders' Association, acting on behalf of his association, has donated a $250 purse for a running race of one mile and a sixteenth to be decided at the Pacific Coast Trotting Horse Breeders' Association meeting to be held at Bakersfield this fall. This generous action has done much to establish harmony between the harness horse and thoroughbred organization, who both have common interests in racing matters on this Coast.

✤ ✤ ✤

The work on the Arizona State Fair grounds, under the direction of former Superintendent D. C. Aiken, who is again in charge of the race track and grounds, is beginning to show magnificent results. Vast improvements are in progress on the grounds, and both the mile and half mile tracks are being put in splendid shape. The mile track, which has a national reputation, has been plowed and leveled to grade, which will make it lively and in perfect condition for the coming races in November. All indications point to a larger attendance at the Arizona State Rair than ever before, and it is expected that some world's records will be broken on the newly improved track.

✤ ✤ ✤

One of the most important horse sales of the season was transacted in New York last week. A. K. Macomber, the wealthy Burlingame turf patron, disposed of North Star III, the famous English-bred three-year-old, to E. R. Bradley for $20,000.

North Star III, a son of Sunstar—Angelic, was brought over from England by Macomber, with the reputation of being one of the greatest colts across the pond. Macomber is reported as having paid $35,000 for him, with the hopes of winning the classic Kentucky Derby. Horsemen picked North Star as the winner, but two days before the race the colt unfortunately bowed a tendon and could not start. It was quite a disappointment to Macomber. It is understood that North Star will be used at Bradley's stock farm.

Harness Horses and Horsemen

THE GRAND CIRCUIT AT COLUMBUS, OHIO.

Aug. 6—2:05 pace; stake $3,000.

Free-for-all pacing; purse $500.

White Sox 1 1 1
Mack Fitzsimmons 2 3 2
Bondelin ..... 3 2 dr

Time—2:08½, 2:08¾, 2:09¼.

Half mile running, purse $60—Creole Sue won; Two-Step second, Bert Getty third, Jennie Trigg fourth. Time—0:52¼.

Half mile running, purse $60—Alice Teresa won; Tom Woods second, Von Dillon third, Ada Zain fourth. Time, 1:48.

MATINEE EVENTS OF THE MONTH.

The San Francisco-California Driving Club has been busy during the month of August at the Stadium and at Petaluma. The opening day at the Stadium furnished a great day's sport, and the second Sunday the horses were shipped to Petaluma to take part in the races of the Petaluma Driving Club; on Labor Day the members of the Oakland Driving Club and the Petaluma Driving Club were entertained at the Stadium. The results follow:

Emma M., Bill Malough's popular and consistent mare, kept up her success in the matinee at the Stadium. It was only after five heats, however, that the winner was determined. King Pointer, as usual, proved dangerous in the three-quarter mile heats and took the first and third heats. Emma M. looked to be winning the third heat, when she broke. "South Americano" Roberts had a bad day in the sulky with Bradmont and finished far out of it. W. J. K. showed improved and is evidently rounding to.

Ottinger & Welsh scored in the free-for-all trot in straight heats with Vallejo King, Yoncalla being the contender. Joe Kidd also put over a victory in the 2:15 pace with Pointer Belle. Hamburg Belle unseated her driver and ran away, but caused no damage. The summary:

First Race—Free-for-All Trot.

Vallejo King.....(Ottinger & Welsh) 1 1 1
Yoncalla .....(T. F. Ryan) 2 2 2
Minequa .....(Ford) 3 3 3

Time—1:43¼, 1:42, 1:41½.

Second Race—2:15 Pace.

Pointer Belle.....(J. M. Kidd) 1 1 1
Little Jack .. ..(George Conlan) 3 2 2
Lynmour .....(D. D. Hanks) 2 4 3
George W. .....(F. Burton) 5 3 4
Hamburg Belle .....(J. Dupon) 4 dr

Time—1:40¾, 1:40¼, 1:40½.

Third Race—Free-for-All Pace.

Emma M. .....(William Malough) 2 1 3 1 1
King Pointer .....(H. Campodonico) 1 2 1 5 3
Rodney Patchen ....(J. McNamara) 4 3 2 4 4
Bradmont .....(R. P. Roberts) 5 4 5 3 2
W. J. K.....(W. J. Kenney) 3 5 4 2 dr

Time—1:36¼, 1:36, 1:39½, 1:38¾, 1:37.

* * *

Petaluma, Aug. 28.—The races at Kenilworth Park Sunday afternoon under the auspices of the Petaluma Driving Club were well attended, and horses owned by members of the San Francisco Driving Club were entered in the three events. The people were well pleased with the results, which were as follows:

First Race— :25 Pace.

Cookey ..... (J. Tassi) 2 1 1
Hamburg Bell .....(Dupon) 1 4 3
Peaches .....(McGovern) 4 2 2
Glenwood Chief .....(Millerick) 3 3 4

Time—2:22, 2:21, 2:21½.

Second Race—2:15 Pace.

Lynmour D. ..... (Hanks) 3 4 1 1
Rodney Patchen .....(McNamara) 1 3 2 4
Little Jack .....(Gielow) 2 1 3 3
Frank N. .....(J. McGovern) 4 2 4 2
Edith Light .....(A. Dolciffi) 5 5 5 5

Third Race—Free-for-All.

W. J. K.....(Kenney) 3 2 1 1
King Pointer .....(Campodonico) 2 1 2 2
Pointer Belle .....(Malough) 1 3 3 3
J. C. Simpson.....(F. McGovern) 4 4 4 4

The judges were Robert Dickson, L. Foucrault and D. Healey. Timers, F. Courtier and W. Studdert. Starter. S. O'Leary. Marshal, William Offutt.

* * *

W. J. K., Bill Kenney's high-stepper, finally got a winning bracket at the Stadium track in the feature of the Labor Day matinee. King Pointer won the first heat, Emma M. the second, and W. J. K. the third. W. J. K. took best in the summary, and was declared the winner.

Yoncalla had a cinch in the free-for-all trot, Minequa being the only other starter. Hamburg Belle, that figured in a runaway two weeks before, took the 2:25 pace. Firebaugh, Shorty and Rodney Patchen won the other events in straight heats. The summary:

First Race—Free-for-All Trot.

Yoncalla .....(Thomas Ryan) 1 1
Minequa ..... (M. Ford) 2 2

Time—2:24, 2:21¾.

Second Race—2:25 Pace.

Hamburg Belle ..... (J. Dupon) 2 1 1
George W. .....(Frank Burton) 1 2 2
Peaches ..... (D. McGovern) 4 3 3
Cookey ..... (J. Tassi) 5 4 4
Glenwood Mac .....(E. Millerick) 3 5 5

Time—2:21½, 2:18, 2:18½.

Third Race—220 Pace.

Firebaugh ..... (E. Stinson) 1 1
Grant W. .....(A. L. Hinds) 2 2
Willie K. .....(A. Bangs) 3 3
Cleo Verne .....(Mrs. Carlisle) 4 4

Time—220, 2:23.

Fourth Race—FreeforAll Pace.

W. J. K. .....(W. J. Kenney) 2 2 1
Emma M. .....(Wm. Malough) 4 1 2
King Pointer .....(H. Campodonico) 1 3 4
Pointer Belle .....(J. M. Kidd) 3 4 3

Time—2:12, 2:12, 2:15.

Fifth Race—2:25 Mixed.

Shorty .....(Al Hanks) 1 1
Harold G. .....(M. Mimcucci) 2 2
Sidney .....(Fred Straus) 3 3
Esther Queen.....(W. E. Wyber) 4 4

Time—2:23, 2:22.

Sixth Race—2:18 Pace.

Rodney Patchen .....(J. McNamara) 1 1
Little Jack .....(L. A. Gielow) 3 2
Frank N. .....(Jack McGovern) 2 3
Lynmour D. .....(D. D. Hanks) 4 4

Time—2:13, 2:14.

BLACKHAWK STABLE CAPTURES MOST OF IMPORTANT PRIZES.

Judging day for Shire horses at the State Fair (Thursday) was made the occasion for a visit to Sacramento by a special train load of members of the Mount Diablo Park Club, the country club in Contra Costa county whose grounds are close to the celebrated Blackhawk Ranch of Ansel Mills Easton. Both the club and the ranch are situated on the 10,000 acre Mount Diablo Estate.

Among those in the party leaving Diablo at 9:30 a. m. were Mrs. Easton and guests; Col. and Mrs. W. L. White, Mr. and Mrs. E. B. Thorning, Mr. and Mrs. Joseph Ghirardelli, Dr. and Mrs. E. C. Love, Mr. and Mrs. George C. Jensen, Mr. and Mrs. E. B. Bull, Mr. and Mrs. J. B. John, Mrs. W. H. Berg, H. O. Alexander, E. L. Cooper, William Macdonald and others. The owner of the horses and his son-in-law and associate, William A. Ward, were already at Sacramento.

The prize-winning Blackhawk horses were unharmed when the partially completed $50,000 Easton home on the Mount Diablo Estate was burned down. E. Lovell, manager of the Easton ranch, by hard work saved a stable in which were $30,000 worth of the horses.

The leading awards in the horse judging contest Thursday went to the Blackhawk stable. The principal competition was from the stable of the late Jack London of Glen Ellen. Chessie of the Blackhawk stable won the championship from Cockerington Princess of the London stable by a margin.

The Easton exhibit has taken honors right and left, most recently at the Butte County Spring Exposition at Chico. The ranch was given the Panama-Pacific exposition special award for the finest display of Shires.

Anwick Arthur, grand champion stallion, is one of the most noted of his breed in the world. He was the exposition premier champion and with his colts, Blackhawk Beauty and Blackhawk Gay Lad, took nine prizes for stallion and get in two years, never being defeated.

Others of the Diablo horses are Dovecote King, Blackhawk Mystery, Blackhawk Ring o' Bells, Salvador Buster—recently sold to the University of Nevada—and Blackhawk Delphine.

Notes and News

Esperanza went a good race in the free-for-all trot at Ferndale, winning three heats in 2:11, 2:10¼, 2:09½.

✤ ✤ ✤

Fred Woodcock won two races with Capt. Mack, and Jas. Stewart won two with Guy Bon, at Vancouver last week.

✤ ✤ ✤

Kinney Lou acquired another standard trotter when Annaline Lou took a record of 2:29¼ at the Vancouver Exhibition association.

✤ ✤ ✤

William Finlay, after a lot of bad luck on this year's circuit, finally succeeded in winning the 2:14 pace at Ferndale with Mono Ansel.

✤ ✤ ✤

The brown mare Colleen by Charley D. McKinney won the 2:06 pace, purse $2,000, at Milwaukee, the race going to five heats, best time being 2:05¼.

✤ ✤ ✤

At Hamline, Minn., on Sept. 6th, William set a new record for pacers at that track when he traveled the second heat of the free-for-all pace in 2:00½.

✤ ✤ ✤

Willie Durfee won both races on the opening day at Ferndale; and on the second day Al. Schwartz was equally prominent, winning both events on that occasion.

✤ ✤ ✤

As will be seen in an advertisement in another column of this paper, E. S. Hicks is offering for sale a 160 acre improved ranch in Lake county that has many attractive features.

✤ ✤ ✤

G. Cuneo of Oakland last week sold his four-year-old colt by The Bondsman, dam Gracie Pointer 2:07¾, to Mr. P. Foley of Calistoga. Mr. Foley has entered this horse in the Standard Bred Class at the State Fair.

✤ ✤ ✤

The Napa fair will open Saturday, the 22d, with a big industrial parade of Napa county products. Work of erecting livestock stalls to accommodate the livestock to be shown is being rapidly pushed. All entries will close on the 20th.

✤ ✤ ✤

A correspondent writing from Hanford says that in addition to the fair and race meeting to be held there Sept. 19 to 22, that it has been decided to put on the rodeo exhibition, which was held at Salinas in July, and that extensive preparations are being made to that end.

✤ ✤ ✤

Mr. J. C. Adams, President of the Adams Hotel Company, and one of the staunchest supporters of racing in the Southwest, will be in charge of the races at Phoenix this fall, which is one reason for better purses and more interest in that department than has been manifested for many years.

✤ ✤ ✤

A new world's harness record for a five-mile race was established at the closing of the Quebec exhibition harness meeting, when Marconi paced ten rounds of the half mile track in 12 minutes and 2¾ seconds. The record: Standing for five miles up to then was 12:24, made in 1902 by Zambra.

✤ ✤ ✤

Dr. T. Peppard of Olympia, Wash., has in his charge the registered saddle stallion Rex McDonald No. 2011, and as will be seen by the advertisement in another part of this paper, the horse is for sale or will be leased to a responsible party. Saddle horses are in demand, and anyone looking for a good one will do well to see or write to Dr. Peppard.

✤ ✤ ✤

The second Stanislaus livestock show and exposition at Modesto will open Monday, the 24th. There will be 400 head of dairy cattle and a big display of agricultural and commercial products, a special stock train bringing the prize winners at the State Fair to Modesto. The big feature of the fair will be a daily rodeo with the best horses and riders in the west in attendance.

✤ ✤ ✤

J. R. Smith, formerly at the Pleasanton track, has again taken over the horseshoeing shop at that place, where he intends to remain permanently. Mr. Smith is well known as a high-class farrier, and any horses left in his care will receive the best and expert attention. In the winter months is the time to put feet in good condition, and Mr. Smith's return to Pleasanton will be an acquisition to those who train horses on that famous winter track.

✤ ✤ ✤

Secretaries at the various county fairs have no right to include in their conditions, "Horses distancing the field or any part thereof entitled to but one money." The associations have no right to retain any part of the purse if four or more horses compete in the first heat. We also note that some associations are racing the old five-heat plan, but this also has been abolished. All races must be either two in three, three heats or three in five to a finish.—[American Sportsman.

Thirty-three new remount depots for army quartermasters have been authorized, and among the thirty-three it has been officially stated by the eastern heads that one or more of these depots will be established at Camp Fremont. The commission personnel of each depot calls for a major, a captain, a first lieutenant, one officer of the medical corps and six officers of the veterinary corps. The enlisted strength of each depot totals twenty-eight men.

✤ ✤ ✤

S. H. Cowell has purchased the chestnut geldinng Sequoia by Wilbur Lou, dam Eradiate by Geo. W. McKinney, from the Hemet Stock Farm and will start him in the two-year-old stake at the Breeders' meeting. The Hemet Stock Farm has also sold the two-year-old chestnut filly Edith Carter by Kinney de Lopez, dam Louise Carter by Chestnut Tom, besides several other promising youngsters that are entered in the stakes.

✤ ✤ ✤

The Rubberset Company of Newark, N. J., is getting out bell quarter boots and selling them direct to horsemen at a low price, as will be seen by its advertisement in another column of this paper. Will Neal, who was formerly editor of the Breeder and Sportsman, left this paper to become associated with the Rubberset Company and as all of his life he has been connected with trotting horses, no doubt he had something to do with the getting up of these boots and takes a pride in seeing that they are a superior article.

✤ ✤ ✤

While unloading the racing stable of Tommy Murphy at Philadelphia, the fast colt, Kelly De Forest (3) 2:10, fell into a coal hole and his legs were injured so badly as to necessitate his being temporarily thrown out of training. In trying to rescue the horse Will Fleming, Murphy's assistant, who was in charge of the horses, also fell into the hole. When rescued he was unconscious, remaining so for some time, and was taken to a hospital. Fortunately his injuries were not serious and he is expected to return to work in a few days.

✤ ✤ ✤

Arthur C. Thomas is no longer sales manager of the Houghton Sulky Co., but has been appointed Secretary and General Manager of the new Omaha Fair Association, of which Edward Peterson, Otis Smith, John D. Creighton, Thomas C. Byrne, George Brandeis, E. D. Gould, and other prominent Nebraska business men are backers. The present plant of the association will be greatly enlarged or a new one established. It would be difficult to find anyone with all the necessary qualifications to successfully fill the position, equal to Mr. Thomas.

✤ ✤ ✤

Seeley Mudd and R. H. Satterwight of Imperial Valley spent several days last week in Stockton, buying equipment to open up a tract of 6,000 acres in the valley, to be planted in cotton and alfalfa. Among their purchases was 39 head of mules from Mrs. Agnes Minnehan, for which they paid $8,000. Mr. Satterwight selected a fine saddle horse from Mrs. Minnehan's stock, and Mr. Mudd bought a handsome saddle animal for his particular use from Mr. C. B. Fagnant, paying good prices for these animals. They also put $10,000 in "caterpillars," scrapers, etc., from the Holt Manufacturing Co., $2,000 worth of plows from the Moline Plow Co., and made numerous other large purchases.

✤ ✤ ✤

Napa, Aug. 27.—The Napa County Fair will be held at Napa from September 22 to 26, inclusive. The arrangements are already well under way, and Manager E. P. Locarnini is pleased with indications which show that in every part of the county a keen interest is taken, and the success of the fair is already assured.

The Farm Center exhibits, which will be many and varied, will be placed in one of the huge tents to be erected. Industrial exhibits will fill two more tents, and there will be a tent devoted exclusively to a flower show of rare beauty.

Opening day will be marked by a great parade and there will be a live stock parade on September 25. A barbecue on Monday, the 24th, will be one of the features.

✤ ✤ ✤

The traffic in old, wornout horses, which are shipped into Sonoma county to be made into chicken feed, is a cause of much trouble to all northern California S. P. C. A. A typical case is one handled recently by the Marin County Humane Society, in which Dr. A. J. Rydberg, the Society's officer, found that a car of twenty-five horses shipped from Modesto to Petaluma were five days without food or water. He was forced to destroy three of the animals. Complaint was filed in the Justice Court at Novato against the two shippers, only one of whom was apprehended, however. The latter was tried before Justice Hermann Rudolff, who convicted him and imposed a fine of $35. The unfortunate animals were five days in a car without food or water, and their condition was pitiable in the extreme.

HEMET FAIR AND RACE MEET DECLARED OFF.

Secretary Frank Rees of the San Jacinto-Hemet Valley Fair Association, has sent out notices that because of existing conditions which are unfavorable for a fair and race meeting at Hemet this year, the Board of Directors of that association has decided to declare it off this year. It is the intention to retain their permanent organization, however, and they hope to be able to be in a position to give a big race meeting in 1918.

PERSONAL INTERESTS OF LONG AGO.

The Growth of Golden Gate Park.

[Special Correspondence.]

It is a far, but wonderfully inspiring cry from "The Thinker" to the early day settler who built his shack, and started the ranch which gave "Chicken Point" its name. No doubt, he thought himself far enough from civilization to be undisturbed. This point was the first piece of park ground to be sodded; and for a number of years bore tantalizing signs of "Keep Off the Grass." In 1885 Park Commissioners R. P. Hammond, Gen. McDowell and Joseph Austin had these hated signs removed, and it is estimated that in the last forty years ten million people have tramped over this grassy point; children of several generations have rolled and tumbled over it; not to its detriment, but to its evident improvement: Hats off to the wisdom of the commissioners!

Californians do nothing by halves, and once convinced that the park was to be a success, interest became stronger than their former indifference and opposition, and they began to blaze the way with substantial evidences of their approval. One of the first personal gifts, which bears the name of the donor, was Alvord Lake, at the Haight street entrance to the park; an artistic gem that keeps the Alvord name green. A short distance from this lake we find the only genuine cork tree in the park, and although its age and growing weakness appeal for mercy, a wire fence does not protect it from the vandals who cut into its trunk and branches—bad "cess" to them. This tree is in the "Valley of the Three Flag Poles," once familiar landmarks. Along one side of this, Cypress Avenue, not so long ago marked by a line of mere shrubs, is now an avenue of tall, stately trees. A path, known as the Northridge road, stole away from the main entrance at Baker street, continuing along back of the conservatory, which was destroyed by fire in 1880 and rebuilt by Chas. Crocker. At this entrance stood a little lodge, which served to shelter a watchman, who closed the park gates at ten p. m., opening them to belated travelers, of whom there were not a few, and whose driving was not always reliable. These gates were removed about 1880 and the lodge did later service at the watering troughs.

Recalling the fact that the first tree was planted in the Panhandle in 1872, one cannot help being amazed at the wonderful amount of work done in less than fifty years. Supt. John McLaren asserts, and has demonstrated his assertion, that with proper shelter and cultivation, plants, trees, and shrubs from any part of the world can be grown in Golden Gate Park.

Amid these surroundings, music suggested itself; and the first band-stand—a little temple with a red copper dome—was built in the late seventies in Conservatory Valley. The space was so small that teams were not allowed to stand, but were kept continually moving, and the visitors on foot listened to the music from benches arranged along the drive above. With the improvement in car service the crowd outgrew these limited quarters, and a larger concourse was built on the site of the present tennis court. This concourse was planned with a view to safety, having an entrance thirty-five feet wide, and an exit of a hundred and thirty-five feet, so that in event of an accident, it could be cleared of teams inside of sixty seconds. Regular receptions were held in this court on Saturday and Sunday afternoons, the fine teams, and society in all its glory, being as great an attraction as the concerts.

The present magnificent band-stand, built in 1900 at a cost of $100,000, was donated by Claus Spreckels. Its wonderful sunken gardens, on the site of the Midwinter Fair, can accommodate an audience of 20,000. A generous and fully appreciated gift from the Sharon Estate was the Children's Playground, planned and laid out in 1886, at a cost of $50,000. Special provision, on a large scale, for the recreation of children, was at that time an innovation, but now wisely copied in all parts of the country. In every direction beautiful and enduring monuments of interest sprang up, as if by magic. The great possibilities of Strawberry Hill were considered, and once made plain, our pioneers as usual got busy. W. W. Stow solicited the money for the lake; C. P. Huntington advanced $25,000 for the falls that bear his name, and under John McLaren's skillful guidance nature is so wonderfully imitated that it is hard to believe its varied beauties are artificial. Thomas V. Sweeney, an enthusiastic pioneer, who loved the glorious view from the top of this hill, built an "observatory" at a cost of $10,000, as a protection from the rigorous ocean breezes, sufficiently roomy to accommodate a large number of teams. Finding that the walls were not high enough to answer the purpose, he added another story. The earthquake of 1906 destroyed this structure, leaving such a picturesque ruin that it seemed a pity to destroy it. At this time the only direct road through the park to the beach ran over the steep side of Strawberry Hill, where the boat-house now stands. The long line of handsome, well-appointed teams winding slowly over this grade, during popular driving hours,

(Continued on page 12)

CALIFORNIA STATE FAIR.

Big Crowds, Good Racing, Fine Exhibits, All Go to Make the 1917 State Fair a Great Success.

The greatest throng that has invaded the California State Fair at any time in its history has been in attendance during the week just passed and a large percentage of the attendance was composed of outside visitors. They surged through the exhibit halls and scampered here and there over the grounds, satisfying their curiosity and receiving a cordial welcome everywhere. The Sunday programme consisted chiefly of music and the bands played for cash prizes. This is one of the most attractive features of the weekly programme and the vast multitudes, packing the stand like the proverbial sardine, cheered and applauded as the various musical organizations, representing the best there is in the State, marched forth one after another and rendered their selections in the competitive concerts.

A better class of beef animals will be raised in future in California. The live stock show this year is another evidence of the trend towards the better. The victory of California beef at Chicago last December was the first sensational manifestation of the change that has taken place in the beef cattle industry of this State. Incidentally the show of meat animals at the State Fair is good evidence that California farmers are harkening to the call for more food and that better animals mean more food at less expenditure. More beef animals than ever before are shown this year and the quality has been pronounced as beyond that of all previous fairs. The Shorthorn exhibit probably is the largest ever seen in California. This may also be true of the Herefords. At any rate the Hereford exhibit surpasses any previous State Fair effort, for five distinct herds are on exhibition. Some of the old herds of dairy cattle have not appeared this year but new ones have taken their places. Much disappointment is expressed at the absence of A. W. Morris Sons' herd from Woodland.

The racing year was the best ever seen on the State Fair grounds. The track record for trotters was twice broken during the week, first by John Mack, driven by Walter Tryon, who trotted a heat in 2:07¾; this ecod held fo two days when it was shattered by Allie Lou's mile in 2:06½. The Hemet Stock Farm was much in evidence during the meeting. Allie Lou set a new coast record for the mile and also for the fastest three heats. Don de Lopez showed his Eastern form, winning three fast heats, in the fact of a strong north wind blowing down the stretch; winning from a good field of horses with his driver buggy riding. Both the State Fair Futurity No. 6 and the Stanford-Occident Stake were won by Zeta Lucille, also bred at the Hemet Stock Farm.

Hal Logan, the famous six-year-old son of Jim Logan, was also prominent as the winner of both the 2:14 and 2:20 class paces. This horse has won eleven straight races without losing a heat, making thirty-three straight heats to his credit, which as a pacing performance stands as the best ever made on the Coast. The three-year-old pacing division of the Stanford-Occident Stake was won by Ora Fino, from W. G. Durfee's stable, and the State Fair Futurity Pace for three-year-olds was taken by El Paso, owned by Roy D. Mayes of Dixon. Taken all in all, the 1917 races were probably the best ever held over the State Fair race track and the horsemen and the public were loud in expressing their satisfaction over the various events.

Sept. 8.—Stanford-Occident Stake No. 1, 3 y. o. Trot, $3,000.

THE STATE FAIR HORSE SHOW.

W. J. Carlisle of Oklahoma, who judged the horse show at the State Fair, declared that the show was the best ever given in California, highly complimenting the polo ponies which he said was the best lot he had ever had the pleasure of judging. The horse show altogether was quite a success, not only from the standpoint of the excellence of the animals exhibited, but from the interest taken in it. Preceding the show a concert was given by the United States Naval Training Station band, and the management saw that there was something entertaining to hold the attention of the spectators every moment. Prizes were awarded as follows:

Class 1—Best pair of saddle horses ridden by gentleman and lady: First prize awarded to Charmeran Chief, bay gelding, and Charmeran Peavine, chestnut gelding, owned by Mrs. C. B. Anderson of Pleasanton. Second prize, Kildare, chestnut geldinng, owned by Mrs. Winslow Anderson, and Don Castano, chestnut stallion, owned by Mrs. A. S. McCormick of Los Angeles.

Class 2—Shetland pony, not exceeding 46 inches in height: Miss Peekie, bay mare, won first prize; Chester, black, second, and Don, black, third. Miss Peekie is owned by Mrs. C. B. Anderson, and Chester and Don are owned by Mrs. H. M. Boyd of Sacramento.

Class 3—Three-gaited saddle horses: Kildare, owned by Mrs. Winslow Anderson of Kenwood, first, and Charmeran Chief, owned by Mrs. C. B. Anderson, second. My Surprise, owned by the San Francisco Riding School, and Mavis, owned by H. C. Ahlers of San Francisco, were scratched.

Class 4—Best stallion, mare or gelding, 3 years old or over, shown hitched to light vehicle: San Vicente, chestnut stallion, owned by Mrs. A. S. McCormick, first; Don Castano, chestnut stallion, owned by Mrs. A. S. McCormick, second; Frenorious, chestnut stallion, owned by Ruby & Bowers, third, and My Surprise, bay gelding, was fourth.

Class 5—Novice polo class: Earline, chestnut mare, owned by the Garwood ranch of Sutter county, first; Betty, chestnut mare, owned by the Garwood ranch, second; Tracey, chestnut gelding, owned by the Garwood ranch, third, and Chance, chestnut gelding owned by the San Francisco Riding School, was fourth.

Section 612—Five gaited saddle stallion, three years and under four: Tamrack 7382, first, exhibitor, Martha Freeman, Los Angeles; Goldie Rex 7383 second, Fred J. Bork, Sunol, Cal.

Section 614—Five gaited stallion, one year and under two: Don Diego, first, S. P. Eastman, San Francisco; Granford, second, also Eastman; Our Choice, third, Bridgford Co., San Francisco.

Section 615—Five gaited stallion, under one year: California Grande 148, first, Bridgford Co., and Artist Le Grand 151, second, Eastman.

Section 616—Five gaited mares, four years old or over: Angelus Butterfly 7684, first, exhibited by Charlotte B. Anderson, Pleasanton, Cal.

Section 618—Five gaited mares, two years old and under three: Santa Ynez 12876, first, exhibited by Adelaide S. Gillis-McCormick, Los Angeles; Santa Monica 12875, second, Gillis-McCormick; Maggie Q, third, Dr. Quinn, Antioch.

Section 619—Five gaited mares, one year and under two: Paloma 13384, first, Gillis-McCormick, and Jackaranda, second, Gillis-McCormick.

Section 621—Five-gaited stallion and four of his get: Don Castano 5631 and his get, first, Gillis-McCormick; Le Grande McDonald 360 and get, Bridgford Co.

Section 622—Five gaited mare and two of her produce: Diana Dare, prize, Charlotte B. Anderson, of Pleasanton.

Section 623—Five gaited gelding, four years old or over: Highland Monarch 5205, first, Gillis-McCormick; Minstrel 154, second, Fred J. Bork, Sunol; Crawford 153, third, John H. Spring, Berkeley.

Section 624—Five gaited gelding, three years and under four: California's Best 123, first, Bridgford Co., and Charmeran Peavine 7135, second, Anderson.

Section 625—Five gaited gelding, two years and under three: Jimmie Britt 133, first, Bork, and Denmark, second.

Section 626—Five gaited mare or gelding, any age: Angelus Butterfly 7684, first, Anderson; Highland Monarch 5205, second, Gillis-McCormick. Butterfly also took three prizes in three other events.

Section 630—Five gaited combination stallions: San Vicente 6513 was the only entrant. Exhibitor, Gillis-McCormick.

California State Fair futurity, five-gaited saddle horse futurity No. 1 for foals of 1914—F. J. Bork, Sunol, first, with Goldie Rex; Martha Freeman, Los Angeles, second, with Tamarack; Bridgford Company, third, with California Best; Mrs. C. B. Anderson, Pleasanton, fourth, with Charmeran Peavine.

Combination pony class—Mercedes C. Anderson, first, with Fire Cracker; Geraldine Bowers, Davis, second, with Lady; Mrs. M. E. Boyd, Sacramento, third, with Lassie.

Five-gaited saddle class—Mrs. A. S. McCormick, first, with San Vicente; Bridgford Company, San Francisco, with Le Grande McDonald.

Heavyweight polo class—Garwood Ranch, first, with Big Enough and third with Elvas; San Francisco Riding School, second, with Chance.

Three-gaited saddle class, man rider—H. C. Ahlers, San Francisco, first, with Mavis; San Francisco Riding School, second, with Hazel Dazzle; Mrs. Winslow Anderson, Kenwood, third, with Kildare; Mrs. C. B. Anderson, fourth, with Charmeran Chief.

Hunting class, ridden by women in costume—Garwood Ranch, first, with Big Enough; second with Sanford Cady; third with Elvas; fourth with Miss Murphy.

One of the most brilliant colts the writer of this column has ever seen is owned by Mrs. Thomas L. Johnson, of Mendocino county. The colt is a bay stallion, two years old, by Bourbon King, sire of Astral King and others, and is out of Mrs. Johnson's very famous matron, Lady McDonald A., by Rex McDonald and the dam of champion My Idol, and many others that have won in Eastern shows. This youngster has a rather Thoroughbred appearance, can trot like Astral King, and if looks count for anything he surely will be one of the greatest horses in the country. The colt probably will be broken this fall and prepared for the next season's shows.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

September 30 & October 1.—Los Angeles, Cal.—Vernon Gun Club. Stanton A. Bruner, Secretary. "Old Policy."

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

GRAND AMERICAN HANDICAP.

The Great Event of the Year in the Trap Shooting World.

Champion trapshooters from all over the United States assembled at the Interstate Association's eighteenth Grand American Handicap trapshooting tournament, held at Chicago August 20th to 24th, on the grounds of the South Shore Country Gun Club. Four thousand dollars in money and many valuable trophies were distributed among the winners. The great event of the shoot was the race for the annual amateur championship at single targets. Trapshooters eligible to enter this contest must have been winners of or runners-up in the state championship races, therefore the winner is called "Champion of All Champions," for not only has he landed the title and the glory of his own state, but he has defeated the champions from every other state who are supposedly the best trap shots in their district and in the world. Mark M. P. Arie of Thomasborough, Ill., captured this event and is the individual star of the 1917 Grand American Handicap, and is entitled to be called the greatest clay target breaker in the world today. The following is the score for the meeting:—

THE GRAND AMERICAN HANDIICAP.

Name—City and State.	Yds.	Score.
*Won by C. Larson, Waupaca, Wis.	20	98x100
*Second—Mark Arie, Thomasboro, Ill.	22	98x100
†Third—R. C. Smith, Mounds, Ill.	19	97x100
†Fourth—I. C. Norwood, Davenport, Ia.	17	97x100
‡Fifth—H. C. Hood, Pittsburgh, Kans.	19	96x100

(*Larson won shoot-off for first trophy.)
(†Smith won shoot-off for second trophy.)
(‡Hood won fifth trophy by defeating, in shoot-offs, F. Hale, Mitchell, S. Dak., 17 yards; R. Buchanan, Duluth, Minn., 19 yards; H. J. Foster, Chicago, 19 yards; Alex. Vance, Capron, Ill., 19 yards; T. Forde, Minot, N. Dak., 17 yards; A. J. Frauenholz, Chicago, 18 yards; B. F. Elbert, Des Moines, Iowa, 20 yards; Al. Koyen, Fremont, Neb., 21 yards; C. B. Eaton, Fayette, Mo., 20 yards, and H. J. Pendergast, Phoenix, N. Y., 22 yards.)

THE G. A. H. YARDAGE TROPHIES.

	Score.	Shoot-off
16 yards—		
B. H. Little, Cedarville, Ohio	95x100	19
17 yards—		
J. W. Reed, Lima, Ohio	94x100	18 & 19
18 yards—		
A. R. Jones, Wolcott, Ind.	95x100	20
19 yards—		
J. G. Fye, Ollie, Iowa	95x100	19
20 yards—		
G. W. Lewis, Pond Creek, Okla.	95x100	(no tie)
21 yards—		
D. C. Rogers, Logansport, Ind.	95x100	(no tie)
22 yards—		
F. S. Wright, Buffalo, N. Y.	95x100	(no tie)

THE PRELIMINARY HANDIICAP.

Name—City and State.	Yds.	Score.
Won by—J. Peterson Randall, Iowa.	18	99x100
Second—J. L. Lumpp, Youngstown, O.	18	98x100
*Third—J. B. Lallance, Jr., Huntingdon, W. Va.	19	97x100

(*Lallance won third trophy by defeatinng, in shoot-offs, C. D. McGary, Hammond, Ind., 20 yards; W. L. Hayes, Dwight, Ill., 16 yards; B. S. Donnelley, Chicago, 20 yards; W. E. McCormick, Libertyville, Ill., 17 yards; Ed. Bollhoefer, Colfax, Iowa, 18 yards; B. C. Higgins, Gladbrook, Iowa, 18 yards; N. H. Martin, Memphis, Tenn., 18 yards; J. F. Fisher, Titonka, Iowa, 19 yards; H. E. Dickerman, Chicago, 20 yards, and T. W. Harker, Billings, Mont., 18 yards.)

THE CONSOLATION HANDICAP.)

Name—City and State.	Yds.	Score,
Won by—R. A. Nutt, El Paso, Ill.	19	96x100
*Second—J. R. Livingston, Springville, Alabama	20	95x100
*Third—C. B. Stickley, Vancluse, Va.	18	95x100

(*Livingston won shoot-off for second trophy.)

NAT'L AMATEUR SINGLES CHAMPIONSHIP.

Name—City and State.	Yds.	Score.
*Won by—Mark Arie, Thomasboro, Ill.		99x100

(*Arie broke 75 straight in three shoot-offs and defeated Roy McIntire, Butler, Pa., and Jay Clark, Jr., Worcester, Mass., who broke 99 in the championship race.)

NAT'L AMATEUR DOUBLES CHAMPIONSHIP.

Won by—C. B. Platt, Bridgeton, N. J.	96x100
Second—Mark Arie, Thomasboro, Ill.	95x100
Third—R. H. Bruns, Brookville, Ind.	93x100

THE CHICAGO OVERTURE.

*Won by—E. H. Powell, Valparaiso, Ind.	100x100
*Second—C. A. Gunning, Longmont, Cal.	100x100
*Third—H. P. de Mund, Phoenix, Ariz.	100x100

(*C. A. Edmonson, Clayton, Ind., also broke 100, but in the shoot-off Powell, Gunning and de Mund won the trophies.)

THE SOUTH SHORE INTRODUCTORY.

Won by—F. M. Troeh, Vancouver, Wash.	199x200
Second—J. E. Chatfield, Texarkana, Ark.	198x200
Third—A. C. Skutt, Morton, N. Y.	197x200

THE WOMEN'S TROPHIES.

G. A. H.—Won by Mrs. L. G. Vogel, Detroit, Mich.; 18 yards, score 87x100. *Second—Mrs. C. D. Moon, Eau Claire, Wis., 16 yards, score 86x100. (*Defeated Mrs. H. C. Snodgrass, Chicago, in shoot-off.)

1st Day—Miss Lucille Meusel, Green Bay, Wis., 46x50. Second Day—Mrs. A. H. Winkler, Chicago, Ill., 47x50. Third Day—Mrs. H. A. Almert, Chicago, Ill., 45x50.

THE PROFESSIONAL CHAMPIONSHIP.

Won by Homer Clark, E. Alton, Ill.	94x100

TAKE GOOD CARE OF YOUR GUN.

To the man who is a true sportsman, who loves his guns, there is a complete charm in a gun the model of which is obsolete, a gun which has outlived its day on account of its honest construction, for his loving hands have jealously shielded it from injury and nursed its joints against wear.

Traces of blue on its straps and of case-hardening on its frame may linger in protected spots on the bright steel, which, in the case of the barrels that glow like mirrors within, has these many years shown a bald spot through the browning of the neighborhood of the fore end as though to dignify its age and arouse a longing to go back through the Octobers with such a gun.

Habits early formed will systematically fight the certain wear of steel on steel. Heavy grease such as is used for gears, is a most soothing lotion for the gun's most wearing point, where fore end and frame meet.

It is easy to dose the trap gun in this way, for a small round metal box containing the grease may easily accompany the gun in its case, and there will be plenty of time to procure a match or sliver of wood to apply the grease not only to the bearing of fore end on frame, but also to the lug that hooks to the bolt on this bearing, and to the lug which receives the locking bolt.

Besides being an effective lubricant when breaking and closing the gun, the grease acts as a cushion for the shock sustained by the lugs and joint at the time of discharge.

While the sportsman may be quite willing to take this time to protect his trap gun in this manner, his field gun may suffer from bearings wiped dry on the cloth interior of his gun case. This may be overcome, before the instant eagerness of entering the cover interferes, by applying a generous supply of grease to the concave bearing of the fore end iron before he leaves home. When the gun is assembled later in the day a twig may be pressed into service and all larger bearings be lubricated from the generous supply in the protected curve of the fore end iron.

It is true the field gun suffers far less than the trap gun, for it may be carried for hours at a time without its being broken open or the gun discharged; nevertheless, it is a comfortable feeling to know that the gun of your choice is being protected as far as human care can go.

Honest wear will denude the steel of the frame and barrels, but if carefully wiped and oiled it will not suffer from rust.

TO BE A GOOD TRAP SHOT.

1. Practice regularly.
2. Eat in moderation of things you like and that agree with you.
3. Keep outdoors as much as possible, but avoid violent exercise.
4. Get eight hours' sleep per day.
5. Smoke if you want to, drink if you are accustomed to it, but be moderate.
6. Don't worry.

Fishing at Catalina.—Mrs. B. O. Kendall of Pasadena landed a tuna recently that weighed eighty-nine pounds, according to George Dank's report on fishing at the island. Yellowtail have made their appearance in goodly number, says the report, taking the place of albicore which seem to have disappeared. Three black bass were brought to gaff and a few barracuda and many rock bass were reported.

SMALL BORE RIFLE CLUBS ARE AN ASSET IN WAR TIME.

Rifle shooting in the United States for many years has for the most part been from the angle of sportsmanship, though all the time there has been a serious aspect on the part of those who appreciated the value of training riflemen to be ready in time of need. That time has now come and every ctiizen who has been taught to shoot a rifle properly will have done 75 per cent of his duty as a citizen in every sense that the word implies.

Official records show that there are approximately 2,3000 active rifle clubs in the United States with perhaps an additional 700 organized but not affiliated with the National Rifle Association of America. But in any event, with nearly 3,000 rifle clubs we have an interesting proposition before us. During the past few weeks press reports indicate that these rifle clubs are serving the useful purpose of "doing their bit" to help our new army "go over the top" by instructing in rifle shooting, these men who have already been drafted into the new National army.

WOMEN BECOMING QUITE ACTIVE IN SHOOTING WORLD.

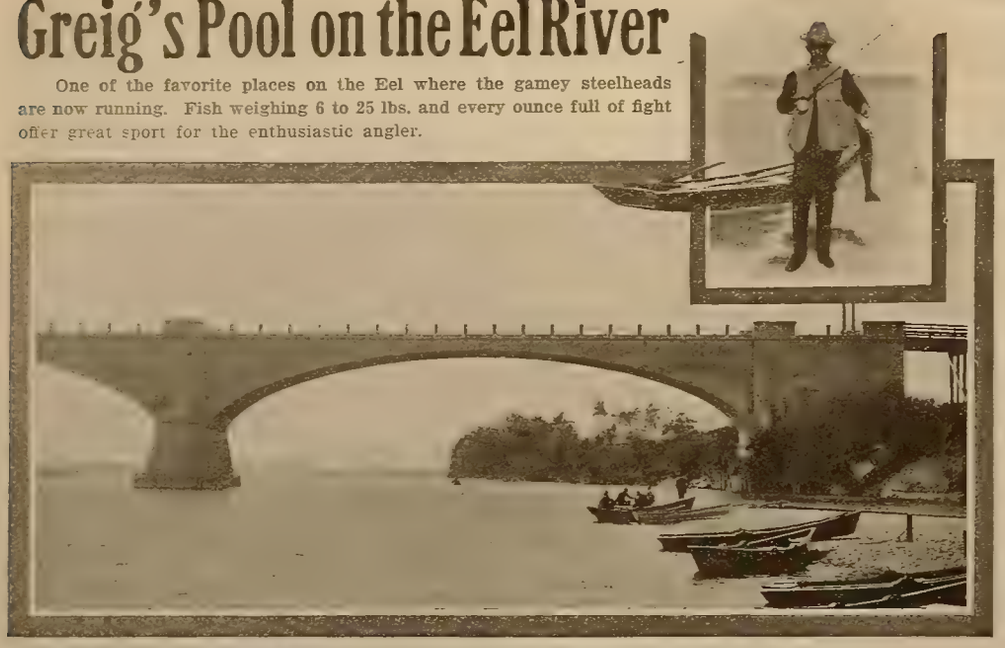
Would you have thought a few years ago that trapshooting would ever be such a popular sport with women throughout the country and the present-day Dianas would surpass many men in shotgun, rifle and revolver shooting?

Shooting used to be a sport exclusively for men and boys. Women never thought of handlinng a gun; in fact, the majority of women would run at the sight of one. Now there are hundreds of the gentler sex shooting regularly at gun clubs and home traps, as well as in the field, and on the same footing as the men.

Trapshooting has been found to be not only a most enjoyable sport for women but an exceedingly beneficial one as well, for it strengthens the muscles, steadies the nerves and makes the delicate, clinging vine a strong, self-reliant woman. It is an ideal sport for the wife and daughter of the farmer, for it is the people on the farm who believe in recreation and outdoor sports. Trapshooting is an all-the-year round sport, and with the exception of very wet, stormy days, can always be enjoyed. The outdoor girl will brave the cold snappy weather in winter or the hot sun of summer to shoot at blue rocks, with the same genuine pleasure that most young women feel in preparing for an afternoon bridge party.

The equipment for home trapshooting can be very simple and inexpensive; a hand trap which is easiily carried around from place to place; a basket of blue rocks, a shotgun, and last but not least, one of the men of the house, or better, a stalwart lad to look after things until the novices learn to handle the gun, and the women are ready for a most exciting and enjoyable afternoon's sport. After a brisk walk, they arrive at the place picked out for their shooting grounds and prepare to learn to trapshoot. First they are taught how to hold a gun properly and how to load and eject, and when these have been mastered they are ready to shoot. After a few trials at a stationary target, they try the flying blue rocks and then the fun begins. Of course, at first, there are more misses than breaks, but that is to be expected and only adds zest to the sport and makes the shooters work harder to score breaks.

After a little practice at shooting blue rocks the women will not only become acquainted with the best of outdoor sports, but will be so used to handling a gun that they will be able to defend themselves with one whenever occasion demands.



A small bore shotgun is the best and most convenient weapon for a woman to use. Even though the aim be not strictly accurate, some of the load will probably reach the mark and do the work.

The man of the house cannot be home at all times, he is frequently called away on account of business, so it is the duty of every woman to learn to use a gun and be able to defend herself and children. Women develop cases of nervous prostration and little children become nervous wrecks from being frightened, and it takes a physician some time to straighten them out. In addition to that there is no more pleasure for them in their home after dark unless the man of the house is there to protect them. All women can learn to shoot and be just as much protection to a house as a man. Once the wife and daughter learn to shoot, there will be fewer burglaries and tragedies reported in the daily papers, and when the disturbers of the public peace learn that women and girls all over the country can handle firearms as well as men, it will no longer be unsafe for women to be left alone either in the city or on the farm.

Down back of Santa Lucias is a swampy valley called Pine Valley. This valley furnishes fine feed in summer, and the heavy screen of pines down to its edge makes it an ideal place for deer. Deputy SWheriff W. A. Oyer of Gonzales says he saw 68 deer, including does, fawns and bucks, in Pine Valley at one time last winter, and his statement is corroborated by a picture of the bunch which appeared in the booklet issued by the Fish and Game Commission. Game Warden Frank Shook counted 43 deer in sight at one time. Pine Valley and the woods in its vicinity should be a paradise for deer shooters.

Greig's Pool on the Eel River

One of the favorite places on the Eel where the gamey steelheads are now running. Fish weighing 6 to 25 lbs. and every ounce full of fight offer great sport for the enthusiastic angler.

SOME POINTS FOR DEER HUNTERS TO REMEMBER.

The new law governing the hunting of deer has been changed as follows:

S. B. 351—Every person killinng a deer must retain in his possession during the open season and for ten days after the close of the open season, the skin and portion of the head bearing the horns, and must produce the same upon demand of an officer, and failure to do so is a misdemeanor.

A. B. 52B—Only one dog per person can be used to hunt or pursue deer. No game can be shipped by mail.

Section 1.—A new section is hereby added to the Penal Code to be number 626 U:

"Any person lawfully killing a deer during the open season may ship such entire deer to any part of the state during the open season for the killing of deer in the district in which the animal is killed, provided that an affidavit is made before a justice of the peace or notary public, in which affidavit is set forth the date and place of killing, the name and address, the number of hunting license of the party killing and shipping the deer, the name and address of the party to whom the deer is shipped. The original of this affidavit must be immediately filed with the fish and game commission in San Francisco, a copy attached to the carcass of the deer shipped and a copy left on file with the notary public or justice of the peace before whom the affidavit is made. After such deer is received in the district in which the season is closed, if it is desired to distribute it to two or more persons, the receiver must at once file with the fish and game commission a list of the persons receiving any part of the deer.

BREAKING A GUN DOG OF GUNSHYNESS IN FIVE DAYS.

During a week's outing, I had the pleasure of watching and learning how to break a dog of gunshyness in a very novel but to my notion a good way to overcome thisgreatevil.

A gentleman in Camden, N. J., had a very handsome English setter dog, sixteen months old. He is a beauty, but was one of the worst gunshy dogs I ever looked at. His owner told me he had asked R. V. Ohl of Merchantville, N. J., a well-known dog man and shooter, to come and try him out, for, as he put it, "Ohl can make an English dog speak German, or do anything he wants him to."

Mr. Ohl arrived on Monday a. m., and after seeing Mr. M. shoot over the dog and the dog run as no dog ever ran before, said: "He is simply a bad case, but I guess I can help him a little. Now get a rowboat and a lot of shells." We rowed nearly to Cape May, where there was a large expanse of water, and here the dog was thrown overboard and the boat moved away from him. Of course, he soon got tired and swam for the boat, and then Ohl began to shoot. At the first shot the dog almost sank out of sight, but he started to swim away. Bang! went the gun again and then Mr. M. called and whistled to him, and when he turned and swam for the boat,—and he certainly wanted to by this time—Ohl again began shooting, but the dog kept coming and the last shot was fired right over his head. Then, while in the boat, the gun was fired a couple of times. After this we arrived at a little island, where he was made to retrieve Mr. M.'s hat and Mr. Ohl would shoot while he was doing it. He dropped it a couple of times and at last was whipped for not doing it to his own(illegible) satisfaction, but after awhile he would fetch all right while Ohl shot only a few feet away.

Next day this was repeated and the third day they took him to the mainland and then back on the meadows. On the fourth day they could throw a stick in the water and he would go overboard after it with the gun cracking over his head, and yesterday, meeting Mr. M., he told me the dog was all right. I told him I was going to write about it to the American Field, and he asked me not to mention his name, as he did not want his friends to know he stuck so long to a gunshy dog, but he added: "Who, but Ohl, would have thought of such a thing—swimming the shyness out of him?" And he said Ohl told him to keep the dog with him all the time and make a regular pal out of him.—[L. M. French, M. D., in American Field.

AGE NO BAR TO TRAP SHOOTERS.

The Grand American Handicap, held on the South Shore Gun Club's grounds overlooking Lake Michigan, is the classic tournament of the trapshooting world and attracted one of the largest aggregations of shooters ever assembled. For the eighteenth time the crack shots of the United States met to determine the individual best qualified to be recognized as the trapshooting champion. Every entrant was a maker of trapshooting history and had earned the right from former performances at the traps to enter in the epoch-making competition.

So long as the male of the species can stand on his hind legs, use his arms and hands, and has at least one good eye, he can still derive almost unlimited pleasure from shooting, regardless of whether he is clad in knee breeches or has snowy hair and long white whiskers. Some of the best shots in the country are way past the "Osler age limit" and their names still figure in the lists of winners at the range or traps. The gray-haired baseball player playing ball is the exception, but you often see him at the traps competing with his son and frequently his grandson, and carrying off the honors.

Take up shooting, in some form. It is not violent exercise, brings you outdoors, and is a sport that you can stick to with the assurance that you will always enjoy it and that your skill will stay with you until you reach that age when nothing remains of life but a host of pleasant recollections. As the rejuvenating influence and a sedative for overwrought nerves, nothing beats trap shooting.

Albicore Mystery Probed by U. S.—The mystery of the albicore remains unsolved. The now famous fish, basis of a new and flourishing Southern California industry, has been the subject of special investigation on the part of the government bureau of fisheries for the last few months, but with little result.

Where the fish passes the winter months, when it disappears from the California coast, where are its permanent feeding grounds, where it spawns, with many other questions remains unsolved.

The power launch Rheingold, chartered by the government several weeks ago, returned recently from a cruise which took the investigators some 200 miles of San Nicholas island.

E. C. Johnson, a naturalist of wide renown, who accompanied the expedition, reported that the voyageestablished only one definite fact, that no albicore are to be found outside of the Japan current. The few caught on the outskirts of the warm water had nothing in their stomachs, demonstrating, says Mr. Johnson, that the albicore's feeding grounds are not off shore.

The government will continue its general investigations started two years ago, until essential facts concerning the habits of this important food fish are ervealed.

Crater Lake Development.—Crater Lake, deepest, bluest and most marvelously rimmed and colored lake in the wide world, will be made more accessible to visitors this season than ever before. The new National Park Service has taken hold of its development in earnest and the first results is a fast daily automobile service from the railroad station at Medford City, Ore., up the picturesque Rogue River Valley, to the inn on the edge of the rim.

Another practical improvement is the building of a fine trail on an easy grade from the top of the volcano rim down to the edge of the water. The former trail made the descent of a thousand feet exceedingly brief in duration; but the coming back was a feat that taxed the sturdiest lungs. Many visitors did not see the wonders of the lake from the launches on its surface because of the exhausting climb back to the inn. The new trail makes a detour among several highly scenic spots and reaches the waterside through a gentler and more beautiful canyon than the old. There will also be additional launches on the lake.

Other new trails are being constructed to wonder places on the rim, and the rim road for automobiles is progressing.

Good for the Dog.—Here's a skin soap that is a real good thing as a tonic and cleanser and destroyer of fleas and lice. And if care is taken it may be used with safety on young puppies which sometimes become infested. It is an old remedy and thoroughly reliable: One pound of Crown soft soap, 10 ozs. Mild Mercurial ointment, 1 oz. Powdered Camphor. Dissolve the soap, add the other two ingredients, and stir well, then set in a cool place. Very good for all toy dogs, as well as the more robust.

A Friend in Need.—One day, at an Irish seaport, a terrible fight was taking place on the pier between a Newfoundland dog and a mastiff, when suddenly both fell into the sea below. The Newfoundland, of course, did not mind this mishap and at once swam to the shore without any difficulty. As soon as he landed, he looked around and saw the mastiff, who could not swim, being quickly carried out to sea. The noble dog, instead of rejoicing over his enemy's misfortune, plunged into the water, took the drowning creature by the collar, and keeping his head above water, towed him safely to shore. After this the dogs were known to be the best of friends and never to quarrel again.

Northwest Washington Trapshooters' League.—With rainy weather furnished to the last tournament of the Northwest Washington Trapshooters' League the affair staged by the Green Lake Gun Club on Sept. 9th proved a success, with an attendance of fifty shooters. This league shoot was the first of the season which was shot through rain and had it not been for the dampness there undoubtedly would have been seventy-five in the line-up.

Ties and shoot-offs were in evidence through the program. J. B. Lewis and C. L. Templeton furnished the high scores in the Interstate program, each of these shooters finishing with 95 out of the hundred. In the shoot-off for first prize Lewis won, giving Templeton second. George Miller of Bellingham and George Baker tied with the second high amateur score each of these men, finishing with 94. In the shoot-off for the third prize Miller won.

Among the professionals in the Interstate program, Frank Riehl of Tacoma stood high score, as well as high gun among all the shooters, with a total of 96. I. M. Fisher stood second high professional with a score of 94.

In the Green Lake Handicap of fifty targets John Ruppe stood alone for first prize—a sterling silver vase—with a total of 48. Fiive shooters tied for the second prize in this event with scores of 47. In the shoot-off George Baker won.

The Times medal was up in competition on the first 25 targets of the handicap. L. S. Barnes won the shoot-off among five shooters tied for this prize. The scores were 24 each. John Ruppe, with a score of 25, stood alone in winning the Green Lake Merchants' Trophy which was the prize for the second string of 25 targets in the handicap.

The Green Lake Gun Club team, composed of Barnes, Kerr, Carstens, Hopkins and Call, stood high in the team race with a total of 227. The Bellingham Gun Club team, with Rice, Brackney, Converse, Kienast and Miller, were second with a total of 225. The Seattle Trapshooters' Association's team, with McKelvey, Templeton, Fleming, Searle and Kinzer, was third, with a total of 224.

G. A. Conklin with 20 and L. S. Barnes with 19 furnished the two high scores in a shoot of twelve pairs of doubles.

Old-timers in the trapshooting game welcomed "Dad" Edwards, one of the founders of the game in this locality. Edwards did not appear on the grounds until after the regular events were over but shot in the "doubles" event.

Golden trout have been found to thrive in other than their original haunts, and the state fish and game commission is expending considerable time and money in planting these gamey beauties all over the state. Trout fishing next year should be at its best, if the work of the past year is to show any results. The commissioners have taken particular pains with their work and expect a record crop of trout.

Sportsmen's Row

The Oregon State game warden will appoint 100 Boy Scouts game wardens to co-operate with the department in enforcing fish and game laws.

✤ ✤ ✤

Stanton A. Bruner, secretary of the Vernon Gun Club, Los Angeles, announces that the club will hold a registered tournament on September 30, October 1 and 2.

✤ ✤ ✤

Dove shooting is reported to be excellent in Shasta County. From Placer County comes a report that doves are very plentiful and that comparatively few hunters are in the field.

✤ ✤ ✤

To establish the Eastern lobster on the Pacific Coast, as was done with the striped bass many years ago, 5,400 Maine lobsters were liberated recently off Orcas Island, near Seattle, Washington.

✤ ✤ ✤

To those who are lucky enough to bag a buck, the game warden issues a warning that the horns and hides of all deer must be kept during the open season. Failure to do so may result in a fine of not less than $50 nor more than $500.

✤ ✤ ✤

Thirty thousand Loch Leven, Eastern brook and Rainbow trout have been released in Shaver lake, Fresno county, by Game Warden S. L. N. Ellis and General M. W. Muller. The fish were allotted to the Shaver Lake Fishing Club and turned over to Warden Ellis by General Muller.

✤ ✤ ✤

The rice fields around Colusa, Davis and Willows teem with wild ducks. Old-timers say they never saw anything like it so early in the season. Sprigs and mallards seem to predominate and all are enthusiastic advocates of rice culture, which is attested by the way they flock to the fields to feed on that succulent grain.

✤ ✤ ✤

Arie's work in the Grand American Handicap netted him $743.30. Larson received the same amount. In the three events in which he qualified for money prizes Arie won $896.70. No trapshot ever performed as well in a Grand American tournament as Arie did this year. It is doubtful if his performance from 22 yards will ever be equaled.

✤ ✤ ✤

Rice growers have been given permission to shoot blackbirds as they have become destructive pests in the rice fields. It is said of them that they will alight on a stalk of rice where their weight bears it down to the ground and leave the head riddled and worthless. By the way, blackbirds made fine pot-pie, especially those that have fattened on a liberal rice diet.

✤ ✤ ✤

Along about the first of last month George Shattuck, Walter Hughes and Leland Milliken killed a lioness up in Lake county measuring nine feet and four inches and weighing 142 pounds. This occurred near Horse Mountain. The three men had been out rounding up cattle when their dogs rounded up the lioness. Milliken gave the fatal shot and he gets the skin.

✤ ✤ ✤

The steelhead are now running in the Eel river. Fish weighing from six to twenty-five pounds are being taken by expert anglers with a seven ounce rod. Greigs, Van Duzen, Weymouth, and Fortuna pools are all yielding big catches. There is no greater fun than to have hold of a lively big steelhead with light tackle. It's a fair fight to a finish on both sides.

✤ ✤ ✤

A couple of years ago a doe with horns was shot above Mineral King by a Visalian. He naturally presumed he was shooting at a buck. The story was doubted for some time. This year, however, three such cases have been reported and there sems to be no longer any reason to question the existence of these freaks. If they become more common it will be necessary for the game laws to be modified so as to take cognizance of this condition.

✤ ✤ ✤

The long expected run of salmon in the bay has commenced. A few straggling fish have been caught during several weeks past, but in the last few days a number of good catches have been made in Raccoon Straits and off the coal bunkers at California City. The largest fish taken outside the heads this year was brought in by a party in Charles Trulsen's launch. It was a monster to take with a rod as it weighed a trifle over seventy pounds.

✤ ✤ ✤

At the Grand American Handicap the throwing of 303,258 targets means that the same number of shells were fired. In those shells were more than a ton of powder. The shells and targets meant an outlay to the shooters of $21,229.06. The entrance fees of the shooters and the purses offered by the Interstate Association amounted to $20,000. It is estimated that the expenses of the 798 shooters to the tournament would average $100 each—or, in round figures, $800,000. Speaking by and large, this is a considerable amount of money for one week's amusement. It only goes to show the size of the tournament and the great interest that is manifested.

San Diego, Cal., fishermen are meeting with such a heavy run of tuna that for the first time the three canneries are unable to handle all the fish brought to that port. More than 100 tons were left on lighters in the harbor for the workers to handle in one day. The fish are running in unprecedented numbers into the harbor a short distance off Point Loma, and tuna boats averaging three men to a crew are making from $120 to $650 a day, it is estimated.

THE HUNTING SPIRIT.

Hunting is the most ancient and the most complex game of skill known to the human race. It makes greater demands upon physical strength and endurance, moral determination and patience, mental quickness and flexibility and nervous co-operation and control than any other pastime.

The successful hunter is the embodiment of the supreme development of the human animal. Had the ancestors of the race failed as hunters, humanity would be known simply by the fossil remains dug up by the scientists of some more efficient form of life.

Whether he consciously knows it or not, the man who goes hunting is simply seeking an answer to the questions:

"Have I brought this magnificent brute, given to be the servant and executive of my intellect, to its fullest possible development?

"Is it sound in heart and wind, staunch in bone and muscle, keen in sense and reason, patient under toil and hardship, quick and accurate in action, fit to express a man's soul?"

All our imposing superstructure of spiritual, mental and material civilization is founded upon the simple, primitive ability to get meat.

Going hunting is the average man's way of inspecting the foundation of his being.

We personally entertain the belief that when this foundation of animal efficiency crumbles beneath a man—or a nation—the superstructure erected upon it, be it ever so imposing, will ultimately fall down—if it is not previously pushed over.

A REAL SPORTSMAN'S CALENDAR.

To the average sportsman, the year begins in September. Then, Nature starts to paint the forest leaves a brighter tint, the nuts are nipped with the first frost, the Autumn haze clothes the hills, and—the game seasons open.

A sportsman whose heart responds to the September call of the hunt suggested to the Remington UMC people that a calendar for the tribe of Nimrod should be issued with this month of charm leading all the rest. So the Remington calendar comes to us this year bearing leaves for all the months from September, 1917, to December, 1918, inclusive.

In another respect this calendar is a precedent breaker. The full color sketch which adorns it is in Lynn Bogue Hunt's best style—in fact, good judges say that Mr. Hunt never did a better thing. Have you had a covey of quail whir-r-r up right under your feet? If you have had this experience, you will get a much better view of the birds and in just as true color when you see this splendid calendar. Should you be looking forward to coming upon your first quail, Mr. Hunt here saves you the trouble of going to the fields. Just below the sketch is another new note—an extremely artistic view of the mammoth Remington UMC factories.

Sportsmen the world over will treasure this calendar—those who are fortunate enough to get one—and when its sixteen leaves have gone, will frame it "for keeps."

Ducks Do His Angling.—Henry Cecil of Cecilia, in a lake near his home in Kentucky, has devised a most successful and novel way to catch fish.

He has a number of ducks that frequent this lake. He ties a short fishing line to the duck's foot with the hook baited. The duck swims about the lake, fishing all over it. When a fish strikes he pulls the duck's leg, and Mr. Duck, not understanding what this means, turns and flees to the shore just as fast as he can.

Cecil takes off the fish, rebaits the hook and throws the duck back into the lake to renew the fishing. He has a number of ducks fishing for him at the same time and has caught 100 pounds of fish this way.

The State fish and game commission of California is compiling data preparatory to bringing test cases into court within the next few days as to whether fish and game shall be transported by parcel post. It is hoped that this will end the controversy in regard to this matter which has prevailed between the state and the post office authorities for several months. The state commission opposes sending fish and game by parcel post, because the government will not allow accepted packages to be inspected. The contention of Postmaster Charles W. Fay is that the law, giving the commission power to forbid the shipment of fish and game, is unconstitutional. Acting on an opinion from the postal authorities, he has been accepting both.

✤ ✤ ✤

Sportsmen's clubs of Oregon have heeded the appeal of W. B. Ayer, Federal food administrator for Oregon, to refrain from feeding (baiting) wild fowl with wheat, and will not scatter grain on the preserves this year.

..Seattle Trapshooters' Association Shoot Sunday, August 26th.—Ideal weather conditions prevailed for the event on this date. C. E. McKelvey and Ralph Kinzer furnished the high score in the fifty bird event by each dropping forty-nine. Kinzer stood a good chance of going straight but dropped the last target.

Two visiting shooters, Dr. Sprattley of Bellingham annd J. Cooper of Tacoma, furnished the second score with forty-six each.

McKelvey finished high also in the 100 target event with a total of ninety-eight. Dr. Sprattley went second with ninety-five to his credit. J. Cooper and McKelvey topped the list in 12 pairs of doubles by each shooting twenty-one.

Burning the Aigrettes.—Ten thousand dollars' worth of aigrettes, the beautiful bird plumes of the snowy herons, were placed in a pile and burned in public recently by the Conservation Commission of New York. These egret feathers represented a year's seizure by the officials in their efforts to stop the illegal traffic, and yet they afforded only a passing glimpse of one of the most cruel and inhumane practices ever directed against innocent bird life.

The snowy heron whose plumage constitutes the "white badge of cruelty" seems destined to be forever removed from the world's birds. Laws prohibiting the sale or possession for sale, which several States have passed, are inadequate to stay the slaughter and traffic that is fraught with the greatest of cruelty. The plume birds have been nearly exterminated in the United States and Mexico, and the same condition of affairs will soon exist in tropical America. This extermination will come about because of the fact that the young are left to starve in the nest when the old birds are killed. Could the wearing of the aigrette be made a misdemeanor these birds of surpassing beauty might yet be preserved.—[Dumb Animals.

Rabbit Chases Bulldog.—An Angora rabbiit that has more pep than an Angora goat is the proud possession of Mr. and Mrs. William G. Sutton of 1008 Fifth street, Santa Monica. The rabbit, although trained to come at call, like a dog or a cat, is much more ferocious and independent than the feline or canine pets ever thought of being. More than once the owners of the latter have been forced to rescue their pets from the rabbit's clutches as it pounced on an unprotected dog or cat from ambush behinnd a big palm on the lawn.

A particularly vicious bulldog, that had heretofore terrorized the neighborhood, had a habit of attacking its opponent's tail, and then, when the latter turned around to avenge the injury, the bulldog would seize it by the throat and all would be over unless there was a rescue.

One day recently the bulldog happened by, and mistaking the rabbit, because of its size and busy appearance, for an Airedale, he made for it in deadly silence, but with bared fangs. The ugly teeth met with a clash, as only thin air was found in the place where the tail ought to ge. The dog was so disconncerted and chagrined at this inexplicable failure of his usual mode of attack that he turned and ran, with Bunny Sutton in close pursuit. Owing to the latter's superior speed the bull was soon yelping with agony and fright, as the rabbit took a nip at his hindquarters at every leap. Only the intervention of his owner saved Mr. Bull from an ignominious defeat.—Los Angeles Tribunne.

Peters Points.—High professional average at Austerlitz, Ky., May 24, was won by "Pop" Heikes, 138 ex 150, using Peters shells.

At the Nebraska State shoot, Fremont, May 23-25, Mr. R. A. King of Delta, Colo., using the "P" brand shells, scored 433 ex 450, winning second amateur average. Mr. King also made high score in the State Championship event and the longest run of the tournament, 180 straight. Users of Peters shells won five of the seven Interstate Association trophies.

Mr. Fred Gilbert broke 148 ex 150 at Gladbrook, Iowa, May 24, winning high general and high professional averages with Peters "steel where steel belongs" shells.

At the Connecticut State shoot, Norwalk, May 25-26, Mr. T. H. Keller of New York was high professional, 232 ex 250, and Mr. L. F. Curtis of Boston won the New England Handicap, 91 ex 100 from 21 yards, both shooting Peters shells.

At Ashland, Pa., May 23, Mr. W. H. Oneil of Ashland was high amateur, 136 ex 150, and Mr. Neaf Apgar high professional, 135, both using the "P" brand shells.

At Denver, Colo., May 27, Capt. A. H. Hardy won high professional average, 96 ex 100, and also made the longest run, 61 straight.

At the Liberty Gun Club, Dayton, Ohio, May 30, Mr. Ed. Cain of Dayton was high gun over all amateurs and professionals with the score of 100 ex 100 aud a straight run of 172. He shot Peters factory loaded shells.

High professional at Canton, Ohio, May 30, was Mr. R. O. Heikes. He shot Peters shells and scored 147 ex 150. He was also high on the entire day's shooting with a score of 194 ex 200.

High general average at Eau Claire, Wis., May 26-27, was won by Mr. J. E. Dickey, who scored 281 ex 300 with the "P" brand shells.

(Continued from page 7)

was a brilliant sight, and offered an excellent opportunity for display. Four-in-hands, tandems, well-matched pairs, saddle horses, the selfish but tony little single-seat,—all were represented in the most up-to-date style. Some of the most conspicuous four-in-hands were driven by Chas. Crocker, Geo. Newhall, "Lucky" Baldwin, Simon Semour, "Bob" Graves and P. A. Finnigan. Theodore Kearney, the "raisin king," drove a beautiful black tandem. Handsome "Hank" Hunt handled a showy pair skillfully. Joseph Grant and wife in a stylish carriage represented the quiet drivers. W. S. Hobart, well mounted and with his little son on his pony, were both much admired. "Jim" Fair, in broad hat, ambling along, looked the typical Californian, his daughter Virginia in her canopy-top phaeton handled a rakish-looking trotter to perfection. Aristocratic looking Adolph Sutro rode his mount with unbending dignity. As usual, we must stop, but not for want of material.

This long climb, day after day, grew monotonous; so a cut through the hill was decided upon. The opening of this cut was a momentous event, and General John McDowell, in his enthusiasm, waited five hours for its completion, in order to be the first to drive through it. This ambition was gratified, although Capt. Sam Thompson, then chief of the park police, had to ride his horse alongside, and hold the buggy to keep it from tipping over.

The strong personal interest has paused, and the park now truly belongs to the public, and, alas! to the automobiles. BACK NUMBER.

New Hatchery Planned.—Preparatory to establishing a new and much larger fish hatchery on Lake Tahoe, W. H. Shebley, Superintendent of State Hatcheries; E. W. Hunt, field agent, and R. D. Duke, attorney for the State Fish and Game Commission, left on the 13th for the lake to look over the ground and make recommendations.

GUESSING THE DISTANCE.

Both the military rifle shot and the big game hunter are interested in estimating the distance existing between the rifle and target and that this ability is far from being well developed is evidenced by the frequent errors made in the field. Those who shoot the shotgun are by no means exempt from this inability to judge distance, so it becomes a matter of some importance to learn a few simple rules by which distance can be measured either with the eye or the ear.

The ear is put at some disadvantage when depended upon during battle, but at other times it may be remembered that sound travels at the rate of about 1100 feet or 366 yards per second. If the number of seconds between the flash and the report be carefully taken and multiplied by 366, the product will be approximately the distance in yards to the gun.

The eye will distinguish features plainly at 30 yards, and up to 100 yards all parts of the body and slight movements can be distinguished. At 500 yards, movements of arms and legs can be seen. At 1000 yards a line of men resembles a broad belt but the direction of their march can be determined.

At 1200 yards infantry can be distinguished from cavalry but at 2000 yards a mounted man resembles a speck or spot.

Training the eye to judge distances is a regular part of a soldier's instruction, but there is no reason why the mere citizen should not endeavor to train his eye so that reasonable accuracy is obtained, and the ways to do so are so simple that the training can be accomplished while walking along the streets or country roads.

Establish first a unit of comparison, either 50 or 100 yards, and when able to judge one or other of these distances with a minimum of errors, imagine them doubled, tripled or quadrupled to get longer distances.

Measure off, say, 50 yards by the eye, then pace it to verify judgment. When able to judge 50 yards, estimate 100 and pace it.

If in the open country, estimate 500 or even 1000 yards and pace the distance. Almost always the distance will be over-estimated until practice begins to eliminate the personal error, and it will be found that almost unconsciously the eye will learn how to judge correctly, or at least with a comparatively small error.

Judging distance over water is more difficult than performing the same feat over land. Broken ground also adds considerable to the difficulty of correct estimation. Using a Weldon range finder is a good sport though the instrument is expensive and I have often wondered why its use has not been adopted by Boy Scouts, teaching as it does a simple lesson in geometry while measuring very closely the real distance desired.—[American Sportsman.

GAME IN MARIN COUNTY.

The deer season in Marin county this year was disappointing in some sections, with the result that not half the deer were killed this year that were a year ago. In all the country contiguous to Mt. Tamalpais the hunters enjoyed good hunting, and in many instances procured the limit. The deer this year were rather small, the largest deer having been killed in the city of San Rafael in Black Canyon, back of the Hotel Rafael.

The hills are alive with does and fawns, but the forked horn is rather scarce and the hunter must have good dogs to procure any sport.

Some of the hunters have been violating the law by killing from four to six deer each. These parties should be arrested and prosecuted, as they should not be permitted to enjoy privileges that are denied others who are law-abiding citizens. It would not be a bad idea to close the season for one year in Marin county in order to give the bucks a chance to accumulate. The preserve on Mt. Tamalpais will give the deer an excellent chance to multiply and it will only be a few years when Marin county will be the finest deer country in the State.

From all over the county comes the report that quail are plentiful everywhere in the foothills. The auto hunter is apt to get in his work before the season opens, but a jail sentence for shooting on the county road would settle the illegal hunting of quail out of season. A well known woman of the valley, who drives an automobile, takes a delight in shooting into flocks of quail along the Lucas Valley and Nicasio roads. She can be sent to jail just as well as a man, and the chances are that she will be arristed before the quail season opens.

✤ ✤ ✤

On San Pablo Bay and in all the lagoons in the county the sprig have arrived in flocks, and are as tame as domestic ducks, with the result that some good bags have been killed, regardless of the law. One hunter we heard of killed 17 in two shots, and another did even better than this with five shots from an automatic. In Lamatour Bay thousands of sprig are in evidence. The same can be said of the inlets of Tomales Bay.

We are informed that several persons of the Bolinas side of the mountain and in the vicinity of Fairfax have been seen poaching on the Mountain Preserve. It is silly to have a preserve unless it is patrolled. It should be a settled fact that all persons arrested for poaching on the Mountain Preserve should receive a jail sentence. This would soon put a stop to hunters entering the preserve.

There has been some question as to the exact lines of the preserve on the mountain. The preserve extends from Fairfax and includes all property east of the Fairfax Grade from Fairfax over the summit to the base of the hill on the Bolinas side. It also includes all lands south of the Northwestern Pacific Railroad right of way from Manzanita station to Fairfax station and the county road to Mill Valley Junction due south to the ocean. The Pacific ocean is the boundary on the south from Tennessee Cove to Manzanita station, on the west from Manzanita station along the Northwestern Pacific Railroad to Fairfax station, and the Fairfax and Bolinas road is the boundary on the north. People are permitted to trespass on this preserve, but anyone caught carrying firearms of any kind will be arrested and prosecuted.—[San Rafael Independent.

AND HERE'S A BIRD WITH HANDS.

Science has discovered a bird which walks on all fours with the aid of hands on its wing tips, dives under water like a reptile, and is so little like any other bird it can scarcely fly at all.

Dr. William Beebe, curator of birds at the New York Bronx zoo, and member of the New York Zoological society, has sought out and described this most remarkable bird living on earth today.

It is called the hoatzin and its home is in British Guiana, along a few tropical rivers.

Dr. Beebe believes this bird is a survival from dim, distant geologic ages, and that it is the "missing link" which separates reptile, bird and mammal. Protected by its strong body odor, which resembles musk, and by the bunduri pimpler, or thorn tree, upon which it feeds and whose tremendous thorns "would defend a trench against the most outrageous regiment," as Dr. Beebe declares, the hoatzin has defied the tide of evolution which has swept away so many ancient forms of life.

The hoatzin, although unmistakably a bird, is almost unable to fly.

At the ends of its wings are unmistakable mittens or hands, with which it is able to grasp branches on which it makes its home.

The nests are invariably built over the water, on the forks or crossing of two branches. The young birds live on the soft leaflets of these thorn trees.

Not only do they resemble mammals by creeping about on all fours, using the wing tips for forefeet, but the head and neck distinctly resemble some strange extinct reptile.

The most astonishing thing about this remarkable bird, however, is that it dives and swims under water like a reptile.

Field Trials on Coast.—It was like the days at the time of the field trials up in the St. Francis Hotel the other afternoon. S. Christenson, secretary of the Pacific Coast Field Trials Club, was making ready to take up his new duties at Fort Reno, Oklahoma, as a captain in the Quartermasters Corps, and a number of the devotees of this aristocratic sport gathered around the festive board to bid him adieu.

President A. G. Wilkes took occasion on behalf of the club to present Christenson with a beautiful wrist watch that will likely come in handy during the line of duty. Of course, Sir J. Walter Scott had to make several speeches telling how Chris would be missed. All agreed that the hustling secretary had done much to make the trials a success and it was then and there decided to let him remain as secretary with Roy S. Avery as his substitute.

Among those who were present were John H. Rosseter, Judge Phil M. Wand, Dr. Arthur Beardslee, J. S. French, A. G. Wilkes, S. P. Eastman, James Woods, Roy S. Avery, Mr. Martin, Colonel Dorsey, and J. Walter Scott.

The devotees are looking forward to the field trial sport prospering on the Pacific Coast. The fun will start in September, when trials are staged in the Northwest. A number of the fanciers are counting on having their setters and pointers represented in the Oregon and Washington events.

The Pacific Coast Trials will not be held until January, 1918, and the members are anticipating much better results in trying out their favorites.

Indicative of California's increasing importance as a swine breeding state, nominations to the Poland-China futurity in the swine exhibit of the California State Fair this year, exceed in number nominations to similar futurities at the state fairs of thirteen of the twenty states holding the event. Several of he states ouranked by California are in the heart of the corn belt and ordinarily are given top positions in the list of pork-producing states.

In the announcement by the American Poland-China Record Association and the Standard Poland-China Record Association of nominations for the 1917 Poland-China futurities, California with 25 nominations leads: Wisconsin, 24, Indiana, 23, South Dakota, 22, Kansas, 21, Oklahoma, 21, Oregon, 21, Montana, 21, Ohio, 20, Idaho, 20, and Memphis (Tennessee, Kentucky, Mississippi and Arkansas), 20. Nebraska with 25 nominations is even with California and Iowa, with 47, Illinois, with 35, Missouri, with 29, Minnesota, with 28, and Texas, with 26, are ahead.

Entries received by the State Board of Agriculture in other Poland-China events likewise emphasize the rapid growth of the hog-raising industry in California. Although entries could be made until August 8 and many last minute applications were expected, available space was taken up rapidly by the many breeders from all sections of the state, who will exhibit. Each exhibitor will show from 20 to 30 head to the herd.

COWS ON PASTURE MAY NEED GRAIN.

Does it pay to feed grain to cows on pasture? The results obtained at the University of Missouri College of Agriculture indicate that it depends largely upon how much milk the cows give and how good the pasture is. If a cow is producing less than a pound of butter each day the necessary food can be obtained from a good pasture. If she produces more than this some grain can be fed profitably. This means that a Jersey cow should be able to get enough food from grass to make about 20 pounds of milk daily and a Holstein about 25 to 30.

It will pay to feed grain to all cows which give more than this amount since high producing animals cannot gather sufficient feed in the form of grass. A cow giving a pound and a half of butter daily should receive about five pounds of grain daily, and one giving two pounds of butter should receive seven or eight pounds of grain. When not more than four or five pounds of grain are fed it may consist of corn. If more than this is needed, some bran or a small amount of cottonseed meal should be added. These recommendations hold good only when pastures are good. In late summer it will often be necessary to feed more grain to high-producing cows or to give some silage or green feeds to help out the pastures.

"Every Fellow Helping the Other Fellow."

In a press bulletin issued by the California State Council of Defense, the following tribute to the achievement and patriotism of Yolo county is given wide publicity over the country. The blessings combined in California soil, sunshine and the spirit which prompts every fellow to help the other fellow has made the result possible. The statement of the California Council of Defense is in full as follows:

"The example set by Yolo County in increased crop production and all-round patriotism is being commended for emulation to other counties of the state by the State Council of Defense and by Governor Stephens.

"Here are some of the things which Yolo county, which is one of the richest agricultural regions in California, already has done in the cause of patriotism:—

"Raised crops worth twenty million dollars.

"Increased its crop production approximately $7,000,000 over that of last year.

"Subscribed to Liberty Loan bonds on a basis of $47 to every person living in the county.

"Contributions to Red Cross will average $1 or more for every inhabitant of the county.

"Yolo county's crop production alone shows an average of $1,400 in foodstuffs for every person in the county. In some instances the county increased its production of certain foodstuffs over last year by close to 100 per cent."

Yolo county, in area, is one of the little counties of the state. The last government census gave it a population of less than 14,000. The deposits in the various banks of the county aggregate about six millions. Its plan of county government is frequently referred to as the "Yolo Plan."

THE FARM

CALIFORNIA LAND SHOW.

The California Land Show which will open in San Francisco October 13th, will devote much space and labor to the demonstrations of raising, preparing, marketing and ultimately consuming various California products.

To this end, many new features are being added to the Show, which in point of area, for instance, as well as in point of attractions, will be doublefold over that held in 1913. A model kitchen is to be installed, showing the best and most approved methods of preparing California appetizing dishes. There will be daily culinary lectures with the demonstrations and it is the plan of the organization to create as many new dishes consistent with the present national plan of economy, as possible.

The California Land Show Committee has opened this culinary department at 510 Mills Building, San Francisco ,and has placed it in charge of Miss Aperitif, an international food expert.

It is the plan of the Committee to open a contest for one hundred prizes for the best 100 recipes to be presented, made of any of the following commodities: California rice, used alone or in conjunction with meat, fish or fowl; prunes, raisins, dried figs, dried black or logan berries, and oranges. Recipes in which any of these are used as a base will be passed upon by a committee, with Miss Aperitif.

Of these foods, a separate department is to be used as a vehicle for an exhaustive demonstration of California rice, beginning with lectures on soil and through the various stages of planting and harvesting to marketing and the ultimate consumption.

Rice, as all agriculturists know, is fast becoming a necessity to the American household, and it is therefore one of the most profitable of industries. Certain soil in all parts of the State is well adapted to the cultivation of rice and it has been said that the only chance of failure with the crops is the lack of knowledge of the farmer.

Rice will be shown from the time of the paddy, or unhusked rice, the very first natural product, through the polishing stages and even through the process of cooking and serving.

Dean Hunt of the University of California is at work on a plan, with Robert C. Newell, President of the California Land Show and O. C. Stine, also an official, for giving a condensed course in horticulture and agriculture. This course, which will be given in the two weeks of the Show, will be so arranged as to include what would be a normal year's course in the University. The course will comprise dry farming, irrigation, the husbandry of stock, the adaptability of plants to various districts and all of the channels of the newest methods for scientific farming. Thus, it is the plan of the ever helpful Land Show Committee, to make it possible for visitors from out of the city to combine learning with pleasure, and to avail themselves of a tabloid course in these two pursuits under the direction of one of the greatest experts in scientific farming in the world.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENY,
BONY TUMORS,
LAMENESS FROM SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES

BUNCHES or BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANYONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made Every bottle sold is warranted to give satisfaction Write for testimonials showing what the most prominent horsemen say of it. Price, $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

AN OPPORTUNITY

I have two very fine saddle colts, stallions—a yearling and a weanling—for sale——

By LE GRAND McDONALD and out of Black Belle, by Black Rose, by Montrose 106.

The yearling won the colt class at the 1916 California State Fair, this year's colt is a better one.

I want to see some good saddle horse lover who desires to own a future champion get these colts. Prices right.

Ask Dad for a Rifle!

Dad knows that it is just as important for his boy to learn how to handle a gun safely as it is for him to know how to swim. Dad also knows that a gun will teach his son responsibility, self reliance and self control.

Tell Father you want a Winchester .22 calibre rifle. Remind him that a boy's natural interest in a gun is going to make him get his hands on one sooner or later. It is going to be mighty fine if Dad can get out to enjoy the sport with you and teach you the correct use of a rifle.

Have you heard about our Winchester Junior Rifle Corps? If not, ask your nearest dealer for a booklet explaining how any boy or girl under sixteen can earn a silver "Marksman" or gold "Sharpshooter" medal. At the same time get the proprietor of the store to let you "try on" a Winchester .22 rifle.

In case your dealer cannot supply you this information write direct to us.

Phoenix, Ariz. ..... Nov. 12 to 17

THE GRAND CIRCUIT.

Atlanta ..... Oct. 15 to 20

The race meeting at Phoenix, Arizona, November 12th to 17th inclusive, gives every promise of being one of the very best, from a racing viewpoint, held in the United States this year. The reputation of its equable climate and perfect race course has created a widespread interest. The splendid purses and stakes offered, and reports of the cordial welcome extended to visiting horsemen and their friends, have also had a wholesome effect. Many of the leading horseowners of Kentucky and the far Eastern States have signified their intention of sending some of their best trotters and pacers there, in charge of the most famous reinsmen in the United States, to compete in the races and also get time records for their fastest horses. Horsemen from Oregon, Washington, California and Canada will also assemble there with the best horses that have appeared on the Pacific Coast this year, and with their Eastern brethren will form an aggregation that has never been known in the history of light harness racing before.

✤ ✤ ✤

With the death of Captain William Matson, of the Matson Navigation Company, another ardent admirer of the harness horse has passed away. Capt. Matson always owned a few good horses which he delighted to drive in the park and in driving club races. He was born in Sweden in 1849 and has lived in San Francisco since 1867, where from a small beginning he amassed a fortune that is estimated to be in excess of $3,000,000. He was the founder of the Matson Navigation Company, was heavily interested in sugar plantations in the Islands, in California oil companies, at the head of the Wonder Water Company, and a director in the National Ice Company, and many other large enterprises. He was actively identified with the Pacific Union, the Bohemian, Commonwealth, and other clubs in San Francisco, and was one of the commissioners of the Panama-Pacific International Exposition. Notwithstanding he was a very busy man in managing his extensive business affairs, he used to make it a point to drive his horse with great regularity and has always been a prominent figure on the old road to the beach and the speedway in the Park. Although Capt. Matson had been ill nearly a year, his death came as a sudden and unexpected blow. He left the office Tuesday, the 16th, only an hour before his fatal attack, and appeared in excellent spirits. Capt. Matson rose from the position of a sailor before the mast to one of the wealthiest shipping men on the Pacific Ocean, with eight steamers under his control doing a tremendous business. He was recognized by all as being a man of sterling worth, great ability, companionable, charitable, and a good judge and lover of horses.

✤ ✤ ✤

In another column of this issue of the Breeder and Sportsman will be found a letter from Mr. C. A. Harrison in which he announces his election as Vice-President of the Western Association of Trotting Horse Breeders. No better selection could have been made, as Mr. Harrison is one of the most enthusiastic lovers of the light harness horse west of the Rocky Mountains. He has always been a booster and has spent much time and money in the breeding and development of both trotters and pacers and has attained quite a measure of success in both these lines.

The Pacific Trotting Horse Breeders' Association gave its first race meeting on the old Bay District track in San Francisco in 1889 and followed it with a record meeting in November, the same year, at which time Sunol captured the three-year-old record of 2:10½. Her performance was followed by Regal Wilkes taking the two-year-old stallion record of 2:20¾, and Faustino the yearling stallion record of 2:35, which was considered honor enough for one day in one State. These colt performances were followed at the same meeting by the stallions Stamboul and Palo Alto trotting in 2:13¾ and 2:12½ respectively, and taking it altogether, it was unprecedented in the annals of the trotting turf up to that time.

The associaion was organized with a membership of one hundred and had on its roll the names of all the prominent breeders in California, including such men as Leland Stanford, William Corbett, W. S. Hobart, H. W. Meek, Henry Pierce, L. J. Rose, Monroe Salisbury, Col. Harry I. Thornton, Count Valensin, George Woodard, A. T. Hatch, Isaac de Turk, Marcus Daly, Martin Carter, A. W. Foster, Dr. Hicks, Fred Loeber, L. U. Shippee, C. W. Smith, A. B. Spreckels, Mat F. Tarpey, Josiah H. White, and many others.

For the last twenty-eight years the association has given from one to four meetings each year and has been one of the largest and most successful organizations of its kind in the country, having disbursed over $400,000 in purses and stakes. Seventeen years ago the association started a series of futurity stakes, the original stake being for $6,000. The stakes were so popular that the nominators received more than the advertised amount of the stakes, the amount paid out for one stake being more than $8,000. The stake was then raised to $7,250, since which time, on account of the decline in the breeding business, there has been no instance where the entrance money has equaled the amount of the stake, the races having cost the association more than the receipts for entrance, the net cost to the association of this year's three-year-old stake, which was stake No. 14, being $2582.

This year the association undertook to give its race meeting at Bakersfield in conjunction with the Kern County Agricultural Fair, on the basis of one-third of the revenue from admissions to the gate. Based on the receipts from this source to the Kern County Agricultural Fair last year, which amounted to over $21,000, the association undertook to give in addition to its colt stakes a number of class races for $1000 each, and to give two running races each day of $100 each. The Fair Association, instead of receiving the attendance it did last year and the revenue from that source, was only able to turn over $2,431.17 to the P. C. T. H. B. A. for its one-third, the result being that the association was only able from the funds it had on hand, exclusive of its trust funds for futurity stakes Nos. 16 and 17 and a balance on hand in Stake No. 15, to pay at the time of the meeting fifty cents on the dollar, except for the two-year-old divisions in Stake No. 15. Bills have been sent out, and if the members of the association will promptly pay the amount they owe for dues and entrance, the indebtedness for the due bills which were issued to winners for the additional fifty per cent can be wiped out; otherwise it will be necessary to levy an assessment, which will be done as soon as the horsemen return to this state from the Phoenix meeting.

The Board of Directors of the association consist of the following well known gentlemen: E. P. Heald, R. S. Brown, I. L. Borden, C. A. Durfee, A. J. Molera, J. A. McKerron, C. W. Paine, F. J. Ruhstaller, C. J. Berry, I. B. Dalziel, and G. J. Giannini.

It is to be hoped that those who are interested in the preservation of this organization and harness racing on this coast will do all they can to put this association on its feet again. The Pacific Coast Trotting Horse Breeders' Association is incorporated under the laws of the state without stock. It is not an association for profit, and under its by-laws no dividends can be declared, and any profits it makes is to be returned to the horsemen in the shape of purses and stakes to be given at its race meetings. None of its officers, except the Secretary, have ever received a dollar's compensation for their services, such also being one of the provisions of its by-laws.

Throughout the east harness race meetings this year have been universally successful, the attendance being greater than for several years past, with a circuit of fairs and race meetings, and the demand for horses that will be required for the war, there should be a big revival in the breeding business in California, and an organization like the Pacific Coast Trotting Horse Breeders' Association deserves the support of all who are interested.

The Bakersfield meeting, from a racing standpoint, was highly successful, and the Kern County Agricultural Fair Association is to be highly commended for getting its mile track in good condition. The track was fast, the races well contested, and records were broken for trotters and pacers in the San Joaquin valley. White Sox in the free-for-all pace paced three consecutive heats in 2:04¼, 2:04¼, and 2:05—record performances. Hal Logan paced three consecutive heats in the 2:08 pace in 2:05¼, 2:05½ and 2:05½. If the gate receipts had reached the expected amount, the meeting would have been considered a highly successful one in every respect.

THE FOSTER PONIES GO TO THE MOUNT DIABLO PARK CLUB.

America's largest and most celebrated herd of Hungarian ponies—that of A. W. Foster—has found a new home on the Mount Diablo Estate, having been sold by the American Red Cross, to which Mr. Foster donated the sixty head last June. The ponies have been bought for the benefit of children of members of the Mount Diablo Park Club, the country club lying at the foot of "the purple mountain" and near the entrance to the famous scenic motor boulevard leading to the 3049f-oot summit, whence thirty-five counties are visible without a glass.

The sale is the largest of its kind on record in America. The Red Cross originally planned an auction, but, the date conflicting with its financial campaign and other events, it was eventually concluded to accept a lump sum offered by R. N. Burgess, one of the directors of the country club.

The ponies have a national reputation, many of them having in the past been sold in all parts of the country. They were kept at the Foster Hopland farm from the time of their donation till their sale, their keep in that period costing Mr. Foster $1500. He has decided to stop breeding ponies, reserving only a few yearlings and six stallions on pension. For the first time he has permitted a pony stallion to leave Hopland, lending one of the most noted—Dan—to Diablo. He will devote his attention at Hopland to his registered hogs and shorthorns,, his chickens and other interests.

The pony herd was thirty years or more in the making. Some of the stock was imported from Australia at a cost of $500 a head. They are long lived; some of the original stock died but recently.

These ponies have been exhibited many times, but never for prizes because of lack of competition. Among other prizes refused were those proffered by the Panama-Pacific Exposition.

Plans for a special barn at Diablo have been made and already members of the club are making reservations for ponies.

DEATH OF W. H. McCARTHY

Horsemen in this city and other sections of the East were shocked and pained to read in the dispatches of Tuesday morning of the death of W. H. (Knapsack) McCarthy, which occurred at his home at Terre Haute, Ind., on Monday, from the effects of an injury sustained in a race at Carrollton, Ill., last week, when a woman driver collided with his sulky. The news occasions deep sorrow to legions of friends of the veteran driver here and everywhere else, wherever he was known. He was the oldest and about the only remaining reinsman of the school which was contemporary with the early days of Doble, Woodruff, Turner, Hickok, Mace, of whom he was a pupil, and others. Mr. McCarthy was 62 years old and was born at Elmira, N. Y. As a mere boy he went into the Civil War in the artillery service and was afterward transferred to a cavalry regiment, and was for a year and a half with the army of the Potomac. His racing career began in 1867 under Dan Mace, and he has pursued it without interruption since, training and driving in that long period many noted horses, including Frank Agan 2:03¾, pacer; Oro 2:05¼, Nancy Royce 2:06¼, Norman B. 2:06¼, and a good many others with records below 2:10. He brought out and developed as a two-year-old the brown stallion W. J. Leyburn 2:14¼, and last winter sold him at a price said to be $15,000. He also owned at one time the pacing mare Ethel Mac 2:07¼. Mr. McCarthy leaves an honorable record from his long service and will be genuinely mourned by all who knew him. He is survived by his widow, a long and faithful helpmeet and counsellor.—[Trotter and Pacer.

THE HEMET STOCK FARM.

For the length of time it has been in operation, no breeding establishment devoted to raising trotters and pacers has been more successful than the Hemet Stock Farm. The late W. F. Whittier in selecting Wilbur Lou (3) 2:10½ as premier stallion not only picked out a wonderful race horse as a colt, but also a great sire of early extreme speed.

Mr. Whittier being a man of unlimited means, selected an ideal place unexcelled as to climate and fertility of soil for the Hemet Stock Farm. He spared neither pains nor expense in making it attractive both from the standpoint of beauty and utility, building commodious barns and stables, a handsome cottage, an excellent half mile track, and every other desirable appointment that could be suggested. Mr. Whittier lived to see and enjoy the success of his efforts, and the property is now being placed on the market by the executors of the estate, not only all the real property, but the horses.

Anyone looking for the finest property of the kind on the Pacific Coast, most desirably situated, a property that is already made and developed, cannot do better than to purchase the Hemet Stock Farm, and in the interest of harness horse breeding and racing, it is to be hoped that the farm and horses will be sold intact to one buyer.

Thoroughbred Matters

HIGH CLASS RACING AT DEL MONTE, BEGINNING OCTOBER 27.

"Come on, you Red Leaf! C'mon, you Rapid Water!"

Do you remember that—ten years ago at Emeryville—Jack Keene's little red mare and Sam Hildreth's big bay horse fighting it out stride for stride for a $4,000 stake, after "Red" Walker's horse had fallen at the start and the only other runner had broken down on the backstretch?

"Come on, you Krishna! Come on, you Claude!"

Do you remember them—fifteen years ago at Ingleside—when Walter Jennings' handsome black colt by imported Watercress and Mike Daly's sturdy bay from Kentucky were two-year-olds?

They were two of the best youngsters ever saddled on the Pacific Coast, Krishna winning the last Futurity run in these parts. That was in December, 1902; and that afternoon Walter Jennings, who is likely to be very much in evidence at Del Monte only two weeks hence, would not have traded him for two Claudes.

But Krishna never faced the starter again. Claude trained on and became famous from Coast to Canada by winning four Derbys, including California's, and running second under a heavy penalty in the great American classic.

Such are the fortunes of the turf, with its lights and shadows of big winnings and keen disappointments.

Ingleside! That was where Garnet Ferguson's great colt Bearcatcher turned an ankle one morning just when he looked like winning every rich three-year-old stake race from here to the $30,000 American Derby at Washington Park, Chicago.

Such times those were! And it is predicted by shrewd business men with a fondness for horse-racing that they are coming again, and that the week of galloping sport at Del Monte this coming month is the harbinger of their early return.

What an attractive and romantic looking racing rendezvous Ingleside was. Yet, at its best, it had nothing on the picturesque course that will tempt the public to "root 'em home" on the first Saturday in November at beautiful Del Monte.

To indulge in a description of the famed beauties of Del Monte would recall that subtle line "to paint the lily." But what a setting for ding-dong, stride-for-stride, never-say-die dead-heat between galloping thoroughbreds! And when it comes to rooting them home, well—

"Come on, you Geraldine! Come on, you Murphy horse! Come on, you Eclipse!"

Do you remember THAT—twenty-five years ago, at the old Bay District track—the afternoon that the roan Murphy horse beat the shapely mare and the Oregon speed merchant?

If you can remember them back that far, it is pretty nearly certain that you will not be able to resist what might be called "the call of the hoof-beats," when Starter "Dick" Dwyer releases the barrier for the first race at Del Monte Saturday afternoon, November 3, next.

Yes, if you can recall those great turf struggles, whose intensity and excitement were such that they still live in memory, you certainly will be at Del Monte when the saddling bell rings; and you will be looking around for "Tommy" Griffin, "Johnny" Coleman, Walter Jennings and other once familiar figures on track and paddock.

The Griffin racing jacket of red with blue sash will look like flashing first past the post just as much as it ever did. But H. T. Griffin, wealthy rice planter and exporter, may not instantly recall the energetic "Tommy" who used to specialize in early two-year-olds that often won for him because of their extra forward condition, due to his skill and thoroughness.

A. K. Macomber and George Wingfield are known from coast to coast as wealthy patrons of the running turf. They will be at Del Monte to see their colors sported. Indeed, they are among the chief promoters and pillars of the short meeting that gives promise of passing all too quickly. But it well may be of such good quality that it will whet the appetite for more in the spring.

John S. Rosseter, whose ships sail the Seven Seas, is coming into thoroughbred racing strongly and is planning to start his speediest runners at the Del Monte meeting. He has been elected president of the new Monterey Jockey Club, and he says his aim will be to help to make it what Bryn Mawr is to Philadelphians, Brookline to Bostonians and Piping Rock to New York's wealth and fashion.

J. O. Tobin has written to President Rosseter accepting appointment as a racing steward. He added:

"After a good many years, there at last is hope of the right type of racing gaining a foothold in California. Twenty-five years ago I saw racing at Del Monte, and it will afford me untold pleasure to enter the sport again."

OMAR KHAYYAM, UNDISPUTED CHAMPION

New York, Sept. 15.—Omar Khayyam has rounded out his New York season the undisputed champion three-year-old. Wilfred Viau's wish came true, for his wonderful chestnut has beaten August Belmont's Hourless, both with weight up and over a mile and a half route. The son of Barco clinched his right to the crown in the most thrilling finish that ever came out of a Lawrence Realization down at Belmont Park this afternoon. It was only a victory of inches, but Omar Khayyam proved himself a thoroughbred of the stoutest heart when he was home the winner.

The Lawrence Realization was a fitting closing of the fall season at Belmont Park, and the largest crowd of the autumn racing was on hand to witness the running. Ever since Omar Khayyam took the measure of Mr. Belmont's colt in the running of the Brooklyn Derby, at Aqueduct, it has been the ardent wish of all lovers of the sport that the two might be brought together again. A special race was suggested, but all through the Saratoga season Hourless was away from the races. In the meantime Hildreth was fitting him for his test in the Realization, and going to the post he appeared to be as fit as hands could make him, and he ran like a fit horse.

When the two colts returned to the scales the crowd went fairly wild with applause. Hats were thrown in the air and many a fair devotee split her gloves by her vigorous handclapping. It was a finish that will never be forgotten by those fortunate enough to witness the heart-breaking, sinew-straining battle of the two giants of the 1917 season.

There have been faster runnings of the same old stake, but time is of no moment in such a contest, and it is doubtful if there ever was another Realization when the last quarter was covered in 24 seconds, as was the case today.

This season Omar Khayyam has only been beaten twice. He was beaten in his first start at Lexington and he followed it up with a victory in the Kentucky Derby. It was after this running that Mr. Viau purchased him for $26,500. His first start under the new colors was in the Brooklyn Handicap, and that was his other defeat of the season. He followed that by a score in the Prospect Handicap; then he beat Hourless in the Brooklyn Derby, through the mud, and at Saratoga he was winner of the Kenner, Travers and the Saratoga Cup.

—o—

Geo. W. Wingfield of Reno, Nev., who has taken to the breeding of thoroughbreds on a large scale, shipped a representation of his stock to Honolulu last month. The horses left on Sept. 18 and although the name of the prospective buyer has not been announced Mr. Wingfield declares that the sale of his stock is almost completed.

Mr. Wingfield is selling his stallion Deutschland, by Sain—Derfargilla, sire of Sleeth, Parlor Boy, Divland and of The Tug and The Kaiser, which won in England. He is in splendid condition, but Mr. Wingfield will have little use for him in the future. With the arrival of his new sire Atheling and other new blood, not saying anything of his Honeywood and Montgomery, Mr. Wingfield has more than enough stallions for his fifty odd mares.

There are nine broodmares in the shipment and five yearlings. Mr. Wingfield is branching out more and more each passing year and he has the utmost confidence in his yearlings by Honeywood. Eventually he believes he will cut no little swath in American racing, even though his horses raced so disappointingly during the past summer in the East.

Here are the broodmares and yearlings he is sending to Honolulu, in care of the veteran handler and manager of his stock farm, George Berry:

Broodmares.

Abelene, by El Rio Rey—Ogalene, by Joe Hooker.

Silver Line, by Free Knight—Silver Lining, with colt foal by her side by Deutschland.

Frazzle, by Ogden—Pleasant Girl, and colt foal by her side by Montgomery.

La Estrella, by Electioneer—Fluid.

Peggy O'Neil, by King William—Cleodora, dam of Glorio.

Divina, by Bassetlaw—Angelique. Divina is the dam of Divland.

Fair Muir, by Canopus—Duplex, by St. Andrews, sire of Articulate.

Rosella, by Voter—Hanrose, by Hanover.

Princess Zeika.

Yearlings.

Dinner Bell, ch c by Starbottle—Eleven Bells.

Saunte, by Starbottle—Silver Lane.

Peter Host, b c by Deutschland—Roselawn, by Orsini.

Dreamery, ch f by Montgomery—Ocean Dream, by Henry of Navarre.

Remark, b f by Montgomery—Kermiss, by Atheling.

—o—

Henry A. Porter of Tulsa, Oklahoma, has closed a deal at Lexington, Kentucky, for the purchase of the entire Elham Stud of English thoroughbred mares and foals. There are eighteen mares and eight foals in the lot. Mr. Porter will not engage in racing but expects to devote his attention to the breeding side of it exclusively and is doing this as a form of deversion from his business interests. The foals are all by Darley Dale, son of St. Simon and Ismay, by Isonomy, and the mares are bred this year to Darley Dale, Sun Flower II. and Neal Gow. The purchase price was more than $50,000.

ESCOBA WINS BREEDERS' FUTURITY

Before 8,000 cheering spectators, Escoba, Kenneth D. Alexander's two-year-old son of Broomstick—Christmas Star, won the Breeders' Futurity, the feature event of the closing day of the Kentucky Association's most successful fall meeting, and a race which drew out a field of the highest-class juveniles in America. Second to Escoba and a length back was Atlanta, with Gipsy Queen, an added starter, third, beaten only a head for the place. Jack Hare Jr., Everest, Viva America, Papp, Herald and Right Angle were the other starters and they finished in the order named.

The net value of the stake to the winner was $6,946; the second horse received $2,046; the third, $1,023, and the fourth, $215. In addition to this Mr. Alexander will receive $300, which goes to the nominator of the first horse; J. N. Camden gets $200 as the nominator of the second horse, and J. B. Respess receives $100 for naming the third horse. The three horses which finished in the money were bred by their respective owners.

In winning the Breeders' Futurity Escoba ran a remarkable race and to Jockey W. Knapp belongs a lot of credit for his victory. In the early running Escoba was last, but Knapp bided his time and after turning for home he put up a ride, the equal of which has seldom been seen in these parts. He mowed his field down rapidly and in the last furlong came from sixth place to first.

—o—

The semi-annual meeting of the Thoroughbred Horse Association was held early this month, about thirty members being present.

The resolution adopted at the April meeting to the effect that, in the event 60 per cent of the owners and breeders of thoroughbred horses who are members of the association shall agree in writing to make contributions of one per cent of purses won and yearlings sold, to be paid into the Association for the purpose of employing a fiscal agent to represent the Association at points where there is need for his services, failed to carry, less than 10 per cent of the members being in favor of the resolution according to the vote received by the secretary, who put the vote to the membership by mail.

For the good of the order, several of the members spoke of the purchasing of the worthless horses around race tracks. They thought the Association ought to buy and send them to St. Louis or some Southern horse market and sell them without pedigrees. Report them "dead" to the Stud Book, so as to eliminate them from the breeding ranks. Some were of the opinion that the sales ring was the place to buy cheap horses, the same as the Breeders' Protective Association did several years ago. A resolution was finally passed authorizing the President to appoint a committee of three of the Board of Directors to buy such animals as may be considered by the breeding committee to be undesirable for further racing and breeding purposes and to dispose of those horses without pedigree and without identification to persons who will use them for other purposes.

At the meeting of the directors, which followed the meeting of members, the President appointed Hal Price Headley, Thomas C. McDowell and T. P. Hayes the "weeding-out" committee.

✤ ✤ ✤

John E. Madden has been invited to judge the thoroughbred classes at this year's National Horse Show in Madison Square Garden. The exhibition will be from November 12 to November 16. Mr. Madden began judging thoroughbreds at the Garden in 1910.

✤ ✤ ✤

The nineteen days' meeting of the Cheyenne Thoroughbred Breeders' Association commenced August 18 and ended September 8, during which time 133 races were decided and $29,150 was distributed in purses. C. B. Johnson was the leader of the money-winning owners, of which the fololwing were winners of $500 or more each:

Owner.	1st.	2d.	3d.	Amt.
C. B. Johnson	5	2	3	$1.960
F. Dahnken	6	3	0	1,410
Irwin Bros.	7	4	9	1,280
Los Angeles Stable	4	2	0	850

—o—

As will be seen by an advertisement in another column of this paper, there is an improved 160 acre ranch in Lake county that has many attractions in the way of orchards, house, barns, etc., and is well located, that can be bought at a very reasonable price.

Harness Horses and Horsemen

HANFORD RESULTS

Sept. 17.—2:25 Class Pace; purse $400.

Directress Mac, by Nearest McKinney (Schwartz)	2	1	1
Vevo Hal (Townsend)	2	4	2
Surety (Gallup)	4	2	4
Gay Tommy (Best)	3	3	3

Time—2:11¼, 2:11¼, 2:15½.

Free-for-All Trot; purse $400.

Allie Lou (Ward)	2	1	1
Great Policy (Brolliar)	1	2	3
Miss Frisco (Schwartz)	3	3	2

Time—2:18, 2:16½, 2:16½.

Sept. 18.—2:15 Class Trotting; purse $400.

Zeta Lucille (Ward)	1	1	1
Miss Frisco (Schwartz)	3	2	2
Sadie View (Best)	2	3	3
Louise de Lopez (Atkins)	dr		

Time—2:20½, 2:16½, 2:18.

2:12 Class Pacing; purse $400.

Potreress (Stewart)	1	1	1
Vevo Hal (Townsend)	5	2	2
Shamrock	2	3	4
Surety (Gallup)	3	4	3
Breezy Marie (Brolliar)	4	ds	

Time—2:17½, 2:17½, 2:21½.

Sept. 19.—Special Race; purse $400.

Hal Logan (Montgomery)	1	1	1
Emmaline Dillon (Stewart)	2	2	2
Potreress (Lowe)	3	3	3

Time—2:14, 2:12½, 2:12.

Free-for-All Trot; purse $400.

Allie Lou (Ward)	1	1	1
Great Policy (Brolliar)	3	2	2
Sadie View (Best)	2	3	3

Time—2:19¾, 2:25, 2:12½.

Sept. 20.—2:20 Class Pacing; purse $400.

Directress Mac (Schwartz)	1	1	1
Gay Tommy (Best)	4	2	2
Vevo Hal (Townsend)	2	4	3
Shamrock	3	3	4

Time—2:14¾, 2:15½, 2:17.

FRESNO

Sept. 25.—2:11 Trot; purse $1,000.

Great Policy, by Best Policy (Brolliar)	1	1	1
Miss Frisco, by San Francisco (Schwartz)	2	2	2
Sadie View, by Direct View (Best)	3	3	3
Bert Kelly by McAdrian (Townsend)	4	4	d

Time—2:14¾, 2:13¼, 2:12¼.

2:10 Pace; purse $500.

Potreress, by Potrero Boy (Stuart)	1	1	1
Vevo Hal (Daniels)	2	2	2
Breezy Marie, by Athadon (Brolliar)	3	3	4
John Black, by Abcosta (Gallup)	4	4	3

Time—2:09¾, 2:11, 2:13.

To beat 2:25¾, pacing:
Garland C., by Peter the Great (Tryon) won; time, 2:11.

Half-mile running, purse $100—C. W. Hodges (Sykes) won; Tom Woods (Powers) second; Fresno Boy (Joseph) third. Time—0:49¼.

Five furlongs, running, purse $100—Alice Teresa (Sykes) won; Von Dillon (Powers) second; Fresno Boy (Brown) third. Time—1:02½. Conejo Girl also ran.

Sept. 26.—2:20 Pace; purse $500.

Directress Mac, by Nearest McKinney (Ryan)	2	1	1
Loma Dee, by Major's By Guy (Malcolm)	1	5	2
Surety, by The Bondsman (Gallup)	4	2	3
Gay Tommy, by Tom Ferguson (Lambert)	5	4	3

Breezy Marie and Sheldon B. also started.
Time—2:08¾, 2:11½, 2:10¾.

2:07 Pacing; purse $800.

Lock Logan, by Jim Logan (Montgomery)	1	1	1
Mono Ansel, by Monicrat (Finlay)	4	2	2
Potreress, by Potrero Boy (McConnell)	2	3	4
Vevo Hal, by Hal B. (W. A. Davis)	3	4	3

Time—2:09, 2:10¼, 2:09.

One mile novelty, running, purse $200; one-quarter of purse paid to rider leading at each quarter—C. W. Hodges (Sykes) won. No other entries in the money.

One-quarter mile, running; two heats, purse $100

Little Mamie (Harmon)	1	1	
LaGovista (Millerich)	2	2	
September Morn (Joseph)	3	3	
Teddy Murphy (Osborne)	4	4	

Sept. 27.—2:08 Pace; purse $2,000.

Hal Logan, by Jim Logan (Montgomery)	1	1	1
Potrero Boy, by Demonio (Daniels)	3	2	4
Mack Fitzsimmons, by Bob Fitzsimmons (Holman)	2	4	3
Emmaline Dillon, by Guy Dillon (Townsend)	5	3	2

J. C. L. and Bold Harry Aerolite also started.
Time—2:05½, 2:05½, 2:07.

Free-for-All Trot; purse $800.

Allie Lou, by Kinney Lou (Lowell)	1	1	3
The Proof, by The Exponent (Daniels)	3	2	1
Albaloma, by Almaden D. (Smith)	3	3	4
Ella M. R., by Lord Alwin (Machado)	4	4	2

Time—2:07¼, 2:10¼, 2:05¼.

Five furlongs, running, purse $100—Crusados Jr. (Sykes) won; Von Dillon (Powers) second; Logavista (Scoville) third. Time—1:02. Teddy Murphy also ran.

Half-mile running, purse $100—Rocky Boy (Nawn) won; Bert Getty (Scoville) second; Conejo Girl (Sykes) third. Time—0:50. Teddy Murphy also ran.

RESULTS AT BAKERSFIELD

Oct. 3.—Breeders' Futurity Stake, No. 15, for Two-Year-Old Trotters, two in three, purse $850.

Edith Carter, ch f by Kinney de Lopez (Silva)	1	1	
Esmeralda, b f by Carlokin (Durfee)	2	3	
Sequoia, ch g by Wilbur Lou (Smith)	3	2	

Time—2:26¾, 2:22¼.

No others entered.

2:20 Class Trotting, three heats, purse $1,000.

Guy Boy, b g by Guy Dillon (Stewart)	1	1	2
Future Tramp, b g by Trampfast (C. A. Durfee)	2	2	1
Byron, by Tom Moko (W. G. Durfee)	3	3	3

Time—2:09¾, 2:09¼, 2:12¼.

No others entered.

2:06 Class, Pacing; three heats, purse $800.

John Malcolm, br g by Dan Logan (W. G. Durfee)	5	1	1
Mack Fitzsimmons, ch g by Bob Fitzsimmons (Helman)	2	2	2
Potrero Boy, ch g by Demonio (Daniels)	1	3	3

Lock Logan and Mono Ansel also started.
Time—2:07¼, 2:08¼, 2:07¼.

Breeders Futurity, Three-Year-Old Pacers, $1800.

Matilda Lou, by Wilbur Lou (Ward)	2	1	1
El Paso (Chadbourne)	1	2	2
Tommy Atkins (C. A. Durfee)	3	3	3

Time—2:18¼, 2:15¾, 2:14½.

Free-for-All Pace, $1000.

White Sox (Durfee)	1	1	1
Bondelin (Daniels)	2	2	2
College Gent (Barnes)	3	3	3
Lock Logan (Montgomery)	4	4	4

Time—2:04¼, 2:04¼, 2:05.

2:20 Class Pace, $1,000.

Directress Mac (Schwartz)	2	1	1
Miss Rico (Durfee)	1	2	2
Beretta D. (Chadbourne)	4	3	3
Sheldon B. (Montgomery)	3	4	4

Time—2:07¼, 2:07¼, 2:10.

Oct. 5—Pacific Breeders' Futurity, Stake for Two-Year-Old Pacers; three heats; $550.

Hemet Queen, b f by Wilbur Lou (Ward)	1	3	1
My Sweetheart, b f by Ed McKinney (C. Durfee)	2	1	2
General Villa, b c by Copa de Oro (W. Durfee)	3	2	3

No others entered.

Time—2:20½, 2:21, 2:18.

2:12 Class Trotting; three heats, $1,000.

Allie Lou, b m by Kinney Lou (Ward)	1	1	2
Guy Boy, b g by Guy Dillon (Stewart)	2	3	1
Great Policy, b g by Best Policy (J. Brolliar)	3	2	3

George N. Patterson also started.
Time—2:10¼, 2:10¼, 2:08.

2:08 Class Pacing; three heats, $1,000.

Hal Logan, br g by Jim Logan (Montgomery)	1	1	1
Mack Fitzsimmons, ch g by Bob Fitzsimmons (Jaggar)	2	3	2
Strathtell, b h by Motell (Barnes)	3	2	3

Rico, Emmaline Dillon and Mono Ansel also started.
Time—2:05¼, 2:05½, 2:05¾.

Oct. 6.—Breeders' Futurity, 3-Year-Old Trotters, $2800.

Zeta Lucille, b f by Wilbur Lou (Ward)	1	1	1
Jack b c. (Daniels)	2	2	2
Skyrocket, b g. (C. Durfee)	3	3	3
Eloretta D., b f (Montgomery)	4	4	4
Kewpie, br c. (W. Durfee)	5	5	5

Time—2:11¼, 2:11¼, 2:12.

2:13 Class Pace; purse $1000.

Dirtceress Mac, by Nearest McKinney (Schwartz)	2	1	1
Oro Fino (Berry)	1	2	3
Sheldon B. (Montgomery)	3	3	2

Time—2:09¼, 2:08½, 2:09¾.

Race for Roadsters, Pacing; purse $600.

Dan McKinney (Lakey)	2	2	1
Dolly Varden (McCart)	1	1	2
Vassar Boy (Black)	4	3	3
Jonesa Basler (Allen)	3	4	4

Time—2:18¼, 2:13½, 2:16¼.

OREGON STATE FAIR RACES

The races at Oregon State Fair were well attended and good interest was manifested throughout the week.

While therewere, of course, races of a draggy nature, there were a lot of finishes that brought the spectators to their feet and sent them home with the feeling that they had their money's worth and then some. The hottest contested event of the meet was the free-for-all pace, as the summary will tell. College Gent showed the most endurance and took the lead in the three final heats and the big end of the $1,000 purse. The results follow:

TUESDAY, SEPT. 25.

2:15 Trot; purse $800; 3 heats, every heat a race.

Byron (W. G. Durfee)	2	1	1
Don de Lopez (F. Ward)	1	2	3
Baby Lally (W. Hogoboom)	3	3	2

Time—2:15¼, 2:12¼, 2:15¼.

2:25 Pace; purse $750; 3 heats, every heat a race.

Captain Mack (F. Woodcock)	1	1	1
Miss Rico (W. G. Durfee)	2	2	2
Bubbles (W. Hogoboom)	3	3	3
Bertie Seattle (Smith)	4	4	d
T. R. McGregor (J. V. Shaw)	3	d	

Time—2:09¼, 2:11¼, 2:11.

Four furlongs, running race, purse $100—Dandy Jim (Hall) first; Klickitat Blossom (Martin) second; Letitia S. (Murratto) third. Drummer and Little Nell also ran. Time—0:50½.

WEDNESDAY, SEPT. 26.

2:08 Pace; purse $2,000; best 3 in 5 heats.

Hal Paxton (F. Woodcock)	1	1	1
College Gent (Barnes)	2	2	3
Rico (W. G. Durfee)	3	3	2
Indian Hal (E. Brain)	4	4	4
Haltamont (Sim Lindsay)	5	5	dr

Lena Patch (O. C. Brown) and O. U. C. (Smith), dis.
Time—2:07¼, 2:09¼, 2:08½.

2:25 Pace; purse $600; 3 heats, every heat a race.

Guy Boy (Stewart)	1	1	1
Salem Boy (P. Mauzy)	2	2	2
Cavalier Gale (G. L. Swisher)	4	3	3
Oregona (T. L. Davidson)	3	4	4
Florimel (W. Hogoboom)	5	5	5

Handicap trot or pace, one mile dash, open to all—Remember Me (117 yards) first; Helen Hal (120 yards) second; Salem Boy (150 yards) third; Lo Lo (100 yards) fourth; Strathtell (scratch) fifth; Bonnie Antrim (15 yars) sixth; Tillamook Maid (10 yards) seventh. No time announced.

Five furlongs, running; purse $100—Drummer (Powell) first; Letitia S. (Murrato) second; Bob Wade (James) third; Little Nellie and Fern Ridge also ran. Time—1:05.

Six furlongs, running; purse $150—Blackston (James) first; Anna Phaon (Powell) second; Rosa Phaon (Murry) third. Hae and Salon also ran. Time—1:18½.

THURSDAY, SEPT. 17.

2:12 Trot; purse $2000; best 3 in 5 heats.

Guy Boy (J. Stewart)	1	1	1
Baby Lally (W. Hogoboom)	3	2	2
Don de Lopez (F. Ward)	2	3	3
George M. Patterson (H. Rutherford)	4	4	d

Time—2:11¼, 2:12½, 2:15.

2:20 Pace; purse $750; 3 1-mile heats, every heat a race.

Miss Rico (W. G. Durfee)	1	1	1
Helen Hal (J. Kirkland)	2	3	2
Bubbles (W. Hogoboom)	3	2	3

Time—2:16¼, 2:17½, 2:16¾.

Special Race; purse $400; 3 1-mi. heats, every heat a race.

Lo Lo (O. Staats)	1	1	5
Remember Me (H. Hogoboom)	3	3	1
T. R. McGregor (J. V. Shaw)	5	2	2
Bertie Seattle (H. Smith)	2	4	4
King Zolock (D. Brain)	4	5	3

Lady B. P. (G. Dixon), dis.
Time—2:16¼, 2:16¼, 2:19½.

One mile running; purse $200—Anna Phaon (A. Powell) first; Solon (Neayion) second; Dandy Jim (Hale) third; Drummer and Blackthorne also ran. Time—1:48.

Four furlongs, running; purse $100—Tell (Martin) first; Little Nellie (A. Powell) second; Silvress (James) third. Time—0:54½.

FRIDAY, SEPT. 28.

Free-for-All Pace; purse $1000; 3 in 5 heats.

College Gent (B. Barnes)	6	4	3 3 1 1 1
Lady Hal (J. Springer)	2	1	1 4 4 2 2
Hal Paxton (F. Woodcock)	1	2	2 2 3 4
White Sox (W. G. Durfee)	4	3	4 1 2 3
Joe Buckley (W. Hogoboom)	3	6	6 5
Indian Hal (E. C. Truesdale)	5	5	5 6

Time—2:07¼, 2:07¼, 2:07½, 2:08½, 2:09¾, 2:10½, 2:13¼.

2:18 Pace; purse $750; 3-1-mile heats, every heat a race.

King Zolock (E. Brain)	1	1	1
Daisy D. (Witt-Chas. Guyon)	2	3	2
Helen Hal (J. Springer)	4	2	3
Belle Bars (R. Dixon)	3	4	4

Time—2:13¼, 2:15¾, 2:14¾.

2:22 Trot; purse $400; 3 1-mi. heats, every heat a race.

Rose King (H. Hogoboom)	5	1	1
Jetlock (McCarthy)	1	4	2
Perrio (S. Lindsay)	2	2	5
Guy Light (Brain-W. Hogoboom)	3	5	3
Song Sparrow (Martin)	4	3	4

Oregona (Davidson), Florimel (W. Hogoboom), ds.
Time—2:16½, 2:18½.

W. Hogoboom drove for Brain, third heat.

RIVERSIDE FAIR.

Oct. 9.—2:30 Class Trot

Little Jack, ch g by Teddy Bear (Silva), first; Garrett B., blk g by Wild Nutling (Reanor), second; Copper King, by Direct Heir (Stewart), third; Ben Nutwood, b g by Dick Nutwood (Gowell), fourth. Time—2:18¼, 2:17¼, 2:16½.

2:20 Class Pace.

Shamrock, b g by Bonny Steinway (Landergren), first; Babe, b m by H. M. Stanley (Cuccattoo), second; Norene, b m by Copa de Oro (Fortune), third; Pansy Hall also started. Time—2:16¼, 2:17¼, 2:16¼.

Matinee Trot.

Anna Conn, first; Atta Lana, second; Bouquet, third; Teddy Bear, fourth. Time—2:29¼, 2:27½.

Three furlongs, running—Well, first; Coyote, second; Little Bob, third; Dick, fourth. Little Girl and Paloma also started.

Half mile, running—C. W. Hodges, Rutland Arms, Babin and Cahulla finished in the order named.

Oct. 10.—2:11 Class Pacing; purse $800.

Mack Fitzsimmons, s g by Bob Fitzsimmons (Jaggar)	1	1	1
Directress Mac	3	2	2
College Gent	2	3	3

Lock Logan also started.
Time—2:08¼, 2:08¼, 2:08½.

2:14 Trotting; purse $800.

Don de Lopez, bl g by De Lopez (Ward)	1	1	1
Zeta M. (Smith)	2	2	3
Guy Boy (Stewart)	33	2	
Miss Gailey (Gould)	4	4	4

Time—2:10½, 2:11½, 2:12½.

2:30 Trot; purse $500.

Little Jack, ch g by Teddy Bear (Daniels)	1	1	1
Ben Nutwood, b g by Dick Nutwood (Holt)	2	2	4
J. H. Dudley, br g by Red McKai (Murphy)	3	3	3
Garrett B., blk g by Wild Nutling (Treanor)	4	4	2

Time—2:22¼, 2:22, 2:21¾.

2:16 Pace; purse $400.

Shamrock, b g by Bonnie Steinway	1	1	1
Flash H., b m. (Sebastian)	2	2	2
Matilda Lou, ch f. (Ward)	3	3	3

Time—2:14½, 2:16¾, 2:15¾.

2:20 Matinee.

Pansy Hall., pacer. (Rackstrand)	4	1	1
Anna Conn, trotter (Nelson)	1	2	2
Jett Lock, b h. (Armstread)	3	3	3

Time—2:19, 2:17½, 2:18¼.

One mile, running—Won by C. H. Hodges (Sykes); second, Alice Teresa (Donovan); third, Crusados Jr. (Evans). Time—1:47.

Half mile, running—Won by Little Bob (Murphy); second, Quay (Sykes); third, Coyote (Donovan). Mabel Normand also ran. Time—0:50¾.

Oct. 13.—2:10 Pacing; purse $400.

College Gent, blk h by Kentucky P. (Barnes)	1	1	1
Potrero Boy, ch g by Demonio (Daniels)	2	2	3
Mono Ansel, b h (Finley)	4	4	2
Lock Logan, br g by Dan Logan (Montgomery)	3	3	4

Time—2:11½, 2:10¼, 2:13¼.

Free-for-All Trotting; purse $500.

Allie Lou, br m. (Ward)	3	1	1
Virginia Barnette, b m. (Durfee)	1	2	2
The Proof, b h. (Daniels)	2	3	3

Time—2:12, 2:10¼, 2:11¼.

Free-for-All Pace; purse $500.

Bondelin, b h by The Bondsman (Daniels)	1	1	1
Mack Fitzsimmons, s g by Bob Fitzsimmons (Hellman)	2	2	2
Directress Mac, b m by Nearest McKinney (Schwartz)	3	3	4
Strathtell, b h by Potrero Boy (Bain)	4	4	3

Time—2:10¼, 2:10, 2:09.

Matinee, Mixed.

Rob Wilkes, yacer. (Nelson)	1	2	1
Teddy Slaughter, trotter. (Armstead)	2	1	2
Casey, pacer (Moore)	3	3	4
Bouquet, trotter (French)	4	4	3
Crow, pacer (Martin)	5	5	5

Time—2:29¾, 2:29¾, 2:25¼.

The Transylvania proved to be the greatest contest of the week, and I doubt very much whether anyone ever saw a better race. The big share of the money went to the Cleveland mare, Ima Jay, owned and driven by Harvey Ernest, proprietor of the Rockport race track, but the real star of the big race was the Indiana gelding, Early Dreams 2:04¼, which had won the Walnut Hall Cup earlier in the week. The Hoosier trotter made a break in the opening heat when out in the lead in the stretch, and finished in the rear, but in the next five heats was either first or second and trotted a really wonderful race.

The big crowd was greatly disappointed when it was announced that only Ima Jay and Royal Mac would race in the seventh heat, but the judges ruled that the gelding from the McDonald stable was not entitled to start back, and he was sent to the barn. The rules read that when at the end of the fifth heat two horses have won two heats each they, only, shall race in the sixth. It happened in this case that no two horses had two heats each at the end of the fifth, but that suituation did not exist at the conclusion of the sixth heat. The rules make no provision for this and the secretaries of the American and National Trotting Associations do not seem to agree on the interpretation of the rule. As the rule reads it would seem as though Early Dreams should have been allowed to start back. He was not, however, and although he trotted the best race of the field which started, was forced to take third money.

The race is the fastest seven-heat race ever trotted. The Cleveland mare, Miss Directed 2:04¼, on the strength of her fast miles at Columbus, was was thought to have a good chance to head the summary, but the brown mare trotted a disappointing race and finished out of the money.—Will Gahagan, in The Horseman.

THE AMERICAN RED STAR ANIMAL RELIEF

Will the great war reduce the fighting nations to a bankruptcy of horse-flesh? Is the time approaching when shot and shell, machine-gun fire and poisonous gases will kill at the rate of thousands and thousands the silent-sufferinganimal heroes assembled and assembling in Europe? If the allied armies of Britain, France and America should break through the opposing line and cavalry forces take the initiative, will there be that terrible carnage which which many authorities foretell in forcing a passage as far as the mighty Teuton defences of the Rhine?

All this is possible. It is not even improbable. In the words of Wayne Dinsmore, Secretary of the Percheron Society of America, in a clarion call to the great horse-breeding interests of this country, "The war may yet be decided by the number of horses available to the respective belligerents, for on the far-flung battle line and in the reserve made up of our farm forces the horse is the most important single factor aside from man."

Can the allies secure enough horses, enough good horses, to carry them through Northern France, through Belgium, to the Rhine—and still on.

In eight hours on the first day of the great Verdun drive it is reported the French lost five thousand horses on a three-mile front. It is calculated that for every mile of battle-line on the western front France has suffered a monthly wastage of forty-five thousand horses. Even supposing that these figures are an over-estimate, yet to one who can conceive the colossal magnitude of history's vastest conflict the sacrifices of horses can only be contemplated in superlatives. We do know that the losses of horses on the Flanders line have been enormous. The total is put at five thousand per day.

The British have suffered losses in the same way as the French, for it is parts of the same line that both nations are holding. In the early days of the war both France and Britain experienced a tremendous drain of horse-flesh. At the first sound of battle their patriotic peoples rushed forward to offer all they had for their countries' sake and safety. Men whose names are known all over the world of sport opened their stables and reduced their studs to the barest requirements of breeding, horses of fame went forth with those of plebeian heritage—to battle, to death. The old-fashioned country squire turned over all but the pensioned pets which years ago carried him over fence and the ditch in the chase of the wily fox; polo clubs, hunt clubs—all rendered to the national need.

Then the strain began to be felt. Russia, with enormous reserves of horses, was able to take care of herself, but Britain and France turned to the Western Hemisphere—to Canada, to the United States, to South America. Canada had the task of equipping her own army of nearly half a million with horses. She did it noby and sent to Europe thousands of magnificent creatures—many of them mares. But Canadian farmers wanted money rather than stock, the price looked good and they turned even mares into cash. Yes, and even mares in foal.

The British Government realized that if the worst came to the worst Canadian horses could be commandeered. So (for that and certain other reasons) they ceased purchasing in Canada and focussed their buying upon the United States, not then a belligerent and not likely to become one. Thousands and thousands, and still thousands of horses crossed the seas from the ports of the western world.

Now America is forced into the great world horror in championing the cause of the weak, in defending her honor and her name. She comes into the canyons of glory and death backed by her millions of men and money, throwing her whole heart and soul into the task of achieving victory. If we should place in the field 2,300,000 men she will require an initial force of 750,000 horses, and 225,000 mules, independent of transport. She will have to maintain her forces on the same basis, to make good her daily, her monthly losses from disease, accidents in transpoots and in camps, wastage on the field of battle, losses possibly also from submarine attacks on the high seas. All these must be made good and at the same time the allies will continue their buying on this continent.

Will the horse supplies hold out? If every horse in America were fit for battle-duty there would be no fear of a famine, but army horses can be drawn from only a limited class. Less than one-fifth of this country's horses are usable for war. With the prospect of two years, yea, three years of war facing us with the prospect of drain, drain, constrant drain upon the usable horse supplies, the question of whether or not we shall come within measurable distance of exhaustion of usable animals becomes more and more worthy of most serious consideration. It creates a national problem, a world problem. Germany has conceived such a possibility. She has not failed to teach and to preach the gospel of horse conservation throughout her armies. In that memorable official edict from Potsdam the voice of Germany was heard in the following phrases:

"In the Army of the Fatherland horses have always played an important part. We owe a great debt to our horses for service, both in time of war and peace. It is hoped that all good soldiers will see to it that the rights of our dumb brothers are respected. Our horses are entitled to food, water, bedding and shelter just exactly as a soldier is."

Germany thus places the horse on the same level as the trooper in the matter of care and good treatment.

America has not yet realized the possibility of a war-horse famine. The only indication of any kind is a tightening of the market for the better types, both here and in Canada, while the market for "scrubs" and undesirables remains as before. For months past not a single suitable horse offered at the French and British inspections has been turned down. The market is absorbing all offerings.

A few days ago the writer visited one of the many newly-created camps and in company with a cavalry officer passed between the lines of tethered chargers. They were a good, healthy-looking lot, a fine useful average. Even more striking than the appearance of these utility, short-coupled animals was one outstanding fact. Many were mares. Far too many, said the officer. The writer agreed. Probably not one of them will take its part in the duty of reproducing its kind. At the first call "To arms" the country is sending forth those animals which have another duty to perform in maintaining the supply and in providing for the needs of the nation in the piping times of peace that are to come again.

The magnitude of the problem may be judged from the fact that the number of horses and mules supplied from the United States in the first three years of the war totalled 1,500,000! Of these approximately 1,200,000 were horses, and all were drawn from the army-type stock rather than from the huge figure-total which represents the equine population of the United States.

The British and French Governments have appreciated the necessity of conserving horse supplies, and have set up a system which is as nearly perfect as human ingenuity can devise. Britain had a terrible lesson in the South African war where the losses in horses were enormous. But South Africa, though a cavalry war, was a small affair as we understand war today. When the European war broke out in August, 1914, the Army Veterinary Corps was in a high state of efficiency, well organized and amply equipped. The Royal Society for the Prevention of Cruelty to Animals offered their services to the Government in any way in which they could be utilized in caring for the sick and wounded horses of the army. Outside help being at that time unnecessary, the Royal Society encouraged its inspectors to serve in the Army Veterinary Corps and these well-trained men proved to be of special value to the service. Three months later, when the strain on the Army Veterinary Department was more than burdensome, the British Council invited the co-operation of the Royal Society.

Since co-operating with the Army Department the Royal Society has built veterinary hospitals to accommodate ten thousand horses, complete with operating theatres, forage barns, forges and even quarters for the officers and other staff at a cost of at least $350,000; has expended something like a hundred thousand dollars on the provision of ambulances for removing sick and wounded horses and has purchased thousands of requisites of various kinds necessary to the upkeep of hospitals. These hospitals are erected behind the fighting lines.

Hs this co-operation with the Army Department been worth while? It has saved the lives of thousands of horses which otherwise would have had to be shot. It has helped to keep down, has in fact almost eliminated as many common diseases which in former wars decimated the ranks of horses.

Of the horses which have passed through the hospitals more than eighty per cent have been returned to duty completely cured. It is a record of efficiency previously unknown and probably undreamed of in the councils of warring nations.

Just as the British Army Department is aided by the Royal Society, just as France and Italy are aided by volunteer help, so must the American Army have a similar co-operation to the end of the great campaign.

The agency recognized by the United States Army Department is the American Red Star Animal Relief. It is the only agency so recognized. The Red Star has sprung from the American Humane Association, the central chamber of the 550 humane or anti-cruelty organizations of this country.

The American Government was not slow to appreciate the magnificent services which voluntary assistance was rendering their respective countries in the European life-and-death struggle. They were face to face with the fact that results had been achieved with volunteer co-operation such as had never been known before. The Government realized thata gap had been bridged, a gap somewhere between official authority and the goal to be reached. And so, in May, 1916, Secretary of War Baker wrote to Dr. W. O. Stillman, President of The American Humane Association, a letter in which he stated:

"It is believed that plans similar in tone to those of the Red Cross could be very advantageously adopted by your Society for rendering organized aid to injured animals ia time of war. If your Society will uedertake this work the War Department will be glad to co-operate with you."

This gave birth to the American Red Star Animal Relief. Why Red Star? This name denotes, distinguishes, designates the work of caring for horses in war. It was so adopted at a convention in Geneva, 1914 ,when the International Red Star Alliance was brought into being. The object of the International Red Star Alliance was to bring about international co-operation in behalf of sick and wounded war animals and to secure the neutralization of those engaged in such work by international agreement.

Thus, American Red Star Animal Relief designates the Red Star—the official—organization in the United States.

When the army of America is lined up in battle in northern France or Belgium its equipment must be as near perfect as possible. While at home the horse-breeding interests must do their part in conserving the nation'ssupplies, the American Red Star Animal Relief must have that auxiliary equipment and its organization perfected so that, like the Royal Society, it may fulfill its mission in saving the lives and maintaining the health of the hundreds of thousands of horses and mules sent forth to war. The Red Star must have men, must have ambulances, must have tents convertible into shelters or hospitals, must have veterinaries, drugs,—must have money. A campaign such as that now in progress absorbs money in bucketsful. Thinking and acting can only be done on a stupendous scale.

Every horse delivered on the field of battle represents a sum of at least three hundred dollars. It represents more. It represents in addition to money-value so much ship-space at a time when shipping is a high factor in winning the war. It represents so much war strength which cannot be replaced from the forges of Pittsburg or drawn from the bowels of the earth. It represents life, represents nature, and nature has its own ways, its own time, and is uncontrollable and undirectable even in a war emergency such as the present. The money value of horses saved by field hospitals to Britain alone is not less than $25,000,000, and that portion of the war in which the horse is to be of greatest value has not begun.

But it is close at hand. It will come with the abandonment of trench-fighting; it will come when men, guns and ammunition are so massed on the western front that no system of trenches ever devised will be able to withstand the weight of the mighty attack which is in preparation and which must be the prelude to the great movement east and north. It will come when advance and retreat are so rapid, when blows will be struck swiftly and surely, when masses of men meet masses, when cavalry must take up the pursuit and cleave its way through the fleeing hordes of Teutons preparatory to the denouement of the campaign.

Today the words of a distinguished army officer ring forth as a clarion call to the humane, the loyal people of America:—

"The time is getting short. Inside of a month we will be in the midst of things and horses will be arriving by the thousands at the various camps. If you have money now is the time to use it. . . .Help us out at this time. We will have to depend on you to a greater extent than you can imagine. . . . The Flag first, last and always."

If you have money now is the time to use it. The American Red Star Headquarters at Albany are busy organizing Branches all over the country and arranging to raise funds. Dr. W. O. Stillman, Director-General of the Red Star, has completed his plans for a big drive for a million Red Star members at a dollar each. It is the money that counts and money must be got. Every dollar is a life-saver. From California and Florida to Maine and Washington the Red Star campaign is being put in operation. Some cities have not yet responded to the call. There are a thousand openings for tens of thousands of people who desire to express their loyalty to their country. Opportunity awaits thousands of women who are ready to do their bit for the boys at the front, to get behind the horse behind the soldier.

The horse may yet be the great final factor in winning this war. In helping the horse the women of America have a chance of helping their down-trodden sisters of Belgium, of avenging the maimed babes of that noble, little country which dared to stand in the path of the most colossal tyranny the world has ever known. The need is now, the opportunity is now. America's good name demands that her armies—her men and her horses—shall go forward fully equipped for this great struggle.

From the trenches of France there has come to the people of America a message, a plea for the war horse. It has come from a fighting man and it breathes his love for his fighting horse. Does it appeal to you?

"There are 'eroes big and small
But the biggest of them all
Is the 'orse wot lays a-dying on the ground,
'E doesn't cause no wars
And 'e's only fighting yours
An' 'e gives 'is life for you without a sound.
'E doesn't get no pay
Just some oats and perhaps some hay
If 'e's killed no one thinks a bit of 'im.
'E's just as brave and good
As any man wot ever stood,
But there's mighty little thought of 'ely for 'im."

Since writing the above Lieutenant Fleming has passed from the warring armies of earth. Perhaps he has joined the angel army which saved the battle of Mons; from that mighty host comes Gabriel-like, to us of earth, the command to care for the animal that doesn't cause wars yet is fighting our battles.

Ella M. R. went a most extraordinary race in the free-for-all trot at the Fresno Fair. She was lame and finished fourth in the first and second heats, but in the third heat, wearing no boots, she was a keen contender throughout and beat Allie Lou in a drive through the stretch and finished second, lapped on The Proof in 2:05¼, the fastest mile ever trotted in a race in California. Ella M. R. must have trotted this heat in 2:06, and after the race it was discovered that one of her front shoes was missing.

Notes and News

The track at Bakersfield was in good shape for the Breeders' meeting, held there last week. This was emphasized by the fact that the free-for-all pacers went three heats in 2:04¼, 2:04¼, 2:05½, the fastest three consecutive heats paced in California. Guy Boy also trotted a mile in 2:08. These are the track records for the Bakersfield track.

✤ ✤ ✤

Quite a contention has arisen regarding the time announced in the 2:08 pace won by Hal Logan at Fresno. In the first heat the time taken by the official timers was 2:05¼ and was so announced; but several watches held in the grand stand and by horsemen under the judges' stand recorded at least a second faster. The chairman of the board of timers was summoned by the judges before the announcement was made and he testified that all three timers agreed on the time as reported by them and it was so recorded in the book. After the race Mr. M. L. Woy, the owner of J. C. L., one of the starters in the race, filed a formal protest with the Clerk of the Course and the matter will be brought before the Board of Review at its next meeting.

✤ ✤ ✤

Fred Woodcock's good pacer Capt. Mack 2:09¼ started in eleven races this year and won all of them, which made it quite a successful season for Mr. Woodcock, who is well known on the California circuit as well as in Oregon, his home being in Forest Grove in that state.

✤ ✤ ✤

The Hemet Stock Farm won all the prizes for breeders and owners of the sire and dams of Futurity winners at the Breeders' Meeting. This is the first time that one breeding establishment has made a clean sweep of these premiums.

✤ ✤ ✤

Both trotters and pacers were stepping along this season. The Coast record, one world's record, and the track records at Sacramento, Fresno, Bakersfield and Hanford were all broken.

✤ ✤ ✤

Sept. 25.—A new and brilliant star has arisen in the ranks of juvenile trotters, Miss Bertha Dillon, bred and owned by A. B. Coxe, of Paoli, Pa., and driven by Joseph Serrill, setting a new world's record for three-year-old trotting fillies in the second heat of the "American Horse Breeder" futurity. The beautiful daughter of Dillon Axworthy, 3, 2:10½ and Bertha C., 3, 2:10¼, by Baronmore 2:14¼, trotted in 2:03½, her performance lowering the 2:04¼ made two weeks ago by The Real Lady in the Review purse, equaling the world's record for the age, held by Peter Volo (4) 2:02¼. The consummate ease with which she negotiated the sparkling miles gave token of the fact that she has an excellent chance to trot in 2:02 or better at Lexington next week; also that she may some day rival her distinguished relative, Lou Dillon 1:58½, and crown herself as the champion of her sex. The Real Lady was a natural favorite after her record-breaking achievement in the Review event, and she went to the post at $50 to the field's $14. She trotted a grand race, too, but Miss Bertha had superior speed today, and was in rare form. The Real Lady drew the pole and was never headed in the initial heat. Miss Bertha closed fast in the stretch and the fillies were only a half-length apart in 2:05½, last quarter in :30½. Bertha McGuire finished third, a head in front of Harvest Gale, their time being 2:06¼. Again The Lady led in the second with Bertha McGuire trailing to the quarter, and Miss Bertha third. Serrill moved his filly up to even terms on the third turn, and from the half home, the pace was terrific. The duel ended 200 yards from home, Miss Bertha's brush bringing her to the front, and seeing that he had the heat won, Serrill took back, winning by four lengths. The last half was done in :59½, final quarter in :29;, an unheard-of clip for three-year-old trotters. Bertha McGuire, in third place, trotted her mile in 2:04¾, she again beating Harvest Gale. Tremendous applause greeted the announcement of Emerson Shepard, when he told of the significance of the performance. In the third Miss Bertha was a half-length in front of The Lady at the quarter in :30¾, and they were lapped at the half and three-quarters. Like in the second, the heat was decided on the stretch, and had Serrill so elected, he could, without question, have driven his filly out in 2:03½ or better, for she appeared to be merely jogging. Ackerman, behind Bertha McGuire, brought Murphy to a drive in order to nip the place with the Lady. They trotted in 2:05, and Worthy Volo, who finished at a great clip, was lapped on them. Harvest Gale made a couple of disastrous breaks and failed to beat the flag, fourth money going to Worthy Volo. Little Mary Coburn, while outside the money, trotted a highly creditable race. As was universally commented, never in the history of colt racing did so great a field meet, and the Real Lady and the others were honored even in defeat. Azo Jay broke before the eighth in the first heat and was flagged, Dick McMahon afterward working him in 2:11¾.—Horse Review.

The Proof, driven by Daniels, trailed Allie Lou, the State champion trotter, for two heats in the free-for-all at the Fresno District Fair, then went to the front with the word, in the third heat, and made himself State champion by trotting the fastest mile ever trotted in the State of California. His time for the distance was 2:05¼ or a second and a quarter under the mark established by Allie Lou at the State Fair in Sacramento, early last month. Allie Lou was not stripped of all her honors, however, for she still holds the coast record for three consecutive heats. At the same time she made the 2:06½ mark in Sacramento she established a record of 2:07¼ for three consecutive heats. In the three heats raced at Fresno the average was 2:07½.

✤ ✤ ✤

Hal Logan won his fourteenth consecutive race, at Bakersfield. This pacer has won all his starts without losing a heat during this season. He is the best pacer developed in California for many years.

✤ ✤ ✤

The superior court of Arizona has rendered a decision that will prevent the holding of a race meeting in Phoenix this fall with the pari-mutuel system of betting in effect. A decision by the Supreme Court of Appeals last spring was that pari-mutuels were not contrary to the anti-gambling law. The latest decision holds that a race meeting with pari-mutuel betting is against public policy. George Purdy Bullard appeared in the case before the Supreme court and argued the legality of pari-mutuels which the court upheld. Last week he appeared on the other side with the public policy argument and was again upheld.

✤ ✤ ✤

Louisville (Ky.), September 25.—Boots, rated one of the finest handicap horses in the country, stepped into a hole, broke his leg, and was ordered destroyed at Lexington, Ky., according to information reaching here today.

The son of Hessian and Little Flower originally was owned by Harry Payne Whitney of New York, who sold him to Oscar Lewisohn for $10,000. A. K. Macomber purchased him last spring for $20,000. He was six years old and had won such events as the Brookdale handicap, Dominion handicap and the Frontier stake at Windsor.

✤ ✤ ✤

Many failures have been made by great race mares after having been retired to the stud, but in most instances, after having achieved great things on the turf, they were raced too constantly for their own good. Firenze and Miss Woodford were wonderful campaigners and great racemares, but because they were good they were kept at it constantly. Their constitutional vigor was sapped by overwork while on the turf and when sent to the stud practically nothing was left of them. Imp furnishes another case in point. Here was another great mare who ran until she had no constitution left with which to go to the stud. A mare has endurance to a certain point but she can not be raced to death and expect to bring on a progeny at the same time but some men never think of it.

✤ ✤ ✤

The report that has been current for several days that Kenneth D. Alexander had given the winnings of Escoba in the Breeders' Futurity to the American Red Cross has no foundation in fact. So good a sportsman as Mr. Alexander would probably be glad to make the donation, but it is more than likely he does not even know his horse won the great race. He is now somewhere in France and is driving an ambulance from the battle front to a field hospital. Therefore, he is far from a place where he would be able to send any message by cable. A cablegram was sent to him in Paris last Saturday telling of Escoba's victory, and may eventually reach him. In the meantime, a check for the goodly amount earned by the splendid son of Broomstick has been turned over to Dr. A. J. A. Alexander, a brother of young Alexander, who has charge of his affairs during his absence abroad.

✤ ✤ ✤

In point of sensational speed, championship performances, number and speed average of new 2:10 trotters and pacers, the grand circuit season has been more successful than was anticipated at the beginning. In point of cash premiums, the year was rather a lean one compared with its predecessor, in spite of the fact that when stewards arranged the date early in January, the prospects for a record season were very bright. The unexpected happened, however, when the promised $40,000 colt sweepstake was cut down to $10,000. Some associations declared off their obligations in direct violation of racing rules and others had to curtail the value of their stakes, as well as programs for lack of entries, so that there is quite a deficit in the total cash value of purses raced for. As it was more than $350,000 was hung up and distributed widely.

✤ ✤ ✤

The famous Transylvania at Lexington last week, 2:17 trot for $5,000, required seven heats in two days. The winner was Ima Jay by Jay McGregor with Royal Mac second and Early Dreams third. The favorite, Busy's Lassie, finished fifth among the thirteen starters.

Blackhawk Farm, with its magnificent stable of Shire horses from Diablo, in charge of E. Lovell, again triumphed at the State Fair this year. Judge John T. Caine III. of Logan, Utah, studied a long time before he was able to decide the championship among the mares, for the massive and graceful Cockerington Princess from the Jack London Ranch was a compelling creature.

For the second consecutive year, however, the champion went to Blackhawk Chessie of the Easton & Ward stable. This mare also was champion last year at the Rio Vista horse show, in the center of a bid draft horse district.

Blymhill Forester was declared Grand Champion. He, too, is from the Blackhawk stable.

MATINEE AT GOLDEN GATE PARK

Bill Malough's Emma M. featured the racing card, Sunday, Sept. 7, of the San Francisco-California Driving Club at Golden Gate Park Stadium, when she captured two consecutive heats after losing the first to Bradmont. "Shorty" Roberts, driving Bradmont, won the first heat with apparent ease and was going fair to win the second heat when Emma M. came up from behind and nosed him out.

The final heat in the 2:15 pace was the next feature of the day. The Pointer and Rodney Patchen were neck and neck from the time the word was given until the final stretch, when Pointer Belle tore loose and won the race by less than two feet.

Little Jack surprised the crowd when he romped away from a field of good horses and won two straight heats and the trophy for the 2:18 mixed.

Complete results of the day's races were:

2:18 Mixed.

Little Jack	1	1
Lynmour	2	4
Vallejo King	3	2
Minequa	4	3

Time—2:18½, 2:16½.

Free-for-All Pace.

Emma M.	2	1	1
Bradmont	1	2	3
W. J. K.	3	3	2

Time—2:11¼, 2:13¾, 2:13½.

2:15 Pace.

Pointer Belle	1	1
King Pointer	2	3
Rodney Patchen	3	2

Time—2:13¾, 2:13½.

MATINEE OCTOBER 15.

The laurel still decorates the shapely and pretty head of Emma M. as the queen of the pacers at the Golden Gate Park speedway. Bradmont endeavored Sunday afternoon, in a match race, to lift the title from the consistent and popular mare, but it was to no avail. Emma M. scored in straight heats in such impressive fashion that it left no doubt in the minds of the spectators who braved the cold and wind during the three miles of competition.

Loud were the cheers that greeted Emma M. and her proud owner, Bill Malough. Bill's a good sport, and every one was wishing him the top of the morning after it was over. Bill has estabzlished a reputation of being a good loser, and this requisite is so rare that he is appreciated by that band of horsemen who race every Sunday at the Stadium for the fun of witnessing the trotters and pacers measure strides.

After it was all over, South Americano was still trying to dope it out why Bradmont can win a heat in Sacramento in 2:07½ and get beat at the Stadium n 2:12. He smiled over the figures, and Bill Malough was right there to join in the gladsome comments. The summary:

First Race, Special Match Pace.

Emma M. (William Malough)	1	1	1
Bradmont (R. P. Roberts)	2	2	2

Time—2:16¾, 2:12½, 2:12.

Second Race, 2:16 Mixed.

Lynmour (D. D. Hanks)	1	1	
Vallejo King (Welsh & Ottinger)	2	2	
Little Jack (J. McNamara)	3	3	

Time—2:18¼, 2:15¾.

Third Race, 2:12 Pace.

Pointer Belle (J. M. Kidd)	1	1	
Rodney Patchen (J. McNamara)	2	3	
W. J. K. (W. J. Kenney)	3	2	

Time—2:11¼, 2:13½.

The champion, Miss Bertha Dillon, was beaten in the most spectacular heat ever raced in the Futurity. The two great youngsters raced the last eighth like a team, and opinion in the stand was all split up as to which had won, the official decision giving it to The Real Lady. Miss Bertha Dillon met her Waterloo in the second, when she was pocketed, and the high-strung filly, who inherits the nervous temperament of the Sidney Dillon family, made a standstill break on the upper turn, and could not be settled until she was hopelessly distanced. As a pure speed marvel I believe this filly outranks any three-year-old which has ever appeared, even the great Peter Volo, for she has trotted a half in :59, and the wonderful son of Peter the Great never approached that, even when at his best. She looks to be the one best bet of the trotters now racing to reach the 2:00 mark.

✤ ✤ ✤

No mare has beaten 2:01¼ on the trot except Lou Dillon 1:58¼, near relative of this filly, and her record was made behind a pacemaker, a method which is tabooed by the trotting authorities now.

✤ ✤ ✤

Lexington, Ky., Oct. 10.—A. H. Cosden's grand filly The Real Lady, driven by Thomas W. Murphy, today reduced the world's record for three-year-old trotters to 2:03, beating the record of 2:03½ made by Peter Volo here in 1914 in a trial against time.

RACING GAME TO RECEIVE BOOSTING.

[By Fred A. Purner.]

James W. Coffroth professes to believe that before another twelve months roll around the once kingly and popular pastime of horse-racing will be installed in California as a regular thing again. You will hear the notes of the bugle call out the horses, see the fields of fiery thoroughbreds parade to the post and get the thrill of following the flying silks to the wire. How you will receive that further touch of adventure and sensation that is part and parcel of fondling a ticket in your pocket on one of the steeds is one subject that Coffroth did not orate on.

Right here is where the shoe pinches. It is the troublesome corn, for racing without the added attraction of wagering is similar to baseball with the accompanying bats and balls. Coffroth is venturing a prediction, however, and he bases his optimistic view of a turf revival in California on the observations he has made from his Tijuana track. He has witnessed the breeders around here bring their horses across the border and has noted the old-timers and recruits get back into the game. All that was needed to stir up the old interest was to have a place to campaign the colt and fillies that were raised.

War Boosts Racing.

Coffroth has had a world of experience in promoting sporting events and is a pretty keen observer. He thinks he has left the pulse correctly in dagnosing the racing situation, for the war has created a demand for horses and the preferable type comes from the blooded stock.

Nothing would please the Lower California Jockey Club head more, so he says, than to have racing re-established in California. There would be limited meetings and it would act as an incentive to attract more of the big stables in the East to Tijuana and the ranks of the breeders would be increased. Coffroth is accordingly bending his efforts to assist in making whatever movement that is launched a success. He also wants to encourage the running events around the fair circuit.

There has been a squabble all summer between Coffroth and the promoters of the fair races over the rule that was adopted by the Tijuana Club requiring a sanction. The fair people contended that Coffroth was setting himself up as a dictator. Coffroth explains that perhaps he could have made a better outline of the existing conditions, which would have done away with the misunderstanding.

Coffroth says that the Tijuana Club is backed up by the Jockey Club of New York, the controlling turf body, in endeavoring to regulate the game. The practice of the ruled-off horsemen and jockeys going around the fairs cleaning up by hook or crook would have to be stopped. The State Fair at its last meeting had a taste of dealing with the handful of undesirable turf followers.

The Jockey Club head is going to try and show the Fair people that he is not ambitious to be a czar, but aims to keep the sport clean. He is talking of getting into communication with the promoters and patch up the misunderstanding so that the events of next season will be on a higher plane. If the two sides get together it will be a step in the direction of bringing the thoroughbreds before the public in a favorable light, as the crowds showed that they liked to see the runners break from the barrier and gallop to the wire.

The first move to bring back the racing game will be made by the newly organized Monterey Jockey Club at the Del Monte course on October 27. Five days of the sport will be run off and an effort will be made to have it go off with a bang. If successful Del Monte will have a meeting of a limited number of days every spring and fall. The chances are that other points would also take up the exploitation of the runners.

Some of the well-known thoroughbreds and jockeys at present at Reno will be secured and the announced plans call for running off the meeting in style to see if the game will go without any recognized betting.

At the directors' meeting of the State Agricultural Society last week at Sacramento, surplus receipts of the State Fair of a few weeks ago, promoted by the society, were made known by the financial secretary. President John M. Perry of Stockton stated that the receipts were $328,93.31 above the expenses. This is an increase of more than $4,000 over the surplus of last year. "Not many years ago the State Fair officials were giving notes to meet the expenses," said Mr. Perry. Mr. Perry has been connected with the promotion of California's State Fair for the past six years.

This immense surplus was made in spite of the large amount of money expended for the erection of temporary buildings for the housing of exhibits. Over $15,000 alone was spent in the erection of new buildings, and two exhibitors demanded $9,000 for their expenses. In the repair of tents expenses accrued to over $1800.

The percentage of entries at the State Fair this year was larger than ever before. "It is evident that the growers and producers of California are taking great interest in the exhibiting of their horticultural, agricultural and live stock products," said Mr. Perry in conclusion.

John H. Rosseter, newly-elected president of the Monterey Jockey Club that has taken the lead in heralding the return of the racing game to California, gives promise of taking his place in the ranks of the men who once built up the State's reputation as the home of great horses. Rosseter is branching out as a breeder, with an elegantly equipped farm just outside of Santa Rosa.

The Jockey Club head had the misfortune to lose a number of thoroughbreds on a ship that was recently sunk, but he is out to secure others. He already has had some imported stock along with well-known American-bred matrons, and in the next couple of years he will likely have some colts and fillies to make their debut. It is pleasing to note that some of the influential and prominent men of the State are again taking an interest in the breeding of blooded horses.

✤ ✤ ✤

IMPROVED METHODS TO PREVAIL AT TIJUANA

It is sad and pathetic to even contemplate the assaults on the traditions of the American turf that James W. Coffroth has mapped out for his Tijuana track. Men whose locks have grown gray in following the vicissitudes of the "sport of kings," along with the more youthful recruits, will be afforded an opportunity of delving into the dust-covered books of records to cite how this and that was never done before.

'Tis a brave man indeed who stacks up against these honored turf traditions. More consternation can be raised than the most flagrant of form reversals. Coffroth, however, believes in progressiveness and has laid down an edict containing the sum and substance that when it rains too hard and when the track becomes too muddy the scheduled day's race programme as the Tijuana track will be declared off.

"A most unheard-of occurrence," will come the wail from the rank and file. Evidence will be submitted that rain or shine the race meets in the past for years and years have continued on their merry and sometimes dreary way .

"What is the use of bucking against such adverse conditions, is the way I figure it?" says Coffroth. "Last season we raced on days when it was anything but sport to watch the horses struggling through the mud. At the same time the spectators were forced to put up with a number of discomforts. Accordingly I will devise some signals and announcements on the rainy days when we will not race."

At a meeting of the Monterey Jockey Club, the roster of racing officials for the fothcoming meeting of the club over the course at Del Monte, Saturday, October 27, to Saturday, Nov. 3, was completed.

President John H. Rosseter announced that the stewards of the meeting would be John Cheever Cowdin, John B. Coleman and Leon H. Wing. The presiding judge will be Fred A. Purner, with Walter B. Jennings and R. Porter Ashe as associates. The racing secretary is S. J. McGibbon, an experienced official, with S. J. Rothert as clerk of scales and entries. Among the other officials selected were:

Starter, Richard A. Dwyer; patrol judges, Edgar S. Gleason, H. T. Griffin; paddock judges, Fred W. Goodcel, Edward A. Molera; track superintendent, John H. Currie; official physician, Dr. Arthur Beardslee; official veterinary, Dr. A. G. McCarthy; timers, W. S. Tevis, M. J. Salaazar; racing committee, J. O. Tobin, S. F. B. Morse, Edward Cebrian.

Many of the officials are acting in an honorary capacity without compensation. In a racing way the success of the coming meeting is almost assured. Up to a few days ago sixty-four stalls had been reserved, including the strong stable of R. J. MacKenzie and the stable of G. A. Marshall, all the way from Aqueduct, N. Y. Eight stalls have been taken by Hildreth & Leary.

It will be the first time in eleven years that "Sam" Hildreth has saddled a race horse in California. After the first two days at Del Monte he returns East to Glenwood, Col., for a month's holiday on a big game hunt.

Horses have been galloping on the Del Monte course the present week. By October 25 there will be 100 horses ready to race at Del Monte.

✤ ✤ ✤

Definite arrangements regarding the New Orleans race meeting to be held from November 29 to December 31, inclusive, have come to hand. This meeting will be held under the auspices of the Jefferson Parish Fair, Inc., with Joseph A. Murphy as director of racing and presiding judge. The following staff of officials will assist Murphy:

E. C. Smith, presiding judge New York track, associate steward.

J. B. Campbell, presiding judge, Kentucky tracks, placing judge.

A. B. Dade, starter.

James McLeman, racing secretary and clerk of the scales.

H. P. Conklin, patrol judge.

John Carey, paddock judge.

✤ ✤ ✤

The $250.00 purse donated by the Golden Gate Thoroughbred Breeders' Association for a mile and a sixteenth race to be run at the meeting of the Pacific Coast Trotting Horse Breeders' Association was decided at Bakersfield last Saturday, and was won by the bay gelding C. W. Hodges, son of Woolsthrope, making his eighth victory since the beginning of the State Fair on Sept. 6.

SEEING HORSES AS THEY ARE JUDGED.

Two horsemen were comparing opinions on the horses and the judging of them at one of the big fairs. One man thought the judging was well done and that the line-up of winners looked consistent all through the classes. The other thought the judging was poor, maybe crooked, and that there was nothing istructive about it. These men both know horses, and yet they could not both be right in their opinions as expressed.

Prejudice is often the cause of such divergent opinions. One man's favorite exhibitors or horses may have won and the other's favorites lost. It is amazing to note how blind men will be to the faults of animals which they wish to see win. Some men seem absolutely unable even to make a fair comparison between eyes, bone, action or any other single dtail of a horse they wish would win and a horse they wish would lose. Two horses may have bone of nearly the same measurement and flatness as it can be, and yet one man will believe he sees a larger bone in his favorite and another man will argue as positively that his choice has the larger bone. This has often occurred. If every breeder would cultivate a critical attitude toward his own stock such mistakes would seldom be made.

It is a safe guess that a capable judge learns more about the horses in the ring than anyone looking on from the ringside. In classes that include some unsound animals the casual observer might readily overlook the reasons for decisions. The keener the eye of the onlooker the surer he is to catch the reason for a likely-looking horse failing to please the judge. When animals are sound and very closely matched in excellence, a decision may hang on some comparatively small point of advantage which the successful horse possesses. Only keen discrimination and close attention to the animals in the ring will enable one to anticipate the judges opinion in such cases. Even then a person on the outside must have some acquaintance with the judge's ideas and his personal preference as to utility, type, breed, character and the importance he attaches to certain points of conformation and action in order to understand his work most fully.

A good horse judge is consistent in his work. After he has made awards in a few classes and has thus shown his ideals, the best horsemen who are watching him can very nearly pick out the horses which will win in the succeeding classes and give the reasons the judge will have for his decisions. The effort to do this sharpens perception and seasons judgment. Picking the winners in a class of horses is an instructive pastime.

We always hear complaints about incompetent, unfair and dishonest judging when horses are shown. Naturally this comes from the losers in the contest. Usually it comes from certain exhibitors who habitually make accusations of this kind whenever they are beaten. They cannot admit that anyone else has horses good enough to beat theirs. The exhibitor who looks pleasant when defeated and says nothing, gains the respect of everyone. So far as the personality of the exhibitor may influence the judge, the game loser is the most likely to win.

He is also the most likek ly to win in business in the long run. He has the right attitude. He attempts to see the horses through the judge's eyes. That is the way everyone at a ringside should try to do When that is attempted one can generally discover sufficient reasons to justify the official decisions. The result is to improve one's judgment instead of to sour one's disposition. Most horsemen who are entrusted to judge at important shows are selected because they are capable and honest, so it is only fair to assume that they are so. Then the onlooker can improve his ability to see the horses in the same way they are judged.

✤ ✤ ✤

Thoroughbred racing in California was given great impetus recently with the announcement of a six-day racing meet to be held at Del Monte October 27 to November 16. The meet will be held under the auspices of the Monterey Jockey Club, an organization of breeders and sportsmen who are interested in bringing the racing game back to this State. The first meeting this autumn will be followed by two meetings of twelve days each in the spring and autumn of 1918.

The rosters of the Monterey Jockey Club's officers is a very strong one, with John H. Rosseter as president. He is a lifelong devotee of racing and one of America's leading breeders. The honorary presidents include W. H. Crocker, A. K. Macomber, William Mayo Newhall, C. W. Clark, L. J. Rose and A. B. Spreckels. Among the vice presidents are the well known California breeders, R. M. Mackenzie, D. C. Jackling, Walter H. Dupee and Edward Cebrian. The club's treasurer is S. F. B. Morse, who has devoted much time and thought during the last two years to an institution of racing in California upon a high sporting basis. The secretary is J. S. A. Macdonald, a man of wide knowledge of American breeding lines and racing. Selected to act as the first board of directors are J. R. St. Cyr, John H. Coleman, George Wingfield, John H. Rosseter and S. F. B. Morse. Among the well known men asked to act as stewards of the racing are Malcolm W. Whitman, Henry T. Oxnard, H. R. de Long, Frank S. Drum, Francis Carolan, Thomas Driscoll, R. M. Tobin, Captain W. H. McKittrick and George W. Nickell.

STATE FAIR LIVE STOCK SHOW EXHIBITORS SECURING AWARDS.

Close to 15,000 persons were in the grandstand at the State Fair Grounds when Governor William B. Stephens and other high state officials reviewed the 500 or more pure bred horses and cattle that are a part of the State Fair's livestock show this year. It was at once the greatest parade of its kind ever held in Sacramento and the largest crowd ever in attendance at such a parade. The animals it line are estimated to be worth $1,325,000, at least a third of a million more than the stock in last year's parade.

Regardless of the dairy cattle exhibits, H. H. Kildee of the University of Minnesota, who judged this department of the livestock exhibit, stated that the California State Fair showing was by far the best that he has had the pleasure of judging this year and that many of the animals entered, particularly the Holstein bull, King Segis Alcarta Prilly, owned by the Bridgford Company of Knightsen, Cal.—who was awarded the grand championship—would take top position at any fair in the land. Judge Kildee has passed on the dairy stock at four state fairs from the standpoint of one who knows. Judge Kildee added that the entire exhibit of dairy cattle, even those that did not secure awards, including Holsteins, Jerseys, Guernseys, Ayrshires, Dutch belted and dairy shorthorns, were most excellent on type, quality and weight. Many of the awards are here given:

Draft Horses—Percherons: M. Bassett, Hanford, E. A. Ward, Trustin; Sonoma Valley Percheron Horse Co., Shellville; Ruby & Bowers, Davis; H. G. Learned, Stockton; California Polytechnic School, San Luis Obispo; N. W. Patterson, Patterson, Cal.

Belgians: Exhibitors securing awards — C. J. Luhrses, Bethany; Ruby & Bowers, Davis.

Work Teams: Easton & Ward, Diablo; Ruby & Bowers, Davis; Burrell & Corey, Hanford; M. Bassett, Hanford.

Harness Horses.—Stallions, Mares or Geldings: Adelaide Gillis McCormick, Los Angeles; Charlotte B. Anderson, Pleasanton; Ruby & Bowers, Davis; Mrs. W. Anderson, Kenwood.

Ponies.—Shetland Ponies: Geraldine Bowers and Mrs. M. E. Boyd, Davis; Frank Hart, Modesto; Miss Mercedes Anderson, Pleasanton.

Cattle.—Herefords: W. J. Bemmerly, Woodland; D. O. Lively Stock Farm, San Francisco; H. H. Gable, J. A. Bunting, Mission San Jose; Mrs. J. H. Ware, Live Oak; Kern County Land Company, Bakersfield; H. L. and E. H. Murphy, Perkins, Cal., and Western Meat Company, San Francisco.

Shorthorn Cattle, Open Class: Jack London, Glen Ellen; Thomas T. Miller, Los Angeles; Ormondajo Co. of San Francisco; Pacheco Cattle Co., Hollister; Carruthers Farm, Mayfield; T. B. Gibson Sstate, Woodland; Hopland Stock Farm, Hopland; T. S. Glide, Davis; H. L. and E. H. Murphy, Perkins.

Fat Cattle, Any Breed, Pure or Grade—Steers, one year and under two: First, Kern County Land Co. on Steer; second, Murphy on Kelley.

Swiss Belted: Mrs. Jennie Strader, Ceres, Cal., and U. G. Strader, Ceres, Cal.

Guernseys—Open Class free for all: B. E. Nixon, Napa; A. J. Welch, Redwood City; Charles De Bois, Bereley; J. W. Henderson, Bereley; L. D. Smith, Bereley; B. E. Nixon, Yountville; Calla Grove Farm, Manteca.

Shorthorn—Alexander & Kellogg, Suisun; Thomas Harrison, Glen Ellen; E. L. and E. H. Murphy, Perkins; G. A. Murphy, Perkins; T. M. Stuart, Salt Lake City, Utah.

Jerseys—C. P. Hombree, Monmouth, Ore.; Guy H. Miller, Modesto; J. B. and J. E. Thorp, Lockeford; S. F. Williams, Orland; Dr. H. W. Hand, Glenn; O. J. Ames, Oakdale, Cal.

Holstein-Friesian Cattle (Open Class) — J. W. Benit, Modesto; J. S. Gibson Co., Williams; S. G. Kounias, Modesto; Napa State Hospital, Napa; E. G. Wharton, Tulare; J. H. Harlan Co., Woodland; Bridgford Company, Knightsen; Gonzalo Co., Cia, Santiago, Chile, S. A.; Fred D. Ross, Hanford; Toyan Farm Association, Santa Clara; F. A. Heroux, Oakland.

Ayrshire—E. B. McFarland, San Mateo; Preston School of Industry.

Swine. — Hampshires: Conejo Ranch, Newbury Park, Cal.; L. A. Denker, Saugus; J. W. Henderson, Berkeley; C. Eugene Gaddis, Martinez.

Poland Chinas: J. H. Hansbrough, Modesto; H. I. Marsh, Modesto; John M. Bernstein, Hanford; M. Bassett, Hanford; E. Miner, Lodi; W. Bernstein, Hanford; Raymond Beckman, Lodi; George V. Beckman and Sons, Lodi; A. L. Bassett, Hanford; Fred. D. Ross, Hanford; Howard C. Peterson, Reedley; W. A. Young, Lodi.

Berkshire: Perkins & Co., Perkins; James Mills Orchard Company, Hamilton City; A. B. Humphrey, Escalon; H. L. and E. H. Murphy, Perkins; A. L. Stephenson, Los Molinos; Frank A. Brush, Santa Rosa; H. J. Hammond, Sacramento; Carruthers Farm, Mayfield; George M. York, Modesto; Frank B. Anderson, Sacramento; Napa State Hospital, Napa.

Duroc-Jerseys: J. M. DeVilbiss, Patterson; Hadin Smith, Woodland; H. P. Eagle, Woodland; W. J. Fulgham, Visalia; J. E. Thorp, Lockeford; Frederick M. Johnson, Napa; Allen Thompson, Tulare; Conejo Ranch, Newbury Park; Clocum & Son, Willows; A. A. Trueblood, Sacramento; Henry Cummins, Tulare; M. Rucker, Fair Oaks; C. L. Nielson, Fowler; V. F. Dolcini, Davis; A. J. Welch, Redwood City; E. J. Weldon, Sacramento; J. H. Minto, Patterson.

Swine Raising Contest: C. D. Nielson, Fowler; C. A. and W. M. Johnson, Lemoore; Howard C. Peterson, Reedley; Hiram Hendren, Fair Oaks; Ed. McKenna, Lemoore; Irving R. Dickson, Fair Oaks.

Sheep and Goats.—Hampshire Sheep: Calla Grove Farm, Manteca; Robert Miller, Davis; Kaupke Bros., Woodland; Wray Bros., Davis; McInnes & Salz, San Francisco; Bullard Bros., Woodland; Edwin W. Pritchett, Mojave.

"The best Shorthorn show I have ever seen in the West—probably the best Shorthorn showing ever made in the West."

In this fashion did Professor John T. Caine III. of Utah Agricultural College characterize the exhibition of Shorthorn beef cattle held at the California State Fair this year.

It was truly an exceptionally fine showing of beef stock. A day of hard work was required to pass on all of the entries. At the conclusion of the day, Thomas T. Miller of Los Angeles, a wealthy young man who has spent large sums of money to obtain the best in the country, proved to be the principal winner. However, Miller did not carry away all of the honors, for Hopland Stock Farm of Hopland and the stock of the Jack London Ranch, Glen Ellen, shared in them.

Miller's Greendale Sultan was declared to be champion of the bulls and Roselawn Choice of the London herd was Reserve Grand Champion. The winning cow was Hopland Lass and White Mayflower, owned by Miller, was the reserve to her.

The quality of the Shorthorn stock was of such character that Judge Caine had to study long to decide and even then, of course, there were those who disagreed with him.

* * *

Both Highland Monarch and Minstrel won over Charmeran Peavine in the combination harness and five-gaited geldings judging contest at the State Fair horse show. Monarch was awarded first honors. In every case the horse selected by Dean Carlyle as the winner was the popular choice of the 2,000 spectotors.

Results of the night's show follow:

Class 1—Combination harness and five-gaited geldings: Highland Monarch, first, owned by Mrs. A. S. McCormick; Minstrel, owned by F. J. Bork, second, and Charmeran Peavine, owned by Mrs. C. B. Anderson, third.

Class 2—Ladies' saddle class: Hazel Dazzle, owned by the San Francisco Riding School, first; Charmeran Chief, owned by Mrs. C. B. Anderson, second, and Kildare, owned by Mrs. Winslow Anderson, third. My Surprise and Miss Murphy were scratched because of the non-arrival of riders.

Class 3—Middleweight polo class: Jim C. first, owned by Garwood ranch; Betty, second, owned by the Garwood ranch; Chaner, owned by the San Francisco Riding School, third; and Prestal, owned by the Garwood ranch, fourth.

Class 4—Hunters, in pairs, ridden abreast, in riding costume: Rifle and Jim C., owned by the Garwood ranch, were awarded first honors; Sanford Cady and Baldy were given second, and Miss Murphy and Good Enough, third. The two last named are owned by the Garwood ranch, as is Sanford Cady. Baldy is from the Bork stable.

—o—

A. B. Humphrey of Escalon, who won the highest award at the Panama-Pacific International Exposition, captured a grand championship at the State Fair with his Berkshire boar Majestic King VI., which he purchased from Perkins & Co. of Sacramento county only a few days before.

✤ ✤ ✤

COMMUNICATION FROM C. A. HARRISON.

The Breeder and Sportsman,
San Francisco, Cal.

Gentlemen: I am in receipt of a letter from Arthur from Arthur Caton Thomas, Secretary, Western Association of Trotting Horse Breeders in session at Des Moines on September 16th, notifying me that I was elected Vice-President of the Association for the State of Washington. Also requesting me to notify the Horse papers in my district, so I take pleasure in notifying you, and while I am sure there are many men in my state who would be far better qualified to fill the office conferred on me, yet I will say that no man is any more sincerely interested in the sandard bred horse and all the interests connected with harness horses and harness racing than I am, and now that this honor has been given me I will promise to do my level best to make good and encourage the breeding and racing of harness horses, and encourage each and every man who is in any legitimate way connected with or interested in the game, as I believe that now is the time for every man who loves the sport of harness racing and the breeding of harness horses to put his shoulder to the wheel and push hard, for at no time in the history of harness racing was a real first-class trotter or pacer worth as much money as it is today, and the people are more enthusiastic over fairs and racing today than I ever saw them. I am speaking about the people of the Northwest as I saw them at our State Fair just held at North Yakima, Washington. The applause from the vast audience at the close of a well contested heat or race proved to me that the American public loves and appreciates a well contested hosse race.

The Vancouver Fair and Racing Association had a financially successful fair and race meeting. The public turned out in big numbers and were pleased. The Southwestern Washington Fair at Centralia and Chehalis was a financial success. The racing was clean, the time fast, and the contests were well applauded by the public.

The Interstate Fair at Spokane broke all previous records as a money-maker. The racing was all high-class, and the way the public showed their appreciation both by continuous larger attendance and applause proves beyond any doubt that horse racing is not a dead sport, and that it will not die as long as men and women live, for horse racing is truly the sport of real men and women, and I, as a citizen of the State of Washington, and a lover of good horses, both the standard bred and the thoroughbred, am pleased to publicly say that I, as the Vice-President of the Western Association of Trotting Horse Breeders for the State of Washington, will try to render such a good account of myself that the people of my state and my associates in the Western Association of Trotting Horse Breeders will not be ashamed of me, and in conclusion I sincerely thank the W. A. of T. H. B. for the honor they have conferred upon me.

Yours truly,

C. A. HARRISON.

—o—

HISTORY OF THE ANIMALS IN GOLDEN GATE PARK.

As the trees and shrubbery grew into near forests, hills and valleys developed, ponds and lakes formed; animal life, wild and domestic, naturally suggested itself. The suggestion met with quick and enthusiastic response.

The first donation, October 31, 1889, was a pair of elks from Alvinza Hayward. The first elk born in the park made its appearance on June 24, 1890. These prolific animals took kindly to their surroundings, and the progeny from this pair numbers over a hundred. In February 1891 the park purchased its first buffalo from "Buffalo" Jones, of Garden City, Kansas, paying $1000 for the animal, which was named Benjamin Harrison, and on April 26, 1891, Capt. Sam Thompson caught on the Wyoming plains eighty miles north of Rock Springs, the five-year-old cow "Mrs. Harrison." This cow had a rather romantic history. In 1886 her father and mother ran into a herd of range cattle—belonging to Abe Lehman. Sam Harper, later of the park police, caught the pair intending to sell them to the circus; but from excitement and injuries incident to capture, both animals died, leaving their six-months-old calf an orphan. A kindly range cow adopted her, and she ran wild with the herd until lassoed by Capt. Thompson. The park paid $400 for the cow; and the Southern Pacific, imbued with the popular public spirit, rebated the freight, $250, and thus the wild little waif of the plains became the dignified "Mrs. Harrison" of Golden Gate Park. She showed her gratitude by presenting the park with a female calf on April 21, 1892; her descendants now number more than forty. Thse animals, now almost extinct, thrive well; the climate seems to suit them; they are very fond of the native grasses, and are fed alfalfa with occasionally a little meal. Their beautiful paddock was once the site of a lake which disappeared over night, in the earthquake of 1865. The huge bodies and lumbering gait are a constant source of interest to park visitors.

The grizzly bear, so long an object of amusement, and said to be the last of his species in California, was presented by The Examiner in 1880, having been brought to the city for the Native Sons parade. He was caught in the San Bernardino mountains and his capture was no easy matter. Three traps were built ten miles apart. The first trap he wrecked and stole the bait; the second he walked around for about two weeks but did not go in; the third proved his Waterloo. He was unable to get out and was tangled up in ropes by the Mexicans. His capture cost $2800. His mate, a Silver Tip from Idaho, was the gift of A. B. Spreckels. Although Hagginback has asserted that bears will not breed in captivity, this pair produced several sets of triplets. The first set were killed by their heartless parents, but this was not allowed to happen again.

All gifts were not made by the sterner sex. In 1894 Mrs. Henry Miller presented a pen of ostriches from the Bloomfield Ranch near Gilroy.

Six Persian sheep, given during the Mid-Winter Fair, increased to more than one hundred. The odd-looking kangaroo are wonderfully interesting, especially to children, but they have to be carefully fenced, as they are great fighters and can give a terrific blow when annoyed or angry.

From these early gifts we can now wander into the modern Academy of Sciences and learn at our leisure all the points and habits of these animals, a curiosity which the live subject would no doubt resent and refuse to gratify. While we wander at our leisure, let us dwell with satisfaction on the fact that our horses are not waiting, standing in the sun, nor wind, nor troubled with flies.

BACK NUMBER.

—o—

Marvin Childs has been called to the colors, his latest orders being to report at Fort Riley, Kansas, Oct. 2. He is the first of the Grand Circuit drivers to be called, and will carry the good wishes of every horseman of the country, as he is one of the most gentlemanly and likable young men in the harness horse sport. We all wish his war experience will be no more severe than the learning of the business of war, and that before another season is at band he and Ben Earl 2:00½ will be making war only on the free-for-all pacers.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

The open season for jacksnipe is the same as that for ducks and geese,—October 16th to January 31st.

✣ ✣ ✣

The daily limit for quail and rabbits is fifteen and thirty for the week.

✣ ✣ ✣

The robin eats his own weight and 56 per cent over, every day. His is principally a diet of worms.

✣ ✣ ✣

Now that the Government wants the people to eat more fish it will be harder than ever to keep Father from "taking a day off."

✣ ✣ ✣

You can shoot ducks one-half hour before sunup, which will be around 5:50 o'clock at the opening of the season, and don't forget the bag limit is twenty-five.

✣ ✣ ✣

Fishing for rock cod on the smill tides has been good in Raccoon Straits and around Angel Island, an unusually large number of big fish being taken, some of them weighing three or four pounds.

✣ ✣ ✣

Striped bass enthusiasts have been having good sport at the entrance to Corte Madera creek along the San Quentin shore, a number of big fish having been taken within the last two or three weeks.

✣ ✣ ✣

Steelhead fishing in Weymouth pool was reported excellent, twenty-one being caught on the fly on Thursday and fourteen on Friday, with half-pounders very plentiful. The fish are all up the river, as very few were taken at Greigs.

✣ ✣ ✣

The rice growers in the Sacramento valley will welcome with delight the fusillade that will greet the ducks on the morning of the 16th. It will be some compensation for them to get even with the ducks for the amount of their good rice that has gone into making "duck meat."

✣ ✣ ✣

Reports from Eureka state that a half hour before sunrise on the opening day of the duck season an unprecedented flight of water fowl, lasting several hours, was noted, and hunters are delighted with the prospect for splendid shooting this season.

That the abolition of spring shooting has done wonders for the preservation of wild game is evidenced from the abundance of wild water fowl this year. Birds are reported more numerous than for many seasons past, and reports coming into the office of the Fish and Game Commission show that limit bags are the rule rather than the exception. Ofcourse, the first in the fields enjoy the best shooting as the birds were quite tame and flying low. It will not be long, however, before they will get wary and realize that they are being warred upon.

There has been great shooting at Los Banos and throughout the San Joaquin and Sacramento valleys, not only the marshes and sloughs offering great sport, but the rice fields have been full of shooters getting limit bags.

Capt. A. W. duBray, T. C. Peterson, and Jim Hull are shooting ducks in Goose Lake, way down in the Imperial valley.

✣ ✣ ✣

W. F. Turner opened the hunting season, as far as he was concerned, at Corcoran last Monday, one day too early, and it cost him just $200, $100 for shooting out of season, and another $100 for going over the bag limit, as he was found with thirty-three ducks instead of a lead of twenty-five. The Sacred Heart Hospital at Hanford profited, however, as the confiscated ducks were donated to that institution.

✣ ✣ ✣

A Wyoming newspaper describes several wild animals of that region heretofore overlooked by naturalists: Oogly Woo, a six-legged animal with a sharp, stiff tail; when closely pursued and cornered will stand upon its tail and whirling rapidly around bore a hole in the ground into which it disappears. The deadly Racaboar is a four-legged animal with short legs on the left side and long ones on the right side —adjusted for mountain climbing; will course its swift way around mountain peaks with its four feet always touching, and can be captured only by turning its course in the opposite direction, when its four long legs become uppermost. The One-Eyed Screaming Aemus is a bird inhabiting the highest peaks; when closely cornered will turn upon its pursuers and with a mighty gulp swallow itself.

The Remington Arms-Union Metallic Cartridge Company has issued a very handsome calendar taking in the months of October this year up to November, inclusive, next year. The calendar is a beautiful piece of high-class color work, true to nature, and represents an autumn field with a covey of Bob White just taking to flight.

✣ ✣ ✣

Trapshooting has taken such a hold on the miners of Treadwell, Alaska, that tournaments ars held Saturdays and Sundays and sometimes during the week, even though the mines do not close excepting July 4 and Christmas. It is not a bit out of the ordinary to see a miner coming off his shift carrying a shotgun and go to the trapshooting club and shoot with a squad before going home.

✣ ✣ ✣

The Mount Diablo Club's private lake has been closed for the season for everything except boating. Though it is several years since the lake was restocked the fishing has been excellent of late, the limit having been reached several times this season. Not only is there new blood in the recently arrived fish, but there are new varieties, the shipment having included blue gills, crappie, black bass and Sacramento perch. The closing of the lake has turned attention more than ever to the new blue rock trap of the club, to golf, and to the other out-of-door attractions.

✣ ✣ ✣

American elk, which once had a wide distribution in North America, are now confined chiefly to the States of Wyoming, Montana, and Idaho, and the Provinces of Manitoba, Alberta and Saskatchewan, Canada. The largest herds are in the Yellowstone region, numbering between 50,000 and 55,000, distributed in two main herds. Many elk now in captivity are privately owned, and a census of such elk is made annually by the Department of Agriculture through its Biological Survey. It is estimated that there are about 2200 elk in captivity in about 125 different places in the United States; the total number, wild and in captivity, in this country being estimated at between 80,000 and 100,000.

✣ ✣ ✣

Never has there been such pole fishing for mackerel as was enjoyed the latter part of last month at the beaches in Southern California. The run lasted for ten days and the fish swarmed soreward in great schools—acres in extent, and bit ravenously, and it was often the case that five or six fish were landed at once on a single line. At Redondo Beach the endless pier for days resembled a mighty horse-shoe-shaped porcupine, long mackerel poles bristling from every foot of it from daylight to dark, and small boys were making extra spending money by holding places all night for enthusiastic anglers. The fish ran in weight from one to two pounds each, and it is estimated that not far from a million pounds of mackerel were taken and salted by families for future consumption.

✣ ✣ ✣

The newly installed blue rock trap of the Mt. Diablo Park Country Club is declared by experts to be ideal, especially in the matter of lighting, and many members of the Country Club have been limbering up on the clay birds in anticipation of the opening of the duck season. Already prizes have been put up, and it is expected cups will soon be offered by interested trapshooters. Meantime, arrangements are being made for a shoot between the Diablo Country Club and the Elks and Golden Gate Clubs of San Francisco to be held in November. This, like other arrangements regarding trapshooting at Diablo, is in the hands of E. P. Thorning.

✣ ✣ ✣

Forty Yolo county sportsmen have organized a new gun club to be known as the Birch Gun Club, and are preparing to celebrate the opening of the duck season with a big hunt. The club's hunting grounds cover about four square miles of land and includes the tract running eastward two miles along the Northern Electric trestle from a point a mile west of Target station and extending two miles southward from the trestle, the entire preserve being fenced and properly posted.

✣ ✣ ✣

Early reports sent in from the San Joaquin and Sacramento valleys state that farmers are paying men to chase the ducks off their farms. Big flocks were seen flying over San Francisco bay Sunday and the ponds in Golden Gate Park were covered with fowl. On the marshes near Halfmoon Bay and Salada Beach plenty of ducks have been within the past week, and several local hunters have their eyes on that section for the first day. Twenty-five in one day and fifty in a week is the limit. The Fish and Game Commission will have a special corps of "crack" deputies on the job, and it is very improbable that anything not legal will be "slipped over."

Fishing for rock cod on the small tides has been heavier than any heretofore experienced. At least so declare the veteran duck hunters, and it looks as though limit bags will be the rule early in the season.

✣ ✣ ✣

America is going to send a war dog division to France. Secretary of War Baker approved a bill introduced by Senator Brady of Idaho to accept as a gift one thousand dogs to be trained for military purposes.

✣ ✣ ✣

Henry Twisselmann killed a freak buck on the Twisselmann ranch in the foothills east of Gonzales last month. Because he already had the season's limit, he could not shoot the dead buck's running mate. The animal killed had long, straight horns, like those of an antelope, about eighteen inches in length. The two bucks have been feeding on the almonds in the Twisselmann orchard, and when the hunter came upon them they were only about a quarter of a mile from the house. The buck killed weighed 137½ pounds after it was dressed.

WENTWORTH DAM CELEBRATION.

The completion of the Wentworth dam, at Point Reyes, was celebrated last Sunday by the California Anglers' Association and there were many members present, together with other enthusiastic fishermen. The California Fish and Game Commission was represented at the celebration by Carl Westerfield and Ernest Boucher. Judge George A. Wentworth, Secretary of the California Anglers' Association, and S. Spence, the President, delivered appropriate speeches and contributed to the general good time. The dam is named after Judge George A. Wentworth and was built by the Fish and Game Commission for the purpose of restoring Paper Mill Creek to its old channel, thereby deepening the outlet to the creek and giving large steelhead easy access to this stream. It is expected that fishing on the Paper Mill will be greatly improved, especially the steelhead fishing late in the year. The California Anglers' Association and the Fish and Game Commission are working hand in hand to better conditions for fishing throughout the state, and the association is now considering a lodge somewhere on the upper Sacramento River that will be open to the use of all its regular members. This will be provided for by an extra initiation fee in addition to regular dues and will be charged incoming members.

DUCK SEASON OPENS ON THE 16TH.

Sunrise on Tuesday, the 16th, is the opening of the duck season according to the State law which was amended at the last session of the Legislature to be in conformity with the Federal laws. There was considerable confusion and misunderstanding last year as the State law at that time allowed shooting to begin a day before the national law permitted it. Reports from the marshes and from all sources indicate that there is a plentiful supply of ducks this year and that the sport will be good. Everybody is looking for limit bags on the morning of the first day.

FASHION IN DOGS.

What will be th next fashion in dogs? This is a somewhat absorbing question to those who breed for the market, as of all things mutable the fashion in dogs is perhaps the most changeable. The man who is out for the fashion might as well, as far as money is concerned, be out of the fancy.

Mastiffs were once in great demand, and not so many years ago, either; now they are a drug on the market. The dealers say "they went quick." St, Bernards are on the wane, probably owing to the unhappy knack they have acquired of dying at unexpected and inconvenient times.

What will be the next breed?

Some think the barzois will reign for a period, but this is somewhat improbable, as the temper of the noble Russ is not angelic, and people occasionally object to buying a dog that may sooner or later elect to dine off a favorite child. Undeniably beautiful is the Russian barzois, and possibly very useful in large packs when there are wolves around, but hardly the animal to fill the bill in New England, where wolves are extinct and babies unusually plentiful.

Straws show the way of the wind, but when there is no wind, patience to wait until it comes is of more value than aught else. What will be the fancy in big breeds next year, or the year after, no one knows; in the smaller breeds it looks as though the Scotch terrier was going to have an inning. He will take probably, the place of the moribund fox terrier.

QUAIL SEASON OPENS NOV. 15TH.

A mistaken idea seems to prevail among many hunters that the quail season for mountain and valley quail in California opens on October 15th. This is wrong. The open season does not commence until November 15th, and the Fish and Game Commission are issuing warnings to those who fail to abide by the law, as ignorance will not excuse violators. Deputy game wardens will be out in force all this month to see that the provisions of the law are carried out.

Duck Shooting in California—Every Man Gets the Limit

CALLING OF DUCKS.

Whether you shoot ducks over decoys, on the pass, jumping or wading, the call is very essential. Yet of the great number of men who shoot, comparatively few are able to call well or with judgment. Nor is it necessary to cultivate many different calls. Two or three are enough.

For the inland water-fowl, mallard, widgeon, teal, gray-duck and all non-diving ducks, the mallard and teal call is sufficient. In fact, the mallard call alone is usually enough for all non-diving ducks.

For diving or deep-water ducks, the blue-bill call will answer, although if one has also at command the purring call of the red head, it will greatly help in the day's sport. In shooting over ordinary waters where sport is to be had at red heads, blue-bills, broad-bills, whistlers, butter-balls and the others of their class, most of the ducks will respond readily to the blue-bill or the broad-bill call. Blue-bills are great callers, and on calm days can be heard hailing every passing flock.

Sometimes the blue-bill calls the ker-r-r-r once, then twice and three times, and occasionally even four times. When they are feeding they often sound a contented kind of chuckle which is similar to that of the mud-hen when undisturbed.

Do Not Call Too Loud.

Sound travels a long way in a still marsh. When the call is loud the mallard, black-duck and widgeon detect easily the fraud in calls; therefore, modulate your voice in a marsh. Oftentimes these wary birds, after coming into a marsh in response to your call, will settle among your decoys; or they may alight outside of gun-range and study the decoys to satisfy themselves of their being all right. If not disturbed they will then slowly move towards the decoys, feeding and chuckling as they swim.

Do not call too loud or too often.

Call to attract the bird's attention to decoys, then modulate your call. In a marsh remember the birds can detect the imitation much more easily in a loud than in a muffled call.

For deep-water birds call louder, or else give a low chuckle that they can just hear.

If birds start to circle away, a few low calls will often bring them back.

If in open water, the birds often will go entirely around you to discover what the suspicious bunch of weeds contains, and at such a time lie low and do not try to keep them in sight all the while. Your moving will scare them quicker than anything else. Lie low, and stay low, and if the birds come in do not jump up if you happen to be on shore. Rest just high enough to clear your blind when you shoot. Be assured the ducks' eyes are on the shore side, for there is where they watch first for danger, and any movement sends them scattering.

NEXT YEAR'S HANDICAPS.

The places for holding the several Handicap Tournaments, the Grand American included, that will be directly given by The Interstate Association next year, will be decided upon at the annual meeting of the Association, scheduled for November 8th. Gun Clubs desiring any of said Tournaments to be held under their auspices should make application on or before October 15th. Each trapshooting season numerous gun clubs signify their intention of applying for these Tournaments to be held under their auspices the following year, but they fail to send in their applications, or wait until it is too late for the Association to take action on them. Wry not do it now?

HOW TO BUILD A DUCK BLIND.

Having had considerable experience with ducks and ducking blinds, the writer will explain the way his most successful one was made:

Set in three posts, the size all depending on the size you wish the blind to be. These posts need only be small and driven in the bottom far enough to withstand all winds. They should extend four feet high. Then get six laths (of thin material so as to be limber), each one long enough to reach the three posts. Then nail three laths on posts, putting them about a foot and four inches apart.

Now get a good stock of tules or bulrushes, commonly called cat-tails, cutting them off near the root so as to make them all the longer. Carrying them to the frame of the blind stand them up (one deep) all along the laths, but have them just as close together as you can possibly get them.

After you have enough material all placed as described, seeing that the butt of each rests solidly, then take the other three laths and nail tules or bulrushes to frame solidly.

Have the latter laths over laths before described and remember to nail only on posts, as if you should try to nail the laths together they, having no support, would be likely to break.

Use good sound cord to tie laths together where not supported by posts, so the tules or bulrushes will be there good and solid. Then cut several holes about three inches square in walls to push barrel of gun through, instead of shooting over the top.

URGENT NEED OF CONSERVATION.

Conservation of wild life means first and foremost protection and increase of supply of insect-destroying and wild seed-eating birds (admittedly wholly deficient through unrestrained slaughter in the past) without which the raising of food crops would be impossible.

The annual crop loss from insect ravages alone exceeds $1,200,000,000! These are the figures of the United States Department of Agriculture.

Conservation of food is the world's greatest problem today.

Without crops we cannot have food.

Without birds we cannot have crops.

These facts cannot successfully be denied. They impel the conclusion that for every dollar spent in the protection of bird life before the war, at least double the amount should be expended now.

BEST MANAGED SPORTING EVENT IS GRAND AMERICAN TOURNEY.

No sport or business can hope for success unless it is well managed. The best managed of all sporting events is the Grand American Trapshooting Tournament. As a sporting proposition, it is second to none—in fact, those who are interested in baseball and trapshooting claim that the October classic in baseball doesn't compare with the Grand American. This trapshooting game is much bigger and more interesting than those who are not interested believe.

This, however, is getting away from the real idea of the article—expert management. For 25 years Elmer E. Shaner has managed the tournaments of the Interstate Association. Any person who manages anything for 25 years should be nearly perfect. Shaner is. He knows his business and handles things correctly. To do this it is necessary to build up a competent staff of assistants. This Mr. Shaner has done.

THE ART OF DUCK SHOOTING.

Built for speed and inheriting a suspicious nature, the wild duck is a fine example of the survival of the fittest among birds, and there is a fascination about the sport of shooting them that can be but feebly portrayed with either pencil, brush or camera.

If the gunner possesses, in addition to his love for the pursuit of game, a pair of quick eyes, and will cultivate his power of observation, he will find an hitherto undiscovered charm to complete his delight when indulging in his favorite sport.

The wild duck is the embodiment of nervous energy. Built for speed, and inheriting from long generations of ancestors a suspicious nature and active brain, he is at once a most striking example of the "survival of the fittest" among the feathered kind.

When closely observed one will find a purpose in every action. The gunner, hidden in the blind among the rustling sedge, can tell the moment his eye catches sight of a flock in the air just to what species they belong.

And as they whizz along on rapidly beating wings, their subsequent actions tell him whether they will swing to his decoys and permit of a shot or continue on their unruffled way.

"An Investigating Committee," composed of mallards (Anas Boschas), have come up look over the bunch of decoys that float so innocently on the still water near the tule line. If a novice were in the blind he would most likely be tempted to fire at the birds before the proper moment, but our old head says, "Wait!"

You see by their actions that they are not at all alarmed, and you may rely upon it that after going off a short distance they will swing back again. Then just as they bunch up over the decoys preparatory to settling, let them have it, and unless badly rattled, you will secure three or four to your shot, as with fluttering wings they endeavor to alight.

It is intensely exciting to lie perfectly still in your blind and have them come right up to you, and until one learns by experience the temptation to fire at such a moment is well night irresistible.

HUNTING IN FRANCE.

France will allow the hunting of game this fall for the first time since 1913. The season will open only after the crop has been harvested and will be short. The Government has decided this measure is necessary to protect agriculture against the ravages of game, which has multiplied greatly in the three years during which only restricted destruction of depredating animals has been allowed.

Hares, rabbits, pheasants and partridges are particularly abundant, while wild boar, driven from the forests of Northeast France by the military operations, have done considerable damage in regions where they never were seen before. The opening of the hunting season, besides saving the crops, is expected to help relieve the provisions market.

HOW TO CLEAN THE GUN.

Happily the action of the nitro powder is confined to the polished interior of the barrels and they may be kept in perfect shape, if, after use, the following method is followed:

1. Brush out the bore with a bristle brush.
2. Wipe out with a rag.
3. If streaks of lead appear—and they are quite apt to in the 20-gauge tubes—remove them with a Tomlinson cleaner (brass gauze covered wood forms laid on springs).
4. A second rag will remove the lead loosened by the cleaner.
5. A third rag usually comes out white.
6. If the bore is now besmeared with a nitro solvent, such as Hopps No. 9, the action of the solvent will cause a black precipitate to form which may be wiped out in a day or two, when another application of the solvent should be made for nitro powder residue does not allow a thorough cleaning the first time.

The locks of the gun will not need attention for periods of several years, unless they get a wetting, when they should be taken down, wiped, and lubricated with a thin oil.

PORPOISES AND DOLPHINS GOOD FOOD.

That porpoises and dolphins, no less than whales, are good food for mankind, has been reported to the committee on resources and food supply of the State Council of Defense by the college of agriculture of the University of California.

Like whales, cattle or sheep, the porpoises are mammals and their flesh is meat and not fish. In texture and appearance, the flesh of porpoises and dolphins resembles beef, although the color is darker red. There is no reason why this meat should not be placed on the market, not only fresh, but also corned and canned.

As to whale meat, the probable development of the future is that the tenderer cuts will be sold for table use and served in all the various ways in which beef is used, while the less tender portions of the whale promise to be of much commercial and practical value if dried and ground and sold as a meat food to give chickens the much needed protein element in their diet.

FINAL SHOOT OF SEATTLE TRAPSHOOTERS' ASSOCIATION, SEASON 1917.

A good bunch of shooters turned out to take part in the last shoot held on the Harbor Island grounds of the Seattle Trapshooters' Association. For eight years this location has been the home of the oldest trapshooting organization in Seattle and it is with regret that the club is giving up their grounds, although a much better place will doubtless be the result of removal.

Good shooting in both the regular scores and the handicaps were in evidence at the final shoot. C. E. McKelvey furnished the high amateur score in the regular fifty target program, finishing with forty-nine to his credit. L. S. Barnes ran a close second to McKelvey with a total of forty-eight. L. H. Reid furnished the high professional score in the fifty bird race and tied McKelvey with his forty-nine. D. Rhodes shot into second professional standing and tied Barnes with 48 targets.

The Merchandise Certificate Handicap was placed on the first fifty targets and after a shoot-off between J. H. Davis, who incidentally shot one of the best scores ever tallied for him, and C. E. McKelvey; Davis won the first prize and McKelvey the second. Added targets were given in all trophy events.

Two professionals, L. H. Reid and D. Rhodes, furnished the high gun scores of the day, Reid with 98 to his credit and Rhodes 97. McKelvey took the high amateur score in the hundred program by shooting 95 of them. C. W. Bandy stood second high amateur with 93 to his credit. Bandy finished his last 50 targets with but one miss recorded.

In the A. A. T. A. Spoon Shoot, placed on the last fifty targets in the program, Bandy, Dr. Newton and W. B. Taft tied for a shoot-off which resulted in Dr. Newton's winning the spoon. This competition was open to members of the American Amateur Trapshooters' Association only.

For the Dupont Trophy, placed on the total 100 targets, J. H. Davis won the shoot-off between himself and W. B. Taft for this trophy.

BIG SCORES AT THE VERNON GUN CLUB SHOOT.

The most successful trapshooting tournament ever held in Southern California was that given by the Vernon Gun Club September 30 and October 1. The second semi-annual registered shoot was finished after having brought out the keenest kind of competition among the fifty contenders present.

The high amateur score of the day on the 200 birds was hung up by Bob Bungay, the champion of Venice. He broke 199x200. Bungay also scored high amateur for the tournament, making a score of 395x 400.

It is easily seen from the summary that the highest scores ever recorded in a registered tournament, considering the size of the crowd competing, were made in this tournament, the lowest score on the 400 targets being 339, a shade under 85 per cent. This mark was made by P. M. Burns of Eureka. He was awarded the H. R. Everding trophy, up for the maker of the low score.

O. N. Ford, the San Jose champion, broke second high the last day with 197x200. He also gained second high honors for the tournament with 394x400.

Bill Mullen, the Ray, Arizona, crack shot, scored third high the last day with 196x200. He also won the Elgin watch in the Ford handicap after tying with six shooters.

Third high amateur for the tournament was Otis Evans, the local star. He broke 393g400.

The highest run of the tournament, a total of 208 straight, was made by Ford.

The professionals declared following the tournament that beyond a doubt Mrs. C. E. Groat, the local woman shooter, is the amateur champion of the United States. For the tournament she broke 379x400, breaking 186 the first day and 193 on the second day.

The 10 cup winners were: Robert Bungay, 395x 400; O. N. Ford, 394; Otis A. Evans, 393; C. S. White, 393; William Mullen, 390; W. J. Reid, 388; H. Pfirrmann, Jr., 388; H. E. Sargent, 388; S. A. Bruner, 387; Frank H. Mellus, 385; J. F. Dodds, 383; H. R. Everding, 393; Owen Council, 383; Louis Mellus, 382; H. D. Blanchard, 380; Robert Bole, 379; Mrs. C. E. Groat, 379; Victor A. Rossbach, 379; C. W. Fish, 378; E. C. Forrest, 378.

JOIN A RIFLE CLUB.

Scattered all over the country there are numerous rifle clubs, and if there is any prospect of your going into service in the near future, it would be a wise move to get in touch with the one nearest to you and by practice remove some of the rough spots so that when you are called by the government you will get the full benefit of the training given you. In this way you will be helping the cause along by lightening the burden of the officers who have so much to teach you.

Generations ago civilization was not so complex nor was warfare so complicated. Men lived outdoor lives to a great extent and skill with the rifle was very common.

Proper skill with the rifle can be attained without great difficulty if you can be made to realize its importance and to devote the time to practice with the requisite concentration.

A VISIT TO THE HERONRY AT WALKER LAKE.

I have just returned from a visit to the U. S. bird refuge, known as the Walker Lake Reservation, situated in Mississippi County, Arkansas. To me the experience was a very novel one, and I thought others would be interested in hearing of the trip.

This was my first visit to an egret heronry, and while I knew a few of these birds nested in southeast Missouri and northern Arkansas, I had no idea that anything like what I witnessed could be seen without going much farther south.

Small bird life in this swamp was wonderful; never before did I see so many woodpeckers. We worked our way a mile or so through this swamp, so thick overhead that the sun was entirely shut out, with the water never over three feet deep, before we came to any open water.

In this first opening we came to, we sighted an old dead cypress tree and on its branches perched a whole regiment of cormorants. This opening did not exceed forty or fifty acres, and we were told it was as large a body of open water as could be found on the entire swamp, which, according to the inhabitants, covers about four thousand acres at high water.

Across and down this opening we went, and shortly after entering the dense timber again bedlam broke loose. We had arrived at the heronry. Never before did I hear such a noise made by birds, as we intruded upon their home life. Every imaginable noise was turned loose from the tops of those tall cypress trees, from the barking of dogs, gabbling of geese, and screaming of parrots, down to the ticking of hundreds of dollar watches.

To make a reliable estimate of the numbers of the different kinds of birds inhabiting this heronry is out of the question unless a person could spend days there and climb to the tops of the trees where he could get a panoramic view. I would say, though, that the heronry covered about twenty acres and that practically every tree had from one to a dozen nests in it. Some birds! when you stop to think that often these trees are so close together that it is impossible to get between them with a little narrow John boat.

We positively identified great blue herons, American egrets, cormorants, anhingas or snake birds, and buzzards, all living here together in perfect accord. I also believe I saw several specimens of the snowy egret, but I am not positive. Another bird that is nesting in this colony I believe to be the yellow-crowned night heron, but on account of not being able to get a better view of them I could not swear to this, either.

A thing that struck me as peculiar was the large number of buzzards living with these birds of such an entirely different nature. Perhaps they gather there to live off the large quantity of food brought in by the herons and later cast aside. Large pieces of fish were continually dropping from the nests. Whether it was cast out as unsuitable or accidentally dropped I do not know.

The heat was stifling down in the shade where we were. It must have been worse up among the foliage. The young birds sat in or on the edges of their nests, and with outseretched wings panted until their necks actually vibrated. The old birds seemed to suffer from the heat almost as badly. Occasionally a young bird, becoming excited at our approach, would decide he was perfectly able to fly and would make a lunge out of his nest, only to hit the next tree while going full speed, at which he would tumble around and down through the branches, but always catching himself before he reached the water.

These birds feed their young by regurgitation, and during this process I noticed a very amusing incident. A great blue heron had just arrived at the nest with a fresh supply of fish, frogs, snakes and other insects. She lit at first some distance away from her three hungry children, and then flew over to the edge of the nest. First-come-first-served, must have been the rule, but it was hard to tell which mouth was opened the widest or which one was shoving the hardest to be first.

The old bird quickly made a decision and began the feeding process. Then came the fun. Evidently the old bird thought the youngster had had enough, but the opinion wasn't mutual. The old bird would back away and try to shake loose; but baby blue had a firm hold on Mother's long bill, and the battle was on. They fought and wrestled all over and around the three-foot nest. Several times I was sure both were going to tumble out, but a lucky grab always saved the day. Time after time the old bird would back off with one foot and frantically claw the air to climb back on again. Finally she jerked loose and flapped away for a fresh supply, or maybe to ge ther wind after that battle royal.

Of course, the egret surpasses all others for beauty among the birds residing in the colony, and the buzzards bring up the rear. Mr. Hatfield, the Federal Warden in charge, says the buzzards stay out around the edges of the settlement, which location he compared as suitable to them as to the darkies in the southern towns.

So much has been written and said about the plume hunters killing the egrets when in the nuptial plumage and leaving the young to starve in the nests, that one could not help but think how easy it would be to completely annihilate this colony were it not for the fear of the long arm of the law. These birds, so shy and hard to approach at other times, come without fear to their nests to feed and care for their young.

Later, when wading the swamp in the shallow water around its edges, I had this again brought to my mind. These birds are so keen of sight that to approach one when feeding is almost impossible. At no time was I able to get within gunshot of them. For this reason, as long as they are given adequate protection on their breeding grounds, they will be perpetuated.

To anyone at all interested in bird life, the visiting of a heronry is, indeed, a red letter day.—Wild Life.

DO ANIMALS SENSE THE SUPERNATURAL?

[By N. C. Dickey, Ph.D.]

To every human being, no matter what his or her religious training, or lack of it, there comes an hour, usually through the death of some loved one, when a knowledge of the world and some definite and conclusive information as to the condition or fate of those who enter upon it seems, by long odds, the most valuable gift that could be bestowed upon a mortal and finite intelligence.

Therefore I have found much food for thought in the incident which I am about to relate, with merely the prefatory warning that I am not, and never have been, a believer in Spiritualism (so called) and hold no brief for its defense.

My wife, who succumbed to a fatal attack of pneumonia about four months ago, was for several years the owner of an exceedingly intelligent and loyal little Irish Terrier, which was her constant companion and attendant upon every possible occasion—and, quite frequently, upon what anyone but an ardent dog-lover would have considered impossible occasions. At her command, Paddy was ever ready to perform any one of a number of simple tricks, such as "sitting up," "shaking hands," "playing dead," or "rolling over"; but for no other human being could he be persuaded or bribed to perform a single trick, seeming to consider them beneath his dignity except as a means of entertainment for his beloved mistress.

On the day when the little lady was carried to her last earthly resting place, it was necessary to confine Paddy in an upper room to prevent him from doing bodyily injury to those who approached the casket which contained her dear form, or from accompanying the hearse to the cemetery.

And for several days after the funeral the little dog refused all food, and seemed in a fair way to follow his mistress as loyally in death as in life. Then, very quietly, he came forth to take up again the burden of life; and, seeming to recognize in me his only remaining friend, he attached himself to me and has ever since paced sedately at my heels; honoring me, however, with none of the demonstrative affection which he constantly showered upon my wife, and manifesting not a trace of the gay joyousness which formerly so marked his demeanor. Toward all the rest of mankind his attitude is so morose and sullen, and even savage, that, more than once, only the recollection of my wife's love for him has kept me from killing him as a dangerous animal.

One evening, less than a week ago, I was sitting close by one of the windows in my home, striving to read by the rays of a rapidly declining sun, when suddenly I seemed to feel a hand resting on my shoulder, and there came to me the conviction that my wife was standing beside me and seeking to convey to me some message of love and comfort which my spirit sorely needed, but tried in vain to comprehend. Several moments passed and then the sense of her nearness left me; and with a weary sigh, I took up my book once more, assuring myself that I had been tricked by an illusion created by my subconscious mind under the stimulus of an ardent longing that is never absent from my heart during any waking hour.

Then I was startled to hear a sharp ecstatic bark from Paddy, who was sleeping by the stove in the adjoining room—such a bark as I had not heard him utter since the last time that my wife in the flesh had walked into our home after several hours' absence. Spring hastily to the doorway, I was in time to see the terrier leap again and again into the air as if welcoming and fawning upon the one being in all that universe to whom his heart acknowledges unqualified and unconditional allegiance. When he had exhausted his exuberance, he sank back upon his haunches, sat up, extended one paw and gravely moved it up and down, rolled over upon the floor, laid quiet as dead—in short, went through every trick which my wife had taught him—tricks which, as I have said, none but she had ever been able to induce him to perform, and which he had not once essayed since her death. Then, with lifted head and short tail madly wagging, he seemed listening to the words of commendation and affection which, in former days, always closed such a performance; and finally, with a howl of dismay, he dashed to the outer door, crashed into it, recoiled, and whimperingly returned to his place by the stove.

As a psychologist, I can formulate an explanation which, without appealing to the supernatural, will cover every detail and point in the entire occurrence; but I am impressed with the fact that to the layman, such an explanation would seem every whit as abstruse, complicated, and incomprehensible as an acceptance of the incident at its face value.

Therefore to each of my readers I leave the task of deciding for himself or herself the question, "Do animals sense the supernatural more keenly than their human associates?"—[Kennel Review.

The Junior Holstein Bull

"Fondern Mutual Fayne Valdessa" That Sold for $27.50

THE FARM

Pasture For Cheap Pork.

Pasturing hogs reduces the amount of grain needed to bring them to a profitable weight and marketable condition. Either permanent pasture or temporary crops afford such a grain reduction. The amount to reduce the grain ration is a problem for the individual farmer.

Pasturage, however, does not furnish a complete food because a sufficient quantity of roughage can not be onsumed and digesected to supply all the nutrients required for a rapid growth. The forage, especially from leguminous pastures, furnishes cheap protein, supplies ash for bone making, adds bulk to the ration and acts as a mild laxative and tonic to keep the hog's system in condition to utilize profitably the concentrated feeds. Pasture crops alone, however, make a pig's fat thin and soft, and therefore grain is required to remedy these defects. Even with the present high prices of grain it pays better not to cut the grain ration more than half, feeding at the rate of two pounds per day per 100 pounds of live weight to pigs on pasture, instead of the usual four and five pounds when they are in a dry lot.

Farm animals must be comfortable in order that they do as well as possible. This is especially true of swine, since no farm animal suffers as much from extremes of heat and cold as the hog. Most men prefer to feed hogs in the spring and fall, for they say the hogs gain more at these times on the same feeds, than during summer and winter. This is perhaps in a large measure true only because they are more comfortable.

The Sloping Shoulder.

How often we use the term "sloping shoulder," and how often we wonder why perhaps the straight shoulder of a draft horse would not fill the bill just as well. Let us consider the "why" of this for a moment. The horse in moving a load exerts all the pushing force possible into the collar by bracing himself with his hind feet. This force is exerted forwards and upwards and hence the reason for a sloping shoulder forming a good collar seat, is to bring about an even distribution of this force on all parts of the collar. The straighter shoulder needs a special type of collar or else the force is exerted on the lower half only and sore shoulders result. With the sloping shoulder we also find almost invariably a slope of pastern to correspond, a very necessary adjunct when it comes to durability. The straighter the shoulder, the less graceful is the style and carriage of the horse for the reason that such conformation forces the head closer to the ground, and lessens the arch to the neck. The same thing is true of ourselves when we start to get round shouldered. Still another very important feature about the set of the draft shoulder is that the better we have the shoulder blade laid back into the body, the less distance we are likely to have from the high portion of the withers to the high portion of the rump. Hence the greater likelihood of getting the short, strong, wide, and well muscled back.

RACE HORSES FOR SALE.

All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

WM. H. NESMITH, Humphreys, Mo.

CHICAGO MULE QUOTATIONS.

16 to 16½ hands	$200@275
15 to 15½ hands	165@200
14 to 14½ hands	110@135
13 to 13½ hands	100@125
12 to 12½ hands	100@135

Above quotations are extreme high and low range, and top prices refer only to extra choice selected mules, carefully sorted and sold out of dealers' hands.

The skunk has been classified as an animal of great economic importance by the Department of Agriculture. As an enemy to destructive insects and vermin, against which the farmer could not successfully cope, this animal, so commonly despised and destroyed, should be protected at all times.

HOLLAND FORCED TO KILL OFF LIVE STOCK.

Warning that on account of lack of feed-stuffs it might be necessary to slaughter the live stock of the country, has been issued by the Dutch Department of Agriculture.

The number of animals to be killed under this policy is declared to be 50 per cent of the young horses, 20 per cent of the young cattle, 75 per cent of the hogs and 95 per cent of the sheep. It is asserted that the fresh meat thus to be forced upon the Dutch market cannot be kept, and that as Holland does not possess sufficient storage facilities, it will be sold to the highest bidder, and may go to Germany.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Relief. Gombault's Caustic Balsam will give you immediate Relief. A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

BREEDER AND SPORTSMAN
Turf and Sporting Authority on the Pacific Coast.
(Established 1882.)
Published on the 15th day of every month.
F. W. KELLEY, Proprietor.

OFFICES: 363-365-366 PACIFIC BUILDING
Cor. of Market and Fourth Sts., San Francisco.
P. O. DRAWER 447.
National Newspaper Bureau, Agent, 219 East 23rd St., New York City.
Entered as Second Class Matter at San Francisco P. O.

Terms—One year, $1; six months, 75 cents. Foreign postage 25 cents per year additional; Canadian postage 15 cents per year additional.

Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912,

of the BREEDER AND SPORTSMAN, published weekly at San Francisco, Cal., for October 1st, 1917.

State of California,
County of Marin—ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared F. W. KELLEY, who, having been duly sworn according to law, deposes and says that he is the proprietor of the Breeder and Sportsman, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:
Name of Post-Office Address.
Publisher, F. W. Kelley, 366 Pacific Bldg., San Francisco
Editor, F. W. Kelley, 366 Pacific Bldg., San Francisco
Managing Editor, F. W. Kelley, 366 Pacific Bldg., San Francisco
Business Manager, F. W. Kelley, 366 Pacific Bldg., San Francisco
2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock):
F. W. Kelley, 366 Pacific Building, San Francisco.
Curtis P. Cauthorn, 366 Pacific Bldg., San Francisco.
3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If none, so state).....None.

(Signed) F. W. KELLEY,
Sworn to and subscribed before me this 24th day of September, 1917.
(Seal) J. H. KELLEY.
(My commission expires February 7, 1918.)

CORRECT TIMING.

We believe that every racing plant should be provided with an annunciator, but the methods used by the manipulators invariably come in for just criticism. In most cases, some one is selected who is unacquainted with the contrivance and, to detract still more from the benefits provided by the annunciator, the officials are frequently very slow in apprising the manipulator of the fractional time so that the field is most generally at the half before the public learns how fast the quarter was negotiated. While this state of affairs prevails at most small tracks where the machine is used, a still more ridiculous condition frequently arises when the time is suppressed. It is customary with most timers to give the fastest watch at the quarter, half and three-quarters, then, when the mile is over and they desire to keep a friend's horse in a particular class, it often occurs that two or more seconds are necessarily tacked onto the final two furlongs and the field which finished back of the winner is not only treated very unjustly but made to appear mighty cheap.

In most instances time suppression can be traced to the secretary, as that underpaid official, if with a fair association, takes but little genuine interest in the racing sport, and therefore does not consider that a couple of seconds allowance is of any great consequence.

When a secretary once starts making concessions, he lays down the bars to every imaginable demand and his troubles increase. Unfortunately the competition for horses to fill the classes at the fairs, particularly in late August and throughout September, is so great that in numerous instances freight is paid, feed and straw furnished, no entry fees charged unless money is won, and horses kept in their classes regardless of time made, etc. Personally we see no objection to paying freight and furnishing feed if the same concessions are granted each and every horse which participates in the events at the fairs, as the horsemen furnish the most attractive entertainment, but the leniency in the timers' stand is certainly disastrous to the best interests of the sport in general, and, what is worse, we cannot hope to see a change for the better until the parent associations take a firm stand on the matter and do not hesitate to punish such infractions, regardless of whether or not they may lose a member.—[American Sportsman.

County fairs with harness racing as an adjunct make a combination that draws like a circus and menagerie combined. One without the other will not attract one-third of the attendance that they will if given together. But, however, it will not do to make the horse racing end of it the chief feature. The valuable and substantial part of the show is the fair exhibit. If the supervisors of each county appreciated the great good a high-class fair could do their county they would make a liberal appropriation for that purpose. Nothing could exceed it in value from an educational point of view, or from the desirable advertising that would result, and the greatly enhanced value of the productions and the lands of the county that would be the result of the rivalry to excel at the fair and win prizes and blue ribbons among the breeders of livestock of all kinds and those who tilled the soil. Many a breeder has purchased outside of his county or outside of his state high-class breeding stock so as to win against some rivalled breeder in his vicinity, and the result has been shown in a few years, in improving the value of that particular kind of livestock in that particular county by hundreds of thousands of dollars.

The management of the racing at the county fairs should offer purses and stakes large enough to attract a good class of horses and good fields, at the same time taking into consideration the amount of money that can be devoted to that purpose and not give big purses at the expense of premiums for fair exhibits. The races should be conducted in accordance with the rules, and only competent officials selected to act in the Judges' and Timers' stand. Another important feature that should not be overlooked is to have a competent person to announce to the spectators the results of the races and to impart such other information as is necessary to make them understand the progress of the afternoon's sport.

Spectators who are not horsemen or are not familiar with racing frequently get races mixed, especially where heats are sandwiched, and it is sometimes amusing to listen to the mistakes and comments of some one who does not know whether it is a new race or a third heat of some previous race. Twenty-five years ago ninety per cent of the people who attended a harness race meeting knew something about the horses that were going to compete and understood how the game was conducted. Nowadays at a race meeting, there will not be more than thirty per cent of the people present who know anything about the horses and very little about what is taking place, and their enjoyment would be greatly increased if the timer or some other competent person, at the end of each heat not only announced that heat, but if it is a continuation of a race, again announced the score of the previous heat. All of this would go to increase the interest of the spectators and the popularity of harness racing.

TIA JUANA MEETING POSTPONED.

Just as we go to press the rumor of the indefinite postponement of the Tia Juana race meeting is confirmed, and according to the present outlook it is not unlikely that the meeting will be declared off. The stringent passport regulations governing crossing the border has led to this action. Under the regulations a passport only entitles a holder to cross the border twice, consequently would be good for only one trip, and as nearly all of the race followers who attend the Tia Juana races would be domiciled in San Diego, the daily securing of passports would hardly be practicable. James W. Coffroth is, however, doing all he can to relieve the situation, and those most interested are looking forward to his being able to surmount these obstacles so that it will not prevent the meeting.

There are at the present time over five hundred horses on the grounds and carloads are arriving daily, and unless the meeting is carried on, some of the horsemen will be put to hard straits as the promoter of the meeting paid their shipping expenses from different parts of the country, and relying on being able to earn money with their horses, they are here without funds to buy feed and maintain their stables.

To relieve the situation a plan of holding a series of meetings in California has been suggested. Without betting, however, the promoter would be up against a problem in making them a success. Should this plan be adopted, Pleasanton would probably furnish the scene of turf activity around San Francisco. Superintendent George Ryan of the Pleasanton track states that he has not yet been approached on the subject but has heard that there is something in the air, and also announces that Pleasanton will be available for a meeting.

The Interstate Association in its report shows that California held thirteen registered tournaments, at which 240,965 targets were trapped. The only states beating it were Illinois, 821,883; Pennsylvania, 604,475; Iowa, 410,165; New Jersey, 270,625.

✣ ✣ ✣

At a meeting of the Board of Directors of the Interstate Association held on the 8th, the following officers were elected for the ensuing year: President, P. H. Keller; vice-president, F. Manning; secretary, E. Reed Shaner; treasurer-manager, Elmer E. Shaner.

The Grand American Handicap for 1918 will be held under the auspices of the South Shore Country Club in Chicago.

✣ ✣ ✣

Walter Cox was the leading money winning driver at Atlanta, with nearly $6,500 to his credit. Lon McDonald stands second, his total being $5,195, while Tom Murphy's winnings were $4,260.

Our Cleveland contemporary brings up the old subject of the neglect of the trotter by the sporting editors of the daily papers and bewails the fact that pages are devoted to the pugilists and baseball without even bare mention of harness racing meetings where thousands of dollars in purses are won every week and the world's records in speed are shattered. This subject has already been threshed out at length in the turf papers and all the regretful facts of the situation made bare. The remedy has also been revealed, and it is the one which our contemporary now suggests, a paid publicity bureau. In the previous discussions of the subject Frank L. Menke, the well-known sporting writer of the daily press, made it plain that the reason why trotting received such scant consideration is the fact that its followers and supporters neglected to provide for the desired publicity by employing somebody to furnish it, while on the other hand every prominent prize-fighter or star baseball player has his special paid press agent, whose function it is to keep his employer's name before the public as much as possible. The baseball and college football associations, the running horse folk, and, in fact, every other sport except harness racing, retains the same special writers, who have no difficulty in getting all the space they want. It is not that the sporting editors have any prejudice against trotting, but that they know nothing about the subject, and there is no one to tell their readers. An application to a number of these sporting editors in this city on one occasion for space to exploit a certain coming trotting meeting brought the uniform response, "Take all the space you want, only you must prepare your copy. We know nothing about it." The Grand Circuit or the American Association of Trotting Horse Breeders could make no better investment than to pay some bright young man a couple of thousand dollars a year to provide spicy current gossip of the trotters and pacers for the readers of the daily papers. The matter would be printed and it would be read.—Trotter and Pacer.

PORK PRODUCTION AND PRICE-FIXING.

Pork is the army meat indispensable. While the government is seeking to check the mad rise in the price of other necessities of life, the pork question demands radically different treatment. With pork, price-fixing is quite a secondary consideration. The first is how can an ample supply be secured? It was in an effort to secure some answer to this question that representative hog-growers from the middle west met representatives of the Food Administration at the request of Mr. Hoover at Waterloo, the Iowa Dairy Cattle Congress, and Omaha, Neb., National Swine Show.

At the Waterloo meeting Gifford Pinchot and E. C. Lasater, representing the Food Administration, outlined the question for discussion as, "What will it take to bring an increase in swine production next year of 15 per cent above normal?"

When it is remembered that this year's hog crop is at least 10 per cent below normal it is seen that it is no little thing which the administration is asking. To turn a 10 per cent deficit into a 15 per cent surplus in the face of the fact that few of the hogs going marketward in the past four months outsold the feed they carried on their backs, had the feed been sold the day the hogs were, is no small task. It takes more than an appeal to patriotism to bring about the result. Too many would be willing to feed the allies on shelled corn and buy a Liberty Bond with the proceeds

The meat of the answer of the hog-growers as embodied in the resolution adopted was that fixing the price of hogs per cwt. at 14 times the price of corn per bushel would bring about the desired result. The price fixed would apply to prime heavy hogs, other grades to hold their average price discounts below. The price of corn it is proposed to take month by month over the period of the average life of the market hog, charging at each month's price the approximate portion of the whole life's consumption that a hog will eat at that age. Thus the hog market would not fluctuate up and down with the corn market but rather follow it very slowly.

$5,000,000 YEARLY TO FEED THE SQUIRRELS.

Expert estimation places the damage done to crops in California by ground squirrels at five million dollars a year, and an appeal to the farmers of California to combine in their efforts to reduce this enormous waste is made by Joseph Dixon, Assistant Curator of Mammals in the Museum of Vertebrate Zoology, in a paper on "Control of the California Ground Squirrel," which has just been issued by the University of California and is obtainable by writing to the College of Agriculture at Berkeley. This paper should be in the hands of every farmer in the state.

✣ ✣ ✣

Early Dreams proved a good investment for George Crouch and Lon McDonald, even at the price of $9,500, which is reported to have been paid for him. After passing to the new ownership he won a $3,000 event at North Randall, one of $5,000 at Philadelphia; a $3,000 one at Hamline, a $10,000 and a $5,000 Transylvania at the same place and first in the $2,500 event at Atlanta, this closing his stake engagements for the season. In these events his gross winnings were $16,650, which pays his owners a very nice dividend after deducting the purchase price. His total winnings for the entire season are right at $23,000, which puts him far in the lead of all others for the season, either trotter or pacer.

RACING AT PHOENIX—ARIZONA STATE FAIR

Don De Lopez, by Kinney de Lopez 2:23 — Eradiate by Geo. W. McKinney 2;14½.
Winner of the Arizona Copper Stake, 2:16 trot, purse $5000,
at Phoenix, Nov. 15th.

The Arizona State Fair opened as usual, most auspiciously on Monday, the 12th. The harness races have always been a prominent feature of the fair, as it has been the policy of the management to give liberal purses to induce the best horses obtainable to enter in its races. It was hardly expected a week ago that W. G. Durfee or Loren Daniels would be able to attend, as Mr. Durfee was suffering from ptomaine poisoning at that time and Loren Daniels had not recovered from the accident he met with at Los Angeles. However, it will be noted that both of them were in the sulky the first day of the meeting. As will be seen by the summary, the 2:07 pace was a hotly contested event, Hal Logan taking the first two heats in fast time and being beaten by John Malcolm, who captured the next three heats and won the race.

In the 2:07 pace John Malcolm, recently acquired from Chas. F. Silva by W. G. Durfee, won the third, fourth and fifth heats, and the race, beating Hal Logan, fastest time 2:05¼, which was the mark Hal Logan got at Fresno, this being the first time all season that Hal Logan has failed to win in straight heats

The 2:27 trot was also another gruelling contest, Zeta Lucille getting the first two heats, Little Jack the third, Future Tramp the fourth, Great Policy the fifth, and Future Tramp the sixth, leaving the race unfinished the first day. On the following day only Future Tramp and Zeta Lucille, both winners of two heats, started in the seventh heat which was won by Future Tramp in 2:11½.

As will be seen by the following summaries, the racing has been unusually good, nearly every event being a sharp contest:—

Nov. 12.—2:12 trot, $2,500:

Allie Lou ..... (Ward)	1	1	1
Belzobola ..... (DeRyder)	2	5	2
Tom Smith ..... (Williamson)	4	2	3
Don de Lopez ..... (Daniels)	3	4	4
Guy Boy ..... (Stewart)	5	3	5

Time—2:10½, 2:09¼, 2:09¼.

Second race—2:07 pace, $2,500:

Future Tramp .....(C. A. Durfee)	3	3	4	1	2	1	1
Zeta Lucille .....(Ward)	1	1	3	4	4	4	2
Bondalean .....(Daniels)	2	2	5	2	5	2	2
Strathbell .....(Barnes)	5	4	2	5	3	5	4
Helen Chimes .....(Owens)	3	3	4	3	dr		
Potrero Boy .....(Ward)	4	6	6	dr			

Time—2:05¼, 2:06¼, 2:06½, 2:09¾.

Third race—2:27 trot, $1,000:

Future Tramp .....(C. A. Durfee)	3	3	4	1	2	1	
Zeta Lucille .....(Ward)	1	1	3	4	4	4	
Great Policy .....(W. G. Durfee)	4	4	2	2	1	2	
Little Jack .....(Daniels)	2	2	1	3	3	3	

Time—2:09¼, 2:09¾, 2:10½, 2:11, 2:11¾, 2:12½, 2:11½—(7th heat Tuesday.)

Nov. 13.—2:09 pace, purse $1,000:

College Gent, blk h by Kentucky P.....(Barnes)	1	1	1
Lady Fuller, b m by George Fuller.....(Owens)	2	2	2
May Davis, ch m by Borado.....(McKillop)	3	3	3

Time—2:08¼, 2:07, 2:07¼.

2:15 pace, purse $1,000:

Hal L gan, br g by Jim Logan....(Montgomery)	1	1	1
Miss Inco, blk m.....(W. G. Durfee)	2	2	2
Clara Todd, b m by Chas. Todd.....(DeRyder)	3	3	4
Guy Tommy, b g by Tom Ferguson.....(Best)	4	4	3

Time—2:10, 2:09½, 2:09.

Three-year-old trot, purse $500:

Superb, b m.....(DeRyder)	1	1	1
Mormon Lad, b g by Directly.....(Cheatham)	2	2	2
Bess, br m by Zombro.....(Selman)	3	3	3
Fort U. S., g., by Col. Randolph.....(Ullom)	4	4	4

Time—2:40, 2:39, 2:26.

Nov. 14.—Free-for-all pace, purse $1500:

Lady Hal, b m by Hal B.....(Owen)	1	1	2
White Sox, b m by Del Coronado..(W. G. Durfee)	2	2	1
Bondelin, b s by The Bondsman.....(Daniels)	3	3	4
College Gent, blk h by Kentucky P.....(Barnes)	4	4	3

Time—2:04, 2:05¾, 2:03½.

2:11 pace—Capitol City stakes; purse $5,000:

Rico, ch g .....(W. G. Durfee)	3	1	3	1	1
Oro Fino, b g.....(Berry)	1	2	1	2	2
Directess Mac, blk m by Nearest McKinney ..... (Schwartz)	2	3	2	3	3
May Davis, b m by Borado.....(McKillop)	4	4	4	4	4

Time—2:08¼, 2:06¾, 2:08¼, 2:08½, 2::08¾.

Nov. 15.—Arizona Copper Stake, 2:16 trot, $5,000:

Don de Lopez, blk g.....(Ward)	1	1	1
Pfeister's Lynwood, ch g.....(Kirby)	2	4	2
Future Tramp, b g.....(C. A. Durfee)	3	3	4
Belzabola, br m.....(DeRyder)	4	2	3

Time—2:09¾, 2:08¾, 2:09¼.

Three-year-old pace, purse $500:

Bill, ch h.....(DeRyder)	1	1	1
Lillian Directly, blk m.....(Davidson)	2	2	2
Mary Jane, b m.....(Brawner)	3	3	3
Willetta Lu, br g.....(Best)	4	4	4

Time—2:42¾, 2:43.

2:20 pace, purse $1,000:

Gay Tommy, b g .....(Best)	1	1	1
Ellen Douglas, b m..... ...(Montgomery)	2	4	2
Clara Todd, br m.....(DeRyder)	3	2	4
Vernon Russell, b g.....(Butler)	4	3	3

Time—2:11¼, 2:11¼, 2:11½.

2:25 trot, purse $1,000:

Stewart, b g.....(Langdon)	3	1	1
Otis Jr., b g.....(Schenck)	1	2	2
Kildare, blk g.....(Bunch)	2	3	3

Nov. 16.—2:18 trot, best 3 in 5, purse $1000:

Great Policy, b g by Best Policy(W. G. Durfee)	3	4	3	1	1
Guy Boy, b g by Guy Dillon.....(Stewart)	4	1	1	2	3
Little Jack, ch g by Teddy Bear...(Daniels)	2	2	2	3	2
Pegasus, c s by Zombro.....(C. A. Durfee)	1	3	4	4	4

Time—2:08¼, 2:09½, 2:09½, 2:10¾, 2:10¾, 2:11¼.

2:05 pace, purse $1500:

White Sox, b m by Del Coronado..(W. G. Durfee)	1	1	1
Lady Hal, b m by Hal B.....(Springer)	2	2	2
Hal Logan, b g by Jim Logan.....(Montgomery)	3	3	3
Potrero Boy, b g by Demonio.....(Ward)	4	4	4

Time—2:04¾, 2:04¾, 2:04½.

Esperanza, bay mare by Carlokin, driven by W. G. Durfee, trotted an exhibition mile in 2:04, thereby beating her own record one-half a second.

THE COMING NATIONAL HORSE SHOW.

To aid the American Red Cross through the medium of the National Horse Show, eight members of the Ladies' Four-in-Hand Driving Club have volunteered for active service in the competition for tandems driven by women at the coming exhibition in Madison Square Garden. Few, if any of them, have heretofore consented to display their skill in a place so public as the great Garden show, but with the entire gross receipts of this year's exhibition given to the Red Cross the young women have taken off the brakes, in coaching parlance, and are doing everything in their power for the war relief benefit.

William H. Moore, James Cox Brady, J. Campbell Thompson, A. W. Atkinson and other leading exhibitors have entered horses for the women's tandem class, and Miss Eleanora Sears, Miss Ruth Twombly, Mrs. Robert L. Gerry, Mrs. Arthur Iselin, Mrs. Thomas Hastings, Mrs. Charles Cary Rumsey, Miss Lida L. Fleitmann and Miss Marion Hollins are to do the driving.

Mrs. Hastings was the first president of the Ladies' Four-in-Hand Driving Club, and as Miss Helen Benedict was noted as a four-in-hand whip when she was a school girl, driving her pony four and miniature coach to the Westchester County Horse Show. Mrs. Iselin was the first secretary of the Ladies' Four-in-Hand Driving Club as Miss Eleanor Jay. She is the daughter of Colonel William Jay, who was president of the Coaching Club from the time of its formation, in 1876, until his death, a year or two ago. As Miss Mary Harriman, the daughter of E. H. Harriman, Mrs. Rumsey, together with her sister, Mrs. Gerry, who was Miss Cornelia Harriman, took part in the annual meets of the club in the days when the young women drove their fours through Central Park each spring, making one of the smartest spectacles New York has ever seen.

Many other women of society are lending their aid in making this year's Horse Show a memorable occasion. A notable example of the spirit of the times is Mrs. Peter Cooper Hewitt's nomination of Moonshine, one of her private victoria pair, in the competition for the Sir James Challenge Cup for gig horses, where owners must drive their own entries for the eight hundred and fifty dollar trophy, donated by the late Alfred G. Vanderbilt. Moonshine won the championship in harness at the Garden in 1914, beating Miss Constance Vauclain's ten thousand dollar hackney mare, The Whip.

Equally noteworthy is the action of Mrs. Robert E. Tod in putting her famous English saddle mare, Sceptre, in training again after a season's absence from the show ring, to compete for the championship at the Garden. Sceptre is the premier saddle horse of America.

First exhibited in 1911, when Miss Mona Dunn, an English girl, brought her over from London, with Miss Helen Preece, another English girl, to ride the mare, she was best in her class at the National Horse Show. She crossed the Atlantic again the next year to compete in the ladies' class and the open class, both of which she won. Since then she has never been beaten at the National Horse Show, even when she went out of her class to compete against horses of much larger size. Sceptre is just fifteen hands high. At the last two shows in the Garden she has won eight first prizes, including the championship each year, and in the ladies' class has beaten the noted champion, Twilight, 15.2 hands high.

After winning thirty-five blue ribbons and championships in two years, Sceptre was retired last spring, and has not appeared in public at the summershows, the reason being that Mrs. Tod was averse to taking part in the exhibitions when Mr. Tod was virtually in active service in the war. It is not generally known that he is one of the members of the New York Yacht Club who are manning J. P. Morgan's Corsair, now hunting down submersible assassins somewhere on the Atlantic. But the National Horse Show is this year strictly a war relief benefit, and to enter Sceptre in such a show is, Mrs. Tod thinks, almost as much of a war service as to join the navy and go gunning for submersibles herself.

Expressing his own interest in the Red Cross benefit, by which it is hoped to raise $100,000 for the war charity, Commodore Tod last week cabled from a British port to James McLean, the new president of the National Horse Show Association, offering a special prize for the coming exhibition. It was too late to make a new class, entries having closed for the show, but the donation will be given to the winner of the championship for undocked saddle horses exceeding 15.2 hands.

A BIG JEWFISH.

W. H. Whiteside of Pasadena, Cal., recently landed a 350-pound black sea bass or jewfish. Mr. Whiteside, accompanied by two fellow townsmen, John Hernan and C. Y. Knight, was out after tuna with a medium weight pole and a twenty-one thread line. The battle between the men and the fish lasted one and one-half hours and then it required the assistance of two boatmen to bring the mastodon to gaff. The bass was over seven feet long and caused the timbers of that stanch little craft, the Glorietta, to creak and groan when it was pulled aboard. The fish was placed on exhibition and was viewed by many citizens of Coronado.

✚ ✚ ✚

Straight Sail 2:04¼ won the $3,000 Chamber of Commerce Stake for 2:08 trotters. This is the fastest six-heat race on record, and she equalled the fifth heat record by trotting in 2:06¼. She is owned by H. J. Schlesinger, proprietor of Fairland Farm, Lexington, Ky.

DEL MONTE RESULTS.

First Day.

First race—Six furlongs; selling; purse $350: Presumption, 105 (Johnson), won; Estimable, 110 (Nolan) second; Tze Lsi, 105 (Bloom), third. Time, 1:14. Master Franklin, Minnow and Belle of the Kitchen ran.

Second race—Five furlongs; selling; purse $250: Important, 113 (Wolfe), won; Curlicue, 108 (Johnson), second; Senator J. James, 113 (J. McIntyre), third. Time, 1:02. Old Bob, Toastmaster, Twenty-seven, Plucky Chap, Minstrel and Miss Clark ran.

Third race—Two-year-olds; handicap; five furlongs; purse $400: Tombolo, 130 (Pool), won; May Maulsby, 112 (Johnson), second; Thrift, 108 (Smith), third. Time, 1:01 4-5. Candelaria, Carl Ellwanger and Hattie Croxton ran.

Fourth race—Inaugural handicap; one mile; purse $750: Celestia, 130 (Pool), won; Leah Cochran, 100 (J. McIntyre), second; Pit, 106 (Johnson), third. Time, 1:41 1-5. Dervish, Say, Bonnie Buick and Almino ran.

Fifth race—one mile; selling; purse $250; Colonel Matt, 108 (Johnson), won; Christmas Eve, 104 (Mulcahy), second; Old Harry, 100 (O'Brien), third. Time, 1:42. Finnie F. Gerds, C. M. Johnson, Semper Stalwart, General Pickett and Satisfied ran.

Second Day.

First race, six furlongs, claiming; purse $175, second $75, third $25.—Little Abe, 110 (S. Smith), won; Favorite Article, 112 (Gross), second; B. A. Jones, 107 (O'Brien), third. Time, 1:15. Blue Rock, Belle of the Kitchen, Senator James, Toastmaster, Old Bob, Crankie, Plucky Chap, Minstrel ran.

Second race, five furlongs, claiming; purse $175; second $50; third $25.—Master Franklin, 107 (Johnson), won; Prairie, 108 (Bloom), second; Important, 111 (Wolfe), third. Time, 1:01 3-5. Nellie B., Oakland, Royal Tea, Twenty-seven, Sovereign ran.

Third race, five furlongs, claiming; purse $175; second $50, third $25—Candelaria, 112 (Nolan), won; George Terrell, 105 (Pool), second; Dona Winifred, 100 (Johnson), third. Time, 1:02 3-5. Carl Ellwanger, Hattie Croxton, Commigan ran.

Fourth race, the Crocker handicap, five and a half furlongs, all ages; purse $350, second $100, third $50—Scarlet Oaks, 128 (Pool), won; Presumption, 113 (Wolfe), second; Gladiola, 104 (J. McIntyre), third. Time, 1:07 4-5. Emin Pasha, Curlicue ran.

Fifth race, one mile and a sixteenth, claiming; purse $175, second $50, third $25—Zamlock, 102 (Johnson), won; Semper Stalwart, 107 (Pool), second; Gomul, 110 (Denny), third. Time, 1:49 3-5. Skinny, General Pickett, Satisfied ran.

Third Day.

First race, five and a half furlongs, claiming; $175, second $50, third $25—Twenty-seven, 110 (W. McIntyre) won; Nellie B., 106 (Mulcahy), second; Eleanor, 107 (J. McIntyre), third. Time, 1:08 3-5. Minstrel, Riposta, General Pickett, Edna F., Welga, Salpearl, Thoughtreader, If Coming ran.

Second race, five furlongs, claiming; $175, second $75, third $25—Important, 105 (Wolfe), won; Master Franklin, 106 (Johnson), second; Estimable, 115 (Nolan), third. Time, 1:01. Tze Lsi, Prairie ran.

Third race, mile and sixteenth; A. B. Spreckels handicap, $350, second $100, third $50—Little Abe, 105, (S. Smith) won; Colonel Matt, 108 (Johnson), second; Leah Cochran, 106 (J. McIntyre), third. Time, 1:47 2-5. Dervish, Pitt, Almino, Lottery, Minnow ran.

Fourth race, El Palomas handicap, six furlongs, all ages; $350, second $100, third $50—El Mahdi, 102 (J. McIntyre), won; Emin Pasha, 102 (Johnson), second; Gladiola, 105 (Bloom), third. Time, 1:14 3-5. Scarlet Oaks, Thrift, Passing Fancy ran.

Fifth race, one mile, claiming; $175, second $50, third $25—Semper Stalwart, 104 (Johnson), won; Christmas Eve, 109 (W. McIntyre), second; Skinny B., 106 (J. McIntyre), third. Time, 1:41 1-5. Minnie F., Bonnie's Buck ran.

Fourth Day.

First race—Six furlongs, claiming; $175, second $50, third $25—Old Bob, 107 (Johnson), won; General Pickett, 112 (Nolan), second; Satisfied, 109 (Cross), third. Time, 1:15 3-5. Welga, Sovereign, Minstrel, Salpearl ran.

Second race—Oakholme handicap, five furlongs; $245, second $70, third $35: George Terrell, 106 (Pool), won; May Maulsby, 117 (Wolfe), second; Donna Winifreda, 102 (Johnson) third. Time, 1:02 4-5. Ermitina, Sam Hill, Thrift ran.

Third race—The Macomber handicap, six furlongs; all ages; $350, second $100, third $50: Master Franklin, 102 (J. McIntyre), won; Serenest, 110 (Johnson), second; Scarlet Oaks, 130 (Pool), third. Time, 1:15. Prairie, Presumption, Estimable ran.

Fourth race—President's cup handicap, one mile and a quarter; $700, second $200, third $100: Pit, 106 (Nolan), won; Minnow, 104 (Pool), second; Leah Cochran, 109 (Johnson), third. Time, 2:09 3-5. Lottery, Say, Colonel Matt, Menlo Park, Gerds' Little Abe, Old Harry ran.

Fifth race—One mile, claiming; $175, second $50, third $25—Favorite Article, 112 (Gross), won; Bonnie S. Buck, 105 (Dawson), second; Skinny, 112 (Johnson), third. Time, 1:42 3-5. Crankie, B. A. Jones, Christmas Eve, Minnie F, also ran.

ORAL BETTING IS LEGAL.

That oral betting on horse races in Louisiana is legal, is the judgment of the State Supreme Court. Furthermore, by a decree in the case of the State vs. Edward Austin, recorded Oct. 28th, the system of betting operating at the race track is not violative of the Locke law.

The opinion of the court was rendered by Justice Sommerville. The decision of the lower court in the case of Austin was ordered annulled and the defendant discharged. The decision of the court follows:

1.—Operating a betting book on horse races, at the time of the passage of Act 57 of 1908, p. 64, has reference to registering or recording of bets by the bookmaker, or by his assistants. It does not refer to oral bookmaking. It is order adjudged and decreed that the judgment appealed from be avoided, annulled and reversed, and that defendant be discharged from custody.

Austin was found guilty in the District Court at Gretna by Judge Fleury last spring for having accepted a bet from a man at Suburban Park, McDonoghville. The case was proposed by Jefferson Park officials, it is said, to make a test of the Locke law in this respect before the meeting in November.

Austin was arrested by Chief of Police Leson on the McDonoghville race track for accepting bets on several horses. He carried a program issued by the association giving the races and offered to take bets from all comers, but made no memorandum of the bets. He allowed those betting with him to make memorandums of their bets, a copy of which he retained and the other copy was kept by the bettor. He was charged in the District Court at Gretna with having operated a betting book. He was later released on bond. The case attracted widespread attention and was heard two weeks ago by the Supreme Court.

UPWARD OF ONE THOUSAND ENTRIES FOR THE TIA JUANA RACES.

Over one thousand entries were received for the Lower California Jockey Club's first offering of stakes and already there is a large number of horses at the track, coming from Reno, St. Louis, Canada, Louisville, Latonia and Maryland.

A winter resort, with practically a stationary thermometer, variations of temperature seldom exceed ten degrees, with ample and excellent hotel accommodations and offering, even in January and February, salt water bathing, fishing and wild fowl shooting that cannot be matched anywhere, San Diego is in for a banner season of racing at Tijuana which, under the Lower California Jockey Club's management, has grown steadily in popularity, until it is attracting to San Diego hosts of Eastern tourists who, in other days, were wont to flock to Los Angeles and San Francisco. Some of the most prominent sportsmen in the country have planned to bring their horses this way and, with these thoroughbreds will come that army of the turf patrons, who are everywhere classed as "regulars." Winter tourists and regulars alike are generous spenders.

The racing plant at Tijuana has been improved, both as regards its adaptability for speed contests between thoroughbreds and its accommodations for spectators, until it now compares favorably with the big tracks of the country. Betting will be conducted on the old-fashioned plan: Throughout the meeting bookmakers in the betting enclosure will compete actively for the business of patrons of the sport with slates up and prices quoted.

A report from San Diego states that a detachment of the 21st infantry was despatched to the border by the government for the purpose of turning back youths of military age who attempt to cross the international boundary at Tia Juana. Customs officers have reported that an unusually large number of young men subject to draft have tried to cross the border. Fearing that the government's action will have a bad effect, which it undoubtedly would, upon the attendance at the Tia Juana races, the officials of the Lower California Jockey Club are making a strenuous effort to have the ruling modified, but so far it is reported that they have not been successful. The enforcement of this action ordered by the government would be a body blow to the Tia Juana track this year.

✤ ✤ ✤

The office of the Jockey Club is authority for the statement that no amendment to the new rule prohibiting the racing of two-year-olds before April 1st of their two-year-old career, has been proposed or passed by the Jockey Club and no such amendment has ever been considered. This statement is made so that horsemen will not be deceived by published reports that the two-year-old ban had been lifted.

✤ ✤ ✤

The bay stallion, Top Hat (7) by Hastings—Topiary (dam of Tracery, for which Mr. Belmont refused an offer of $200,000) which August Belmont donated to the government recently, was shipped East last week from the Nursery Stud.

✤ ✤ ✤

Barney Oldfield, the famous automobile race driver, has built a stable of his own at Tia Juana and he recently wrote Mr. Coffroth that he had offered $7500 for a horse that he thought could not fail to win the Coffroth handicap. He was unsuccessful in getting him as the owner wanted $12,500. He is still trying to get a horse to capture that handicap and is willing to pay a good price but not an unreasonable figure.

As will be seen by an announcement in the advertising columns of this paper, the Nevada Stock Farm is offering for sale thoroughbred mares of fashionable breeding, in foal to popular horses, including imported Honeywood. They also have young stock for sale and horses ready to race. The liberal policy of the Nevada Stock Farm in selecting only the very best stock and offering the produce for sale will do much to promote the breeding of thoroughbreds on this coast, and it is now in a position to offer to those who want to purchase high-class horses for either racing or breeding purposes. The stock farm also announces that it will offer imported Athelene by Desmond, out of Wood Daisy by Cyllene, and imported Honeywood by Polymelus, out of Honey Bird byFriar's Balsam, for public service for the season of 1918, at a fee of $300 each, for approved mares only.

✤ ✤ ✤

TIA JUANA NOTES.

One of the greatest colts at the Tia Juana track is a two-year-old named High Cost by Von Tromp, out of the great mare Mitten who is the dam of many great performers and whose get brought big prices. This colt belongs to Ray Egan of Petaluma. He has been offered $10,000 for him, which flattering price he turned down. He shipped the colt to the east where he certainly lived up to expectations, making a brilliant record. Out of seven starts he won six and was beaten only on one occasion by the fast youngster Jack Hare Jr., High Cost having been slow in getting away from the post and losing all chance at the start, in spite of which he was beaten only a length after making up much ground. It looks as though he would give George Wingfield's great colt Tombolo a hard rub, and a mighty race is expected between these two.

* * *

Next week the resurfacing of the Tia Juana race track will be completed, a new top dressing being placed on the entire mile, and the horsemen say it will be one of the fastest tracks in America,—one that will dry out fast and will keep in shape during the rainy weather.

* * *

Fifteen cars of horseflesh will make up the quota from Kentucky to Tijuana for the meeting which will open on Thanksgiving day. Among that fifteen carloads are some of the best campaigners which have been sent to a winter track in years. Notable among the lot which will leave Kentucky for the Coast is Moscowa, winner of the classical Latonia cup. Moscowa has been entered in the rich Coffroth handicap along with twenty-five others from the Kentucky track. The Keen Brothers' star campaigner will also have his good assistant apprentice boy, O. Willis.

* * *

Jasper is also pleased with the large delegation of riders who have also promised to come. There are many others on the anxious seat regarding their winter plans, but he has been assured that F. Murphy, O. Willis, L. Mink, Thurber Harrington, C. Hunt, T. Hunt, C. Jackson, E. Martin, Van Dusen, Gruber, Casey, Dursch, Gentry, Kederis and J. Callahan will be here for the opening.

There will be no dearth of riding material at Tijuana. With the Western contingent already on the ground and Troxler, Knapp and several other boys coming from Maryland, Tijuana will be well supplied with crack jockeys. Pool, Byrne and Pickens are recent arrivals and they are busily engaged galloping horses and getting into condition for the long 100 days or more of racing.

* * *

Roscoe Troxler is a staunch booster for Tijuana. The veteran rider reveled in San Diego's sunshine and his ability to make a low weight and still be at his best encouraged him to his greatest efforts. He did not finish with the greatest number of winners, but his high percentage stamped him as having one of his best years.

* * *

The horses which have been summering in this vicinity look fine for a big season. The horses owned by the Coronado millionaire, W. H. Dupee, and which run in the name of Juan Fuentes, are all in training at Coronado and they have done remarkably well during the idle months. Particularly so, can this be said of Virile. This horse has picked up more than 100 pounds and he looks as though he will repeat some of his former performances.

Fuentes' two-year-old, Avon Carey, champion at Tijuana last winter, and Arrowsmith, have grown to wonderful proportions. They will likely be the biggest two-year-old colts stabled on Coffroth Bluff..

* * *

The Bronx Stable horses, owned by George P. Fuller of San Francisco, the millionaire paint manufacturer, are also doing well at Imperial Beach near San Diego, where they have been summering. John Graham, Schulenburg and Landslide, platers which were badly crippled with the closing of the last meeting, are all in fine shape again and going sound Brando is another that has shown an inclination to run at his best.

* * *

Fuller enlarged his stable with several horses he picked up at Reno. Brown Favorite, by Bannockburn, is one of those. He is a likely looking performer which has been given little chance and when purchased by Fuller was badly run down. He will be given a rest and Fuller believes he has the makings of a real race horse in the brown gelding.

Schulenburg broke down in his three-year-old form after showing a likeliness of developing into a high-class performer. For the first time in two years he has been able to stand beneath training.

HISTORY OF THE KENTUCKY FUTURITY.

The first colt stakes for trotters were given by the Spirit of the Times and Turf, Field and Farm, two New York publications devoted to all kinds of sports and both of which disappeared several years ago. A few old associations and clubs also offered purses for two and three-year-old races for small amounts, but none of them had what could be called established futurities until the Charter Oak Park Association at Hartford opened one which matured during its Grand Circuit meetings the latter part of the eighties and early in the nineties. They were for large amounts and with a powerful organization back of them received a tremendous entry. It was so large, in fact, that mushroom associations sprang up at a number of places and offered events for large amounts on the chance that they would make a handsome profit on the entrance fees. This actually happened at a number of places, one of them being Terre Haute, where Hickok after he won with Silcon was handed the guaranteed amount while the promoter of the event retained the excess payments.

In 1890 the Kentucky Trotting Horse Breeders' Association adopted the plan which had been started by the associations at Hartford and opened a stallion representative stake for foals of that year to be trotted in 1893, when the youngsters were three years old. Also in 1891 when renewing the offering it added a two-year-old division and named the event the Kentucky Futurity. In these two races and several others that followed, all of the money that was received went to the winners, and that they were well patronized is evidenced by the fact that in 1893 the two-year-olds raced for $5,000 and the three-year-olds for $11,900. In 1894 the two-year-olds raced for $5,000 and the three-year-olds for $26,430, while in 1895, when Oakland Baron won the three-year-old division, it was worth $20,000, while the two-year-olds raced for $7,500.

In 1893, when the first of the three-year-old events matured, the California bred colt Oro Wilkes by Sable Wilkes was returned as the winner after a five-heat contest in which Medio by Pilot Medium won two heats; while in the two-year-old division the Wilkes Boy mare Nellie A. defeated the Nebraska-bred filly Ella Woodline. The time was slow when compared with what is made by the winners of today but the contests were just as brilliant, while the interest in both races took on a national character on account of the broad field covered by the nominators.

In the twenty-five years that have elapsed since Oro Wilkes won the Kentucky Futurity, California never showed in front again until 1912 when Manrico won after a six heat struggle, and his connection with the Pacific coast was only through ownership, and he was bred and foaled in Kentucky where his sire and dam were also bred, and it might as well be stated that the Kentucky Futurity has done more to emphasize the quality of the Kentucky bred youngsters than any events that ever appeared on a racing programme. The returns show that nineteen of the twenty-five winners of the three-year-old division were either bred or foaled in Kentucky and included such splendid performers as Thorn, Boralma, Grace Bond, Miss Adbell, Siliko, General Watts, The Harvester, Grace, Peter Thompson, Manrico, Peter Volo, Mary Putney, Volga, and The Real Lady.

Of the six that invaded Kentucky and secured first honors in the Kentucky Futurity Rose Croix was bred and developed by M. E. McHenry, who drove her in the race. She was also foaled in the blue grass country and was only sent to Illinois for development.

Peter the Great was the first colt foaled in the north to win the Kentucky Futurity. He was bred by D. D. Streeter of Kalamazoo, Mich., and made his first appearance at Lexington in 1897 when he finished second to Janie T. in the two-year-old division of the Futurity. In his three-year-old form he again returned to Lexington and won the Futurity without being extended, while Limerick, Charley Herr, and Seraphim divided second, third and fourth money. Shortly after this race Peter the Great was purchased by J. Malcolm Forbes of Boston, Mass., and taken to Milton, Mass., where he sired Sadie Mac, the winner of the Kentucky Futurity in 1903. She was also the first in the Peter the Great family to place her name in the list of winners to which her sire has since contributed to Grace in 1910, Peter Thompson in 1911, and Peter Volo in 1914, when he placed the three-year-old record at 2:03½, and Volga in 1916. At the present time Peter the Great is the leading sire of Kentucky winners while he is also the greatest living sire of early and extreme speed. Being by Pilot Medium out of a mare by Grand Sentinel, he has proved an outcross for the flood of Wilkes and Mambrino blood which is found on all the farms in Kentucky, while the round, rapid gait and the course of his descendants as well as their soundness has placed the racing trotter of today on a higher platform.

Until Peter the Great winners appeared on the horizon the Baron Wilkes' trotters were considered the leading Futurity family, and they were certainly entitled to the honor. Oakland Baron, one of his sons, won the event in 1895 with Baronmore, another son that was to be heard from later, just outside the money, while Oakland Baron also sired Lady Gail Hamilton that finished second to Nella Jay in 1902 and Rhythmic 2:06¾, in turn the sire of Rhythmell 2:04¼, that was second to Manrico in 1912 and won the Walnut Hall Cup in 1914. In 1899 The Bondsman, still another son, finished third to Boralma.

It is through his sons that Baron Wilkes secured a strangle hold on the Kentucky Futurity and it is very doubtful if any horse in the future will ever wrest it from him. The first to break into the limelight was Moko, when Fereno won the event in 1900 after having secured first honors in the two-year-old division the preceding year. This splendid filly was followed by Siliko in 1906, Manrico in 1912 and The Real Lady in 1917. Moko also sired the dam of The Harvester, who won the Futurity in 1908, as well as Susie N. who finished second to Miss Adbell in 1905.

Of the other sons of Baron Wilkes, The Bondsman sired Grace Bond, the winner in 1904 after a terrific battle with Alta Axworthy, and Colorado E., winner of second money in 1910, as well as the three-year-old champion trotter of his day, while Baroness Virginia, the winner in 1909, was sired by Baron Review, another son of Baron Wilkes. The Baron Wilkes horse Baronmore also sent a winner to Kentucky in 1901 when Peter Stirling defeated Walnut Hall. Another son, Barongale, finished second to Sadie Mac in 1903 and still another son, Ed Custer, was awarded third money in 1906. In 1909 this good horse was also represented in the Futurity by Bertha C. In this race Czarevna won the first two heats, Baroness Virginia the next two, and Bertha C. the fifth in 2:10¼. Baroness Virginia won the deciding heat in 2:14 and the premiums were awarded Baroness Virginia first, Czarevna second and Bertha C. third. This line was also again repesented at Lexington in 1917 when Miss Bertha Dillon, a daughter of Bertha C., started in the Futurity. In the first heat of the event she was beaten a head by The Real Lady in 2:05 and was distanced in the second heat through a mishap incident to racing. That the Lexington race, however, did not show her true form is evidenced by the fact that two weeks later at Atlanta she won the deciding heat of the Matron Stakes in 2:03¼, making a new world's race record for three-year-olds.

Sadie Mac, the winner of the Kentucky Futurity in 1903, is the only New England winner, while the Allen Farm finished second with Bisa in 1907 and with Binvolo in 1908. John H. Shults of New York was also responsible for the production of General Watts, the winner in 1907. The colt, however, was foaled in Kentucky where his sire Axworthy died a few days ago, and is at present the sire of Sparkle Watts, winner of the two-year-old division in 1914, Mahomet Watts, who finished second in the same division in 1911, and Allie Watts, winner of second money in the four-year-old division last year.

Wisconsin was credited with a Futurity winner in 1901 when Peter Stirling defeated Walnut Hall, while that state also has to its credit in this event such good trotters as Barongale, Ed Custer, and Bertha C. The sunny south contributed its only winner to date in 1913 when Geers defeated Peter Johnston with Etawah, a son of Al Stanley that finished third to Trampfast in the two-year-old division in 1907.

As has been stated, the Kentucky Futurity was started as a three-year-old event in 1890. The two-year-old division was added in 1891. Another change was made in 1895 when the pacing division for two-year-olds was included in the published conditions. The first of these races was contested in 1897 and was won by Will Leyburn. From that time until 1902 this division was won by Extasy, Lucie May, Alice Mapes, Improbable, and Jessie Herr. There was no pacing race in 1903 as in 1901 the pacing division was changed from a two to a three-year-old event. Phalla won in 1904 and was followed in their respective years by Bonalet, Brenda Yorke, Shakespeare, Catherine Direct, Maggie Winder, Twinkling Dan, Braden Direct, Annie Axme, Homer Baughman, Anna Bradford, General Todd, Sister Bingen, and Poorman. In the twenty races for the pacing division of the Kentucky Futurity, there has been but one creditable contest. It was programmed in 1911 when Braden Direct was returned as the winner.

In the announcement for foals in 1917 the pacing division was dropped from the Kentucky Futurity, so that the last race for it will be contested in 1919. Also in the announcement for foals in 1912 and 1913 a four-year-old race was added. The first one was won by Mary Putney in 1916, after a splendid battle with Allie Watts, while Opera Express secured the honors this season.

Sixteen of the twenty-five winners of the two-year-old division of the Kentucky Futurity were bred in Kentucky, while of that number Fereno, Grace Bond, Peter Volo, Volga and The Real Lady also won the three-year-old division, while Native Belle, Peter Volo and The Real Lady made world's records for foals of their age when they were returned as winners—Native Belle trotting in 2:07¾, Peter Volo in 2:04½, and The Real Lady in 2:04¼. In 1911 Princess Todd duplicated the victory of her sire, Kentucky Todd, the winner in 1906, and also placed her name on record as the only Canadian bred foal to win money in this event.

Over 20,000 foals have been named in the Kentucky Futurity since the first one was opened in 1890. Of that number 174 started in the two-year-old division for trotters and 204 in the three-year-old division; 92 of the two-year-olds finished inside the money and 99 in the three-year-old division, Idoleta being the only colt standing for money in the latter that was distanced. Of the two-year-old races twenty of them were won in two heats, three in three heats, and two in four heats, while in the three-year-old races Mary Putney won in two heats in 1915, while of the other races ten were won in three heats, four in four heats, five in five heats, and four in six heats, the winners of the latter being Thorn in 1897, Boralma in 1899, Baroness Virginia in 1909, and Manrico in 1912. The premiums for the twenty-five Kentucky Futurities have amounted to $628,830, and of that amount $188,500 was paid in the two-year-old division for trotters, $398,330 in the three-year-old division for trotters, $6,000 in the two-year-old pacing division, $26,000 in the three-year-old pacing division, and $10,000 in the four-year-old trotting division.

The Kentucky Futurity is the blue ribbon event of the trotting turf. It has never been won by a counterfeit while many of the greatest trotters on the turf and in the stud have taken the word in it. No other race can furnish such a galaxy of winners as Peter the Great, Boralma, Sadie Mac, Siliko, General Watts, The Harvester, Peter Thompson, Manrico, Grace, Etawah, Peter Volo, Mary Putney, and The Real Lady. They in themselves constitute a gallery of champions, but they are not by any means all of the great ones, as among the defeated can be found such names as Lee Axworthy, the champion trotting stallion, Larabie, Surpol, Charley Herr, one of the best race horses that ever wore a shoe, Walnut Hall, Ethel's Pride, a Transylvania winner, Soprano, a champion of two continents, and The Bondsman colt Colorado E., that reduced the three-year-old record from 2:06¾ to 2:04¾.

LEADING GRAND CIRCUIT MONEY WINNERS.

The following is a list of the principal money winning trotters and pacers on the Grand Circuit, showing those whose winnings were $5000 and over; also a list of the following drivers whose winnings amounted to more than $3000. The big money on the Grand Circuit this year was more evenly divided than usual. Early Dreams had a substantial lead and was followed by five other trotters whose winnings amounted to more than $10,000. Busy's Lassie just missed getting into the $20,000 division. Among the pacers, The Savoy, the leading money winner, was several hundred dollars short of reaching the $10,000 mark.

Trotters.

Early Dreams 2:04¼, by Richard Earle p. 2:14¼	$22,185
Busy's Lassie 2:04¼, by Peter the Great 2:07¼	19,430

The Savoy 2:02¼, by Charley Hayt p. 2:06¼	$9,381
Ben Ali 2:03¼, by Wealth, p. 2:10	9,300
Little Batice 2:05¼, by Red Elm, Jr.	7,010
Little Frank D. 2:03¼, by Little Frank, p. 2:09	6,585
Miss Harris M. 2:00, by Peter the Great 2:07¼	5,274

Trainers and Drivers.

Cox	$79,693
Murphy	58,050
McDonald	42,608
Serrill	23,255
Geers	22,806
Valentine	18,672
Jamison	12,971
Ackerman	12,236
Snow	11,785
Ernest	11,475
McMahon	11,067
White	9,518
Murray	9,395
Pitman	9,010
Rodney	7,038
Edman	5,374
Traynor	4,400
Whitehead	4,267
H. Fleming	4,150
Leonard	3,900
Childs	3,610
Russell	3,550
Brusie	3,415

The winnings of several of those in the above table will be substantially increased by the addition of money won in races over tracks not in the big line series, as the figures presented show only the winners on the Grand Circuit.

NORTH PACIFIC FAIR ASSOCIATION.

The annual meeting of the North Pacific Fair Association will be held at New Westminster, B. C., February 8-9, 1918.

Matters of importance to the state and county fairs, livestock and industrial exhibits, and race meetings will be considered. A two-days' session has been arranged.

All persons connected with the business, members of the press, representatives of transportation companies, exhibitors and amusement managers are welcome. Dates of the Northwestern fairs, exhibitions, and race meetings will be fixed.

Notes and News

We regret to learn that H. K. Devereux, president of the Grand Circuit, was recently thrown from the sulky while working Rusticoat (3) 2:08¼, sustaining a broken wrist and other injuries.

✤ ✤ ✤

In a letter to a member of the Review staff, Marvin Childs writes from Camp Funston, Junction City, Kansas, that he likes military life very much, and is anxious to get to France as soon as possible. He has been assigned to the field artillery, and the number of his command is 342. Marvin should be remembered by his horsemen friends, and it would be most considerate of them if they would occasionally write him. Another horseman that is now in service at either Junction City or Fort Riley is Lieut. Edward Welch, a son of J. D. Welch, the well-known Kansas City, Mo., horse owner.

✤ ✤ ✤

Matinee races for the 1917 season are concluded. Directors of the San Francisco-California Driving Club decided as much at a meeting held two weeks ago in the rooms of the Mission Promotion Club. Weather conditions were considered uncertain and, as many of the horses are being turned out for the winter, it was thought best to cancel the remaining programmes until next season.

✤ ✤ ✤

After a long and most successful career, the Detroit Driving Club at a meeting of stockholders on October 19th, decided to clean up the affairs of the club and go out of business. There is a deficiency of something like $15,000, a portion of which will be met by the sale of the pari mutuel boxes, track machinery and other fixtures, for which it is expected the new driving club at Toledo will be a bidder. The Detroit club has paid its next year's rent in advance, and there is some talk of a new organization taking over the rights of the club and giving a meeting next year.

✤ ✤ ✤

During the Lexington meeting, R. M. Williams, proprietor of Rosewood Farm, Columbia, Tenn., engaged Millard Sanders to train the farm's horses. Mr. Williams owns High Admiral 2:07¼, and a select band of brood mares, as well as colts by Peter the Great 2:07¼ and other popular sires. The arrangements will without question work to the mutual benefit of owner and trainer. Sanders has brought fame to every family of horses that he has trained, including the Sidneys, Axworthys and Sidney Dillons.

✤ ✤ ✤

The American Trotting Association has given notice that the next regular meeting of the Board of Appeals will be held at the Auditorium Hotel, Chicago, Tuesday Dec. 4, at 10 o'clock a.m. Secretary Gocher of the National Trotting Association has announced a meeting of the Board of Review to be held at the Murray Hill Hotel, New York, on the same day and at the same time.

✤ ✤ ✤

The Estate of the late Dr. C. E. Farnum has just sold to Dankin and Turner a colt by Marse Abe out of Miss Whitemouse. The consideration was $1000 and judging from his breeding and appearance he should prove to be well worth it. Marse Abe is one of the best bred stallions in the United States and it is a pity that so few of his colts have been put in training, as they are all fine individuals and if given a chance should prove worthy scions of their sire's family.

✤ ✤ ✤

Presumably acting for W. S. Hobart of Menlo Park, J. O. Walsh has purchased the Lidden ranch two miles east of the racing course at Del Monte. Hobart has declared his intention to establish a breeding farm on the Lidden place, being encouraged to do so by the permanent institution of racing at Del Monte. D. C. Jackling and Richard McCreery are also in quest of likely breeding farms, and all three of these gentlemen will show their racing colors at the Monterey Jockey Club's spring meeting in 1918.

✤ ✤ ✤

With oral betting legally permitted, the prospects are brighter than ever for the most successful winter racing season New Orleans has had since the halcyon days of 1900. Sixty-five days of uninterrupted sport are assured, commencing on Thanksgiving day and running through to the 1st of January. At the conclusion of the meeting the Business Men's Racing Association will open its fair grounds for a season to run from January 1st and until Mardi gras day, February 12th. New Orleans will be as popular with the race track followers this winter as was San Francisco in the days of Emeryville, Tanforan, and Ingleside.

✤ ✤ ✤

The field enclosed by the race track at Agricultural Park, Sacramento, has been plowed and is soon to be checked and planted to alfalfa. The work is under the direction of Director Charles Chenu, of the State Agricultural Society, who believes that a green crop will greatly improve the appearance of the park and eliminate the dust to a great extent during fair week.

C. W. Bowers returned last Wednesday after spending some time in northern California and southern Oregon. He declares there is a great dearth of horses and mules and that he saw more horse and mule buyers while out this time than on any other trip he ever made. The buyers are more than anxious to buy but are unable to find stock for sale. This shows the importance of producing all the horses and mules possible as there is no question but the demand and prices will increase, and the opportunity is now offered for the farmer and range men to make good money in breeding and raising a good class of horses and mules.

✤ ✤ ✤

Butt Hale 2:02¼ by Senator Hale 2:10¼ has been sold by his former owner, W. J. Connors of Braddock, Pa., to S. H. Cowell of this city. He has been shipped to Sacramento and will be an element in the free-for-all pacing class that will cause plenty of trouble to the pacers that have made up the fields among the fast ones during the past season. It need cause no surprise, if, under the influence of new climatic conditions, this son of Senator Hale takes a record of right close to two minutes. He was the bright particular star of the Murphy stable during the 1917 season. He paced five heats in 2:10 or better at Kalamazoo on a recent Wednesday, was shipped to Columbus and on the following Tuesday won in 2:09, 2:04¼ and 2:05¼; started again on Friday and won in 2:03¼, 2:05 and 2:09¼; was sent to Cleveland and on Wednesday he wont in 2:04¼, 2:07¼ and 2:05¼; the following day was again started and won in 2:07¾, 2:08¼ and 2:09 three days later, one of which was spent on the cars, he won at Philadelphia in 2:08, 2:07½ and 2:09, thus winning five consecutive races and pacing fifteen miles at an average of better than 2:07 in two weeks. There is not a thoroughbred horse in America capable of such a display of endurance.

✤ ✤ ✤

Loren Daniels was badly injured at the Los Angeles race track; he was working The Proof and during the heat was thrown out of the sulky and sustained a fracture of the ankle and two broken ribs, but at last accounts was resting easily.

AN INTERESTING CASE.

B. F. Townsend, the trainer and driver of the horse J. C. L. in the 2:08 pacing, purse $2000, raced for over the Fresno track on the 27th day of last September, has filed a protest against the decision of the judges in the first heat of that race awarding the horse Hal Logan a record of 2:05¼, claiming that the actual time made in this heat was not slower than 2:04. Mr. Townsend backs up his protest with the sworn statements of W. Doherty and of George W. Beall, timers in said race, in which they swear that each of their watches showed that the heat was paced in 2:04. The other timer in this race was J. W. Zibbell of Fresno. Under the rules the timers are provided with a blank certificate to be filled out, stating the race, the heat, and the time, giving the mile and fractions, and the certificate filed with the judges by the timers and signed by Mr. Beall as presiding timer showed the heat in 2:05¼. It is claimed that Mr. Beall was questioned in the judges' stand before the time was announced and reported to the judges that the timers' watches were uniform and showed that the heat was paced in 2:05¼.

The opinion seems to prevail among those who held stop watches on the race that Hal Logan paced the mile faster than 2:05¼, and how Mr. Beall and Mr. Doherty, the timers, will reconcile the time they turned in to the judges for announcement and their sworn statements to go before the Board of Review will be interesting.

THE FIRST TWO-MINUTE PACING MARE.

Just twenty years ago, in 1897, Star Pointer 1:59¼ inaugurated the list of two-minute pacers, and ever since then horsemen have been awaiting the advent of a two-minute mare of the lateral gait. In 1903 Lou Dillon, a trotting mare, took a record of 1:58½, and that season, also, Dariel, behind a runner, paced in 2:00¼. At the time it was thought to be a matter of but a season or two for the "taking off of the fraction," but year after year has passed, and not until the meeting at Atlanta, Ga., this fall did the long-awaited "pacing lady" qualify for a place on the two-minute roster along with the ten stallions and geldings that previously had inscribed their names thereupon.

The heroine of this truly notable achievement is the bay mare Miss Harris M., daughter of that unequaled extreme speed sire, Peter the Great 2:07¼, and owned by his owner, Mr. Stoughton A. Fletcher, of Indianapolis, Ind. Ever since her advent upon the turf, as a three-year-old, in 1915, it has been confidently predicted that she could and would pace in two minutes. That season she won two pacing futurities, took a record of 2:07¼, and showed herself able to step in 2:04. It is not unusual for a three-year-old pacing star to be retired at four, for a year's rest and development, but this course was not pursued with Miss Harris M., and as a four-year-old she was last season campaigned against the aged stake horses in the pacing classics of the Grand Circuit. Her performances are too recent and well-remembered to require recapitulation, but that which "set the seal of her greatness" was her victory in the $5,000 Board of Commerce stake at Detroit, in which she beat a field of eleven aged competitors and paced three consecutive heats in 2:01¼, 2:01¾, 2:04½, a new world's record of its kind for her sex and gait.

DEATH OF AXWORTHY 2:15½.

Last December, in his eightieth year, William Simpson, the owner of the Empire City Farms, passed away after a career as a breeder extending nearly half a century, and since then his two great stallions, McKinney 2:11¼, died last April at the age of thirty, and now the news has just come that the great stallion Axworthy 2:15½ died on the 5th of this month. It will be remembered that Mr. Simpson paid Henry B. Gentry of Indianapolis the sum of $50,000 for the great McKinney in the fall of 1904, and in 1906 he paid $21,000 at auction for the stallion Axworthy. It is doubtful if any other breeder, except J. Malcolm Forbes, ever owned two such great sires as McKinney and Axworthy. Mr. Forbes at one time was the owner of both Bingen 2:06¼ and Peter the Great 2:07½. As a youngster Axworthy was a very promising colt and much was expected of him in his three-year-old form, but unfortunately his prospects were blighted by an injury he received to one of his ankles. It was at that time that he took a record of 2:15½ in the second heat of a race at Terre Haute, Ind. He was bought at auction in 1896 by John H. Shults for $500. Ten years later, after having become one of the most successful living sires, he was again sold at auction at Madison Square Garden, and was bought by Mr. Simpson for $21,000. He was then sent to the Empire City Farms. In 1910 he was sent to Lexington, Ky., the blue grass breeders being anxious to obtain his services, and was placed in charge of R. L. Nash. He died at the latter's Mansfield Farm. He would have been twenty-six years old had he lived to complete the year. The following is a list of 2:10 trotters by Axworthy:—

Hamburg Belle, b m (1902); dam, Sally Simmons 2:13¼, by Simmons 2:28 ..... 2:01¼
Hailworthy, b g (1904); dam, Alselma, by Altivo 2:18¼ 2:05¼
Axtien, ch h (1907); dam, Protien 2:11¾, by Glenwold 12367 ..... 2:06¼
General Watts, 3 yrs., b c (1904); dam, Carpet 2:28, by Prodigal 2:16 ..... 2:06¾
Tom Axworthy, ro g (1909); dam, Nell, by Estill Eric 2:07
Ortolan Axworthy, 3 yrs., b c (1911); dam, Mary Elkin (2), 2:29, by Prodigal 2:16 ..... 2:07½
Queen Worthy, b m (1906); dam, The Queen 2:10¼, by Chimes 2:30¾ 2:07½
Adlon, 3 yrs., ch c (1909); dam, Dorothy T., by Advertiser 2:21¼ 2:07¾
Bright Axworthy, b g (1907); dam, Honor Bright 2:22¾, by Antonio 2:28¼ 2:08
Rusticoat, 3 yrs., ch c (1912); dam, Dorothy T., by Advertiser 2:15¼ 2:08¼
Olcott Axworthy, b h (1903); dam, My Trinket, by Stamboul 2:07½ 2:08½
Guy Axworthy, 4 yrs., b c (1912); dam, Lillian Wilkes (3), 2:17¾, by Guy Wilkes 2:15¼ 2:08¾
Worthy Volo, 2 yrs., ch c (1914); dam, Nervolo Belle, by Nervolo, p. 2:04¼ 2:08¾
Nathan Axworthy, br h (1910); dam, Bertha Bennett 2:14¾, by Prodigal 2:16 ..... 2:09
Lord Brussells, 4 yrs., b c (1910); dam, Lady Brussells, by Wilton 2:19¼ 2:09½
Kerrigan, br h (1912); dam, Carrie Kerr 2:30, by Prodigal 2:16 ..... 2:10
Silver Axworthy, 4 yrs., ch c (1912); dam, Easter Lily, p. 2:06¼, by Oratorio 2:13 ..... 2:10

With the close of 1917 he has twenty-seven producing sons that are all horses of great quality, and it is doubtful if any stallion ever had three sons the equal of Guy Axworthy (4) 2:08¾, Dillon Axworthy (3) 2:10¼, and General Watts (3) 2:06¾, the first named being the sire of Lee Axworthy 1:58¼, the world's champion trotting stallion, etc. The Axworthy mares, while still young, are making a great record as producers, there being not less than ten 2:10 trotters to their credit, headed by the world's champion two and three-year-old, The Real Lady (2) 2:04¼, (3) 2:03. Axworthy was a remarkably fine individual and was a horse of great intelligence and fine disposition.

DRIVERS PETITION FOR THREE-HEAT PLAN.

A large number of the most representative and influential drivers of the Grand Circuit, including Murphy, Cox, Geers, McDonald, Rodney, Snow, Valentine, White and others, have united in a petition which will be presented to the Stewards of the Circuit at their meeting in January, praying for the adoption at all of the meetings next season uniformly of the three heat system of racing, as it has been employed at North Randall for the past few years. These drivers declare that they have observed this mode of racing carefully and are convinced that it is humane, both for men and horses; that it brings about definite results and that it more widely distributes the purse money. The Cleveland plan involves an innovation upon the three heat system, as it is defined by the rules of the American and National Associations, and as it has been exemplified at other tracks, and one that to a large degree removes the objections to it. This innovation is a provision that in an event where three horses have each won a heat, they shall engage in a fourth heat to determine the winner of the race, thus making the contest a practical embodiment of the best two in three method. This provision redeems the three heat system from its greatest weakness, an indeterminate result that leaves an unsatisfied feeling upon the part of racegoers as to which is the best horse. In every race at North Randall a horse must win two heats to get first money, and no engagement can last longer than four heats. It insures short contests, which conserve the lasting usefulness of the horses and the energy of the drivers, but still decisive contests which determine the relative racing quality of the contestants. The drivers have done well to urge the general adoption of the plan and the stewards should give their appeal careful consideration.—[Trotter and Pacer.

"KNAP" McCARTHY.

The passing of W. H. McCarthy at Terre Haute, Ind,. on Sept. 30 is entitled to more than a stickful of matter in the obituary column. While not a very old man, the returns showing that he was born at Elmira, N. Y., March 22, 1855, "Knap" McCarthy belonged to the old school of trainers on account of having started racing early in life and remaining at it for over fifty years.

The first glimpse of him on the screen dates from the opening of the Civil War when as a tow-headed lad he put in all of his spare time riding army horses for a government purchasing agent at Elmira. When the Seventh Artillery joined the Army of the Potomac, young McCarthy was with it and remained with that command and the Ninth Cavalry during the entire war. On the battle field or during the march the sturdy little lad from the Empire State was always in the van. All of his possessions were toted from camp to camp in a shabby old knapsack picked up on the battle field. It made him so conspicuous that the soldiers dubbed him "Knapsack," which was soon shortened to "Knap" and stuck to him through life.

After peace was declared "Knap" remained with the government riding horses that were being offered for sale. When they were all sold, he drifted back to Elmira where he was soon busy riding runners in quarter races and dashes at the fairs and race meetings in western New York.

Opportunity tapped at his door in the fall of 1867 when Dan Mace visited Elmira with a mixed stable of trotters and runners to start at the fair. Among other horses Mace had the thoroughbred mare Charlotte F., that in time became famous as the running mate of the old time trotter Ethan Allen. Young McCarthy was selected to ride her at Elmira and his work made such a favorable impression that when Mace returned to New York, he took "Knap" along with him. The following spring at the mature age of thirteen, W. H. McCarthy began a thirteen-year apprenticeship with Dan Mace. Being a plodder and entirely devoid of the magnetic temperament and light hands which go with a great reinsman, "Knap" rose slowly to the surface. Finally he was given a mount at St. Louis in 1878. Mace was injured and McCarthy was sent out behind Darby. He won. Later on he also drove Sorrell Dan and Hopeful in a few races. This convinced him that he could paddle his own canoe and in the fall of 1880 "Knap" made a contract to drive for H. V. Bemis of Chicago.

The next year he came down the line with Little Brown Jug, Sorrel Dan, Bonesetter, Silverton, and Fred Douglas. The Jug won twelve races for him that season and also paced in 2:11¾, 2:11¾ and 2:12½, the three fastest heats on record up to that date, when he won over Charter Oak Park at Hartford. Silverton also won nine races for the Bemis stable and Bonesetter two before he dropped dead at Pittsburgh.

In 1882 "Knap" made a contract to drive for Commodore Kitson of St. Paul, Minn., and invaded the Grand Circuit with So So, Fanny Witherspoon, Gem, Von Arnim, and Minnie R., as well as Little Brown Jug and Silverton, both of which were purchased from Mr. Bemis. He only had fair success with the new outfit, the double gaited mare Minnie R. and Von Arnim being his best pupils. The next year he opened a public stable and remained a free lance during the balance of his career except in the early nineties, when he trained a stable of runners for D. D. Withers. Starting off with Flora Belle, Zoe B., Mattie H., and Belle F., McCarthy managed to more than hold his own in the fastest company and followed up their successes with the second money trotter Felix, Jewett, Mambrino Sparkle, Harry Roberts and Prince Middleton.

In the fall of 1887 McCarthy purchased the chestnut mare Geneva S. from Andy Welch. Welch knew that she was a good trotter but he didn't want to keep her as she was going blind. That, however, did not stop "Knap" and that he acted wisely was shown by the splendid second money campaigns which she made for him, while she also won occasionally when least expected. About this date "Knap" also selected "Safety First" as his motto, the hope of winning being allowed to go glimmering for the surer and more profitable plan of helping while he nearly always managed to pick up a portion of the purse while doing it. The only prominent slip that he ever made in this role with Geneva S. was in 1888 at Rochester, N. Y., in the $10,000 Flower City Purse which Budd Doble won with Jack. The Kentucky Prince gelding Guy was the favorite. He had five or six seconds more speed than any of the other starters but he was also known to be a bad actor. The result, therefore, depended on Guy getting away in a trot as he was never known to make a break after he took the word. Geneva S. won the first heat which under ordinary conditions cinched second money for the McCarthy family. In the second heat Guy was sent away behind the field but trotting. When the horses struck the home stretch the word was passed along that Guy was coming on the outside. McCarthy deliberately carried him into the fence while Doble went on and won with Jack. The judges distanced him for the foul, a very mild penalty for the offense, while W. J. Gordon of Cleveland, the owner of Guy, at the close of the season retired from racing on account of it.

After Geneva S. was laid away, "Knap" spent about all he had saved for a rainy day trying to make a race mare out of the gray mare Anna Mace by Robert McGregor out of Mattie H. 2:27½ by Blue Bull, and which was bred by his wife. She had plenty of speed but was unfortunate and finally found a place in the discard after the Cleveland meeting in 1894 when "Knap" made an effort to defeat Eliose after W. B. Fasig, who owned the latter, refused to divide with him.

Shortly after this race, "Knap" made a contract to train D. D. Withers' gallopers. Either he or the horses failed to make good, the Favordale colt being about the only good one that he sent to the post. Later he returned to the trotters and rounded out his career by bringing out Oro 2:05¼, Nancy Royce 2:06¼, Norman B. 2:06¼, Dan Cupid 2:09¼, and Derby Boy 2:09¼, while he also raced the pacers Searchlight 2:03¼, Indiana 2:04¾, and Frank Agan 2:03¾, being behind the latter when he defeated Joe Patchen, Robert J., Rubenstein, and Badge at Cleveland in 1896 in 2:05, 2:04 and 2:02¾. These two races were also the fastest three and four-heat races paced up to that time.

In 1906, "Knap" trained the Kentucky Futurity winner Siliko for John E. Madden and was severely injured while the race was in progress. Ethel Mack 2:07¼ also proved a good winner for him and after being retired produced a number of fast foals, one of them being W. J. Leyburn, which he sold for $15,000 last year, after showing that he could trot in 2:10 over a half mile track.

Of late years "Knap" McCarthy confined his racing operations to the middle west with headquarters at Terre Haute. This year he made a very fair showing through the Michigan Circuit with June Red, winning a number of long-drawn-out races with her. He was also behind a member of his stable at Charleston, Ill., on September 25, when he was thrown from his sulky, fractured his skull and died five days later from the injury.

"Knap" was the hardest working man in the light harness racing world. No one ever heard of him pulling off anything with a catch mount or having a prospective champion handed to him after being prepared for a campaign. What he had he made and what he won he kept. His methods were tough but thorough; if a horse stood his preparation he raced well for him. Mace always told him that he would never make a success as a driver as he had a heavy hand and could never learn to send a horse away at top speed without holding him as if he were in a vise. This was the method of Woodruff, Hoagland, Whelan, and Pfifer. It was what he had seen as a boy and he always clung to it, notwithstanding the fact that he was trained under the Mace method of light hand driving, perfect balance, and just enough work to keep all of the spirit and play in a horse, but at the same time sufficient to leg him up for a supreme effort in a series of heats, a system that was followed by Hickok, Marvin, Turner, and James Goldsmith and is being continued at the present time by Thos. W. Murphy, Edward F. Geers, Walter Cox and Alonzo McDonald.

"ONE ANIMAL TO EVERY FOUR MEN."

Since the Government substituted a number of young civilian horsemen for the regular army officers to buy horses for the army, there has been much comment as to the methods of buying. We have received reports from these gentlemen from different parts of the country in regard to their labor and find that Mr. L. E. Waring, who is one of the number, is stationed at Los Angeles, California. Mr. Quincy Shaw of Boston is at Sacramento, Mr. Robert Strawbridge of Philadelphia, at American Lake, Washington, and Mr. John R. Valentine, at Linda Vista, Cal., showing that the East is well represented on the Pacific Coast. They are all said to be meeting with excellent results, obtaining good horses for cavalry or "riding" purposes and strong horses for light artillery. Following are the specifications under which they are working:

Cavalry horses, 15 to 16 hands, weight 950 to 1200 lbs., age 6 to 10 years; artillery, 15.2 hands, weight 1150 to 1300 lbs., age same as cavalry; siege, 16 to 17 hands, weight 1400 to 1700, age 6 to 10 years. They are now just starting to buy mares, accepting about 15 per cent. They are also buying mules plentifully. In a lecture to them by Capt. John S. Fair, he says it requires at least one animal to every four men in the service, excluding the cavalry. Before the British and French representatives came to this country our men had an idea that motor transportation had taken the place of animals. These officers have declared that the regimental field train (that is, the combat train, the supply train and the ration section of the supply train) must be animal drawn and horses are absolutely necessary for the light artillery that we have hitherto regarded as heavy up to the six-inch gun. A regiment of six-inch guns is wanted to go somewhere in a hurry and a stray shell comes along and knocks out a motor; you can't get another motor right away; you cannot draw the gun with a part of the machinery. If a horse or team is knocked out you can bring in others quickly, or haul the gun with the animals unhurt. Machine guns cannot be carried on automobiles. They must be put on some kind of a carrier that can go through woods and across hills and streams and ravines. Capt. Fair adds that the motor looks very pretty on a road but infantry regiments do not usually travel the roads when going into battle. Whatever may be the result of the development of motor transportation, he adds, the horse and the mule will to the end be a factor for war purposes. Pack animals are carrying shells and food into the trenches. Artillery horses with shells on their backs make their way to the guns.—Rider and Driver.

NEW MARKS ESTABLISHED.

The wind-up of the Grand Circuit season of 1917 was staged for the meeting at Atlanta, and, while no season's record for the size of fields was broken, it is doubtful if any previous concluding meeting of the big line ever saw the competing horses in better condition to accomplish great feats and establish new world's records.

Naturally, a world's record is something that, to a certain extent, must be spoken of with bated breath, as there is a sort of halo, or odor of sanctification attached thereto, but a review of the last week's activities at Atlanta necessarily forces the conclusion that the present day breeds a number of iconoclasts.

In the stake trot, won by Early Dreams, as we chronicled last week, a battle for the five heats arose that brought about a new world's record for a contest of that length, as well as equaling in the fifth mile, without regard for the time of the previous four, the fastest time ever trotted in the fifth heat in any competition that there exists a record of today.

This was to the credit of the performers at the diagonal gait, but Miss Harris M., in her fight for the supremacy over the field in the free-for-all pace, speedily disclosed that the side-wheelers were also ready to take their part in a fitting finish of the season. Her victory in the event above referred to gave her the credit of having paced the fastest two consecutive miles ever covered by a pacing mare, 2:00½ and 2:00¾, and at the same time it must be recalled that this is superior to anything ever accomplished by geldings of like gait.

Following this performance, Miss Bertha Dillon, the great daughter of Dillon Axworthy, was the vistress in the Matron Stake, and in the last heat of that event trotted a mile in 2:03¼, the fastest mile ever negotiated by a trotter of like age in competition, regardless of sex.

Of course every interested follower of the harness turf this present season knows that Miss Bertha Dillon is a three-year-old, and, furthermore, knows that by the mile of The Real Lady in 2:03 at Lexington recently that filly stands as the world's champion of extreme speed at that age, but undeniably Miss Bertha Dillon is entitled to the honor of being the world's champion three-year-old racing trotter, and the value and worth of this performance cannot be better indicated than by calling attention to the fact that her record is within one-quarter of a second of the time accomplished by the champion, The Real Lady, in a time trial.

Thus far we have called attention to three new world's records established and one equaled and this, especially, in the face of the fact that the South Eastern Fair Company at Atlanta has just concluded its second year in the big chain, should have been enough to have convinced our friends below Mason and Dixon's line that the verdict to be passed upon their meeting of 1917 must necessarily have been one of approval. However, their cup of pleasure was yet to be added to and again Miss Harris M. figured as the performer that brought additional laurels to the track at Lakewood Park.

Prior to the meeting at Atlanta the list of performers in the history of the harness horse turf that had displayed speed of two minutes, or better, included a stallion, two geldings and a mare at the trotting gait, and also, eight stallions and two geldings had equaled or surpassed this mark at the pacing gait, but it remained for Miss Harris M. to establish herself as the first pacing mare that has ever been able to negotiate a mile in two minutes.

Thus, we are confronted with the fact that stallions, mares and geldings have at this day achieved such speed, both at the trotting and pacing gaits, and again we are convinced that this is an age of progress.[—American Sportsman.

WHEN TO "GENTLE" A HORSE.

The mean or outlawed horse can best be gentled and made useful to man during the time of the year when he gets his feed from a feed bunk or manger. During the grazing season the animal does not have to look to man to supply his wants. During the feeding season, however, the horse is compelled to come to man and not man come to him. If the horse does not come up to man's proffered feed at the time hunger is the result, and, as the old saying goes, while hunger is a hard breaking it breaks the gentlest. If the man will meet the horse half way during the feeding season and show the horse that he is willing to play fair it is surprising to see how quick the horse will lose many of his evil ways. It must be remembered that most of the horse's bad acts were brought about through the horse's belief that man was an enemy and not a friend. The idea of friendship cannot be built in the horse's mind if, during the feeding months, the man continues to abuse the animal. Kindness and perseverance along with the feed will build up friendship, however, that makes a wonderful foundation upon which to build. If this is followed up in the spring with stabling and work to fasten the idea of man's will first, the animal will be of use to man. If, however, it is followed by green pastures and absolute freedom many horses will return to their old evil ways. But as the house cannot be built without a foundation so the horse cannot be gentled without a start—and the feeding months are the months in which this start should be made.

THE CHAMPIONS AT HARTFORD MID-SUMMER SERIES OF RACES FOR 1918

The first step toward a mid-summer series of harness races between the champions of the light harness world on the eastern tracks in 1918 was taken by the directors of the Connecticut Fair Association at a meeting recently when they authorized the announcement that $9900 will be given for a day's racing at Charter Oak Park, Hartford, Conn., on July 4, 1918. This amount will be divided into three $3300 purses for a free-for-all trot, a free-for-all pace, and a stallion race for trotters eligible to the 2:05 class. Each of the races will be on the three heat plan: $1000 being given for each heat and $300 to the horse standing best in the summary.

W. H. Gocher, the treasurer of the Connecticut Fair Association, attended the special conference of the Grand Circuit Stewards which was held at Lexington, Ky., during the meeting in that city and while there interviewed all of the owners and trainers of horses eligible to the classes selected. Upon his return he reported that all of them were in favor of starting at this meeting while the representatives of the tracks at Boston and Philadelphia expressed themselves as willing to put on similar races during the two weeks which will elapse between the meeting at Hartford and the opening of the Grand Circuit at Cleveland. The purses for the three meetings will amount to over $25,000 which will certainly warrant the trainers of the horses eligible to get them ready for this unique circuit.

Of the trainers interviewed Ed. F. Geers promised to appear in the free-for-all trot with his prize pupil St. Frisco, while Napoleon Direct, if he will stand training, or Russell Boy, will be his mount in the free-for-all pace. St. Frisco is bothered at the present time with the quarter crack which accounts for his poor showing at Columbus and Lexington, but before spring it will have grown down and by next July the Tennessee champion will be himself again and ready to meet Walter Cox with Mabel Trask, the most consistent and fastest race mare that has been seen on the turf since Goldsmith Maid stood in the spot-light of fame and met and defeated such sturdy rivals as Lucy, American Girl, Lady Thorn, Gloster, and Judge Fullerton. In the other races the Cox stable will be represented by Lu Princeton, one of the very best horses in training, while for the pace its manager will have The Savoy, Game of Chance, and the electrical sprinter Little Batice to select from.

Alonzo McDonald, who is now a resident of Indianapolis, Ind., has promised to open his 1918 campaign at Hartford on July 4th. He will start his brilliant stake horse Early Dreams in the free-for-all trot, Zomrect in the stallion race, and that beautiful race mare, Miss Harris M., in the pace. Indiana may also send another starter in this race in William. This horse has never started in a race on the eastern tracks, his only appearance being to wagon at Syracuse when Mr. Billings owned him. This winter his owner, Mr. Crouch of Lafayette, Ind., expects that Marvin will get William back into the form which he exhibited as a four-year-old when he met Directum I. at Grand Rapids and Columbus and finished heats better than two minutes. If he does there are no horses now in training that can defeat him.

The Poughkeepsie wizard of the sulky, Thomas W. Murphy, will also be present at Hartford with Peter Chenault in the stallion race and will have Directum I. in the free-for-all pace. Peter Chenault made his first appearance on the Grand Circuit this season and from a comparatively unknown colt marched into the 2:05 class. With a year's racing experience, he should in 1918 be able to carry his great flight of speed without making the skips which proved so expensive in a few of his races this season. During the Columbus fall meeting Murphy snipped another star from the western sky when he won two races with Directum J. and followed it up by driving him in 2:01¼ at Lexington. Before next spring he may also select a free-for-all trotter for his stable. While it is reported that the double Futurity winner, The Real Lady, is to be retired, her owner may reconsider it as she has a chance to duplicate the performance of Mabel Trask and also acquire a record of two minutes or better. Notwithstanding the sickness which kept her on the retired list until after the middle of September, she showed her ability to trot in 2:03, a rate of speed that would make her a factor in any company. With her and Miss Bertha Dillon added to the list of free-for-all trotters, the American public would have the pleasure of seeing the greatest series of races ever offered.

Mr. A. B. Coxe, the breeder of Miss Bertha Dillon, is now considering the advisability of preparing her for the free-for-all trots at Hartford, Boston, and Philadelphia. When she defeated The Real Lady at Columbus, she acquired a winrace of 2:03½ after stepping the last half of the mile in 59¼ seconds, a rate of speed that was never shown before by any trotters except Mabel Trask, St. Frisco, and Hamburg Belle in her match with Uhlan.

Of the others who have promised to participate in the summer series of champions, Dick McMahon will be seen behind the Oregon thunderbolt Hal Boy, a horse that has taken the word on more mile tracks than any other in training, his field of action extending from San Francisco to Hartford, and Bud Murray will drive one of the Brook Farm stallions, Suldine being his choice at present, although Al Mack is known to have a chance in any company. If his tendency to make breaks could be overcome, he would be in the king row with St. Frisco. Harrod's Creek will in all probability represent Kentucky. Like a great many colts he has not been as good as expected in his four-year-old form, but his trip down the line in fast company this season should put him on edge to race the champions next season. The owner of Ben Ali has also expressed himself as willing to bring the "Big Turk" back to Charter Oak Park next year and give him another opportunity to wipe out his defeat by Butt Hale on Labor Day.

Charlie Valentine, who has three good pacers in his stable at this time, may also be induced to come east for a whirl with the champions. The successful manner in which he handles a pacer makes the "Buckeye boy" a dangerous factor in any race while his showing with Straight Sail, Sister Strong, and many others shows that he knows how to sight a trotter, especially a bad actor with flash speed.

DIFFERENCE BETWEEN TROTTING AND RUNNING RULES.

An incident of the race won by Captain David Shaw's matinee trotter Miss Directed 2:04½, on the Grand Circuit a few weeks ago, illustrates an interesting difference between the rules of trotting and running in the matter of determining when a horse is to be deemed a starter in a race. Her octogenarian owner had been driving Miss Directed in amateur races until a few weeks before the meeting when she was quietly retired and pointed for a "killing" in the big league.

Among the trotters entered against her in the 2:07 class was The Woodman, then unbeaten on the Grand Circuit. He was a hot favorite in the auction pools, while the mare sold for $35 in pools of $300. After scoring once or twice Ben Whitehead, who drove the favorite, asked and obtained permission of the judges to draw The Woodman on the ground that he was lame. According to the American Sportsman, the crafty driver afterward admitted that he had been influenced by the fact that Miss Directed could brush right away from his horse, on which he and his friends had wagered several hundred dollars.

When the judges permitted Whitehead to withdraw The Woodman all bets on the favorite were void, by operation of the rules of harness racing, as he was not a starter in the race. Not until the word "go" is given in the first heat can any horse be deemed to be a starter under the code of the National and American trotting associations.

Under the rules of the Jockey Club every horse is considered as having started in a running race when his jockey has been weighed out and his number displayed, and the rules require the jockeys to be weighed out not less than half an hour before the time fixed for the race. It will thus be seen that if The Woodman had been a runner instead of a trotter his backers would have lost their money, even if the stewards had given permission to withdraw the horse after going to the post. And few horsemen would be likely to say they had suffered any hardship in the circumstances reported at Cleveland. If, on the other hand, The Woodman had been disabled after going on the track for the race it would be a hardship for his backers to lose their money without getting a run for it, yet the hardship is substantially the same when a horse breaks down after getting the word, in which case his backers lose, whether he is trotter or runner.—[N. Y. Herald.

MORAL LESSONS FROM HORSE RACES.

To hear a preacher draw moral lessons from horse races was the unusual experience at the Pilgrim Congregational Church at Spokane at the close of the recent Interstate Fair.

"The Fair and the Races" was the topic of the Rev. C. H. Burdick's Sunday morning sermon. He said in part:

"The races were most instructive. No fat, sleep show animals here. They are lean and rangy—not an ounce of superfluous flesh in evidence.

"The drivers have whips. They are for encouragement—the rod of 'correction' not the 'rod of punishment.' What a lesson for Christians in the heavenly race. I never fear for the welfare of the church where the people take the bit and run with all their might. Getting a start is an instructive proceeding. We waste too much time trying to start from a standstill.

"A visitor from a different civilization would draw some inevitable conclusions from a modern fair. The apparent immoderate emphasis upon material development would suggest to him an almost purely material civilization, so little space is there given educational, social or religious exhibits. Cattle, sheep, hogs, poultry, farm products, canned goods, needlework, machinery, all minister to the physical life pre-eminently. Where are the exhibits showing progress in education and in religion? Almost nothing."

TRAPSHOOTING A PATRIOTIC SPORT.

The "Air Division" of the Signal Corps of the United States Army will soon install clay target shooting at its flying schools. It is the firm belief of those in charge of this branch of the government service that members of the flying squad will be better equipped to successfully engage the enemy flying machines if they are proficient wing shots. This more than ever emphasizes the fact that trapshooting is a patriotic sport.

HORSES FOR THE WAR.

Since the beginning of the war approximately 1,000,000 horses have been exported from the United States. This is 2½ per cent of the whole or one out of every 40 horses in this country.

There has been practically no war demand for the heavy draft horse weighing 1700 to 1900 pounds, yet this class of horses is selling higher today than ever before. The demand for the war horse is an unstable one and this kind of a horse is not a profitable one for the farmer to raise so long as the country remains over-stocked with this type of horse and so long as the heavy draft horse continues to be the most efficient and profitable farm horse.

The United States government has not made heavy purchases to date and the latest information from the quartermaster general's office states that only horses from 6 to 10 years old, weighing from 950 to 1350 pounds, are being purchased.

The British demand a neater, smoother, better made, better gaited, and sounder horse than the French and have been willing to pay more for their horses. Most of the horses taken have weighed less than 1400 pounds—a type for which there is very little commercial demand. Market-men express the opinion that this class of horses would be selling for $50 per head less were it not for the war demand.

In general the kind of horses that are being taken for war purposes are as follows:

French cavalry—mare or gelding 5 to 9 years old, weighing from 900 to 1150 pounds and bringing at point of inspection $90 to $115.

French light artillery—mare or gelding 5 to 9 years old, weighing from 1080 to 1275 pounds, and bringing $125.

French heavy artillery—mare or gelding weighing from 1280 to 1500 pounds, and bringing $140.

British cavalry—mare or gelding 5 to 10 years old, weighing from 1050 to 1150 pounds, and bringing $130 to $150.

British light artillery—mare or gelding 5 to 10 years old, weighing from 1250 to 1450 pounds, and bringing $140 to $175.

British heavy artillery—mare or gelding 5 to 10 years old, weighing 1500 pounds or more and costing $175 to $200.

PERCHERONS BEING EXPORTED TO JAPAN.

Koiwai Farm, at Morioka, Japan, has just purchased five Percheron mares and a Percheron stallion which will be exported to Japan in November.

Makota Agata, who purchased these horses for the farm mentioned, states that there are some Percherons already in Japan, which were brought there from France, but that so far as he knows these are the first to be purchased in the United States. He states that there are many good sized farms in Japan which are being devoted to the rearing of Indian corn, oats, wheat and barley, and that the Japanese owners have found it desirable to work these farms with gang plows, discs, seeders, and other labor-saving machinery well known to American farmers. Most of the horses in Japan are too small to handle this heavy machinery, and for this reason Percherons are desired in order that the small horses may be increased in size. It has already been found that the grade Percherons produced by crossing Percheron sires on native horses, are more efficient than small horses in their farm work.

A DEAD HEAT.

At the annual fair that is held at a small town in Russia, a man observed a gypsy and a Pole haggling over the sale of a horse, says the Youth's Companion. When the transaction was over, he asked the gypsy how much he had got for the animal. The gypsy opened his hand and showed a ten-ruble note, worth about $5. "But isn't that very cheap?" "No," said the gypsy, "the horse is lame." The man then sought out the Pole, to whom he said: "You have given ten rubles for a lame horse." The Pole smiled knowingly and remarked: "He is as sound as you or I. I saw he was badly shod, and that was all." The inquirer returned to the gypsy and reported what the Pole had said. Then, with a significant wink, the gypsy whispered: "He's as lame as a two-legged stool! I had him badly shod on purpose to make people believe that that was the cause of his limp." When the Pole was told this he seemed for a moment taken aback and hung his head; then he heaved a sigh and shrugged his shoulders: "Ah, well," he said, "it's all right; it was a bad ten-ruble note."

HORSES SAVE FARMER FROM BULL.

Henry Henneman, prominent farmer near Bloomer, Wisconsin, probably owes his life to three horses, particularly one, a family pet, which displayed almost unbelievable intelligence in rescuing him from the horns and hoofs of an infuriated bull which attacked him.

Henneman was knocked down, trampled on, and horned by the bull and was near unconsciousness when three horses which were loose in the pasture came dashing up and, with their heels and teeth, drove the animal away.

The one horse, the pet, began caressing the injured man affectionately. Henneman put his arms about the animal's neck. With almost human intelligence the horse started carefully toward the house and away from the bull. Henneman fainted on the way and dropped, but the horse stood by until assistance arrived.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

Snipe shooting is good around Santa Rosa and Suisun.

✤ ✤ ✤

The 1918 tournament of the Sportsman's Association of the Northwest will be held in Seattle, Wash.

✤ ✤ ✤

In the California State Shoot 352 shooters fired at 52,100 targets and broke 47,672—an average of 92 per cent—which is just about the best record any State tournament ever had.

✤ ✤ ✤

While many of the crack shots and experienced duck hunters are getting the limit, duck hunting is not nearly as good in the Sutter basin as it will be as soon as we have a good rain. Then the duck season in that vicinity will be on in earnest and bag limits will be the order of the day for everybody.

✤ ✤ ✤

Mrs. S. B. Friend, of Los Angeles, Cal., showed the crack trap shots of the exclusive Tiro at Blanco, Manila, P. I., that American women could break clay targets proficiently, for in a recent tournament there she broke 44 out of 50 targets and won the visitors' trophy.

✤ ✤ ✤

With the idea of making inducements for more women and girls to enjoy the alluring sport of trapshooting, the Golden Gate Gun Club of San Francisco has constructed a reception room for the Dianas at its new grounds in Alameda.

✤ ✤ ✤

At Catalina island but one tuna was hooked in June; fourteen were caught in July, and 291 in August. During the same period eight broadbill swordfish were landed on regulation tackle and several marlin swordfish were hooked but succeeded in getting the better of the anglers who lost their tackle.

✤ ✤ ✤

A mountain lion weighing 115 pounds started to run from John Opid on Mount Lowe not far from Alpine Tavern, last month, turned around to take a final look at Mr. Opid, and received a bullet squarely between its eyes. The lion was instantly killed. Mr. Opid brought the dead animal to Pasadena to receive a bounty of $20 from the state, offered for every male mountain lion killed.

✤ ✤ ✤

There is one spot in this country where night trapshooting and gala events with the shotgun in the daytime have reached unusual proportions, in fact, surpassing any other sport of the country in this respect. This is in Los Angeles, where the home club and the Venice Pier, under the direction of Fred Teeple, has made the events staged at night, and continuously through each week, the magnet to attract hundreds of shooters, instead of dozens, and to spread the fame of that city broadcast over the continent.

✤ ✤ ✤

The Pacific coast has produced in the past few years an excellent example of what one man can do for trapshooting. It has often been said that it takes more than one man's effort to build up any sport or business, which is undoubtedly true in substance; but it is equally a fact that the big men who stand out clearly and boldly at the forefront of a sport are greatly needed. H. C. Everding, of the Portland, Or., Gun Club, is such a man. By his earnest promotion work in the Northwest, his donation of trophies, his constant boosting of the sport, and his introduction of new and interesting features, Everding has gained fame that has spread across the country.

✤ ✤ ✤

One of the best amateur trapshooters among the fair Dianas is Mrs. C. E. Groat, of Los Angeles. On the Pacific slope Mrs. Groat is held in the same respect by the trapshooters as that in which Mrs. L. G. Vogel, of Detroit, Mich., is held in the East. In the California-Nevada State championship tournament Mrs. Groat broke 466 out of 500 targets, an average of better than 93, and in the State championship event she broke 95 targets. In the recent Vernon (Cal.) tournament Mrs. Groat broke 193 out of 200 targets thrown. This is just about as good a score as ever made by a woman in a registered shoot. Mrs. Groat broke 96 targets in the first 100 and 97 in the second 100.

✤ ✤ ✤

The quail were greeted with a salvo from the shotguns of quail hunters on the morning of the 15th, and while the ducks were not given a holiday, still they were not kept quite so busy. Quail are reported plentiful this year in all districts and the good shots the first day got the limit while those who were not quick enough did not get so many birds, but were a better thing for the ammunition dealers.

Clarence Berry is not only a popular horseman whose horses are usually first under the wire, but is owner of a duck preserve at Live Oak where he spends week ends during the duck season with his friends, and the limit for all is the usual thing. When he isn't conducting million dollar business affairs, he is successfully racing horses, beating somebody a game of billiards, or amusing himself with a shot gun,—in fact, life with him is all a recreation.

✤ ✤ ✤

The Vernon Gun Club of Los Angeles is making extensive arrangements for a Thanksgiving shoot on November 25th, and has elected the following officers for the club for the ensuing year: F. H. Mellus, president; S. A. Bruner, vice-president; W. A. Robertson, secretary and manager; directors—F. H. Mellus, S. A. Bruner, W. A. Robertson, William Pugh, Fred Gruell, P. E. Peterson, L. E. Hall, Robert E. Bole, R. H. Bungay, C. A. Groat, O. A. Evans, A. N. Van Nest, W. F. Neel.

✤ ✤ ✤

The Du Pont Company of Wilmington, Del., has just issued a pocket score book that will surely be appreciated by trapshooters. It contains 32 pages and will thus allow the trapshooter to enter the results of thirty-two shoots that he may attend. Each page has space for the place and date of shoot as well as score columns for 14 events. On the front cover page there is figured a list of averages compiled on the basis of 150 targets, which will save the trapshooter a great deal of trouble when he desires to learn how proficient he is becoming.

✤ ✤ ✤

On account of the number of sick or dead ducks that were found among the rice fields and duck lands in Yolo county, it was reported that the birds were suffering from anthrax, the anthrax scare being quite popular at the present time. However, after examining two live birds and one dead duck, Dr. H. A. Burch of the University Farm at Davis declared that the malady is some form of food poisoning which is common among fowls, but has been unable to determine just what the poisoning is.

✤ ✤ ✤

J. Walter Scott, Vice-President of the Pacific Coast Field Trials Club, is making arrangements for the coming field trials to be held in Bakersfield the last week in January. Mr. Scott recently attended the field trials in Oregon and Washington and Vancouver, B. C., and is very enthusiastic over the conditions up there and the interest taken in the events. He states that a large attendance is expected at the coming trials, but there will be many new faces while many of the old ones will be missing as so many of the veterans have entered the service of the government.

✤ ✤ ✤

Last June a vaquero named Rocky Diggs captured a huge condor,—the largest bird that flies in California,—which once were so plentiful and now are so scarce. This bird was feeding on the flesh of a dead horse in Monterey county. After it was fully gorged with food he lassoed it, doing so before the condor could take its needed run to rise in the air. Desiring to preserve this specimen, it was confiscated by the Fish and Game Commission and turned over to the California Academy of Sciences, and is now placed in the aviary at Golden Gate Park, San Francisco, where thousands may view this fine living example of California's largest bird.

✤ ✤ ✤

Stockmen who have been grazing their cattle in the vicinity of Keweah peaks to the north and east of the big arroyo in the Sequoia National Forest believe there has been a decided increase in the band of mountain sheep that range on the peaks in that vicinity. These sheep are very wild and stay in the rough country and are seldom seen, although a stockman reports seeing one late in the fall near Kennedy meadows on the south fork of the Kern. It is believed that some of the band spends the summer in the high peaks near the head of the Kern river and winter on the south slope of the Olancha peak and in the Kennedy meadows country.

✤ ✤ ✤

About ten years ago the Fish and Game Commission planted bluegill sunfish and calico bass in the Sacramento and San Joaquin rivers, and their far-sighted policy has resulted in making the delta region a fisherman's paradise as the sloughs in that vicinity now swarm with these game fishes and fishing is reported excellent in Whiskey, Potato, and many other sloughs. These fish rise readily to the fly. They are game and afford first-class sport for the fly fishermen which can be obtained within fifty miles of San Francisco. Many believe the bluegill and the calico bass to be better flavored and more palatable than trout, and all who will arm themselves with an angler's license, rod, midget flies, and will choose some "blind" slough at low water can confidently expect to bring home the limit, and at the same time enjoy sport equal to whipping the mountain streams for the gamey trout.

Before the opening of the season, rice growers in the Sacramento and San Joaquin valleys were complaining of the damage done to their crops by the innumerable flocks of wild ducks that infested the rice fields. The duck hunters looked forward with pleasure in anticipation of slaughtering the ducks in the good cause of preserving the rice. However, after a few days' hunting, the rice growers declared the hunters a worse pest than the birds, as in gathering the game they trampled down and destroyed more rice than could be consumed by the ducks, consequently the promiscuous shooting in the rice fields has been prohibited, and anyone that wishes to shoot where the rice is standing must first obtain a permit from the owner or he is very liable to be arrested and fined for trespass. Duck hunters should take warning before they shoot over territory where permission has not been secured.

✤ ✤ ✤

From Friday the week previous to the 15th, over one thousand hunting licenses were issued in San Francisco by the Fish and Game Commission. A large part of these, according to the commission, were issued to army and navy men who like to diversify the routine drilling and "doing their bit" by taking a crack at the game on the hills and marshes. There are many places near San Francisco where cottontails abound and where enlisted men can go and bag a mess of them and get back to their barracks the same day.

✤ ✤ ✤

250,000 steelhead trout have recently been planted in the waters of Sonoma and Marin counties by the fish hatcheries department of the Fish and Game Commission, the last consignment being shipped about the first of the month. The waters stocked include Lake Lagunitas, Bib Carson creek, Little Carson creek, San Geronimo creek, Salmon creek, and Austin creek. The fish were taken from the Mt. Shasta hatchery at Sisson.

✤ ✤ ✤

Trapshooting by electric light is the latest dish to be added to the sporting menu. During the past few months quite a number of these trapshooting tournaments after nightfall, under electric light, have been held, and every one has been successful. On Venice Pier, Los Angeles, Cal., more than 100,000 targets were thrown in two months. Here the shooting was done with 20-gauge guns. The only criticism at Venice was that there wasn't room enough for all those who desired to shoot.

✤ ✤ ✤

In the last golf championship the age of entrants was from 14 to 62 years and in the last Grand American Handicap from 14 to 76 years. Max Emery, of Chicago, Ill., 14 years, was the youngest trapshooter, and Captain Andrew Meaders, of Nashville, Tenn., 76 years, was the oldest. That age is no bar to ability was proven by Captain Meaders when he broke 88 of the targets. This was Mastery Emery's first tournament. He smashed 83 of the clay birds.

✤ ✤ ✤

Arrangements are being made for a big rabbit drive near Fresno, and help from the county is anticipated in the purchase of the necessary wire netting for fences, etc. The Fresno county rabbit drives in the past have been spectacular events and the inhabitants have made a regular gala day of it, employing all kinds of conveyances to round up the pests from saddle horses to automobiles. It would be worth a trip to anyone who has never seen a performance of this kind.

✤ ✤ ✤

Miller & Lux, Inc., have filed an injunction suit seeking an order to restrain Andrew George of Dos Palos from entering their land and from shooting on their premises. The complaint states that George has repeatedly trespassed on the Miller & Lux lands shooting ducks and that he has destroyed locks on the gates, substituting locks of his own, and used their irrigation water in making duck ponds on their land, and the corporation now seeks an injunction together with $1000 compensation for alleged damages and attorney's fees. The Miller & Lux people are making an effort to keep out the hunters who have not secured a permit from them from shooting on their property.

✤ ✤ ✤

A GREAT SHOOT-OFF.

One of the greatest shoot-offs ever recorded was that between Andy Flickinger, of Vallejo, Cal., a grizzled veteran, and Owen E. Evans, of Los Angeles, Cal., a youngster, and the veteran got the decision.

Flickinger and Evans tied for second honors in a shoot of the Vernon (Cal.) Gun Club, with 198 breaks in 200 targets. On the shoot-off Flickinger broke 199 to Evans' 198 targets. There isn't another shoot-off in history that required 200 targets to determine a winner. Each shooter broke 20 straight on the first string and each missed one in the second string of 20. Flickinger broke 177 straight to finish, while Evans ran 160 before he missed a target in the tenth string. There may have been better shooting than this some time, some place, but it has not come before our notice.

THE FISHING MONOPOLY.

Now that the question of food conservation has become of such great importance, especially the conservation of meat and meat products, the matter of fish supply and prices in San Francisco is attracting attention and comment. There is no question but the fish supply of this city is in the hands of a monopoly and exorbitant prices are maintained regardless of the catch. It has been proven that thousands of tons of the finest edible fish have been either dumped back into the waters or made into fertilizer rather than to be marketed at a low price. This is a waste that under present conditions is criminal. The California Fish and Game Commission cannot devote its efforts to a greater service to the people and to the government than to break up this monopoly and prevent the enormous waste of this valuable food supply. It is up to them, up to the Governor of the State, and up to the Mayor of the city of San Francisco to take immediate active steps to see that the people of this city are not imposed upon any longer by the arrogant monopoly that controls the price of fish and the business of fishing in these waters. Mayor Rolph could not devote his energies to a more popular or deserving service, and the State Fish and Game Commission should get after this monopoly, the overthrow of which is of vastly greater importance than anything else in its province at the present time.

BRIEF HISTORY OF THE G. A. H.

The growth of trap shooting is the history of Elmer E. Shaner's connection with the sport. For over a quarter of a century he has been in personal charge of the Interstate Association tournaments, and the Grand American Handicap has been conducted under his capable supervision. The following statement of the number of entries and the winners of the Grand American Handicap is interesting:

1900 ..... 74 Entries
Held at Interstate Park, N. Y., June 14.
R. O. Heikes (22 yards), winner,
91x100.

1901 ..... 75 Entries
Held at Interstate Park, N. Y., June 18.
E. C. Griffith (19 yards), winner,
95x100.

1902 ..... 91 Entries
Held at Interstate Park, N. Y., May 8.
C. W. Floyd (18 yards), winner,
94x100.

1903 ..... 192 Entries
Held at Kansas City, Mo., April 16.
M. Diefenderfer (16 yards), winner,
94x100.

1904 ..... 336 Entries
Held at Indianapolis, Ind., June 23.
R. D. Guptill (19 yards), winner,
96x100.

1905 ..... 352 Entries
Held at Indianapolis, Ind., June 29.
R. R. Barber (16 yards), winner,
99x100.

1906 ..... 290 Entries
Held at Indianapolis, Ind., June 21.
F. E. Rogers (17 yards), winner,
94x100.

1907 ..... 495 Entries
Held at Chicago, Ill., June 20.
Jeff J. Banks (17 yards), winner,
96x100.

1908 ..... 362 Entries
Held at Columbus, Ohio, June 25.
Fred Harlow (16 yards), winner,
92x100.

1909 ..... 457 Entries
Held at Chicago, Ill., June 24.
Fred Shattuck (18 yards), winner,
96x100.

1910 ..... 383 Entries
Held at Chicago, Ill., June 23.
Riley Thompson (19 yards), winner,
100x100.

1911 ..... 418 Entries
Held at Columbus, Ohio, June 22.
Harve Dixon (20 yards), winner,
99x100.

1912 ..... 377 Entries
Held at Springfield, Ill., June 20.
W. E. Phillips (19 yards), winner,
96x100.

1913 ..... 501 Entries
Held at Dayton, Ohio, June 19.
M. S. Hootman (17 yards), winner,
97x100.

1914 ..... 515 Entries
Held at Dayton, Ohio, September 10.
Woolfolk Henderson (22 yards), winner,
98x100.

1915 ..... 884 Entries
Held at Chicago, Ill., August 19.
L. B. Clarke (18 yards), winner,
96x100.

1916 ..... 683 Entries
Held at St. Louis, Mo., August 24.
J. F. Wulf (19 yards), winner
99x100.

1917 ..... 808 Entries
Held at Chicago, Ill., August 23.
C. H. Larson (20 yards), winner,
98x100.

COURSING AT MERCED.

Much interest is being shown in the coursing meeting to be run on the W. C. Dallas ranch in Merced on the 22d and 23d, under the auspices of the Golden State Coursing Club, Inc., and some of the finest dogs on the coast will be on hand to compete for the stakes offered, which are as follows:

California cup—For thirty-two dogs, $25 entrance fee, winner $800, runner up $400, third and fourth dogs $125 each.

California purse—For dogs beaten in first round of cup, winner $125, runner up $75, third and fourth dogs $25 each.

Entries for the coursing close November 19.

The Golden State Coursing Club has the following committee handling the arrangements: R. K. Malcolm, Roy S. Avery, Thomas E. Keogh, J. H. Rosseter, H. A. Deckelman, G. W. Heintz and Dr. Fred Clark. The address of the club is 1217 Broadway, Oakland, Cal.

All of the committeemen will have dogs entered, some being imported from the kennels of England.

Dave Dowst of Merced will be slipper and T. A. Giffin slip steward.

AMBERGRIS.

The finding by a fisherman upon San Francisco bay a mass of material that had the appearance of ambergris led to an investigation whether or not this substance was found along our coast. Upon applying the old test of the insertion of a hot needle to draw forth a peculiar musky scent and to show fatty consistency, the fisherman's discovery did not prove to be ambergris, and as far as we have been able to find out, this valuable substance has never been procured in quantity on the California coast.

To those not familiar with the word we offer the following facts gleaned from Scammon's "The Marine Mammals of the Northwestern Coast of North America":

Ambergris has for many years been the basis for a great number of perfumes. Although quantities have been obtained sufficient for such use, yet the source of the substance was a mystery for many years. Great masses of a yellowish, transparent substance was found in considerable quantities floating in the Indian Ocean or along its shores; lesser quantities have been found in other parts of the world.

The demand for this commodity is indicated by the high price paid in 1791, $6 per ounce. As early as the sixteenth century it was valued by the English. At that time a queer myth of its source existed in the tradition that ambergris issued from the root of a tree, which shot its roots towards the sea, and later by the washing of the warm waters the gum was cast upon the shore. Somewhat later in the century we find the term "ambergriese" associated with the whale, for one Dr. Thomas Brown attests that great lumps were found by the leviathan and swallowed.

In these same days country doctors resorted to powdered whale's tooth as a cure for smallpox and other diseases. The medicinal properties of ambergris were recognized, also, and doses of unadulterated ambergris were prescribed in quantities of thirty grains; indeed, a sailor is said to have tried its efficacy by taking half an ounce.

Ambergris is now known to be the excreta of the sperm whale, a fact well proved by its being composed very largely of the remains of squid.

HAND TRAP SHOOTING.

Many men have improved their scores to an appreciable degree by practicing with a hand trap. Trapshooting at targets thrown from a hand trap is not ordinary shooting. It is snap shooting, sighting and every other kind of shooting included. It gives one the best kind of practice for hunting, and improves one's scores at the trapshooting club. In addition, it is more real, genuine fun and sport in 10 minutes than any other kind of shooting is in half a day.

Just listen to this. Five men line up as at the traps. The hand trap operator takes the center position.

Shooter No. 1 gets ready to fire. He gets a target that goes 100 feet in the air, and, the chances are, misses it.

No. 2 gets a left angle, that goes with the speed of a rifle bullet, and curves or "takes English" like a billiard ball.

No. 3 gets a "dub" that goes straightaway about 30 yards. Everybody gives him the laugh when he overshoots it.

No. 4 don't know what to expect, and gets a "skimmer" that sails about two feet above the ground for 40 yards or more, like a jack rabbit.

No. 5 gets one "on edge," which presents a surface to shoot at that looks as thin as paper, and he waits too long and misses. And so it goes, in endless variety.

They start at No. 1 again, and the operator throws the targets "upside down," at high elevations, and right angles that also take "English" and are puzzlers to even the most expert.

That's real shooting, you'll hear the game shooters say, and it is even more difficult than game shooting. At the same time the use of the hand trap will improve one's scores in the field wonderfully. A prominent shooter recently remarked that he found his shooting for quail in close cover improved 100 per cent by the use of the hand trap, and he was always considered a good shot.

CALIFORNIA STATE FISH, GAME AND FOREST PROTECTIVE LEAGUE.

A meeting of the California State Fish, Game and Forest Protective League was held in San Jose on November 10th. J. B. Hauer, president of the league, charges the Fish and Game Commission with opposing measures advocated by the league at the last session of the legislature, and further claims that the commission hampered the work of the league in its methods to conserve the wild life and forests of the state. In view of this action the league amended its constitution, making any person actively identified with the State Fish and Game Commission ineligible to membership in the league. Oakland was chosen for the 1918 convention and the following officers were elected: J. B. Hauer, of San Francisco, president; H. A. Greene of Monterey, vice-president; W. T. Sharpe, secretary-treasurer; W. H. Nagle, Santa Rosa; Robert Laurin, San Francisco; Dr. A. M. Barker, San Jose; J. C. McCaughen, San Rafael, and Edward Strausburg, Los Angeles.

A NEW WILD GOOSE.

The bureau of vertebrate zoology of the University of California report the discovery of a new sub species of wild geese. Report of the existence of these geese first came to the university from George Neal of the Sacramento office of the California Fish and Game Commission.

Judge F. W. Henshaw of the supreme court of California undertook to capture some of these geese. Accompanied by Sam Lamme, a professional hunter, Judge Hanshaw went into the most unfrequented and inaccessible parts of a lake on the grounds of the West Butte Country club, in the Sutter basin in Sutter county. Lamme's marvelous skill in calling wild fowl resulted in calling large numbers of the American white fronted geese. Lamme pointed out in the neighborhood a large goose, and declared that these "tule" geese never join the white fronted geese. Then he changed his call to the note of the tule geese, which he describes as coarser and harsher, though few hearers can detect the difference in the call of the two birds. At his call, two larger geese came flying up. These shy birds which frequent the most remote parts of the marsh, came directly at his call, without the usual wary circling.

Examination at the university proved that there are two well defined sub-species of the goose, heretofore known as "Anser albifrons." Of these, the bird which will be known hereafter as the "white fronted goose," or Anser albifrons, is smaller, the male has sixteen tail feathers, and the eyelid is dark brown, while the newly recognized "Anser albifrons gambell" is considerably larger, the male weighing over seven pounds, while the other goose has eighteen instead of sixteen tail feathers, and the naked skin at the edge of the eyelid is yellow or orange instead of grayish brown.

The common white fronted goose, from which this new sub-species has now been distinguished, is common not only on the Pacific coast of North America in winter, but in summer is to be found far and wide over western Alaska, and for an undetermined distance eastward. The summer home of this new "tule goose" is believed to be in points farther eastward in Arctic America than the region where the white fronted goose abounds. The tule goose is not seen in big flocks, as is the white fronted goose, but usually singly or in pairs. The white fronted goose often frequents grain fields and uplands, while the ponds and sloughs surrounded by tules and willows. "tules" or "timber" goose loves best open water or ponds and sloughs surrounded by tulles and willows.

LEARN TO SHOOT A RIFLE.

One of the greatest illusions that exists in this country is that we are a nation of marksmen. A hundred years ago, when game was plentiful and Indians not scarce, every man had a rifle and knew how to use it. Today, the ordinary young American, unless he has served in the National Guard or the army, knows nothing about a rifle and never had an army Springfield in his hands. In the cities there is no opportunity for practice, and in the country there is little desire. In the latter there are many who have shotguns, but rifles are rare. When I was in a small place in Florida, a year or two ago, I wished to borrow a rifle to shoot an alligator. I found that while every man had a shotgun, there was not a rifle in the village. This I believe to be the case in most localities throughout the country, except here and there, where a boy has a toy rifle.

The great struggle in which we are now engaged, and the dangers which threaten us, impossible to overstate, should lead our people in this particular, at least, to follow the example of Great Britain. At the close of the Boer war Lord Roberts was greatly impressed by the fact that a handful of untrained and undisciplined Boers—because they were wonderful riflemen—had been able to withstand a greatly superior number of British troops. He was also convinced that it was certain that England would be engaged in a European war in the immediate future, and he devoted all his energies to secure the adoption of universal service, and in the meantime to promote a knowledge of rifle shooting, both in the army and among the people of Great Britain. To the army he issued an order which after specifying an elaborate course of rifle firing, stated "that the battles of the future would be won by snap shooting at short distances"—an assertion which has been more than borne out by the experiences of the present war.

MOUNTAIN LION HUNTING IN CALIFORNIA.

["California Fish and Game."]

It is a well-established fact that the mountain lion or cougar is the most important enemy of deer. Those who have studied the problem believe that a single mountain lion kills an average of one deer a week throughout the year, thus making a total of at least fifty victims annually. A lion often kills more than it is able to eat. There are records of one lion having killed three in a single night, and large deer appear to fall prey about as often as small ones. W. T. Shock followed a male lion for three days in Trinity county and found that it had killed three bucks during that time. It is evident that a lion kills many more deer in a year than many hunters do in a lifetime. This being the case, one of the dependable methods of conserving deer would naturally be the destruction of this enemy. This is exactly what is being done. The California Fish and Game Commission has offered a bounty of $20 for the past ten years as an incentive to destroy the mountain lion, so that deer may become more abundant. During this time bounties have been paid on more than 2,500 mountain lions. The amount so expended, totaling about $50,000, has been considered a wise investment by all those conversant with the subject because of the consequent saving of deer. The bounty on female lions was raised July 1, 1917, to $30. Some of the cattlemen offer additional bounty as a method of reducing the destruction of stock by the lion.

Statistics appear to indicate that mountain lions are slowly becoming reduced in numbers, for in 1908 bounties were paid on 482 lions, in 1912 on 275, in 1915 on 162, and in 1916 on 179. The abundance of mountain lions in different parts of the state is indicated to some extent also by the bounties paid. Thus we find Humboldt county leading with a kill of 493 from the time the bounty was established in 1907 up to 1916; Trinity comes next with 231, Siskiyou 229, Shasta 191, Mendocino 164, and Tehama 146. All other counties show a total of less than 100 lions for the same period. Santa Barbara county has claimed a bounty on 66, which places it in the lead of other counties of southern California. It also would appear from these figures that mountain lions have been more abundant in the northern Coast Range than in the Sierras.

Although a bounty has been claimed on a total of 2,526 lions up to January 1, 1917, these animals are still abundant in most of the counties named above. Nor, notwithstanding the apparent decrease in numbers, is the mountain lion yet under control, and it continues its depredations, not only on deer, but on domestic stock. D. S. Brock states, "I have known instances of a single lion killing three large-sized hogs, averaging in weight over two hundred pounds apiece, in a single night; also of one lion killing two large deer in one night. They will occasionally kill a deer, a hog and a calf, and eat only one meal from the lot, not even returning to eat more."

How can these depredations be still further reduced? The answer is: By taking a still larger toll of lions each year. We have two means of bringing this about. We must either interest a larger number of persons in the problem, or we must encourage those who now hunt mountain lions to greater activity by offering a larger bounty. Both methods will probably have to be used. This fact given should interest many mountaineers and sportsmen in a practical method of increasing big game.

The destruction of the mountain lion is not an easy task and the amateur is usually quickly outwitted by the animal. Lions are usually killed by mountaineers who know well the habits of the beasts. (This is readily proved by an examination of the claimants for the bounties.) But even though experience is a great aid, there is no reason why the amateur, if he be properly equipped, can not succeed.

A kill made by a lion is more often seen than the lion itself. Tracks an animals killed furnish the best clews to the hunter. The tracking of animals indicates that male lions cover considerable distance when hunting. One in Trinity county when followed was found to have covered a distance of about twenty miles in three days. The same beat is often used for a long time. As a rule, the animals killed for food are only partly eaten. A male lion seldom covers his kill. The female, on the other hand, especially when hunting for her kittens, covers the kill with earth, leaves and rubbish. As a rule she hunts within a radius of five miles when her kittens are small, making a kill and then leading her kittens to it. The female is accompanied by her young for a considerable length of time; young of two sizes have often been seen with the mother. Carrion is rarely eaten, freshly killed meat being preferred.

SCREEN AND FISHWAY INVESTIGATION.

During the past three months, the screen surveyor has been engaged in making new surveys of all the canals and ditches in the counties of Butte, Contra Costa, Fresno, Kings, Lassen, Madera, Mariposa, Merced, Shasta, and portions of Siskiyou, Stanislaus, Tehama and Tulare counties for the Fish and Game Commission, and preparing notices to be served on the owners of the same to install suitable screens in accordance with the new law passed at the last session of the legislature.

FINDING HUNTING PLEASURE WITHOUT LIVE GAME.

We heard a sportsman talking the other day. He was telling of the results he had on a recent trip. Finally he said, "The old sport of shooting or hunting has been fairly good in this section this season. But good or bad I enjoy myself, for I don't go out just to kill something—I like the outdoors and relief from business strain. I manage to go out with a crowd that feels the same way. We generally take a Du Pont hand trap and a few targets on all our trips, and then when a lull in the game shooting occurs we hammer away at the clay birds. Thus we get practice as well as recreation."

Time was when the shotgun enthusiast was dependent upon the field or a trapshooting club for this recreation. However it is different now, the problem is solved in the hand trap, a portable device which may be laid on the floor of an automobile beside the gun case, taken on the train, on the yacht, or easily carried. It is always ready for business and never loses its energy. It is used on the country estate, on the farm, on trips, in fact in all outdoor maneuvers. When one wants practice a gun, a hand trap, a friend, some targets for him to throw and a vacant field are the only necessities. A trapshooting club is not absolutely necessary. While of course the club furnishes all conveniences it is sometimes not as handy as we would like it to be. This is especially true in the country districts, where week-end and hunting parties are most frequently held.

EDIBLE FRUITS OF FOREST TREES.

Washington, D. C.—It is said that Daniel Boone and some of our other early pioneers could go into the wilderness with only a rifle and a sack of salt and live in comfort on the game and other wild food which the woods afforded. While few people want to try that sort of thing nowadays, persons who know the food value of the fruits of our native trees and shrubs are, according to foresters, able to use them to good advantage in supplementing other foods.

Aside from the numerous edible mushrooms, roots, fruits of shrubs and smaller plants, the trees of our forests afford a large variety of edibles which are highly prized by woods connoisseurs. First in importance, of course, are our native nuts—beech nuts, butternuts, walnuts, chestnuts and chinquapins, hazel nuts, and several kinds of hickory nuts, including pecans. The kernels of all of these are not only toothsome but highly nutritious and are used by vegetarians to replace meat. The oil of the beech nut is said to be little inferior to olive oil, while that of butternuts and walnuts was used by some of the Indians for various purposes. The Indians, it is said, also formerly mixed chestnuts with cornmeal and made a bread which was baked in corn husks, like tamales. In parts of Europe bread is made from chestnuts alone. The chestnut crop in this country is being reduced each year by the chestnut-blight disease which in some sections is gradually killing out the tree.

Acorns are commonly thought to be fit only for feeding hogs, but many kinds of them can be made edible and nourishing for people as well. The Indian custom was to pound or grind the acorns up and leach out the tannin, which makes most of them unfit for eating when raw, by treating the pulp with hot water. The resulting flour, which contained considerable starch, was made either into a porridge or baked in small cakes of bread. As a rule, the acorns of the various white oaks having less tannin are the ones best suited for food, but Indians also used those of the black oaks, even though they contain much tannin. The acorns of the basket or cow oak, the chinquapin oak, shin or Rocky Mountain oak, live oak, and of several other species, are sweet enough to be eaten raw.

Another nut which is not suited for eating raw, but from which a palatable food is said to have been prepared by the Indians, is the buckeye. The kernels of these nuts were dried, powdered, and freed of the poison which they contain when raw by filtration. The resulting paste was either eaten cold or baked.

Several western pines have seeds which play an important part in the diet of the local Indians. Perhaps the best known of these is the fruit of the nut pine or pinion which forms the basis for a local industry of some size. Not only is it extensively eaten by local settlers and Indians, but large quanaities are shipped to the cities where the seed is roasted and sold on the street. The similar seed of the Parry pine and the large Digger pine seeds are eagerly sought by the Indians. The latter tree is said to have gained its name from its use as a food by the Digger Indians. The seeds of the longleaf pine are edible and are improved by roasting. Indeed, it may be said that most nuts are more digestible when roasted than if eaten raw.

The French Canadians are said to use the acid flowers of the redbud, or Judas tree, in salads, while the buds and tender pods are pickled in vinegar. Honey locust pods, often locally called "honey-shucks," contain a sweetish, thick, cheeselike pulp, which is often eaten. Those of the mesquite furnish the Mexicans and Indians with a nutritious food. The Creoles of Louisiana, famous for their cookery, are reported to use the young buds of the sassafras as a substitute for okra, in thickening soups.

DOGS DO THEIR BIT.

There are now approximately 3000 dogs in the various departments of the German army. They have been trained by the German Red Cross Dog Society.

These war dogs have learned to obey commands given both by word of mouth and by pistol shots. They act as camp guards, trench sentries, scouts, and aids to Red Cross workers recovering the wounded on the battlefields. The stronger are used for hauling.

The French use many dogs for these same purposes. They also found the dogs of the greatest service for drawing sleighs carrying supplies through the mountain snows of the Vosges when there seemed no other method of transportation. After the snow melts the dogs draw heavy loads up the steep grades on a narrow gauge light railway.

Some of these war dogs have been so trained that in traversing a field after a battle they wholly ignore a dead soldier but bark loudly when they discover one wounded, returning to their kennels for assistance and leading the way back to the injured man. Surgeons and stretcher-bearers follow them back.

Not all of the most valuable dogs in this present war have been of high degree. Thousands have been just "plain dogs." It's what he can do, not whence he came, that makes a dog or man worth while.

To mount guard in a trench at listening posts for long hours at a stretch, ignoring danger, alert every moment—this is what many dogs are doing for the armies they serve. Some dogs have saved whole companies, especially in fogs, revealing by their growling the nearness of the enemy.

Perhaps when this war is over and our American hog-haters have learned the part these faithful animals have played in serving the cause of humanity and the various countries which have employed them, there will be less demand on the part of these people for the dog's extermination. It was out of a long past age that one deemed himself answering the basest insult by the exclamation: "Is thy servant a dog!" —["Our Dumb Animals."

HOW TO ABBREVIATE A DOG'S TAIL.

A question often asked by owners of dogs belonging to breeds subject to tail docking is when is the best time to do such docking and how should it be performed? The docking should be done within a week or ten days after the birth of the puppies, before the little animals have opened their eyes. The operation is best performed with a pair of sharp scissors. In the old days it used to be considered the proper thing for some "expert" to be called in to "bite off" the requisite amount of tail with his teeth, but nowadays his services are usually and properly dispensed with. A piece of worsted or silk should first be tied around the base of the tail and should be left on for an hour or so after the operation, so as to act as a ligature to prevent or lessen hemorrhage, but this precaution is often neglected altogether. It is wise to remove the mother of the puppies beyond earshot while performing the operation, as she may be inclined to defend her little ones, even though of a gentle disposition, and beside she is apt to be temporarily upset by their cries.

If the tail is cut at the early age of from three to ten days the interior has not had time to become hard and the cartilaginous support yields readily to a razor or the scissors. The pain incurred is only temporary and after a few minutes the puppy will return to the breast and commence sucking away as contentedly as ever. It is rare for the tail to require further treatment, and, although the mother may lick it from time to time, the wounded surface soon heals and becomes covered by hair.

When not performed very learly in life, amputation of the tail is unquestionably a very painful operation and must of necessity be delegated to a veterinarian or some one expert in such operations, who should administer an anaesthetic and perform the operation in the same skilled way as in amputating a limb. To merely cut the tail across with a sharp knife leaves a round, angry-looking wound that often takes weeks to heal over and then generally finishes up with an ugly, stumpy extremity. When performed antiseptically by a surgeon, by the flap amputation method, a primary union is assured in at least nine out of ten cases and the patient (except in rare cases) will not display the slightest evidence of having any knowledge that an operation has ever been performed.

The amount of dockage varies considerably in the different breeds subject to the operation. Schipperkes are docked quite close to the rump, while in Brussels Griffons about a third of the tail is left. Spaniels, Irish terriers, Airedale terriers and wire-haired pointing Griffons have rather more than half the tail removed, and fox terriers about two-fifths.

Diseased conditions, such as tumors and ulcerating sores, often affect the extremity of the tail in the adult dog, especially the Great Dane and St. Bernard, and these may be so severe as to necessitate amputation. Such cases naturally require the services of a veterinary surgeon.—Sportsman's Review.

KILLED AN "EMPEROR" GOOSE.

J. W. Giblin, while hunting in Sutter county recently, killed an "Emperor" goose which is very scarce excepting in Alaska. The bird weighed about nine pounds and was pure white in color. Mr. Giblin refused $20 for the specimen, which he will have mounted.

TRICKS IN SHOOTING ON THE STAGE.

If you are a frequenter of vaudeville theatres you have seen what appears to be marvelous shooting feats on the stage and have marveled greatly thereat

Several years ago Captain Fowler, who was an excellent shot, as well as a clever stage marksman, exposed the deception practiced in an article in one of the publications devoted to the interests of shooting and fishing. Recently some of the dodges were described, and if you would delight in astonishing your friends with your skill with the rifle or revolver we will let you in on a few of the tricks.

Say you desire to show off at targets apparently one inch in diameter. You require a black background and a few air balloons. These are painted black and inflated to about six inches in diameter. They are affixed to the background, and small white spots one inch in diameter are painted on them.

From a short distance the outlines of the balloons are invisible, and you have a target of some 30 inches at which to fire. A repeating rifle is used, and it is an easy matter to make 10 targets in as many seconds. A shot anywhere within a considerable radius would be practically certain to hit one of the balloons, and with its instantaneous collapse the white target would vanish.

Where lighted candles are extinguished with a rifle, candles are placed in compartments or open boxes, on a background. The whole is painted black. At the back of each box is placed a loosely-hung plate of steel, suspended only by the top and free to swing slightly. Before this are placed the lighted candles, and the shooting begins.

It should be remarked that these plates are six inches square, and consequently give an area of large size to shoot at. When a bullet strikes a plate, the concussion of the air caused by the quick movement of the plate in response to the impact of the bullet blows out the candle, and the trick is accomplished.

In the feat of disrobing an assistant with rifle bullets, the garments are made in halves, front and back, fastened together with thin glass globes, about two and one-half inches in diameter and of dark material, and the usual white spots painted on them, while the assistant invariably stands against a black background. If you can shoot reasonably straight it is not at all difficult.

The marvelous revolver shooting at moving targets is generally done with cartridges filled with bird shot.

The man or woman who goes up into the top gallery and snuffs out the lighted candles or breaks a small balloon sometimes does it the same way as described above, although many use a steel funnel with a wide opening which narrows down to about one inch. This opening, on account of the black background, does not show to the audience, and all the marksman has to do is to shoot into the opening, and the bullet will finally reach the small end.

A few years ago a Frenchman created quite a sensation while playing in theatres throughout the country. He made about half a dozen straight shots, the rest were clearly fakes, but he had no trouble in fooling the general public until one night, while he was playing the piano, supposedly by using bullets to strike the keys, his rifle jammed and the piano kept on playing for a few seconds, but quite long enough to make the audience sit up and take notice.

WHALE MEAT—VENISON OF THE SEA.

A whale is now valuable not only for its fat, but for its flesh as well. Each California gray whale will produce about ten to twelve tons of fresh meat. Formerly this meat was unutilized; now it finds its way to the markets. During December, January and February, 1917, eight whales were captured off the coast of southern California. Some of the meat from these whales retailed at fifteen cents a pound. Some of it was canned. Although in early days used in part by the whalers for food, in more recent years nothing but the oil has been taken from the whales killed. The meat is more tender than beef, is very palatable and exceedingly nutritious. It should be remembered that a whale is not a fish, but a mammal. Hence it is no wonder that whale meat tastes like tenderloin. The canners of southern California have been anxious to put whale meat on the market under a trade name, because the uninitiated appear to be afraid to try this new food, but the government will not allow it to be mislabeled.

Modern whaling is carried on with a sixty-foot boat, with powerful engines, and the instrument which does the killing is a Norwegian harpoon gun. After a whale is towed into port the whole carcass is utilized even to the bone and skin. The bone can be used in the manufacture of buttons and there is evidence that the skin can be converted into leather. The blubber from an average-sized whale will make about 160 barrels of oil valued at thirty dollars per barrel.

Doubtless we have been missing one of the choicest products of the sea and before long we will find that whale meat is one of the greatest delicacies, selling at fabulous prices. Now is the time to pass your judgment on the "venison of the sea."

CAT SHOW.

In order to raise funds to aid the work which the San Francisco Society for the Prevention of Cruelty to Animals is doing for the relief of the unfortunate cats and dogs the Pacific Cat Club has arranged to hold a show, December 8th and 9th, at the Hotel St. Francis. The great number of calls upon the public for assistance by various war charities has affected the receipts of the animal society, and in order to raise as large a sum as possible, the club has voted to eliminate every possible expense. It has decided to award ribbons only to prize winners, contributing to the cause the money usually spent for costly cups and trophies. The show is under the management of Mrs. W. C. Lynch, president of the club, and the following officers: Mrs. L. Mowry, first vice-president; Mrs. Kittie Baxter, second vice-president; Mrs. W. C. Hundley, third vice-president; and Mrs. C. B. Grover, secretary-treasurer.

Entry blanks may be obtained from Mrs. L. Mowry, 1892 O'Farrell street, San Francisco, California.

WE NEED MORE PORK.

A meeting of the Missouri pork producers' conference was held at Columbia, Mo., on Nov. 3rd. A large attendance of breeders of swine was present. Many valuable papers were read and there was much interesting discussion in regard to the hog production in the United States. It was shown that at least fifteen to twenty per cent over the present supply is necessary to meet war demands.

The farmers endorsed the action taken by the swine producers of other cornbelt states and offered the following suggestions concerning the best way to induce the necessary increase: "The greatest assurances that the food administration can give the farmers of the United States at this time which will influence them to increase pork production will be to assure them that the price for finished hogs will not suffer the slump that has been characteristic of the market for so long a time, and that this assurance can be best realized by establishing a proper relation between the price of corn and the price of pork in the ratio of fourteen bushels of corn to one hundred pounds of live weight of hogs.

It was further suggested "that the food administration offer a substantial premium to farmers to produce heavyweight hogs in order that they may be encouraged to produce a hog of heavy weight, for, in our opinion, this is the only solution for immediate increased production, and further, it is decidedly essential that this action be taken immediately and be put into effect by December 1, 1917."

George M. Rommel of the United States Department of Agriculture cited figures which show that the supply of hogs has decreased more than 5,000,000 head since a year ago last September when the number was far below normal. Additional figures showed the imperative necessity of increase, especially if the surplus corn, of which there are some 500,000,000 to 625,000,000 bushels in the country, is to be disposed of at a profit. Normally 75 to 80 per cent of the corn is fed. When the crop is greatly increased as it is this year a still greater percentage must be fed to make profitable the part which is marketed direct.

Mr. Rommel and F. B. Mumford, food administrator for Missouri, denied emphatically the report that the Government had set or would set a hog price that would be detrimental to producers' interests. The food administration will not take any action that will cause farmers to lose money.

WOODLAND COW BREAKS ALL CALIFORNIA RECORDS

By creating more wealth for her owner than ever before did any California cow by her milk production in a ten-months' period, the Holstein cow "Aaggie Acme of Riverside II" has won fame in the State Dairy Cow competition being conducted by the University of California College of Agriculture. The University states that her production of $628 worth of milk and butterfat during ten months is exceeded by only a few cows in the United States or in the whole world. It takes six average California cows to equal her production.

Her daily average production of three pounds of butterfat for ten months is equivalent to more than three and a half pounds a day of ordinary butter. She was bred and is owned by the A. W. Morris and Sons Corporation of Woodland. Her production for ten months was 22,088 pounds of milk and 928.813 pounds of butterfat ,equivalent to about 1080 pounds of butter, worth at present prices at least $540. The 17,670 pounds of skim milk, worth an additional $88, make her production during the ten months $628—and this without counting the value of her calf.

Twenty-five other cows completed a ten-months record of production in the University's State Dairy Cow Competition last month, and all but six of them produced more than 300 pounds of butterfat during this period. Seven produced over 600 pounds and eleven over 500 pounds of butterfat. Yet the average production of butterfat of California dairy cows is only about 150 pounds for the whole year. There's plenty of chance to improve—so the University points out to the dairymen.

About 200 cows in the University's competition had an average production for September of 930 pounds of milk and 41.72 pounds of butterfat (the average time from calving being 191 days). The production of butterfat ranged from 10.4 pounds for a cow that was nearly dry to 85.3 pounds, the record for Ninette Aine Pauline, a purebred Holstein entered by the Palo Alto Stock Farm.

Eighteen of the cows in the University competition averaged more than two pounds of butterfat a day for the month, or about four times the production for the average California dairy cow. Five grade Jersey cows belonging to J. W. Coppini of Ferndale won the Pacific Rural Press prize for the month by an average production of 51.033 pounds of butterfat. Another Ferndale dairyman, G. E. Trigg, won the McAlister and Sons prize by the production of 65.146 pounds of butterfat by a grade Jersey. This is the fifth time the former prize and the fourth time the latter prize has gone to a Humboldt county dairyman.

The University's object in this competition is to awaken California dairymen to the folly of keeping any "boarder cows" who don't earn their own keep.

NATIONAL FORESTS HELP INCREASE MEAT SUPPLY

Washington, D. C.—As a war emergency measure the National Forest ranges are carrying this summer approximately 100,000 more cattle and 200,000 more sheep than in ordinary years, according to the grazing experts of the Forest Service. Ordinarily the National Forests furnish pasturage for about 1,800,000 cattle and horses and 7,800,000 head of sheep.

The number of livestock permitted on the Forests is limited in order to prevent damage to, timber growth water supplies, and the range itself. This year exceptional weather conditions combined with the general food situation to create an unusual emergency, calling for special provisions to take care of the stock. A severe winter and late spring exhausted the hay supply and forced use of the spring ranges before they had reached their normal state. To lessen the losses which the western livestock industry faced, the National Forest ranges were opened early. At the same time, the number of stock permitted for the present season was raised to the maximum consistent with safeguarding future productiveness.

At the close of the grazing season a ceraful examination will be made of of the range on each Forest to determine its condition and to find out how many cattle or sheep it will support next season. On areas which are found to be over-grazed, an attempt will be made to shift the surplus think that the increase could be carstrain better.

While the grazing officials do not think that the increase could be carried indefinitely without serious damage to the forage, regulated grazing has brought about a steady improvement of the range and some areas will probably be able to support the larger numbers permanently.

High-Class Saddle Stallion For Sale or Lease

REX MONTGOMERY No. 2011

American Saddle Horse Register

REX MONTGOMERY is a very handsome stylish black horse, foaled 1899, stands about 16 hands, and weighs around 1250 pounds. He is sound, can go all the gaits, is speedy and easy. Has a remarkably good disposition and is bred in the purple, being sired by Rex Denmark. out of Ellen B. by Black Squirrel. He has all the qualities to make him a blue ribbon winner and is brother to the famous Rex McDonald. Anyone looking for an animal of this kind should investigate this and see some of his colts. Will be sold at a moderate price or leased to a responsible party. For further particulars address

Dr. T. PEPPARD, Olympia, Wash.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

Last month California alone shipped over 55,000 tons of food stuff to the east. A great shortage of food generally prevails on the Atlantic coast, and today the householder in New York cannot buy more than two pounds of sugar at a time. The national government is urging California to speed up production of food staples, and if all of the tillable land in this State is cultivated next year, it is capable of raising food enough to supply this country and our army in Europe. It is, however, a matter of fact, conditions are such that we are facing a decreased production due to the labor situation in many sections of the state where farm wages have ranged from $3 to $8 a day and found. Every farmer in California is a loyal American and will back his government to the limit, but to ask him to plant an enormous acreage to see it rot in the field that a few may profit by exorbitant wages is going beyond the limit, and some farmers declare that they will not plant more than they can cultivate and harvest with the force of their immediate families. If the farms in California are to be cultivated, it is becoming a question of either the conscription of labor or the importation of labor. Conscription of labor for agricultural purposes is not practicable as farmers are unwilling to pay wages to the laborer who never saw a seed planted nor a field plowed. Conscripted labor would draw on the factory, mine, workshop, mill, transportation lines, etc., and while it would be skilled labor in the other fields but it would not have more than a fifty percent value on the farm.

The Farmers' Committee of the California Development Board is trying to reach a solution of problems confronting the California producer. The work has just begun and it is the intention to cut straight through red tape and get certain much-to-be-desired information at the earliest possible moment. California with her twenty million untilled acres could feed our entire National Army and part of Europe. But those acres are untilled from various causes—lack of funds with which to purchase improved farm machinery, increase in the wages of farm labor, absentee owners, etc.

The Committee first desires a working idea of the number of acres of plow land in each section or district that is likely to remain idle the coming season unless aid of some sort ise extended. By plow land we mean that land on which a plow may go to work next week or next month. The number of acres, approximately, in each section held by absentees owners and not cultivated. Possibly said owners may be reached by lease or otherwise and their lands made productive. Also the farmer that might double or triple or quadruple his production if he had machinery or could be assured of getting labor. The custom of sending out questionnaires to individuals in each county is well enough, but slow. The Committee desires this information at the earliest possible moment and takes this direct method of addressing you. It is not any one man's job—it is every Californian's job.

Send in the information from your locality. It is your part of the job. Don't wait for your neighbor to do it. If you desire, any information you may send will be held confidential in the Committee. We particularly desire information as to lands that will produce the following staples: wheat, beans, rice, barley, oats, hay, rye, sugar beets, cotton, hemp, flax, hops, dairy products, potatoes, onions, tomatoes and other vegetables.

Write at once any information along the above lines that you think will be of benefit to the Committee. The world is reaching a stage where the production of foodstuff is more vital than the production of bullets. If the worst come to the worst and man must revert to the original type, we can suspend all rules and bite, kick and gouge, but we must be fed and clothed.

Send your information to E. E. Bowles, Secretary Farmers' Committee, California Development Board, Ferry Building, San Francisco.

FRESNO ASSOCIATION HOLDS NO MORE EXPOSITIONS

The supervisors of the county of Fresno have declined to rescind their order, placing certain restrictions upon the Fresno County Agricultural association.

The Merchants Association of Fresno, through the association directorate, has failed in its offices of mediators, in the effort to find a common ground of agreement between the fair association and the supervisors.

The Fresno County Agricultural association, through its directors, yesterday went on record as declining to hold any further expositions as an association until such time as the supervisors shall deem it to be their privilege to take a more favorable view of the situation and in harmony with the thought of the fair association directors.

The final resolution of the agricultural association, based upon the refusal of the supervisors to rescind their action of censure and of restriction, yesterday went on record as follows:

Whereas, the Fresno County Agricultural association is a corporation not formed for the purpose of financial profits to its stockholders but for the purpose of annually holding agricultural fairs in Fresno County, California, the financial profits of said association, if any, being donated to the county of Fresno for the purpose of making permanent improvements on the fair grounds which belong to said county.

And whereas, the stockholders of said association are morally liable for the debts incurred by said association,

And whereas, the board of supervisors of Fresno county who are the custodians of the property owned by said county of Fresno, has by resolutions of its board fixed the prices that said association shall charge the attendants at said fairs for the privilege of witnessing and enjoying the exhibitions of said association, and

Whereas, the enforcing of said resolutions might cause the bankruptcy of said corporation,

Therefore, be it resolved, that the Fresno County Agricultural association hold no more fairs until said resolutions are repealed by said board of supervisors, in so far as said resolutions apply to this association.

(Signed)

BOARD OF DIRECTORS FRESNO COUNTY AGRICULTURAL ASSOCIATION.

This difference between the members of the board of supervisors and the agricultural association is based upon the happening at the last district fair when the crashing of automobiles resulted in the disaster that called into question the methods of procedure in such races, the admission charged and the safeguards that were said to be lacking.

Mr. Eberhart, secretary of the agricultural association, stated last evening that this action on the part of his directors must be taken as final.

It is greatly to be regretted that such a state of affairs as shown by the foregoing resolutions passed by the Board of Directors of the Fresno Agricultural Association should be in existence, and it is greatly to be hoped that the differences will be adjusted and that the Annual Fresno Fair will be held in 1918 as usual. When the present board of directors took charge of the old agricultural district association and incorporated for the purpose of holding an annual fair in Fresno, they started with literally nothing, and owing to their indefatigable efforts and able management the Fresno Fair Association now stands in the front rank of County Fairs on the Pacific Coast, leading all others both in point of attendance and in the variuos educational and entertaining features furnished for the amusement of its patrons. The Fresno Fair has been an unqualified success and a strong factor in promoting the elements which have placed Fresno County in its present prosperous condition. The abandonment of this fair would not be a loss to Fresno County alone, but to the whole State of California, as the Fresno County Fair is known all over the United States and has been the source of much profitable publicity for the whole San Joaquin Valley as well as other parts of the State.

Let us hope that some amicable arrangement may be arrived at and that we shall see Fresno on the map again in 1918.

With buyers who are looking for racing material nowadays, performance and individuality bring ninety percent of the price, while pedigree probably does not count for more than ten percent.

This was amply demonstrated at the Old Glory sale where Roan Hal 2:00 3-4 brought the top price of $4,000. This good pacer won no less than fourteen out of sixteen starts in 1917 and $9,000 in money. He captured the world's record for pacing geldings of 2:03¼ on a hilf mile track and proved himself to be a good horse under all conditions as to weather or track.

By looking over the prices brought at this sale it will be seen that breeding count only in the sales of broodmares, juveniles, and stallions. No matter how well bred a performer may be, his worth is gauged by his performance, and if he has apparently reached the limit of his speed, the price will be guided thereby without any added dollars arising from blue blooded ancestry.

DEATH OF W. H. KNIGHT

William Hugh Knight the secretary-treasurer of both the American Trotting Association and the American Trotting Register Association died very suddenly Dec. 10 at his home in Hinsdale, a suburb of Chicago. The cause was heart failure, and without a moments warning he fell dead; he was apparently in good health up to the time of his death, having spent the day at his office attending to the business of the two associations as usual, and returning to his home, where later in the evening he was stricken.

Mr. Knight was a Canadian by birth and was in his sixty-sixth year. He had been a resident of Chicago since 1873 and during the thirty years from that time until 1903 he was engaged in the railway business, in which line he was successful, rising to the position of general freight and Chicago agent for the Union Pacific Railroad which office he held for many years. He begun breeding in a small way over thirty years ago and was a member of the old North Western Breeders Association. In the fall of 1902 the late John H. Steiner who for a long period had been the secretary of the A. T. A. and the Register Association, became incapacitated from further performance of his duties and was retired, and Mr. Knight was elected to succeed him in both positions.

From that period to the present Mr. Knight, had remained in the active discharge of the manifold duties of both positions. He was an expert in the administration of his office work and greatly increased the value of the two associations to the public. He was the breeder of Fair Virginia, 2.07½, a Grand Circuit winner and Erda, 2.09¼, besides other good ones.

A POPULAR AND RELIABLE REMEDY

There is no remedy on the market that enjoys a greater degree of popularity than Reducine, and all who have used it are so certain of its curative powers that they have no hesitancy in recommending it, and they learn to rely on it to such an extent that they are never without Reducine within handy reach. Reducine is not only a remedy of merit but is backed up by business methods and enterprise in its management and sale, so that it is becoming not only a tremendous business but one of the most successful patent medicines on the market. As will be seen by their advertisement on pages two and three of this issue, they get out a booklet that contains a lot of valuable information and is of interest to anyone who owns a horse or keeps house. Send your name and address and it will be mailed to you postpaid without charge.

Thoroughbred Matters

As the result of the Governments amplification of its passport order, particulars of which, were last week forwarded from Washington, the proposed race meeting at Tia Juana is definitely off the programme of sports.

When the passport order was issued many weeks ago the Tia Juana racing promoters enlisted the aid of San Diego business men and attempted to obtain a modification permitting persons making a daily business of crossing the border to do so by the use of identification cards. This would have done away with the red tape attached to the viewing of passports and would have permitted the gambling fraternity to have made its daily excursions over the border.

The lastest order issued however, shows that the Government had the gamblers and race track followers in mind when the original rule was issued. The new order is sweeping in its inclusiveness and while identification cards will be issued to those having proper and absolutely necessary business over the border, all others must have passports.

The order specifically says:

"Cards will be denied to pleasure seekers, tourists, idlers, gamblers, race track followers and the like".

This news is a heavy blow at James W. Coffroth and his associates in the promotion of race track gambling over the California line. The game depends for its support on the patronage crossing the border every day from San Diego. While poolrooms all over the country pay liberally for the reports from the track, the big income has been from the books conducted at the track. Without them the racing could not exist. There are not accomodations at Tia Juana for those who might wish to remain on the Mexican side of the border for the time of the meeting, even if there were enough of these to make it possible still to support the game.

The promoters, it is said, will be heavy losers. They had planned a big meeting this winter and had imported many strings of horses, advancing expense money to the owners and also paying for the feed to keep the horses in condition. All this expense is a total loss.

The Government's order advises that reasonable time will be allowed the promoters and horse owners to adjust their affairs. The usual meeting at Juarez was called off some time ago, so that all the races this year will be held on American soil.

—o—

Deming, New Mexico, looms up on the racing horizon as a likely place for the Western thoroughbreds to measure strides this winter. Wealthy business men have erected a pretentious grand stand and buildings and laid out a mile track and overtures have been made to Jack Atkin, the well known turfman, to promote a meeting at their track.

Deming, with its cantonment of 41000 soldiers, is now a flourishing city, in a most prosperous condition with but little in the way of amusements for Uncle Sam's men. Twenty round boxing contests are legal in New Mexico, and in addition to the races the promoters intend staging some world's championship battles over the long rounte.

Mess. L. Turner and J. Randolph who are the original sponsors for the sport, have been dickering with Atkin for the past week and have virtually closed with him to handle their track. There are at least five hundred horses at Tia Juana, and as the latter place will be unable to give its proposed meeting, Deming can step into the breach and attract the horsemen to its meet. Should Tia Juana succeeded in opening in February, the new track will follow immediately after the close of the Tia Juana meeting.

The bulk of the horses that shipped to Tia Juana in anticipation of the Winter meeting is still on the ground, very few having been shipped away. Those who did journey to New Orleans would probably be more than willing to ship back to Deming as the game there would be much easier for the class of horses that have been raced at Tia Juana during the past two seasons.

—o—

Lexington (Ky.), December, 16.—James W. Corrigan of Cleveland, through his secretary, J. W. Frazer, announced here today that on January 15 at Kingston farm his Wickliffe stud of thoroughbred stallions, brood mares and weanlings and his Wickliffe stable of thirty-seven racers now at Churchill Downs, would be sold out and absolutely dispersed and that he will until after the war put aside his fondness for horses.

The number of horses to be sold is about 140 and it will be the largest single disposal sale since the passing of Colonel Milton Young's McGrathiana stud in 1908, and fully as important to the horse world as the James R. Keene estate and James B. Haggin estate disposals. The stallion to be sold are Colin, Delhi, Disguise, Hippodrome, Last Coin and Ultimus.

—o—

At a meeting of the Stewards of The Jockey Club, R. T. Wilson was unanimously elected a member of the Board of Stewards to fill the vacancy caused by the lamentable death of the late Schuyler L. Parsons.

New Orleans, La., Nov., 26. — A strengthening link in the racing armor was welded this morning when the Louisiana State Supreme Court refused a rehearing in the case of the State vs. Edwin Austin. A recent decision of the Court in this case declared the system of betting as operated by Edwin Austin at the Jefferson Parish to be not violative of the Locke law.

Today's Supreme Court action disposes of the betting question, as the definition of the Court in this respect will be adhered to. The system as used by Austin and declared by the Court not to be violative, is as follows: The layer quotes prices orally on request of the bettor. The latter, if desirous of accepting the price, writes on a slip of paper the name of the horse, the amount wagered and the total odds against the sum bet. He then affixes his signature to the slip and tenders it and the amount desired wagered to the layer. This ends the transaction unless the bettor has won, when he collects from a cashier, who will be directly in back of the layer. Before collecting his money he duplicates his signature on the original slip, which serves as a means of identification and receipt. The system is simplicity itself, and according to numerous layers now here will work with dispatch and without difficulty after a day or two, when the players and layers alike will become accustomed to its workings.

✤ ✤ ✤

Uncle Sam has collected thousands of dollars from the Maryland and Kentucky race tracks in the form of excess profits taxes. It is said that Laurel and Pimlico each handed over nearly $85,000 to the Government this year, while the other Maryland tracks, Havre de Grace and Bowie, each yielded about $50,000. The Latonia, Louisville and Lexington tracks in Kentucky had to pay a total of $80,000 in taxes on the spring and fall meetings. The Government netted $350,000 from these seven race courses, at all of which the pari-mutuel betting system was in vogue.

—o—

Toronto, Ont., Nov., 30.—A suggestion has been made that the new union government make provision for limited racing next year by allowing one meeting of seven days each to those Jockey Clubs which held only one meeting in 1917. This would be the fairest solution of the situation and would give the horsemen an opportunity to earn the keep of their horses as well as provide funds for the Red Cross and kindred war objects.

Racing in Ontario during the abbreviated season recently closed was responsible for over $150,000 passing into the treasury of this province from war tax and the daily licence fee. The horsemen racing on our tracks and the Canadian Jockey Clubs repeatedly did "their bit" in the way of contributions and assisted in promoting schemes to raise money for patriotic purposes.

The horsemen and racing associations are still anxious to continue in helping along the good cause. The owners of the thoroughbreds are anxious for a resumption of racing next spring. In order to secure as much money as possible for patriotic purposes, they are willing to race for greatly reduced purses, the remainder to go to the "win-the-war" campaign. The Jockey Club would, no doubt, contribute their share of the profits also over and above the legitimate expenses of operating and the upkeep of their plants. Under these conditions the horsemen would be given an opportunity of making enough to cover the expense of maintaining their stables. The public, too, would be given entertainment for the money they would so cheerfully be contributing to the great cause of the present day.

—o—

New Orleans, November 29.—With a crowd on hand that taxed the capacity of the plant, racing was inaugurated at the new Jefferson Parish race course today, and the opening day's sport proved highly interesting. Close finishes were the order of the day, a majority of the races being decided by narrow margins. The track proper was not at its best, it being slow, but it got somewhat better as the day wore on. Transportation facilities, which it was feared would be a serious drawback to the new track, proved adequate, and the large crowd was handled in good fashion.

The Thanksgiving Handicap, for all ages, at one mile, was the feature event, and it fell to Runes, which beat Woodward by the margin of a nose. The winner was giving a rousing ride by Jockey W. Warrington, but he just did manage to last it out. Marion Goosby was the most favored for the race, but he dropped back fast in the stretch after getting to the front. The winner's portion of the purse was $925, the second horse receiving $200 and third, which was Dick Williams, got $100.

Next in importance to the Thanksgiving Handicap was the Jefferson Inaugural Purse, which has a value of $500, and in which Phocion, from the stable of Harry Perkins, just did get up in time to beat Murphy a neck. The winner had a stable mate in the race, Bob Hensley, and he landed in third place. This event was at six furlongs.

Lady Eileen, owned by R. J. Williams, accounted for the opening race, which was for two-year olds, and Cliff Field made it a double for this stable by winning the fifth.

FAMOUS AMERICAN MATCH RACES

The special races between champion horses about equally matched attract wide attention at any time and a halo seems to enshrine the competitors in these famous events so that they stand out in turf history and circumstances recalled and the merits discussed whenever a race is on the program bringing together the champions of the year as was the case recently in the great race between Hourless and Omar Hhayyam.

Hourless was undoubtedly the best horse that day, but as Omar has twice defeated Hourless in other races this year it seems that we ought to reserve our judgment until after they race again before we crown Hourless king and champion of the three-year olds for 1917, writes Charles E. Brossman.

Races of this character create enthusiasm, stimulates breeding, promotes racing and are good for the business in all departments. There are always those eager to proclaim the latest sensational winner as the greatest horse that ever trod on the turf, unmindful of the fact that the same thing occurs every year.

Each year must produce its champion, and as to comparing the best horses of one decade with those of another it is useless and impossible. Each fills its own niche in turf history. To own the best horse of the time in which it races is honor enough and a position only one can occupy each year. The races of Norfolk and Kentucky, were as sensational as those of any three-year-olds we have ever had since, Norfolk never defeated, and Kentucky only beaten once, and then by Norfolk. Kentucky subsequently selling for $40,000, the record price at that time for a race horse in this country. The race between Domino and Henry of Navarre will always be remembered as one of the most interesting and spectacular events that ever occurred upon the American turf, resulting in a dead heat.

This race is also remembered for the gameness displayed by the late Riley Grannan in taking all of the money offered on Domino, about $90,000, at 3 to 5, and holding Henry of Navarre out, eventually cleaning up about $20,000 on a dead heat. Races that bring together the great horses are always popular and the public is ever ready to respond. A presidential campaign did not create as much exitement over the country in 1872 as did the contests between Longfellow and Harry Bassett in the Monmouth and Saratoga Cups, Longfellow winning the Monmouth and Harry Bassett the Saratoga. The race between Freeland and Miss Woodford is also recalled, when Mike Dwyer lost a King's ransom upon the defeat of Miss Woodford by Ed Corrigan's mighty gelding. Salvator and Tenny are another great pair that battled for the supremacy, when if Tenny had not sulked the verdict might have been different. Ethelbert and Imp have the distinction of running the cup distance faster than it was ever run before or since. The record made by Ethelbert that day (1900) still stands, two and one quarter miles in 3:49 1-5, with Imp only beaten a neck, breaking every known American record for all distances after the mile and a half had been passed. In this race the two horses raced like a team, lapped upon each other all of the way, valiantly contesting every inch of the ground. First one and then the other would show a neck in front. A blanket would have covered them from start to finish, and as no subsequent winner, of any two and one quarter miles, has ever approached that record, it must be regarded, for speed and endurance, as one of the most desperate distance races ever run on this continent.

In other races Imp defeated Ethelbert as often as he beat her, so honors were about even. Itis noteworthy that Domino in his racing career ran in a number of these sensational races; ran a dead heat in two of them. In his two-year-old form, in a match race with Dobbins, owned by the Tammany chief, Richard Croker, for $10,000 a side and $2,500 added by the Coney Island Jockey Club, over the Futurity Course, he ran a dead heat, and the stake and bets were divided, as was the dead heat with Henry of Navarre in his three-year-old form.

The race between Henry of Navarre (three-year-old), Clifford (four-year-old) and Domino (three-year-old), run at Morris Park October 6, 1894, where the horses finished in the order named, one and one eighth miles in 1:52¼, is the subject of numerous discussions, turf enthusiasts apparently forgetting that Clifford was one year older than these two great three-year-olds, and when they raced against the former that year it was in handicaps, or weight-for-age races. It must be said in favor of the managers of Omar Khayyam that they have never yet ducked an engagement. The horse is apparently always ready to race and gives his backers an honest run for their money upon every occasion whenever he faces the starter. "His hat is always in the ring", and he has been ready and willing to defend the championship against all comers whenever called upon. All the world loves a champion of any kind that is ever ready to defend the title. The reason that John L. Sullivan retains the respect and admiration of all classes and occupies a place in the hearts of the people, attained by no other athlete, is because he would never evade a contest or carry an excuse book. In races of this character each contestant has its partisan, and if defeated upon one occasion will hope for different results and better luck the next time, and other owners will make extravagant purchases of young things in the hope of securing the best for the next year. This is the spirit that promotes horse racing and secures for the country the best breeding animals obtainable.

Breeder's record.

(Continued on Page 16)

THE LITTLE MAN IN GRAY

[By W. H. Gocher]

Twenty-five years ago Charles Marvin and the Palo Alto trotters were the most prominent figures in the light harness racing world. Wherever world's records were being made the little man in gray was very much in evidence as under his peaked cap there was enough gray matter to furnish all of the trotting world with new material in making speed at a rate that wasn't even dreamed of when Goldsmith Maid and Smuggler were entertaining thousands.

In the early nineties all of the world's records stood to the credit of the Electioneer Family. Marvin made them and Palo Alto repaid the golden harvest as at that time the values rested on a different basis than at present. Today a colt's value depends on what he can show and what he has a chance to earn. In Marvin's day, however, fast records and speed producing lines were the standard.

While Marvin's greatest honors came to him in California, he was born in New York state and was directly descended in the seventh remove from Matthew Marvin, one of the original founders of Hartford, Conn., and whose home lot was on what is now known as the corner of Front and Pleasant Streets. Matthew Marvin came from England in 1634. He landed in Boston and moved from there with the Hooker company to Hartford in 1636. In 1650 he also became one of the original proprietors of Norwalk. Later on some of his descendents moved to New York state and located in the Genesee Valley where Charles Marvin was born in 1839.

As a lad he followed the migrations of his father to Michigan, Illinois, and Iowa where he struck out for himself, his fondness for horses leading him to freighting over the plains. During the Civil War he was with the northern troops in Kansas and when peace was declared his earthly possessions consisted of a couple of quarter horses. After a little experience with them, he found that he could not depend on the boys in the saddle. Therefore when he took up racing as an occupation, he selected the trotters and decided to do his own driving.

In 1872 while located at Olathe, Kansas, a man named John Mason Morgan brought him a bay pacer to train. As there was very little money offered at that time for horses racing at that gait, Marvin told him he would not take the horse unless he could convert him to a trotter. Morgan laughed at the idea but after several months Marvin succeeded in shifting him to a trot. Also as soon as the horse learned what was wanted of him he improved very rapidly, dropping in a few weeks from a mile in four minutes to 2:30 and from there to 2:22 when an offer of $10,000 was declined. Early in 1873 Captain Tough of Leavenworth, Kansas appeared on the scene and bought the converted pacer which was named Smuggler. He shipped him to New York with the intention of selling him to Robert Bonner, who at that time owned Dexter. Marvin accompanied him and drove Smuggler over Prospect Park three heats in 2:19½, 2:21½, 2:21. This was the three fastest heats that had ever been trotted by a stallion up to that date. After the performance Mr. Bonner told the Captain that if he could show him a mile in 2:16 3-4, which was then the world's record held by Goldsmith Maid, he would give him $75,000 for him. While he was considering this offer, Colonel N. S. Russell of Milton, Mass. dropped in and gave $30,000 for the horse. Smuggler was shipped to Boston and later on Marvin returned to Kansas.

In 1874 Colonel Russell tried a new trainer with Smuggler and as he failed Marvin was sent for. From that day he was in the first flight of drivers. In fact with the exception of Doble, Marvin is the only man who ever started at the top of the ladder and remained there. For the first two seasons he had rather rough sledding but in 1876 Smuggler came to his own when he defeated Goldsmith Maid at Cleveland and also placed the world's record for stallions at 2:15¼ overCharter Oak Park at Hartford.

When conditioning and racing Smuggler Marvin showed the qualities that made him succesful at Palo Alto. He was never a brilliant reinsman but he had courage and originality and never hesitated about jumping out of a rut or taking a chance when matters looked desperate or anything was to be gained by doing so. Old timers will remember the free for all at Cleveland in 1876 when he pulled Smuggler out of a pocket in the stretch, flashed around the field and won when it looked as if everything was all over but the shouting. Doble, Green, and Mace never forgot that day or what they tried to do with Goldsmith Maid, Lucille Goldust and Judge Fullerton in order to defeat the man from Kansas.

In the fall of 1877 Marvin took Smuggler to California in the hope that a winter in the wild climate would put him in shape for another campaign. He broke down, however, and just when it looked as though his trainer would be forced to return to his old stamping ground in Kansas, Governor Stanford invited him to take charge of the trotters at Palo Alto. Marvin also proved the man for the place when his thorough knowledge of the horse was grafted on the new ideas advanced by Senator Stanford, the Palo Alto stable sent out champions as regularly as the years were checked from the calendar.

Attention was first called to the outfit by Fred Crocker trotting in 2:25½ as a two year old. He was followed by Linda Rose that made a yearling record of 2:36½ and a three year old mark of 2:19, both of which were world's records. The two year old Wildflower, 2:21, was also trained under his direction while he also gave Manzanita a four year old record of 2:16 in a race. Their successes were followed by Sunol 2:08 3-4, Palo Alto 2:08¼, both world's records to high wheel sulkies in 1891. That year Marvin also brought out the wonder horse of the century. His name was Arion. Very few had ever heard of him until one morning the world was startled by reading that a two year old had trotted a mile in 2:10 3-4 over the kite track at Stockton, and in a few months this colt was sold for $125,000.

Arion was Marvin's masterpiece. In him he united all the knowledge which he had acquired in making speed and all the skill which he possessed in balancing a colt that like Hamburg Belle showed a disposition to brush his knees. Being opposed to toe weights he put the weights in the shoe just as John E. Madden did with the great daughter of Axworthy, and both of them succeeded beyond expectations.

All of the Palo Alto champions were broken and developed by Marvin or under his orders. In their fastest performances his mounts did what he taught them, many of them making their greatest trials on practically a loose line. His driving had none of the dash of MacHenry or rustle of Jack Curry. With the brush system he made speed and taught his pupils to carry it trough a series of heats in all kinds of company. This was his gift from Senator Stanford while from Robert Bonner he acquired a knowledge of the horse's foot and shoeing which gave him the key to the unparalleled performances of Sunol, Palo Alto, and Arion.

With all of his skill Marvin had one quality that endeared him to everybody connected with racing. He was honest and amid all of the temptations that beset a driver, no one could ever cast a reflection on him. One day during a race at Chicago when matters were getting desperate in the betting ring, a man came to Marvin with an offer to lose a heat. As an inducement he laid down several bills of large denominations on the lid of a trunk in the stall where the conversation took place and told him what he wanted. The little man in gray brushed them aside and when the other remonstrating said that if he had been working for Stanford as long as Marvin he would be acting as his banker, Marvin replied: "I have known you a long time and I have never known you to ever need a banker." That ended the interview and the man who called on Marvin and those who sent him received their answer in the next heat as Marvin won.

THE OLD GLORY SALE

The twenty-third annual Old Glory Sale, held last month at Madison Square Garden under the auspices of the Fasig Tipton Company was well attended throughout the four days and every one of the 500 head offered was sold. Tried race material brought satisfactory prices, but in many instances young stock and green prospects sold at very low prices; yet as a whole the result of the sale was considered fair under the conditions, although the aggregate sum realized was one of the smallest in the history of the sales company. The highest price of the sale ($4000) was paid for the hoppled pacer Roan Hal which went to W. B. Eckert of Feading, Pa. Walter Cox bought the highest priced trotter of the sale, his bid of $3025 getting the three year old colt Brother David, by Axworthy. A list of all horses which brought $500 or over is appended herewith.

List of Horses that Sold for $500 and Over

Roan Hal, 2:00¾, ro g (10) by Hal DeFacto—Maud C., by Minnesinger. W. B. Eckert, Reading, Pa. $4000

Brother David, b c 1914 by Axworthy—Lettie Hall by Walnut Hall. W. R. Cox, Dover N. H. 3025

FUTURE OF RACING

There was more racing over more tracks, for more money last year than in any time during the past decade and this condition is bound to continue as we have more Fairs and the fair managements conclude that a fair without racing is a farce.

Despite the new time allowance rules, which let in a lot of old timers, the scarcity of horses in some cases compelled the secretaries to declare off their meetings, or curtail their program.

In the near future the earning capacity of the slow horse will solve itself as they will be needed to fill the classes, and we all know for the fist time in the history of the American trotting turf a horse that can race at all now has an earning capacity—even a short campaign can net a little money for both the owner and driver as well as the railroads.

Notes and News

Dr. Ira Barker Dalziel, the well known veterinary dentist and proprietor of the Telephone Kennels, reports that it would appear from the fact that there is a much greater demand for his professional services just at present than for some time past, people are taking a greater interest in the welfare of their horses.

✤ ✤ ✤

The Annual Meeting of the North Pacific Fairs Association will take place in New Westminster, B. C. on Friday and Saturday, January 18th and 18th.

✤ ✤ ✤

C. A. Durfee has quite a promising string of horses at the Pleasanton track in training for next year's circuit. The horses that Mr. Durfee is handling belong to Mr. I. L. Borden and include Future Tramp 2:10¼, Pegasus 2:08¼; Skyrocket, Tommy Atkins, My Sweetheart, Major's By Guy; also some futurity candidates for the two year old classes next year, including a two year old trotter by Copa that looks particularly good, as well as two others, a trotter and a pacer.

✤ ✤ ✤

E. J. Delorey of Los Angeles, who is a director of the State Agricultural Society and a director and secretary of the California Agricultural District Fair Association of Los Angeles, has been appointed by Governor Stephens to succeed R. H. Norton as supervisor in the second district of Los Angeles.

✤ ✤ ✤

The last biennial session of the state legislature appropriated $30,000 to compensate exhibitors for losses suffered in the fire which destroyed the pavilion at the State Fair grounds in September, 1916. By a decision handed down from the Third District Court of Appeals this appropriation was held to be unconstitutional. The court denied the petition of Alameda county for a writ of mandamus to compel the state comptrottel to pay a loss of over $4000 for damage to the Alameda county exhibit. The Attorney General ruled that the appropriation was in the nature of a gift and was unconstitutional. This contention was upheld by the court. It is claimed, however, that the court does not mean that this loss by fire is not to be recompensed, as it is claimed the wording of the bill that was put through the recent legislature was alone responsible for the defeat of the measure, and that exhibitors will have standing in the court as soon as the basis of their claim is made in harmony with the laws of the commonwealth.

✤ ✤ ✤

W. G. Durfee drove Clarence Berry's three year old colt Oro Fino a mile over the Riverside half mile track in 2:06. This was a remarkable performance and lowered the world's record for three year old pacer held by William 1:58½ from 2:09 to 2:06. Oro Fino was sired by Copa de Oro dam Lilly Mc by McKinney, and performed very creditably on the California Circuit during the racing season of 1917.

✤ ✤ ✤

White Sox 2:03½ and Miss Rico (4) 2:03¾ both of whose records were taken at Phoenix, Ariz., are daughters of the noted matron Subito, by Steinway 2:25¾, also the dam of The Lark 2:08½. Only two other mares have produced two 2:04 pacers. Noretta by Norris 2:22¼ dam of Lady Maud C 2:00½ and Hedgewood Boy 2:01; and Effie Logan, by Durfee, dam of Jim Logan 2:01¾ and Sir Albert S 2:03¾.

✤ ✤ ✤

Mr. George Wingfield, master of the Nevada Stock Farm, has sent the two English mares Polistena and Cyllene Cross to the Keeneland Stud in Kentucky to be bred next spring. Mr. P. M. Guiliams was in charge of the mares.

✤ ✤ ✤

J. O. Keene bred his mare Dont to the English stallion Honeywood at the Nevada Stock Farm last year and the resultant weanling is a very breedy looking youngster.

✤ ✤ ✤

Dick McMahon well known from the Atlantic to the Pacific as one of the leading drivers on the Grand Circuit is now in California; he is out for his annual visit in the interests of the R. J. MacKenzie stable of which he is manager, trainer and driver. McMahon had a very successful season during 1917 landing as usual amongst the leading money winners on the big circuit, he was very successful with Mr. MacKenzies trotting mare Miss Perfection 2:07¼ with which he performed the feat of tying the world's race record for a half mile track. Hal Boy, his free for all pacer had another good year reducing his mark to 2:01. "Sulky racing in the East continues to improve every year", said McMahon. "We had big crowds around the Grand Circuit and the competition was very keen. It was a source of regret than more California horses were not represented but I can appreciate that they were kept busy with events on the California circuit."

"PETE" IS DEAD

How many of the regulars who make a practice of going around the sulky circuit every season will be grieved by this news. "Pete" was the men always on hand with the blanket and bucket when the trotter Esperanza and the pacer White Sox would finish a winning or losing heat. Few knew that his last name was Robertson, but every one on the race course could not help noticing how well he cared for his horses and what satisfaction he secured in their performance.

Since Esperanza and White Sox were yearlings "Pete" has been a figure in the W. G. Durfee stable to look after them. Season after season as the pair went down the line cleaning up on the California and the Grand Circuit in the East, "Pete" went along. His greatest joy was perhaps celebrated at the exposition in 1915 when White Sox paced off with the $20,000 stake.

Finishing up another round of the circuit at Phoenix with winter quarters looming up, "Pete" was taken ill. He insisted upon remaining on his cot in a stall between Esperanza and White Sox. "Pete" had expressed a desire to die next to his two sulky favorites, who had become so prominent a part of his life. W. G. Durfee was hopeful of pulling his faithful employee through, however, and had him removed to a hospital, but the following day "Pete" passed under the wire.

———o———

Lon Daniels, driver for Charley Silva, is rapidly recovering from injuries he received at Los Angeles the first of last month. Lon is a pretty tough bird to hurt, evidently. He was thrown out of the sulky, sustaining a fractured ankle and two or three broken ribs, but insisted on sporting silks at the Phoenix met, which followed a couple of weeks afterwards. Lon went out and piloted two or three winners, too.

✤ ✤ ✤

Charley De Ryder retires from the sulky every year only to come back again. He was teaming at Phoenix as of old. Charley used to manage R. J. MacKenzie's Pleasanton track, and always had a high class string of trotters and pacers, but he has been spending the last two years on his farm down at Selma.

✤ ✤ ✤

R. MacKenzie, owner of the Pleasanton Race Track, is expected to arrive soon in California. It is said that Mr. MacKenzie is intending to make a longer stay than usual on the Coast this winter.

✤ ✤ ✤

The death of Expressive, 2:12¾, is announced. This daughter of Electioneer, under the management of the late Monroe Salisbury, made one of the greatest campaigns to the credit of a three-year-old trotter, winning ten races in eighteen starts. Retired to the brood mare ranks, she produced Atlantic Express, 2:07¾; Esther Bells, 2:08¼, and five other standard performers, three producing sons and four producing daughters.

✤ ✤ ✤

A new rule has been suggested that in order to stimulate breeding, that a part of the earnings of all race horses be set aside for the breeder of the winner—in other words, the owner of the dam will profit by the earnings capacity of all her colts, no matter who races them.

This popular suggestion will no doubt be soon enacted into turf law, and its far reaching effect will be immediately evident.

Great as is this incentive, it but adds to the fact that the breeder who raises a colt from now on, is bound to participate in the increase of values, which is certain to come owing to the scarsity of racing.

✤ ✤ ✤

"Save the horse and Breed" was the slogan of several of the great specializing horse breeding associations at meetings held in Chicago during the week of the International. The event that brought together the greatest and most notable of America's live stock men, and the grandest show of horses in the history of the country, gave opportunity for discussion of the problem of the war in relation to the horse. At the Belgian Society's banquet, speaker after speaker dealt with this topic. It was touched upon at the meetings of the Percheron Society and the Shire Horse Society. These successful and hard-headed specialists viewed the steady drain of horse supplies in Britain, France, Italy and Germany and the exportations from Scandinavia due to the war, together with the vast losses of animals on the Western Front and formed the opinion that Europe will experience great scarcity of horses after the war. They further believed that any surplus in America before the war was rapidly dwindling, and that as America was now the chief source of supply for all the Allies the prospect ahead was one of scarcity. From many shrewd breeders came the advice to save all the youngsters and mares; to breed every good mare during 1918, for after the war America will be called upon to export horses in vast numbers for the restocking of Europe. The end of the war would give to the horse breeders of America an opportunity such as might never occur again.

✤ ✤ ✤

Ben Walker is at present located at Macon, Ga., and has in charge the pacer Auto Zombro 2:02½, owned by W. L. Jessup, Eastman, Ga., and the trotting mare Helen Q. 2:19¼, the property of J. J. Quinlan, Macon, Ga., both of which he raced at the recent meeting in that city.

Wm. H. Hogoboom well known trainer and driver on Pacific Coast tracks died at his home at Walla Walla a few days ago from the effects of an operation for cancer of the stomach. Mr. Hogoboom had lived in Walla Walla for the last twenty years, and before going there had lived at Marysville, Cal. where he had charge of the horses of the late D. E. Knight former president of the P. C. T. H. B. A. Mr. Hogoboom was a highly respected man. He left a wife and one son Elmer.

✤ ✤ ✤

The Bit & Spur Riding Club of San Francisco will give a benefit for the American Red Star Animal Relief at the Riding Academy, 701 Seventh Ave., Saturday afternoon and evening, December 29th. Seventy-five per cent of the net proceeds of the benefit will be given to the American Red Star Animal Relief. Mrs. Winslow Anderson has donated two geldings, each three years old, to be auctioned off on this occasion for the benefit of the cause.

✤ ✤ ✤

The last two new 2:10 trotters of the year trace to McKinney 2:11¼ in the male line and both have conclusively proven themselves genuine racing machines; Don de Lopez (4) 2:08¼, the season's champion four-year-old gelding, won twelve races in 1916 when three and made an excellent campaign this season, annexing two firsts at Phoenix, one in a $5,000 event and one in $2.500 purse; Zeta Lucille (3) 2:09¼ won her every three-year-old engagement along the Pacific Coast and is considered faster than her present mark. Both young trotters are by sons of Kinney Lou 2:07¾, the champion green trotting stallion of his period and the last horse raced in the East by the veteran reinsman Budd Doble. The colt is by Wilbur Lou (3) 2:10¼ and the filly by Kinney de Lopez, 2:23 and both are products of Hemet Stock Farm, the Hemet, Cal., nursery which but for the death of the owner, would no doubt have, within a very reasonable short span of years, proven one of the most wonderful breeding establishments in the history of the industry. The blood of Nutwood Wilkes 2:16½, the noted stallion which died at Spruce Lawn Farm, Springfield, O., is very prominent in the maternal breeding of this fast pair of young trotters, as Zeta Lucille (3) 2:09¼ was out of Zeta W., by Nutwood Wilkes 2:16½, and Don de Lopez (4) 2:08¼ was out of Eradite, by George W. McKinney 2:14½, grandam Mamie Redmond, by Nutwood Wilkes 2:16½.—(American Sportman.)

✤ ✤ ✤

Manrico (3) 2:07¼, one of the gamest trotters which ever appeared and winner of the greatest struggle in the history of The Kentucky Futurity, is proving himself a sire of extreme speed. His daughter, Miss Rico (4) 2:03¾, is the season's fastest four-year-old pacer: his son, Rico (4) 2:06¼ is the season's fastest four-year-old pacing gelding; another daughter, Mary Coburn (2) 2:10¼, now three, trotted in 2:05 in one of her futurity engagements, and others by the splendid son of Moko displayed rare ability.

✤ ✤ ✤

There will be no Grand Circuit meeting in Detroit in 1918. At a meeting of the stockholders, held recently, it was definitely decided to abandon the Detroit Driving Club, and all the belongings of the club will be sold in the near future. There is a deficit of about fifteen thousand dollars which will be cut considerably, however, by the sale of the pari mutual machines, track equipment, etc., and it is quite likely that the new association at Toledo, Ohio, will take over these. There is some talk of a new club being formed in time for a meeting in 1918, but this is considered very unlikely. Some of the most brilliant meetings of the Grand Circuit have been held at Detroit in the past and the passing of the club which was organized in 1885 will be regretted by all.

✤ ✤ ✤

A bill framed for the purpose of limiting betting on horse races to meets held by fair associations, and to have it placed under the supervision of a commission to be appointed by the governor will be introduced in the next Michigan Legislature. Under its provisions nothing but the pari-mutuel system would be employed.

———o———

THE INTESTATE ASSOCIATION

Pittsburg, Pa.

Breeder & Sportsman Pub. Co.,
San Francisco, California.

Editor "Breeder and Sportsman":-

For the benefit of gun clubs that intend making application to hold Registered Tournaments in 1918, please state in the trapshooting department of "Breeder and Sportsman" that our Tournament Committee is busily engaged in working out the details of numerous matters pertaining to Registered Tournaments which were referred to the Committee at the recent annual meeting of our Directors. When these details have been completed they will be issued in pamphlet form, and, accompanied by a new form of application blank to hold a Registered Tournament, they will be mailed to all gun clubs that held Registered Tournaments in 1917. They will also be mailed to numerous other gun clubs, as well as to parties likely to be interested. We expect that this matter will be ready to put into the mails about the middle of December.

Yours very truly,

THE INTERSTATE ASSOCIATION
Elmer E. Shraner, Treas. & Mgr.

FIVE GLIMPSES OF ALONZO McDONALD

[By W. H. Gocher]

Deacon Partridge sat on the lid of an old trunk which had made the rounds of northern New York fairs for at least a dozen years, and watched the wind whirl the dead leaves across the back stretch of the track at the fair grounds. He had had a very good season for him and the November frosts found him with plenty of hay in the loft and enough oats and corn in the bin to carry his stable of horses through the winter. In fact he was very thankful for what little puffs of fortune had come his way and so expressed himself to a sturdy young man with a curly kink in his sandy hair that was walking a colt on the well worn ring in front of the stable.

"Lon," said the old man, "there is no reason in the world why you should not become a successful driver. You have good hands, an even temperament, just enough Scotch in you to make you careful, and I have yet to see you looking around to see what the other fellow is doing. I was always told to watch my horse's ears and keep going the short mile. You cannot climb very high, however, by remaining here as there is very little racing material in this section. There was a time when the Columbus, Blucher, and Phil Sheridan horses as well as the St. Lawrence and Tippoo's from Canada were good enough to go with but they have disappeared and no one has brought in any to replace them. The Kentucky and California people are now breeding nearly all of the fast colts. Of course there will be, no doubt, one that will pop up almost anywhere like the Moose that Van Valkenberg had or Charley Wagner's mare Phyllis but you have to wait a life time to get one of them or possibly, like me, miss them entirely. To be up and doing now-a-days you must land two or three of that kind every year but with it all, remember as coming from me that no matter what you are or where you are, always be a gentleman and at the same time do not forget that the man who does the right thing at all times wears the longest and wins in the end."

This war a rather long speech for the dear old deacon and in time he passed on, regretted by everyone in his little orbit. The lad who was leading the colt started for the tall timber.

* * *

The Cleveland Grand Circuit meeting in 1896 was a success even beyond the most sanguine expectations of Col. Wm. Edwards. Granville Cecil had come up from Kentucky with the fast mares Lottie Loraine and Emma Offut and won with both of them while Klamath and Newcastle also made good. The flash of the meeting, however, came from the oil country and was entered in a slow class. Fourteen horses started in the event with Mocking Boy and Planet, the pick of the bunch, although a few thought well of the Red Bud and Sherman Clay. There was a little group, however, who would not have anything to do with this quartet and devoted their spare time to buying the cheap tickets on a chestnut filly called Miss Jennings. According to the score card she was a Tennessee product by McEwen, a horse that Geers had raced before he located at Buffalo. When Miss Jennings was being warmed up, it was seen that she would be driven by a young man with sandy hair whose face was not very familiar to the wollowers of the Grand Circuit. However as the Bradford people kept backing his mount, Andy Welch, always a close observer, asked Charles Lewis to look Miss Jennings up in the dope book. In a short time he returned with the report that she had been beaten by O. M. C. and Mentor Maid at McKee's Rocks and had won in slow time at Bradword. This scarcely looked good enough to trim Planet or the Village farm horse.

When the word was given, the auburn haired young reinsman showed that he had something up his sleeve as he flashed out in front and won the first heat in 2:09¼ and came back in 2:08¼. By this time everyone knew that Miss Jennings was a real pacer and the race would have been all over on the third trip if George Starr had not bumped into her sulky with Planet at the head of the stretch and caused her to make a break. For this little slip, the judges sent George to the barn but it only delayed the verdict for another mile as the slim built filly won the fourth and deciding heat in 2:09¼. After it was over Harry Olmstead, the veteran clerk of the course, sent the marshall to the barn for the name of her driver. When he returned he had the words Alonzo McDonald written on his score card.

* * *

The first event on the programme for the Hartford Grand Circuit meeting in 1903 was a $6500 race for three year old trotters. The usual Labor Day crowd was out to see the trotters and among those who were disposed to risk a dollar, Ethel's Pride was the favorite. For several weeks Dr. McCoy had been busy preparing her at Charter Oak Park for this event while he had also engaged Jack Curry to drive her. The latter in his usual sanguine way told everyone what the natty little daughter of Directum would do to Cox with Lizzie A., Titer with Lord Roberts, a brother of Admiral Dewey, Joe Thayer and his handsome filly Delight to say nothing of McDonald and Sadie Mac. A few Hartford people admired the latter, however, because they had seen her sire race at Charter Oak Park while her dam Fanella was raised there, and her grandam Directress was known to be a good mare.

Prior to the race it was learned that Curry had made a contract that would interfere with his driving Ethel's Pride and Scott Hudson was selected. He was also positive that she could win and did manage to land the first heat McDonald not making a move for it as his filly was interfered with on the first turn. In the next two heats, however, Sadie Mac showed that she had the speed of the party and won in 2:12 3-4 and 2:11&, this virtory being only a starter for the two campaigns which this mare made and which terminated so suddenly at Hartford when she dropped dead in the Charter Oak Purse that was won by Angiola. Alonzo McDonald developed Sadie and named her after his daughter.

* * *

In 1908 the New England Trotting Horse Breeders' Association made its last stand at Roadville on the magnificent course which it had built under the Blue Hills. A $50.000 handicap was staged as the masterpiece to offset the loss in privilege money and while it made good, the returns were not entirely satisfactory except to the horse owners who finished inside the money.. There were six of them and by passing a green one over the handicappers, Alonzo McDonald managed to get the best of the other competitors. His prize pupil that year was rated as a 2:10 trotter, notwithstanding the fact that he had worked a mile in 2:08 on the outside of the track at Poughkeepsie the preceding week. Also as soon as the handicap was announced McDonald knew that a break or interference such as The Eel met with the following year was all that could keep him from calling with Allen Winter for the $30,000, first money. He called and the money was paid to him.

* * *

Last August there was a 2:12 trot for $5,000 on the programme for the Grand Circuit meeting at Columbus,Ohio. It was considered a gift for Busy's Lassie, the winner of the $10,000 events at Kalamazoo and Detroit. Ima Jay was also in it for her first start of the year while W. J. Leyburn with Geersup was rated as having a chance. Stillthere was not enough in the field, even with Early Dreams tossed in for good measure, to make anyone who was betting on the event give more than $25 to $100 for the favorite. Cox won the first heat with Busy's Lassie in 2:04¼, with Royal Mac in second place and the Dream horse third. In the next heat McDonald picked the favorite up in the stretch and flashed by to the surprise of everyone and won the heat in 2:04¼, a new mark for the Indiana bred gelding. The third heat also went to Early Dreams in 2:06¼, after which Harvey Ernest turned Ima Jay loose.

In the first heat she got away bad but was timed separately in 2:04. In the fourth heat she beat the barrier and clipped off the first three quarters in 31 seconds, 30 3-4 seconds, and 31¼ seconds and still had enough left to come away from McDonald at the distance and win in 2:05¼. That heat set the bees buzzing but the gelding legged up with more races than Ima Jay won the fifth and deciding heat in 2:08. This event put the mintmark of quality on Early Dreams and when Mr. Swisher, the President of the association, presented his driver with the cup that went with the race he said:—"It is a pleasure to give you this cup, Mr. McDonald, and at the same time I wish to add that when you start a horse in a race, the public can always depend on it being driven to win and by a man that is under all circumstances a gentleman".

* * *

Deacon Partridge was wise in his generation. His pupil came through the tall timber and won.

RECORDS BROKEN AT HOLSTEIN SALE

California leads the states in the highest average price paid for pedigreed dairy stock at public auction.

The sale ofe 72 head of registered Holstein stock at the state fair grounds brought in a total of $67,-910, a record not equalled by any sale ever held in any state, and also, according to the records, the sale resulted in the third highest average during any former sale in the United States.

King Korndyke Pontiac, a prize bull owned by Mrs. Anita Baldwin of the Santa Anita rancho, was purchased by W. J. Higdon of Tulare county for $6500, and besides being the record of the sale, is the highest price ever paid in the state for any dairy animal sold at auction.

The purchase of Korndyke Sadie Vale Star-Rena, a heifer born in April, 1916, by Fred W. Kiesel for $3100, was the second largest price paid during the sale, and is the highest price ever paid for a female dairy animal at any auction sale held in California.

Following are the average prices paid for stock during the sale: Santa Anita ranch, eight head, average $1388; McAllister & Sons, seven head, average $3100; Dr. E. J. Weldon totalled the lowest average, which was $424 for four head. Alexander Whaley, three head, average $1607; Bradford company, ten head, average $929; Gotshall & Magruder, three head, $812; A. W. Morris & Son, fifteen head, average $951; Fred J. Kiesel, three head, average $892; Palo Alto Stock farm, eight head, average $950; R. F. Guerin, two head, average $665; W. J. Higdon, three head, average $652; Toyon Farm association, one animal, average $1000; J. S. Williams company, one animal, average $430.

A feature of the closing hours of the sale was the auctioning of a bull donated by the Santa Anita rancho for the benefit of the Red Cross fund. Each consignor put up $50 toward the fund and the bull was auctioned off to the Gibson company for $300 and the $300 together with the $1150 collected from the breeders will go to the Red Cross to be credited to Williams.

During the sale there were two animals purchased by E. Susaeta to be added to 23 other registered Holstein dairy animal to be sent from San Francisco to Chile on December 14. Susaeta is buying for one of the largest dairy firms of Chile and selected the cattle from the herds of the San Joaquind and Sacramento valley districts. Formerly the cattle were all purchased from Denmark, but the California dairy stock was found to be superior in every way.

A feature of human interest was the argument of the young son of W. J. Higdon when Higdon bid $6400 for the bull, which he later bought for $6500. The boy went to his father and with tears in his eyes begged him to buy the bull, saying that there could not be a purchase made for the dairy farm that would be as good as this. Finally the father decided to pay what he did for the bull and the boy was happy in the thought that he had persuaded his father to do the very best thing possible. The Higdon herd is valued at several hundred thousand dollars, it is said.

When one of the Higdon cows would not bring a higher bid than $800, the boy again implored his father if possible not to let the animal go for the price. Those at the auction said that probably if the boy had had the money he would have bought the cow himself rather than see it sold for $800.

A number of the breeders today will visit the ranch of A. W. Morris & Sons at Woodland, where Morris will give a lecture illustrating it with a number of his prize-winning animals telling the breeders his experience in raising the Holstein dairy animal.

ANNUAL MEETING OF PERCHERON SOCIETY OF AMERICA

The annual meeting of the Percheron Society of America, held at 8:00 p. m., Dec. 3rd, at the Congress Hotel, was well attended. President White in his opening address said that it is time for optimism, not pessimism, in the horse business; that the breeding of horses has been curtailed materially in the last few years, while the demands on our horse stocks have been greater than ever. Demands for food and for meat animals have reached unprecedented heights. These grain foods, and forage and grain, with which to feed meat animals, must necessarily be produced from the soil; and in tilling the soil efficiently no power unit has yet been developed which would equal the draft horse. He said that he has himself had experience with tractors; that he has owned three, of various kinds, and that none has proved as satisfactory as his Percheron teams. He telephoned to a neighbor this past season, who had bought a tractor, in an attempt to engage this neighbor to do some discing in the orchard. The neighbor replied that he could not come, had work of his own which must be done at once, and that he was even then unable to use his tractor because it was awaiting repairs, and had been waiting for said repair parts for thirty days. Mr. White said his own experiences were similar, and that no breeder need fear that tractors will materially reduce the demand for good draft horses.

Secretary Wayne Dinsmore reported that the membership has increased to approximately 9,000 breeders, and the reserve funds, in securities, are now in excess of $106,000.

He reported that in spite of the pessimism prevalent in some quarters, the Society has enjoyed the banner year of its history, having handled more registrations and transfers than in any past year. Ten thousand five hundred and eigh registrations were made during the fiscal year ending Oct. 31, 1917; 10,314 of these were American bred, an increase of 1,410 registrations in American bred animals—or a 15 per cent gain.

Nine thousand eight hundred and fifty-two transfer certificates were issuned during the past year, and more than 2,000 other transfers passed through the office and were recorded in the certificates of pedigree. The total sales recorded during the year over 11,000, exceeding even the registrations made, showing conclusively that the trade has been active during the year.

In concluding the Secretary referred to the enormous exports of horses for war. During the 36 months ending Aug. 31, 1917, 939,540 horses, valued at $199,903,036, and 323, 785 mules, valued at $64,-202,454, were exported—a total of 1,263,325 animals. Exports are continuing at a rapid rate. No figures have yet been given out regarding the purchase of horses for the United states army, but the number is estimated to be well in excess of 100,000 head, with purchases continuing at a rapid rate.

Before the annual meeting adjourned Mr. Craven, representing the American Red Star Association, which is to horses what the Red Cross is to men, made a few remarks. He urged the conservation of all available horses, and the breeding of all mares of good type and character. He declared that horses are indispensible in war; that the reserve supplies in our allied nations are practically exhausted, and that the supply of suitable horses in America is much lower than horsemen generally realize. His appeal for the work in the Red Star was heartily applauded, and the members went on record in favor of the work which the organization is doing.

In the election of officers Mr. E. B. White was re-elected President; W. S. Dunham, now serving as a Captain in the United States army, was elected Vice President and Mr. Wayne Dinsmore continues as Secretary.

HISTORY OF THE "M. and M."

[By W. H. Gocher]

In the latter part of the eighties when D. J. Campau revived light harness racing at Hamtramck Park, Detroit, Mich., he decided after giving three meetings that it would be advisable to stage an event which would attract national attention. After considerable deliberation he decided to offer a $10,000 purse for 2:24 trotters. It was named the Merchant's & Manufacturer's Purse, which in time was abbreviated to the M. & M. The race was a success from the start. "Tink" Hills winning the first one in 1889 in straight heats with the Dauntless gelding Hendryx from a field of thirteen. Budd Doble finished second with the favorite Amy Lee while such horses as Alcryon, Greenlander, Yorktown Belle, and So Long were outside of the money. The event was not disposed of so easily the following year when of the eleven starters, Play Boy and Suisun each won heats before Bob Stewart was awarded the honors with Walter E., one of the gamest and also one of the most consistent trotters that ever came down the line.

The M. & M. in 1891 was made memorable by the tremendous plunge of the Montana delegation on Prodigal. Andy McDowell had the mount and considered his horse a sure winner. In the fist heat a railroad conductor from South Bend., Indiana flashed out in front behind a big bay gelding called Prince M. He also remained there to the finish. The judges, however, set him back for a swerve in the stretch and gave the heat to Prodigal in 2:17¼, the record with which he retired from the turf. The next three heats proved easy sailing for Temple Bar, driven by George Spear, Geers finishing second in the last one with Honest George.

The next three renewals of the M. & M. were won in straight heats by the black Nightingale, Siva, and J. M. D. George Ketchem of Toledo, Ohio, was among those who saw Nightingale win. Her success prompted him to purchase her dam from which he bred the champion stallion Cresceus, 2:02¼. The race won by Siva was the last renewal of the M. & M. contested over Hamtramck Park. The following year the flags floated over Grosse Point track when J. M. D. defeated Rex Americus, much to the discomfiture of C. J. Hamlin as well an the admirers of the Onward colt which cost him $15,000. Geers, however, had a winner at Detroit the following year when he drove The Corporal in the deciding heats of the seventh renewal of the event, defeating Don L. and Iron Bar. He was also behind the Mambrino King mare Valence when she finished third to Emma Offut in 1896, Red Star being in second place. Rilma was the next winner, Foote's laying up heat tactics enabling her to defeat Orotorio, Red Star, and the Chimes gelding The Abbott, that afterwards reduced the world's record to 2:03¼. There were many unpleasant things said after this race, while they were also repeated in 1899 when Royal Baron won in the same manner for N. W. Hubinger, a victory which in a measure compensated him for what he lost the preceding year when Directum Kelley defeated his mare Belle J. after she had won two heats.

Geers appeared in the lime light again at Detroit in 1900 when he won the M. & M. with Lady Geraldine in what proved a very cheap race, the deciding heat being trotted in 2:22. From that date, however, it required a 2:10 trotter to win this event, Eleata stepping the deciding heat in 2:08¾ when Marsh won with her in 1901 over Country Jay and Neva Simmons. Scott Hudson also won a splendid race in 1902 with the blind horse Rhythmic while the great trotter Wentworth could only save his entrance. The downfall of the Texas trotter Wainscott made the renewal of this race in 1903 memorable, Dick Wilson defeating him very unexpectedly with the big gray gelding John Taylor but it required a fifth heat in 2:10½ to do it. Stanley Dillon, Angle, and Ann Direct won the next three renewals of the M. & M., the last named trotting her race at Cleveland, Ohio where it was transferred on account of a local disturbance.

Conditions being favorable in 1907 the M. & M. was again revived at Detroit and resulted in the best contest seen in the event up to that date. When the list of nominations was published, it was found that Sonoma Girl and High Ball, two of the best green trotters that ever appeared in one season, were named to start. High Ball won the first heat in 2:07½, the "girl from the golden west" forcing him out. On the next trip Springer showed in front with Sonoma Girl, the time for the heat being 2:06¼, the fastest time made in it up to that date. She also won the deciding heat in 2.09¼, the race being on the three heat plan. The following year the race was advertised to terminate at the end of the fifth heat and while Geers had in Alceste what proved the best starter, the honors went to Spanish Queen on account of her position in the summary. The next three renewals of the M. & M. were never in doubt after the words was given, McDonald winning one of them with Margin and Geers the next two with Dudie Archdale and Anvil.

Murphy won his first M. & M. in 1912 with Queen Worthy while the next year Geers again lead the procession with Reusens, the big chestnut gelding defeating Tenara after the Moko mare had won two heats in 2:08¼ and 2:06¾.

In 1914 the M. & M. was reduced from a 2:24 to a 2:14 class. The change brought out a faster field and also a higher class lot of trotters. Rhythmell won the first heat in 2:06¼ and was distanced in the second which was placed to the credit of Linda Wrona in 2:05½. Cox showed in front on the next trip with Peter Scott and won in 2:07¼, McDonald getting the place with McCloskey. Lassie McGregor, the starter from the Murphy stable, was unsteady in the first three heats. In the fourth, she was on her good behaviour and won in 2:09¼, Mahomet Watts getting the place. She also won the fifth heat in 2:10 and the seventh in 2:08¾, the sixth having been placed to the credit of Peter Scott. This showing gave him second money. Peter Scott tried again in 1915. He was then in the Murphy stable and was defeated by Lee Axworthy in 2:06¼, 2.04¾, 2,04¾, the fastest and most closely contested M. & M. ever trotted. Last year the royal battlers Mabel Trask and St. Frisco met in the M. & M. and the mare won, her first heat being trotted in 2:05¾. Cox also won again this year with Busy's Lassie after Al Mack had placed two heats to his credit. Since this race was contested the Detroit Driving Club has disbanded. The thirtieth renewal of this popular and time honored event will, however, be raced over the new track at Toledo in 1918.

RACING IN THE HAWAIIAN ISLANDS

That the outlook for racing in the Hawaiian Islands is brighter than for several years past, is the opinion of H. M. Ayres, a well-known sportsman and newspaperman of Honolulu, who is in San Francisco on a visit.

"The sport has been handicaped in the past by lack of horses," stated Ayres, "and in consequence the racing fare had to be very thinly spread out. A number of new horses have recently been shipped to Honolulu, however, and these will furnish contention at the coming meetings, which cannot but act as a great stimulus to the sport. Among more or less well-known thoroughbreds which have been for some time in the Territory may be mentioned Florence Roberts, Mary Jay, Uumpqua, Lahonton Water, Fair Mary, Oneonta, Satisfax and Seabolt. Florence Roberts bowed a tendon several months ago but has recently been put in training. Satisfax, a black mare by Rock Sand-Souriante, is the Hawaiian turf queen at all distances from four furlongs to a mile.

"The Niu Ranch imported two two-year-olds and two three-year-olds a few months ago, and the next runners to arrive were Rosella and the Nevada Stock Farm yearlings Dinner Bell, Dreamery, Remark, Saunte and Peter Post. Louis Warren, manager of the Honouliuli Ranch, shipped four yearlings to Honolulu by the last Lurline, the purchase having been made through John Green, who has been interested in racing in the islands for a number of years."

Ayres states that the Hawaii Polo & Racing Club will give a day's racing on Christmas and New Year's Day, a meeting during Carnival Week, next February; and the big annual meeting next June, during which a purse of $1500 will be hung up for a mile-and-a-quarter event and purses of $500 each for races at half a mile and six furlongs.

The Honolulan sportsman intends remaining in this city until after the holidays and will then proceed to Kentucky where he expects to fill orders for half a dozen thoroughbreds which he will take back to Honolulu with him in the spring.

The harness horse game in the islands, according to Ayres, is not in popular favor, indeed were it not for the occasional clashes of the pacing evergreens Welcome Boy and Denervo, the curtain would have been rung down on it long ago. Recently, however, Zorene 2:10½, was shipped to Honolulu with the idea of creating a three-cornered argument between the Hawaiian pacers.

The breeding of thoroughbreds is proceeding apace in the islands, says Ayres, some excellent stock being produced at the Parker Ranch on Hawaii, where the stallion Frolic is quartered and where Sumptuary and a number of other good mares make their home. Umpqua and Oneonta have sired some nice youngsters, as have the Solitaire I stallion, Harvester. The stallion Deutschland was recently shipped to Honolulu and purchased by Mrs. Walter MacFarlane,, the most prominent figure in the racing game in Hawaii today, and who has entered seriously into the breeding business, with the mares Fay Muir, Frazzle, Divina, La Estrella, Abelene, Eleven Bells, Rosella, Florence Roberts and Peggy O' Neil to grace her establishment.

THE GREATER SEQUOIA FOR CAMPERS

Growing public interest in the plan of the Department of the Interior for the enlargment of the Sequoia National Park undoubtedly had much to do with last summer's enormous increase in the patronage of this fascinating reservation on the west slopes of the Sierra Nevada Mountains in central California. This increase amounted to more than seventy-two per cent of the attendance the year before; and last year's attendance, be it noted, was an increase of forty per cent over the figures of the exposition year preceding.

That these two enormous increases cover the precise period since the plan for "the Greater Sequoia" was made public is at least significant.

Last summer's increase consisted largely of campers in and near the Giant Forest. Many of them remained for weeks, some all summer, much to the profit of the local business channels through which they purchased their supplies.

The Sequoia is fast becoming the greatest camping out locality in the country and if the magnificent groves of the present Sequoia Park are supplemented by the immense scenic valleys it is proposed to add to the park, valleys now unknown to the public, there will be drawn to the park many thousands of campers yearly from far distant States.

TRAPSHOTS TO TRAIN AVIATORS

That the Aviation Section of the United States Signal Corps has for many months been possessed of a complete roster of the best trapshots, both amateur and professional, in the United States and furthermore that it proposes to use some of them as instructors is worthy of more than passing notice. This we have it brought home to us in a realistic manner the practical value of one of our greatest sports—trapshooting—which is to be a factor in the winning of the present war. Certainly no greater testimonial in favor of the "learn to shoot" idea could be advanced than that it has come to the front in a time of crisis like the present.

If experts trapshots are of value to the aviation training schools, there seems to be no valid reason why expert rifle shots should not be of value on the army rifle ranges.

In determining to use the trapshots of the United States to teach wing shooting, the judgment of distances and the leading of shots, the Aviation Section has acted wisely.

It is pleasing to note that the question of earning money through trapshooting, which constitutes professionalism in the scattergun game, has been so satisfactorily disposed of. When the question of mobilizing the trapshooters came up, the professionals, almost to a man, answered immediately. There was no reason why any of them should not take employment with the army as paid instructors. With the amateurs, for a short time, things were different. While most of the best amateur shots were willing ti "Do their bit", the question arose whether taking such employment for such a purpose would not constitute professionalism. Fortunately, however, the Interstate Association officials have seen fit to solve the question by holding that such employment will not constitute professionalism.

It is to be hoped that the plans for instructing aviators in shooting at moving objects through the use of shotgun will develop that prime necessity of any fighting force—a corps of aviators who can be trusted to bring down the enemy planes.

10,000,000 LBS. OF VENISON

While 15 states will have no big-game hunting this year because deer have been exterminated or because the stock has been so reduced that the season is closed, there are 33 other states, according to the United States department of agriculture which will have an open season for deer hunting.

The department urges all persons to co-operate to secure the best possible protection of deer so as to get the maximum amount of venison as a source of meat.

It is estimated that about 80,000 deer are killed legally in the United States each year. These produce nearly 10,000,000 pounds of venison. The biological survey of the United States department of agriculture says that this number of deer can be very largely increased, since only two or three states produce more than 10,000 deer a year and many less than 1000. When 1100 deer are obtained in a state as densely populated as Massachusetts it should not be difficult, says the department, to increase the total in the other states by at least 25 per cent. Every pound of venison brought in from the woods should be made to save a pound of beef, mutton or pork raised on ranch or farm.

The co-operation of game commissioners, conservation associations and other organizations is requested by the department as an aid in securing accurate reports of the number of deer killed in each state this year. Such reports should prove of value for comparison with the returns from other years and may tell whether the number of deer annually taken in any state may be increased without impairing the breeding stock.

A PAIR OF PLUCKY BUTCHER-BIRDS

A remarkable instance of bird pertinacity comes from the little town of Santa Ana, California, where a pair of butcher-birds, or gray-backed shrikes, built a nest within the pulley-wheel of an elevator, temporarily out of service, used for loading slaked lime in the yards of the Southern California Sugar Company. One day it became necessary to use the elevator and an employe was obliged to remove the nest, which then contained seven eggs. The birds promptly resumed building operations the next morning, but the following day the new nest foundation was once more displaced by a workman.

Then came the amazing exibition of persistency. For a whole month the birds stubbornly continued to fight for occupancy of the pulley-wheel. Whenever the elevator was stopped for a brief time they would pitch in with fresh energy. So feverishly did they try to get their home built and begin housekeeping that upon several occasion a nest was completed within two days, the mother bird promptly depositing eggs therein. In all, the remarkable number of twenty-two nests were built or partly built and a total of seventeen eggs were laid before the birds gave up the struggle.

At last machinery won over bird patience and the heroic pair, loath to retreat from the neighborhood entirely, chose a new location on a near-by beam that partly shelters a new weed-catcher being installed by the company. Here the mother at last safely hatched five eggs notwithstanding that carpenters and machinists have been plying their noisy trades only four feet below the last nest.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

At the Los Angeles Gun Club shoot on November 24th, S. H. Wilson and J. T. Thomas tied with Heinie Pfirrmann and C. A. Evans in the Liberty Bond shoot. Both teams had a perfect score, breaking fifty straight.

✤ ✤ ✤

The Pacific Coast Championship Field Trials will be held near Bakersfield on January 21st, 22nd and 23d, and fanciers of bird dogs are looking for high-class competition this season as the date for the stakes is set fully a month later than usual, with the assurance that there will be plenty of quail so that the pointers and setters will have an opportunity to display bird work along with their exhibitions of range and distance.

✤ ✤ ✤

At the Pacific Coast Field Trials to take place near Bakersfield next month three fixtures will be contested, the Derby, All-Age and Membership Stakes. The officers of the club report that a number of new dogs will be out for the aristocratic sport. Walton Scott, J. S. French, Dr. Arthur Beardslee, Phil. M. Wand, A. G. and Mrs. Wikes, John W. Considine, S. P. Eastman, Roy S. Avery and Mrs. Avery, and Joe Chanslor are among the local fanciers expected to make entries. S. Christenson, secretary of the club, is a captain in the army now and will not be present.

✤ ✤ ✤

On account of the big weed seed crop in Southern California this year, quail did not taste nearly so strong of sage as last season. When seeds are scarce they eat the sage leaves that sprout after the first good rain and sometimes get rank on this pungent diet of sagebrush.

✤ ✤ ✤

The first indication of the flight of northern birds into the coast region of southern California has been reported. Mallards are plentiful on the Alamo river and in the irrigation ditches in Imperial county.

✤ ✤ ✤

Rock cod fishermen in San Francisco bay report that while their catches are not large, the fish run big, many of them weighing from a pound to 3½ or 4 pounds.

✤ ✤ ✤

The run of herring in Richardson's bay has just commenced and from a dozen to twenty-five fishing boats are to be seen there any time of the day dragging their nets. Last year the catch was tremendous in that vicinity and at low tide the beaches were covered with herring spawn.

✤ ✤ ✤

Striped bass fishing in Napa creek has been good for the past month and as much as 150 pounds of fish a day has frequently been the catch of a single rod. The favorite bait is bull heads which are cut up, and it is remarkable that the fresher the bait, the more effective in taking fish.

✤ ✤ ✤

Dr. Washington Dodge reports it is estimated that over $6000 worth of rice was destroyed by ducks this year in the rice fields in which he is interested, notwithstanding the fact that a number of men were engaged, whose duty it was to scare the ducks and geese out of the rice fields with shot guns and sky rockets.

✤ ✤ ✤

Aviation will no doubt add greatly to our knowledge of the flight and migration of birds. Golden plover have been seen by aviators at an altitude of 6000 feet and carrier pigeons around 3000 feet. One aviator, while flying at a great height, noticed a swallow flying over his head. He was then at an altitude of 9500 feet. It has been supposed that the great majority of migratory birds when on their long journeys, particularly wild fowl, fly at great heights.

✤ ✤ ✤

We are indebted to W. W. Richards, the well known field sports enthusiast, for the photographs of wild ducks at Lake Merritt, Oakland, published in this issue. Mr. Richards shoots as well with the camera as he does with the shotgun.

✤ ✤ ✤

With the conclusion of the Arizona State Trapshooting Championship at Phoenix, on October 13 and 14, won by Mr . H. P. DeMund, with a score of 98x100, shooting a Remington Pump Gun and Remington UMC Nitro Club Speed Shells, the trapshooting season of 1917 passes into history. It is interesting to note that of the forty-five State championships held, thirty-one or over 68% of these were won by shooters who used a Remington gun or Remington U M C Nitro Club or Arrow shells. In addition, four of the five Interstate Handicaps were won by shooters who pinned their faith to the Red Ball products and also the following important events: Pinehurst Midwinter Handicap, National Amateur Championship, Maplewood Championship and the Indians Championship.

The champion trap shooters of the Pacific Coast states, according to report compiled by Peter B. Carney, are: California, Nevada, F. H. Mellus, Los Angeles; Oregon, J. W. Seavey, Portland; Washington, J. H. Hopkins, Seattle; Arizona, H. P. De Mund, Phoenix.

✤ ✤ ✤

Mrs. C. E. de Groat of Los Angeles is the champion woman trap shooter for the Pacific Coast.

✤ ✤ ✤

Another Du Pont Products Book has just been issued by E. I. Du Pont de Nemours & Co., and its associates, Du Pont Fabrikoid Co., Du Pont Chemical Works, The Arlington Works and Harrisons, Inc. It lists all the products of the above concerns and describes their uses as well as who uses them.

✤ ✤ ✤

A. Jay Marsh of New Jersey made the remarkable record at the Newark Bait and Fly Casting Club of an average of 241 feet for five casts in the half ounce distance event, and J. Chas. Ellinghausen of New Jersey at the same meeting in the surf casting events threw the lead 435 feet ten inches and made an average of 419 feet, 4 3-5 inches for five casts, both being new world's records.

LIGHTNING PLAYS ABOUT A FOREST LOOKOUT

San Francisco, December 15, 1917: The lookout men whose duties are to discover and report fires burning in the National Forests live lonely and uneventful lives for the most part. This is not always the case, however, as is evidenced by Lookout Lester E. Creasy's account of his experience in a severe lightning storm while stationed in a tiny cabin on the top of Kern Peak, a high point of the Sierras in the Sequoia National Forest.

"About 4 P. M. the storm began to move south, then the fireworks began, with increasing violence as they traveled. About 4:30 P. M. snow commenced to fall at Kern Peak. About this time a bolt of lightning came down the flag pole emitting a sharp crackling and hissing. This happened five times, giving me quite a jarring sensation, and each time it came with a little more noise than the one before. Bang it came to the sixth time on the flag pole; this sounded like an explosion of a half ton of powder, and there was a shower of sparks fell down by the windows. I looked out expecting to see the roof or flag pole on fire, but only saw a black spot on the pole near its top, and felt a peculiar "something" in the air.

I then put on my rain-coat and hat; as I did this a small spark pumped from the wall when I put up my hand to get my hat. Just then another bolt struck both cabin and telephone line, making a sharp crack as it jumped the open switch at the end of the table. and burned the ground wire off outside of the cabin.

I didn't dare linger to see what might come next, so down the trail I started. It was now a blinding whirl of snow. I could see about six feet and there was about 1½ inches of snow on the ground.

When I had gone about 300 yards from the cabin I heard a hissing in the north rapidly traveling south. Bang it struck the cabin, but I couldn't see if it did any damage as I couldn't see anything except snow. This bolt was traveling horizontally and passed so close to me that it singed the hair on the back of my neck and felt like something brushing past me.

I proceeded a little farther and another crash louder than all the rest hit the cabin. It sounded as if it must have torn it into splinters, but I couldn't see. This bolt was also traveling horizontally and gave me a slap on top of my hat. I could hear both of these rushing through the air before they struck. The loud crashes were not thunder, but the heavy arcing when the electricity grounded or struck the cabin. These last flashes made practically no thunder. This was nine times the cabin was struck. The lightning was all over at 5:45 P. M., ending with this last crack at me. It rained several hours at the Tunnel where I arrived at 7:15 P. M. This happened on October 1, 1917.

Next day I went up to look for fires and see what damage was done, also to pack my bed down.

First I saw the ground and line wires were burned off, next the switch inside the cabin was badly melted, and then the telephone itself was only an imitation. It had been completely ruined, except possibly the generator coils.

There were no fires on account of the rain in the night. The cabin looks as good as ever, except for the black spots where it was hit. Most of them are on the flag pole."

Elk are protected by the State of Washington until 1925.

The United States Biological Survey has destroyed 35,000 coyotes this year in the Great Basin region in Colorado.

Average Entry per Tournament, 493 Tournaments: Amateurs 43.10; Professionals 5.43.

THE STATELY ELK

Now that the buffalo survives only in a few preserves, the elk is the most interesting, as it is the most beautiful of our remaining wild animals.

In this day of Americanism it would be a fine thing if its typical American animal should come to be known by his Indian name of wapiti.

The wapiti is the largest of the red deer family and closely resembles his smaller brother, the European stag.

The wapiti is not properly an elk, as the European elk is more closely allied to the American moose.

The wapiti is now numerous only in the States of Wyoming, Idaho and Montana, though nearly 4000 head are throught to remain in Colorado, and considerable numbers are scattered through western Canada.

The Campfire Club of America and other organizations and individuals are working for its preservation. The favorite home of the elk is the Yellowstone National Park, where he has no rifle to fear, and where congars, coyotes and timber wolves are kept under control.

In the park and its vicinity are probably 50,000 head, distributed in two main herds.

During the summer months the elk live high up in the mountains, generally at an elevation of 8000 to 11,000 feet. The grassy plateaus offer an ideal summer range. Even on the wooded sides of the highest ravines there are park-like glades where the elk, late in the afternoons, come out to feed.

It is difficult to imagine a more beautiful sight than is then afforded by these stately and graceful animals. Although their number in the park may sometimes reach as high as 60,000 head, it is rare for visitors to see a single specimen.

Visitors are taken in stages around a regular route arranged for viewing the natural phenomena of that great outdoor museum.

The elk dislike to be pursued by tourists with cameras, and keep away from the stage routes. If visitors would leave the highways, either on foot or by pack and saddle trips, they would have a marvelous opportunity to study the greatest exhibit which survives of our mountain wild life—not only the elk, but mountain sheep, deer, beaver and many other animals.

BLACKSNAKE REFEATS RATTLER

How a blacksnake vanquished a big rattler is told in a very vivid manner by George Burr, of Carlyle, Ill. He says:

"One morning I went on my bottom ground to a mulberry tree to gather some of the luscious fruit. I was accompanied by my little fox terrier bitch, Tootie. I was busily engaged gathering the berries when I was attracted by the incessant barking of "Tot, so I came down from the tree to see what was causing her distraction, and I found a real war going on between a blacksnake and a rattlesnake. I at once called the fox terrier off and watched the battle between the two snakes.

"The rattler was coiled to strike, and the other one was also ready for war. The blacksnake slowly moved around the coils, drawing closer each time until the rattle would strike, then by a quick action get its body at a safe distance. This performance was kept up for some time, each moment the blacksnake drawing closer to its antagonist, and evidently watching for the time to get busy. At the physchological moment the blacksnake made its spring, and in less time than it takes to tell it, had a firm hold on the rattler near its head, wound itself around the poisonous reptile and after contact the stretching process began. The blacksnake being the more powerful crushed and choked the rattlesnake to death.

During the battle I was a silent witness for fully one-half an hour, and getting tired of inaction myself I finally prodded the blacksnake and made it turn loose of its victim. The rattler was evidently an old one, for after its slayer had moved off to safety I pinched off nine rattles and a button from it. Don't tell me a blacksnake cannot kill a rattler for I know better."—Sportmans Review.

WILD DUCKS IN A BIG CITY

Venice is famous for her pigeons. But where in the world is there a town of nearly two hundred thousand inhabitants where the wild ducks make a sanctuary of a beautiful lake lying within the corporate limits, and only five minutes' walk from the City Hall? Oakland, California—"Across the Bay" from San Francisco—claims the honor.

The first wild ducks that reach us in the Fall from the north are the Sprig, or Pintails, which arrive in California during the latter part of August, and by September 1st are here by tens of thousands. The majority of these Sprig come from the Klamath Reservation, near the border of Oregon and California. The next migratory Winter visitors arrive here a little before the middle of October from that portion of Alaska known as "The Flats." This area of about three hundred square miles of marsh land lies in the vicinity of Circle City and Rampart. As their feeding grounds become frozen they leave and hunt lower and warmer latitudes for the Winter. This second Fall flight brings countless millions of Pintail, Widgeon, Green Wing Teal, Shovelers, Gadwell and Mallard. Later follows the flight from the Yukon Delta and the Saskatchewan country bringing other hordes of game birds. The Canvasbacks, Redheads and Bluebills are the last to arrive, and they come from the big inland lakes on the borders of our northern tier of States.

The hunting season commences in California October 15th, and for the first few weeks the ducks cannot be driven away by the hunters from their favorite feeding grounds on the vast marshes between San Francisco and the Capital of the State—Sacramento. But they soon discover that lovely Lake Merritt is a sanctuary and by November 1st it is fairly alive with them. Lake Merritt is a body of water about a mile long and one-half mile wide, and lies in the heart of Oakland, and is surrounded by some of the most aristocratic homes of that city. At the head of the lake stands Oakland's famous Civic Auditorium, erected at a cost of over a million dollars, and which will seat thirteen thousand people. The lawn in front of this magnificent building borders Lake Merritt.

Miniature yachts, power-boats and countless pleasure craft make the lake their home. About a quarter of a mile of water is wired off by the city authorities, and in this inclosure the wild ducks find protection.

In the lake waters are seen the Canvasback, the Bluebill and the Pintail, together with their ever-constant friends the Marsh-Hens, and on the lawn congregate great bands of Sprig and Widgeon. The wild bird of today soon realizes that he and his fellows are safe in Oakland's bird reservation. A wide automobile drive surrounds the lake, and from early morn until nightfall hundreds of visitors throng the Park, delighted with this most strange and wonderful picture of civilization and nature in such close touch with each other. The city authorities see to the birds being fed daily, and that they are in no way molested. Oakland is indeed proud to welcome and take care of her feathered guests from the far North, knowing that the following year they will return with their broods and winter in California's most beautiful city.

W. W. RICHARDS.

The State of Washington has set aside 29,000 acres in Okonogan county for mountain sheep.

We are now at war. We have no means of knowing how long it may last, or to what lengths we may have to go to bring it to a successful conclusion. It is fundamental fact, however, that every soldier we have to send across the water will have to learn to shoot if he does not already possess this knowledge. How much better for the soldier, for the country and for our common cause, had every one of our soldiers known how to shoot when he entered the service. To train a man in the art of shooting is a long and expensive process.

Our fore-fathers were shooters. In fact it has been said that we were a nation of shooters. A great many men of the present day know how to use and properly care for a gun. Events have proven that such knowledge should be apart of the elementary education of every boy. When we train our boys in the art of boxing, it does not necessarily follow that we are making prize fighters out of them. Nor does it follow that men who know how to shoot are going to develop into murderers.

A man who knows the proper care and use of firearms, and who occasionally goes out for a little rifle, revolver or shotgun practice is pretty apt to be a sane and level headed person, a good marksman who knows the value of contact with mother nature and the bigout-doors, and from whose mind nothing is farther than the misuse of his knowledge and ability with the gun.

Now more than ever, with the lessons of the war fresh in our mind, we should take steps to entrench ourselves behind a practical knowledge of how to shoot. Two, three of four afternoons a month on the range with rifle, revolver or shotgun, will in due season develop marksmen of some ability. And when markmanship is such a potent factor in the life of the nation and the liberty of the people those who have condemned it shoud be silenced forever, and every man, woman and child should resolve and make it his and her Christian duty to attain some knowledge of the art of shooting.

HAS THIRTY-EIGHT THOUSAND WAR DOGS

France has a force of thirty-eight thousand war dogs at the front. The number of these canine soldiers has steadily increased since the beginning of the war. Of this big force at least twenty thousand are what is known as the Alsatian breed, a German dog. They have been found to be the bravest and most intelligent.

Originally the Alsatian was a sheep dog in the conquered provinces of Alsace and Lorraine, but the Germans crossed the strain with a gray wolf. The result was a big, gaunt animal with a head more like that of the wolf than that of the dog. They are fierce fellows, too, and very formidable in a fight. The French have found that these dogs take training quickly and will learn to do more things than even the famed Belgian "police dogs".

These latter rank second in number at the front. The Belgian dog is free from the wolf strain and lacks the fierceness of its Alsatian comrade. Moreover, it objects to "hiding", which is very often necessary as a corrective to mistakes.

M. Aaron, proprietor of the Dog's Palace in Paris, is the chief source of supply for the French government. He owns great breeding kennels and has combed the neutral lands of Europe for suitable dogs. The price of the war dogs has risen hugely since the war began and an untrained dog of the Alsatian variety now sells at $60, while a trained dog brings from $125 to $200.

Charles De Ryder has a good trotter in Belzabola by Redlac 2:07½. She was second to Don de Lopez in 2:08¼ in the second heat of the $5000 stake for 2:16 trotters at Phoenix, and got third money; she also finished second in $2500 stake for 2:12 trotters.

STATE LAW FOR TAKING FUR-ANIMALS IN CALIFORNIA

Trapping.—License required of trapper over 18 years old (fee, $1; alien, $2). Licensed trapper is required to report catch before July 1. Fur animals may be killed at any time when destroying property. Unlawful to use poisons in taking fur animals or to dig or smoke out skunks from dens (1917, ch. 517). Open seasons.—No open season for beaver or sea otter. Open season for black or brown bear, ring-tail cat, coon, pine marten, fisher, wolverine, mink, skunk, river otter, and fox, November 1 to end of February (1917, ch. 517). Seals and sea lions are protected at all times in game district 19 (Penal Code, sec. 637).

Propagation.—No legal restrictions.

Bounties.—Mountain lion, $30, paid by State game commission. Boards of supervisors of counties may at their discretion fix the rate and pay bounty on coyote, wild cat, lynx, bear, or mountain lion. Many counties now pay a bounty on some of these animals, especially on coyotes.

THE LOS ANGELES DOG SHOW

The inaugural dog show of the Los Angeles Kennel Club was held Nov. 15th to 17th in a commodious building on the corner of 15th and Grand streets. From every point of view the show was highly successful, there being over 300 dogs present. The management saw that the dogs were comfortably benched and that exhibitors received every consideration. The show received a large attendance, in fact, the crowd was so great that there was some delay in judging as the aisle space was crowded. However, Mr. J. C. Netz most ably carried out his duties as ring steward, and Mr. C. G. Hopton gave general satisfaction in judging the show.

The display of trophies was large and about the most valuable ever offered by a club on this coast. The President's trophy was won by the Russian wolf hound Grom O'Valley Farm owned by the Anoakia Kennels. The Danziger trophy for the best opposite sex went to the wire fox terrier Del Rey owned by Mr. Martin I. Smith. The Anoakia trophy for the best bred by exhibitor went to the cocker Ch. Bellmore Phillips of the Bellmore Kennels. Best Conditioned being won by the Cocker, San Marino Binkie, of Oak Knoll Kennels. Trophy for best puppy, the Boston Terrier, Moneta Antonette, Moneta Kennels. Best Sporting Dog, English Setter, Lomita Victress, W. A. Brackenridge, Best Non-Sporting St. Bernard, Mezza Luna Queen of the Alps, Miss C. B. Trask, Best Brace, Boston Terriers, Ch. Lady Harmless and Sensation Pilot, W. S. Macy. Best Team, Cockers, Bellmore Kennels. Best Decorated Bench, Bellmore Kennels. Anita M. Baldwin Trophy, best decorated bench and conditioned dogs, Mrs. E. Remington.

The net proceeds of this show were donated to the fund of the American Red Star Animal Relief.

Some people were made to be soldiers,
The Irish were made to be cops.
Sauer kraut was made for the Germans,
Spaghetti was made for the wops.
Fish were made to drink water,
Bums were made for the booze.
Banks were made for the money,
And the money was made for the Jews.
Everything was made for something,
But nothing was made for the miser.
God made President Wilson,
But who in h—l made the Kaiser?

GOLDEN GATE KENNEL SHOW

The Golden Gate Kennel Club gave one of the largest kennel shows held for many years in the city of San Francisco on the 14th and 15th inst. The show was for the benefit of the American Red Star Animal Relief Association. It was held in the Larkin street hall of the Civic Auditorium. Canine aristocracy of nearly every breed was on exhibition and from every point of view the show was quite successful, although some classes were lacking in competition that was ordinarily a part of the Golden Gate Kennel Club's annual exhibitions. Not only the dog fanciers, dog lovers, and the dog curious but the general public were pleased with what they saw.

The fox terriers, both smooth and wire haired, furnished the class of the show, and W. W. Stettheimer's Tallac Talisman, a wire haired fox terrier, was judged the best dog at the show and won the President's trophy presented by Irving C. Ackerman, and for the best dog of the show of the opposite sex Dr. W. C. Billings' Bilmer Fol-de-Rol, an Airedale, captured the trophy presented by Vice-President Wolfen. The exhibition of Boston terriers was unsusually large and drew a world of attention, particularly from the women folks.. The Telephone Kennels captured the prizes for Irish setters. The following is a list of the awards for the best representatives of the different breeds:

Best in show—Tallac Talisman (wire foxterrier), owner Walter W. Stettheimer.

Best in show, opposite sex—Bilmer Fol-de-Rol (Airdale), owner, Bilmer Kennels.

Best Russian wolfhound—Russia, owner I. Scheler.

Best Russian wolfhound, opposite sex—Darcy, owner Elise M. Young.

Best pointer—Dr. Daniel's Boy, owner G. L. Meade.

Best pointer, either sex, having been placed at a recognized field trial—Dr. Daniel's Boy, owner G. L. Meade.

Best English setter—Ch San Francisco Major, owner C. H. Edmunds.

Best retriever—Warstep, owner Dr. George Lee Eaton.

Best retriever, opposite sex—Kitchner Warstep, owner Dr. George Lee Eaton.

Best cocker—Ch. Chasasusque Nantahala, owner Bellmore Kennels.

Best cocker, opposite sex—Espeer from Golden State, owner Louise Hering (Golden State Kennels).

Best cocker, novice or limit—Cherry, owner Alex Wolfen.

Best cocker, not owned by member of Cocker Sporting Club of Southern California—Espeer, from Golden State, owner Louise Hering (Golden State Kennels).

Best collie—Ch. Seedley Blue Sky, owner Mrs. E. F. Brown.

Best collie, opposite sex—Brighton Foxy, owner Imma Kennels.

Best collie puppy—Brae Brock Blossom, owner Brae Brook Collie Kennels.

Best collie, novice or limit classes—Imma Seedley Scruple, owner Imma Kennels.

Best collie team—Mrs. E. F. Brown's collie team.

Best German sheepdog—Lou Neuenberg v. Leonberg, owner Mrs. Charles Lyman.

Best German sheepdog, opposite sex—Nero von Siechelgerten, owner Aime Gyselbrecht.

Best Old English sheepdog—Ch. John Bull, owner Mrs. M. Colverd.

Old English sheedog, opposite sex—Melba, owner Mrs. M. Colverd.

Best bulldog, Chineham Saintonge, owner Miss Mattie Ballantyne.

Best bulldog, opposite sex Vedra, owner, M. Joe Murphy.

Best puppy bulldog, De. Fi, owners, Mr. and Mrs. H. H. Gutsch.

Best novice bulldog, Susan Goldstone, owner, Hess ieBallantyne.

Best American-bred bulldog, Chunky Malone, owner D. R. E. Whitted.

Best puppy bulldog, Sinful Sam, owners, Mr. and Mrs. H. H. Gutsch.

Best dog bulldog, Chineham Saintonge, owner Mattie Ballantyne.

Best Airedale, Bilmer Fol-de-Rol, owner, Bilmer Kennels.

Best Airedale, opposite sex, Medway Admiral, owner, Ray W. Taylor.

Best California bred Airedale, Bilmer Fol-de-Rol, owner, Bilmer Kennels.

Best Airedale puppy, Prince, owner, Mrs. Miller.

Best bull terrier, Southboro Sapper, owner, John D. Stelling.

Best bull terrier, opposite sez, Fricsco Lady, owner R. W. Smith.

Best French bulldog, Ch. Vendone Bounou, owner, B. I. Bloch.

Best French bulldog, opposite sex, Petite de la Mare, owner, Grace R. Schmolz.

Best French bulldog puppy, Jolie Marquise, owner, E. L. Meadows.

Best novice French bulldog, General Joffre VIII, owner, C. J. Winslow.

Best Boston terrier, Ch. Midget King, owner, J. B. Rice.

Best Boston terrier, opposite sex, Baby Ruth, owner T. Martin Smith.

Best Boston terrier puppy, Monetta Antonette, owner, Mrs. Victoria Connelly.

Best Boston terrier puppy, opposite sex, McDuff, owner, Mrs. F. S. Huffman.

Best Boston terrier novice, McDuff, owner, Mrs. F. S. Huffman.

Best smooth Fox terrier, Ch. Tallac Varminty Rivoli, owner, Walter W. Stettheimer.

Best wire-haired fox terrier, Tallac Talisman, owner, Walter W. Stettheimer.

Best wire-haired fox terrier, opposite sex, Tallac Fancy, owner, Walter W. Stettheimer.

Best Irish terrier, Lord Demon, owner, Charles H. Lowe.

Best Irish terrier, opposite sex, Moondine Red Fly, owner, Paul McKenna.

Best Irish terrier puppy, Peg o' My Heart, owner, Suzanne V. Bolles.

Best West Highland white terrier, Ardoch Connie, owner, Mrs. D. O. Lively.

Best West Highland white terrier puppy, Loch Lomond's McDazzle Deachie, owner, Mrs. D. O. Lively.

Best West Highland white terrier team, Mrs. Lively's team.

Best Pomeranian, Liberty Belle, owner, Mrs. K. Hayes.

Best Pomeranian, opposite sex, Ralston Teddy, owner, John Skinner.

Best Pekingese, Ewhurst King Dodo, owner, Mrs. William Jackson.

WHEN THE BLACK BASS FEEDS

The black bass of the rivers is not to be cheated of his favorite food, for, as the shadows fall, you will find him on the edge of the rapids, lying in the circling eddies, and woe betide a hapless insectl when it chances to come within jaw-reaching dis, tance, or within the possible compass of a sudden dash into the tumbling water, in which, however, the black bass does not linger a minute, but returns at once to the eddy.

As the twilight deepens the black bass will be found either rising here and there to the surface of the deeper water, feeding on the insects that fall upon it, particularly the gloaming-loving moths, which are, as a rule, swimming near and upon the rivers containing bass. Or they may be seen in the shallows along the shores making the water fairly boil with their dashes into depths of merely two or three inches. They have been seen in the exitement of feeding with their dorsal fins entirely out of the water chasing the minnows, and either causing them to flutter upon or throwing them by impetuous rushes high and dry on the banks. It is at such an hour that the angler meets with the greatest success with the rod, and it matters but little what feathers he uses, or how immature he may be in handling them, provided he makes his cast at least fifty feet in length and stands in deep water when casting.

From what has been written above, the layman would naturally think that the black bass is a coarse feeder. No so. He is daintier than the brook trout, and feeds less to repletion. It is to be doubted that a black bass was ever taken, with either natural bait or artificial flies, that had a half-digested minnow, too big to swallow entire, sticking from its mouth, and yet this condition presents itself on a trout stream on more than one occasion; fontinalis seems to be more of a glutton than mycropterus, as the scientist would put it, and the experienced angler knows the first named (the trout) is never found in so great a state of repletion that he cannot be tempted by a dainty feather cast by a wizard hand, while the other, the bass, will lie for hours motionless in a pool, apparently chewing the cud of reflection or digestion, indifferent to all the ills of life as well as the full fruition of fish blessedness. They will not fan a tail at the most tempting morsals placed under their noses.

THE UNITED STATES REVOLVER ASSOCIATION WHAT IT STANDS FOR

In March, 1900, a group of men interested in shooting with the revolver gathered in Conlin's Gallery, New York city, in response to a call issued by a number of enthusiasts who felt that the time was ripe to start a national organization.

The result of this gathering was the United States Association.

Its object is to encourage revolver and pistol shooting. The organization is run on a non-profit basis and is supported by the dues and the entry fees from the championship matches which are run off twice a year. There are a set of indoor championships for several different classes of shooting and another set of outdoor championships. These contests are open to all.

Before the U. S. R. A. assumed control, there was an utter lack of uniformity in the conditions under which the revolver shooters of the country held their matches. Some clubs permitted the use of weapons having barrels of any length that seemed to suit the fancy of the individual, and there were no restrictions as to the type of sight that could be used.

Now, thanks to the governing body, a club in any section of the country can compete on even terms with any other club with the assurance that the conditions under which their competitors will shoot will be the same as the ones under which they themselves make their scores.

A record book is kept by the association and a shooter can find out the best score that has ever been made under any of the standard sets of conditions, by simply writing for the information.

THE INTERSTATE ASSOCIATION'S ANNUAL MEETING

The annual meeting of the stockholders of The Interstate Association for the Encouragement of Trapshooting was held at the Association's office with The Corporation Trust Company, 15 Exchange Place, Jersey City, N. J., on Thursday, Novembre 8th. The annual meeting of the Directors was held at the Hotel Astor, New York, on November 8th and 9th.

There were present at the Directors meeting Messrs. Murray Ballou, Edward Banks, C. R. Babson, T. L. Briggs, J. F. Carraher, J. L. Clark, J. D. Chappell, T. E. Doremus, F. G. Drew, O. R. Dickey, E. R. Galvin, T. H. Keller, T. A. Marshall, F. Manning, Paul North, W. F. Parker, J. T. Skelly, Elmer E. Shaner, L. J. Squier and H. E. Winans, Directors of the Association. Messrs. Neaf Apgar, T. Baker, R. W. Clancy, Peter P. Carney, J. S. Fanning, Fred Pond, H. S. Rosenthal, J. S. Samelson, H. J. Strugnell, C. T. Summerson and E. Reed Shaner were also present.

The following officers were elected to serve during the ensuing year:

President, T. H. Keller; Vice President, F. Hanning; Secretary, E. Reed Shaner; Treasurer-Manager Elmer E. Shaner.

By resolution, it was decided to continue in 1918 the same general Registered Tournament policy that has been in force during the past several years and to establish a Development Department in connection with the Association's work, plans of this new department being outlined in a general way. The Development Department consists of F. Manning, Chairman, T. E. Doremus, T. L. Briggs, E. I. La Beaume and C. R. Babson.

By resolution, it was decided to print in booklet form the official averages of 1917, and to present a trophy to the winner of the high amateur average.

By resolution, it was decided to officially announce from time to time during 1918 the averages of all trapshooters who have shot at 500 or more targets at Registered Tournaments.

By resolution, it was decided that unless a complete report is received at the Pittsburg Office of the Association within thirty days after the close of a Registered Tournament the scores made at the Tournament will not be included in the official records, and any contribution of cash or trophies made to said Tournament by The Interstate Association will be withheld.

By resolution, it was decided that 100 moneys be provided for in the main events at the Grand American Handicap Tournament when entries in these events exceed 350—under 350 entries, 50 moneys as at present.

By resolution, it was decided to eliminate the Professional trap at the Grand American Handicap Tournament, and that there be no competition by Professionals at the Tournament other than one event to be known as the Profession Championship. This event to be at 200 targets, 18 yards rise, and to be shot over the same traps at which the Amateurs compete.

By resolution, the Grand American Handicap was awarded to Chicago, to be held under auspices of the South Shore Country Club.

By resolution, it was decided to discontinue giving the Southern, Eastern, Western and Pacific Coast Handicaps, and substitute instead thereof a handicap event at each State Tournament. The plans for this new event have not been korked out in detail, but they will be given full publicity in due season.

By resolution, it was unanimously decided that Government service on the part of Amateur trapshooters employed to instruct recruits and others in the art of trapshooting will not, in any way, affect their Amateur standing.

By resolution, honorary press membership was conferred upon the National Sports Syndicate, of which Syndicate Mr. Peter P. Carney is the head.

The following Committees were appointed:

Tournament Committee: T. E. Doremus, Chairman; F. G. Drew, L. J. Squier, J. T. Skelly, J. L. Clark.

Trophy Committee—C. R. Babson, Chairman; J. D. Chappell, E. R. Galvin.

The make-up of the Committee to allot handicaps to entrants in the 1918 Grand American Handicap will be announced later.

Mr. H. S. Rosenthal of the Sportsmen's Review Publishing Company addressed the meeting on the subject of the Munition Tax. A vote of thanks was extended to Mr. Rosenthal by the manufacturers represented.

After discussing several matters of no particular interest to the general public, the Directors meeting adjourned to meet at Chicago, Ill., in 1918 during the week of the Nineteenth Grand American Handicap Tournament.

THE INTERSTATE ASSOCIATION,
E. REED SHANER, Secretary.

THE FARM

LIVESTOCK BREEDING IN WARTIME

The shortage of animals and animal products in this country should be a stimulus to improved livestock production. There has not been such a great shortage in the livestock population in many years. It is doubtful if there has ever been so great a shortage of livestock in view of the needs of humanity.

It has been repeatedly said by men acquainted with conditions that the wise livestockman will not only continue in business, but increase his holdings. A good many farmers, however, have hesitated until recently to increase their livestock because of unusual conditions. High prices and the urgent need for increased production have induced farmers and livestockmen to increase production. This is a good time therefore for a step toward more profitable production.

The advantages of community livestock breeding which existed before the war still hold good, and present conditions emphasize the importance of community breeding more than ever before. Wonderful progress could be made in livestock improvement if the increase which undoubtedly will be made could be obtained from pure-bred sires. Thus, a relatively larger percentage of high grade animals could be produced than if the improvement were started when the livestock population of the country were normal. If better sires are used at this time the resulting increase in the total livestock population will contain a larger percentage of good blood than the livestock population of this country has ever had.

Communities can obtain sires, to be used on the existing females, which an individual could not afford. In many communities there is no one who is willing to make the necessary outlay for a good sire, and no person should be expected to bear the entire burden of livestock improvement for the community. If the community cooperates in livestock breeding they can obtain the services of a good sire at a comparatively low cost. Most successful community breeding involves organized and specialized production. Cooperation therefore is necessary to the successful outcome of the plan.

Cooperative breeding helps the small breeder, offers opportunity for the exchange of sires with other communities, affords cooperative marketing and buying. It also stimulates community spirit just as any other live, working organization will do. It serves as an excellent advertisement for the community, as has been demonstrated in several Missouri counties.

Details concerning community livestock breeding will be found in Extension Circular 33 of the University of Missouri College of Agriculture. Persons interested in organizing community breeding associations should obtain a copy of this circular. The Agricultural Extension Service of the College will furnish constitution and by-laws for such organizations. These may be adapted to local conditions.

AYRSHIRES FOR PRESTON INDUSTRIAL SCHOOL

One of the largest single sales of registered Cattle made in California this year was the sale of 30 registered Ayrshires from the Steybrae Herd of E. B. McFarland, San Mateo, the purchasers being the Preston Industrial School at Ione, Amador Co., California. The animals range in age from six months to four years. The bulk of the stock are young heifers bred to Mr. E. B. McFarlands' great bull, Robin Hood.

L. S. Willard and Dr. Keane, State Veterinarian selected and passed on the animals, all of which had a clean bill of health. The 30 animals sold for $10,000.

DAIRY COW COMPETITION, 1916-18

The College of Agriculture of the University of California will conduct a competition for dairy herds during the coming year, in connection with the official testing of dairy cows for production of butter-fat in which work the college has been engaged for a number of years past. The competition has been rendered possible through the hearty co-operation of breeders of pure-bred dairy cattle, feed dealers, creamery companies, and other parties interested in the advancement of our dairy industry, who have subscribed a fund of over $4700 for the award of prizes for records of production made by cows in the competition. A number of special prizes of pure-bred bull calves, dairy apparatus, and feeds have likewise been donated in order to make the competition of general interest to dairy farmers and to insure a large participation in it.

The competition is not restricted to pure-breds, but is open to all kinds of cows, including grades, and cows of mixed breeding. Cows of the latter classes do not come into competition with pure-breds in the awards of most prizes, since a considerable number of the prizes are awarded for records made by such cows only. The value of the cash prizes to be competed for by grades alone amounts to over $1000, and a large number of special prizes will be awarded for records made by grade or common cows, or by cows irrespective of their breeding. It is hoped that the provision made for liberal prizes for this class of cows will appeal to many farmers owning common dairy herds and that they will enter cows in the competition in large numbers.

TO PROMOTE HOG RAISING

Joseph P. Cotton, Chief of the United States Food Administration meat department, is doing all possible to promote the raising of hogs, and declares that the main purposes of the division in regard to this matter are as follows:-

To see that the producer at all times can count on a fair price so that it will be profitable for him to raise hogs,

To see that the farmer increases the number of hogs bred,

To limit the profit of the packer and the middleman, and

To eliminate speculation.

Fair prices to the farmer for his hogs will be brought about by the full control which the food administration has over the buying of the allies, our army and navy, the Red Cross, the Belgian Relief, and the neutrals, which together constitute a considerable factor in the market. He states that so far as the administration can affect the matter, prices will not go below a minimum of $15.50 per hundredweight for the average of the packers' droves on the Chicago market, until further notice. The estimated number of hogs is four million less than it was a year ago in this country and in face of this we need more hogs than ever before. This can only be accomplished through the activity of the farmers and swine breeders in this country, and we hope that they will see the wisdom of taking every reasonable step to increase the supply of hog products.

Veterinary Dentistry

Ira Barker Dalziel

Every facility to give the best of professional services to all cases of veterinary dentistry. Complicated cases treated successfully. Calls from out of town promptly responded to.

SAVE-THE-HORSE

TRADE MARK REGISTERED

Greetings

Our most hearty wishes for a merry Christmas to all Masters, Patrons and Friends of Man's noblest of animals,—THE HORSE.

It is at the shrine of the latter for whose betterment and fullest utility we are one and all so ceaselessly laboring, we especially pay homage in wishes for a continued and inrceasing usefulness and success. May the New Year bring to the horses, horsemen and all America Prosperity and Victory.

TROY CHEMICAL COMPANY

SAVE-THE-HORSE

~~1917~~ Now for 1918

In all our 23 years never more than this year—1917—has it been made so clear why Save-The-Horse stands out in triumph and popularity.

One learns by experience to be thoroughly careful in banking money;

For the successful treatment of injuries and diseases causing lameness and blemishes, Save-The-Horse is like a federal reserve bank with the government behind it. It is a remedy on which can be placed absolute confidence—and back of it is a guarantee or contract as good as a Government Bond, to protect you.

It's a poignant fact that Save-The-Horse was the first and is now the only remedy to survive in giving a signed legal contract to refund money should the remedy fail. Merit alone has made it the peer of all medical discoveries for the treatment of

Thoropin—**SPAVIN** or **Any** Shoulder, Knee, Ankle, Hoof, or Tendon Trouble, no matter how old, serious or complicated.

NO BLISTERING. HORSE WORKS AS USUAL

$5.00 a Bottle. Druggists Everywhere Sell Save-The-Horse, with Contracts, or we send by Parcel Post or Express Paid.

*Breeder's record.

The winnings of some of the drivers and horses will be augmented by the addition of money won in races on the Canadian and North Pacific circuits before taking part in the California circuit, as only the meetings in California are compiled in the above table, with the additional winnings of those on the California circuit that took in the Salem and Phoenix meetings.

Aaggie Acme of Riverside 2d

WORLD'S CHAMPION

The world's record for butter production has again been broken by a purebred Holstein cow. Aaggie Acme of Riverside 2d, by producing 1331.77 pounds of butter in 365 days on strictly official test, takes the championship to the Pacific Coast.

Aaggie Acme was not content to merely break a record—she smashed three world's records,—two of them strictly official, the other was semi-official one half the time and strictly official the other half. Her test was completed November tenth. The new records are:

305 days—22092.8 pounds of milk and 1167.96 pounds of butter;

365 days—24690 pounds of milk and 1331.77 pounds of butter. Both strictly official records. Her semi-official butter record for two years is 2426.51 pounds of butter.

All three records were formerly held by the purebred Holstein cow, Keystone Beauty Plum Johanna, whose figures as a senior four-year-old were 1294.71 pounds of butter in a year; 1121.38 pounds in 305 days; 2403.6 pounds in two years. She is still world's champion for her age, both of her year's records being made at less than full age.

The present world's champion, Aaggie Acme of Riverside 2n, is owned by A. W. Morris & Sons, Woodland, California. She is daughter of King Mead of Riverside, sire of seven daughters with yearly records. Her dam is Aaggie Acme of Riverside, which is also the dam of the record cow's sire, so that Aaggie 2n is a sister to her own father.

This is the Kind of Horse the Government Wants

No horse with a Spavin, Splint, Ringbone, Curb, Bony Growth, Capped Hock, Wind Puff, Strained Tendon or Sweeny can now pass the keen-eyed Inspectors of the Government Remount Stations.

Splendid-looking horses—otherwise sound—are being turned down because of some blemish that could be quickly cured with

Gombault's Caustic Balsam

Here is your chance to make money for yourself and at the same time help in the Government's great Thrift and Production movement.

Put your horse into condition with **Gombault's Caustic Balsam.** A safe and reliable remedy.

Gombault's Caustic Balsam if applied immediately after burns, bruises or cuts, is a perfect antiseptic—soothing and healing. An absolutely safe external remedy for man or beast.

Every bottle of **Caustic Balsam** sold will surely give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by parcel post with full directions for its use. Send for descriptive circulars, testimonials, etc.

A Red Cross Christmas

To Those Who Feel Poor

I write as a brother.
We are a large family.
This world war Made in Germany against which we are fighting has sent our incomes down and and our expenses up.
The pinch hurts, but it is not going to kill us.
We still have enough and something to spare.
Though we feel poor don't let us be impoverished by selfish fear.
Let us save in food, in service, in clothes, in luxuries, but not in money.
Let us use it by giving it to save the wounded, the suffering, our friends, our country.
Let us keep Christmas this year by keeping up the the Red Cross.
Then it will not be a poor Christmas, but a rich Christmas in our hearts.

Henry van Dyke

High-Class Stallion
FOR SALE

Sired by Carlokin 2:07¼

Dam Johanna Treat (dam or Del Coronado 2:09¼, Cora 2:07¼, etc.)

A very handsome promising, good gaited young horse. Trotted a mile in 2:15, half in 1:06, last quarter in 31 seconds, last summer, driven by his caretaker, Harvey Wortman. Having no use for this horse as my ranch takes all of my time, I will sell him cheap or trade him for work horses, mules, young cattle or other live stock. Address,

C. L. De RYDER,
R. D., Box 266, Selma, Cal.

SHIRE BREEDERS

The annual meeting of the American Shire Horse Association was held in the Pedigree Record Building, Chicago, on Dec. 4. About fifty members were present and President J. G. Truman occupied the chair. Reports of Secretary Chas. Burgess and Treasurer Edwin Hobson showed that the total receipts for the year were $5,866.50. Total expenditures, $6,249.92. The cash balance on hand on Dec. 1 was $15,929.98.

Sixty new members have bought stock since the last annual meeting, thus raising the total membership to 1,031.

Following the address of Richard C. Craven, field director of the American Red Star Animal Relief, Albany, N. Y., the sum of $500 was appropriated to aid in this work. A cablegram from J. H. Truman, Whittlesea, England, expressed confidence in increased Shire production.

Secretary Chas. Burgess made the following historical statement:

"On Jan. 29 next, thirty-three years will have passed since this association was organized. Our first meeting was held in the Grand Pacific Hotel and the late J. H. Sanders, founder of the greatest live stock journal ever published, acted as chairman. There were twenty-three Shire horsemen present and A. G. Danforth, Washington, Ill., was elected president, serving two years. It was my honor to act as secretary and I have been acting in that capacity ever since. Eighty-two meetings have been held since that time and your secretary has attended every one. We have published ten volumes of our studbook and have received 1,300 pedigrees for Vol. 11. To the officers of this association, the presidents, Mr. Danforth, Mr. Galbraith, Mr. Prichard and Mr. Truman, as well as all the other officers and members of this association, I owe a debt of gratitude for their strong support. Shire breeders must realize that this is an opportunity of a lifetime, as few horses will be brought from France or Belgium for many years and the American breeder must furnish the horse-breeding stock for future generations in this country. The battle will lie between the breeders of the different draft breeds as they are bred, fed and matured in America. If the breeders of Shires use good judgment in selecting and mating, they need have no fear for the outcome.

Members expressed regrets over Mr. Burgess' retirement and voted to present him with a suitably engraved gold watch. The following officers were elected for the ensuing two years: President, J. G. Truman; vice-president, George McCray; secretary, W. G. Lynch, Tonica, Ill.; treasurer, Edwin Hobson, and board of directors: Chas. Burgess, Chas. Finch, George Wendel, Henry Wheatley, F. A. Stoll, Thomas Holbert, A. Latimer Wilson, and Thomas Kiddo.

POLAND-CHINA MEN MEET

The American Poland-China Record Co. held its annual meeting in Chicago on Dec. 5. Members were present from 14 states. Secretary W. M. McFadden, Chicago, reported that for the year ended Oct. 31 he had transacted 33 per cent more business than in any previous year. The total receipts amounted to $36,157.40. The treasurer's report showed a balance on hand of $37,418.

Three new directors were elected, as follows: H. M. Larmour, Lott, Tex.; P. W. Young, Prosper, Minn., and J. P. Bennett, Lees Summit, Mo. Old officers were re-elected as follows: President, Thos. Hunter, Morrow, Ohio; treasurer, P. A. Blackford, Hillsboro, Iowa; secretary W. M. McFadden, Chicago; field secretary, Ray Davis, Chicago; executive committee: J. M. Kemp, Henry, Ill., H. L. Currie, Brownsville, Tenn., and C. W. Philip, New Sharon, Ia.

The treasurer was authorized to subscribe liberally to any United States Government loans which may be announced in the future. A campaign of breed promotion was mapped out, including an expansion of the futurity prizes at the various fairs, the sending of a view herd into the southeastern country next fall and continued support to the National Swine Show. An appropriation was made to supply $100 per month for three years toward the salary of a paid secretary of the National Swine Growers' Association. Breeders who might be interested in planning to exhibit barrows at the next International Live Stock Exposition were assured that $2,000 in prizes would be offered for Poland-China fat stock.

High-Class Saddle Stallion For Sale or Lease

REX MONTGOMERY No. 2011

American Saddle Horse Register

REX MONTGOMERY is a very handsome stylish black horse, foaled 1899, stands about 16 hands, and weighs around 1250 pounds. He is sound, can go all the gaits, is speedy and easy. Has a remarkably good disposition and is bred in the purple, being sired by Rex Denmark, out of Ellen B. by Black Squirrel. He has all the qualities to make him a blue ribbon winner and is brother to the famous Rex McDonald. Anyone looking for an animal of this kind should investigate this and see some of his colts. Will be sold at a moderate price or leased to a responsible party. For further particulars address

1 RIFLE
10 BOXES CARTRIDGES
10 PAPER TARGETS

What to give the boy? That is the question vexing the minds of many parents at this time when all of us begin to look ahead to the Holiday festivities. There is no better gift in the opinion of the enthusiastic sportsman than a .22 caliber repeating rifle for the youngster. The Remington UMC Model No. 12 is a splendid firearm for the purpose because it is absolutely safe—hammerless and solid breech.

Parents in general are looking more to the small calibre rifle as an appropriate gift for the boy. Shooting under proper supervision is an ideal sport. The youngster learns to think and act quickly and to develop the competitive spirit in a manly way.

Your local dealer will be glad to show you the Remington UMC line of firearms and ammunition. Paper targets and instruction booklets will be presented to your boy upon your dealer's request.

Look for the dealer who displays the Red Ball Sign of Remington UMC — Sportsmen's Headquarters—in his store.

800	for Two-Year-Old Trotters.	500	for Two-Year-Old Pacers.
50	to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.	50	to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
50	to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.	50	to Owner of Stallion, Sire of Winner of Three-Year-Old Pace When mare was bred.

$150 in Special Prizes was paid to Stallion Owners in December, 1914.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-year-olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

E. P. HEALD, President.

FARM LABOR IN CALIFORNIA FOR 1918

Facing a threatened decrease in production, owing to the scarcity of farm labor and under the spur of the nation's appeal to California to double its production of foodstuffs, the California Development Board has gone on record as favoring the importation of experienced Chinese farmers for the duration of the war only.

Some weeks ago the California Development Board appointed a Farmers' Committee to investigate the farm labor situation. Visits were made to various sections of the state. Correspondence was had with the many farmers' organizations, commercial bodies and with many individual farmers. Without exception the admission was general that more farm labor was an absolute necessity even to maintain the normal production of the State. To increase production was, with the present force, out of the question.

From various localities it was ascertained that some would plant no greater acreage than they could cultivate and harvest within the force of their own families.

A letter received from a farmer in the upper Sacramento Valley is typical. He says: "Normally I plant one thousand acres of wheat and run cattle on several thousand more acres. I employ from ten to sixteen men the year round. Last season I was compelled to get along with two men and a boy and a few tramp laborers that work two or three days at a time, then quit, go to the nearest saloon, drink up their wages and tramp to the next job. I have six small children, and my wife could not secure domestic help at any price and had to do all the housework and cooking herself. I am willing to produce to the capacity of my land, but I must have labor."

The question of conscript labor was taken up, and the Committee failed to find a farmer who was willing to accept conscripted labor that probably never saw a field plowed, team harnessed or seed planted. Nor did they care to depend on labor that would have to work under guard.

Filipinos, where they have been tried, have not proved satisfactory in the heavy work of a California ranch, and their deportation at the close of the war would be a serious problem, extremely doubtful of execution, as the islands are the property of the United States.

A few favored Mexicans, but the average Mexican brings a family of consumers with him, he cannot be deported, and the latest advices are that many of the Mexican laborers now in this state are returning to Mexico under the belief that their government will cut up the large land holdings into small farms.

The Santa Clara Valley alone lost three thousand of its young men by the first draft, and more will go in the second and successive drafts, and there is no labor in sight to take their places. The cities may fill their clerical positions with women, but on the farms plowing, seeding, planting, harvesting, stock-raising etc., require muscle and brawn in which the state is woefully lacking, and what remains is being taken to meet the paramount military requirements of the nation.

The Executive Committee of the California Development Board met Monday to consider the report of its Farmers' Committee and, thoroughly discussed the question from all angles. In view of the fact that our fields and orchards are being drained of its strong young manhood to make up a national army that must be fed and clothed, and in view of the further fact of the demands of our Government and the increasing demand of our European allies, the Committee held that farm labor was a prime necessity, and recommended by the following resolution that the offer of our Chinese ally to loan experienced farmers for the duration of the war only, be accepted. A complete copy was telegraphed to the President.

Whereas, The National Government is urging the State of California to greatly increase its production of foodstuffs in 1918 to meet the exigencies of war; and

Whereas, The scarcity of farm labor in 1917 resulted in a loss to producers and it was only by the Providential extension of a favorable season aided by almost superhuman effort that greater loss was avoided; and

Whereas, The paramount military requirement of our National army has taken from our orchards and fields a great number of our native farmers and will take more; and

Whereas, By the said scarcity of labor many farmers will be forced to plant no greater acreage than they can cultivate within the force of their immediate families, thus greatly decreasing production; and

Whereas, Every California farmer is a loyal American, willing and eager to aid his country to the limit and beyond; therefore be it

Resolved, That the California Development Board appeals to the President to use such measures as may be necessary to permit the importation of farm laborers for the duration of the war; and be it further

Resolved, That the California Development Board is unalterably opposed to the importation of labor that can not be deported and which would remain to compete with our sons and brothers on their return from military service; therefore be it further

Resolved, That the offer of our Chinese allies to loan us, for the period of the war, any desired number of experienced farmers to be returned to their own country on the issuance by the President of the United States of a proclamation of peace be accepted.

The question of farm labor in California is one of the most important subjects that has come up in connection with war measures, and the only practical solution of it would be the importation of Chinamen as proposed by the California Development Board. The Chinese Six Companies report that they are able to and will contract to bring in all the farm labor that we require during the war, and that on the proclamation of peace they will be returned to China. Also that a rate of wages will be fixed that will enable our farmers to cultivate their land at a profit, with the assurance of sufficient, competent help. This labor would in no way be in competition with the labor unions, as it is restricted to work on the farms and would be a benefit to every wage earner, as on account of increased production at less food saving propaganda. Here is a way to produce more food on the Pacific Coast than possibly could be saved by the people stinting themselves. It looks short-sighted not to grasp the opportunity.

At a meeting of the stewards of the Grand Circuit held at Columbus January 8th, all arrangements were made for the racing season of 1918, and suggestions were received from owners, drivers and minor associations in relation to anything that might be considered for the welfare of the sport.

It was apparent that a universal sentiment prevailed in favor of taking some steps to bring about the amalgamation of the National and American Trotting Associations and the Trotting Register Association, to the end that there would be but the one governing body, and in executive session the stewards by a unanimous vote, adopted a resolution recommending such a step and pledged themselves to do everything in their power to bring about this most desirable condition.

In the course of the discussion of the advisability of amalgamating the parent associations, W. H. Gocher announced that President John C. Welty, of the N. T. A., had expressed to him a desire to see such a union. W. H. Smollinger of the A. T. A. also stated that such action would be desirable but expressed his doubt of the possibility of such an occurrence, except under the plan of retiring from office all present officials of both associations.

The testimony of Mr. Ira Ryerson, the American trainer who has just returned from Austria, as to the racing situation in that country, furnishes a significant commentary upon the timorous promoters of the sport here at home, quite a few of whom are doubtful about the advisability of keeping their gates open on account of the war. Mr. Ryerson states that racing has been conducted at Vienna and Budapest right along through the three years of the war, just as it was before, the present racing season having opened March 15 and been concluded November 15, while the attendance was large and the association has been very prosperous. This vigorous sporting spirit, right at the seat of the war, where the resources of men and money are taxed to the limit to meet the country's necessities, should make the week-kneed, hesitating, fearful souls in this country, 3000 miles away from the combat, hang their heads. In America today every man is a soldier, in some capacity, and the first qualification of a soldier is bravery; the courage to face the daily tasks and the usual pursuits with a spirit of willingness to sacrifice, if necessary. but a dauntless determination to go on, no matter what it costs. The fair or racing association that stops operations at this time because of the war, is surrendering without a fight. It is conquered by a menace and not by a foe or a blow. We are glad to know there are few of this kind here, so far as the plans for the coming season have been announced.—Trotter and Pacer.

The officers of the California Fair and Racing Circuit will call a meeting in the near future with a view of inducing the representatives of the different race tracks to hold harness meetings during the season of 1918. It is to be hoped that they will meet with a better attendance than was present at their last efforts, when but two or three towns were represented. The outlook at present is not particularly rosy; the State Fair will be held as usual and will offer some purses for the trotters and pacers; Riverside will hold its regular annual event, and Ferndale has not missed holding a fair for years and years. Outside of the Breeders' meeting these are the only towns which can be positively counted on for racing this year. It is a deplorable condition and the only way in sight to revive harness racing in this State is to encourage the giving of county fairs and incorporate the racing into them. The Fresno County Fair was a notable example of what could be accomplished along these lines and has been a great success up to date; but owing to complications which have arisen the management has decided not to hold any more fairs for the present. The main attraction at the fairs is always the racing and while racing alone will not draw the attendance, neither will a fair without racing prove a success; this has been demonstrated time and again. The county fair is properly managed is bound to be a success in most localities and with the success of the fairs the success of racing will follow. The following article taken from the columns of the Spirit of the West is quite pertinent to the subject and for that reason we reproduce it here:

"Too many people look upon the county fair of this day and age purely as an amusement proposition; a place to go and see the side shows, spend a few nickels at the doll racks and lemonade stands (who ever heard of a county fair without pink lemonade and hamburger sandwiches?), glance over the live stock and grain exhibits and then go home and forget about it till the next year. People, as a whole, are getting away from this view more and more as the years pass, but there are still hordes of those who attend each year that fail to realize the true educational value of the fair, and fail to get the full amount of knowledge and education possible out of it. We do not mean that the fairs should abolish the amusement side of the fair altogether. The average American citizen demands amusement along with the educational features, and usually by noon he is pretty well fed up on the agricultural and stock exhibits, and in the afternoon likes to see the races, etc.

The county fair is a proposition in which everyone should be interested, and should receive the undivided support of the merchants and business men of the county, for there is nothing more important to the development of the resouces of our country than is the fair. The possibilities are unlimited, and the benefits to be derived, both directly and indirectly, are far beyond the estimation of mere man to conceive. Here is where friends and neighbors meet and exchange ideas. As an educational institution it is one of the best ways imaginable of spreading the gospel of better farming and more scientific stock raising. It is the visible and perceptible expression of progressive agricultural and industrial life of the community.

The average county fair is not run for the benefit of any one individual or of a few individuals, any more than are the churches, lodges, chautauquas, etc. It is for the benefit of all, rich and poor alike. It is one of the few places where all classes can mingle together on an equal footing and feel at ease with each other. A common interest put all classes on an equal plane, and this is one of the things the county fair does. While the benefits to be derived from it may be of an indirect nature, they are nevertheless there, just as surely as the sun shines or the night follows day. It is about the only place where the farmer and breeder of fine stock can advertise his stock and at the same time get paid for it. Every man, woman and child of every county should be up and pulling for their county fair, every month in the year, for it will do more to make prosperous farms and boost food production than almost any one other thing. And prosperous farmers mean prosperity for the merchants, and increased food production means the winning of the war."

That race horses are almost as precious and valuable as gold nuggets is the report that Andrew Robertson, one of the proprietors of the Allendale Stock Farm in Melbourne, brings from England to San Francisco. Robertson has just arrived from spending four months in London trying to purchase blooded stock to be shipped to Australia and he had to return empty handed because of the high prices that are ruling in the auction ring.

"You would be surprised to note the value that they place on thoroughbred horses over there," says Robertson. "It is not due to the scarcity of blooded stock but rather to the demand of the buyers. I passed through San Francisco seven months ago with $50,000 to invest in English-bred horses but they were beyond my reach."

Another reason that is blocking the efforts of foreign buyers in the London horse market is the prohibitive freight rates. It would cost $750 per horse for the shipment to Australia from England. For this reason Robertson does not believe American turfmen will do any extensive importing of horses this coming season.

PROPOSED AMENDMENTS TO THE TROTTING CODE

From the office of the secretary of the National Trotting Association, at Hartford, Conn., comes the following official circular, dated January 7, which we hasten to place before our readers, its importance making it of interest to all horsemen:

To Members of the National Trotting Association:

The following amendments to the rules are recommended by a joint committee of the National and American Trotting Associations, and will be submitted to the next congress, which will be held February 13, 1918:

Rule 3, Section 3, amended by changing the word "third" in the third line to "second," making the section read as follows:

"Sec. 3. In a two-in-three race a horse must win two heats to be entitled to first money. If the race is unfinished at the end of the second heat, a horse not standing for money shall be ruled out."

Rule 3, Section 4, amended by changing the word "fourth" in the third line to "third," the word "fifth" in the fourth line to "fourth," and the word "sixth" in the sixth line to "next," making the section read as follows:

"Sec. 4. In a three-in-five race a horse must win three heats to be entitled to first money. If the race is unfinished at the end of the third heat, a horse not standing for money shall be ruled out. After the fourth heat, only heat winners shall start, unless two horses have each won two heats. In that event they only shall start in the next heat."

Rule 3, Section 5, amended by striking out the period after the word "summary" in the fourth line and adding the following: "except in the event of three horses each winning a heat." The next sentence also amended by striking out the words "of a tie the horses tied" and inserting the word "they" in place thereof, making the section read as follows:

"Sec. 5. A three-heat plan race is an event limited to three heats, with the money divided as provided in the published conditions, less 10 per cent of the purse, which shall be awarded to the horse standing best in the summary, except in the event of three horses each winning a heat. In that event they shall go a fourth heat to determine the winner."

Rule 4, Section 2, amended by inserting the words "by owners or lessees" after the word "used" in the seventh line and by striking out the period after the word "association" in the ninth line as well as the balance of the section and inserting the following "upon the payment of a fee of $25. One registration shall apply to the tracks of both the National Trotting Association and American Trotting Association, and two stables cannot be registered under the same name," making the section read as follows:

"Sec. 4. All horses must be entered in the name of their bona fide owners, and must so appear in the published list of entries. Horses cannot be entered in the name of a party other than the owner, except in the case of leases, certified copies of which must be registered with the National Trotting Association. Racing or stable names may be used by owners or lessees, if registered, together with the names of the persons using them, with the National Trotting Association, upon the payment of a fee of $25. One registration shall apply to the tracks of both the National Trotting Association and American Trotting Association, and two stables cannot be registered under the same name."

Rule 7, Section 6, amended by striking out the words "equals or" in the third line and inserting the following after the word "it" in the same line "At the beginning of each year, a horse is entitled to his full allowance, and can start in a class to which he is eligible, with said allowance added to his win-race. This allowance, however, does not waive the application of Rule 7, Section 2, after a horse has been given the benefit of the time allowance to which he is entitled, or allow him to start in a race after he has won in one second or more faster than the class advertised prior to the closing of entries," making the section read as follows:

"Sec. 6. After a horse has acquired a win-race he shall be allowed, whether raced or not, one second for each calendar year until he reduces it. At the beginning of each year a horse is entitled to his full allowance, and can start in a class, to which he is eligible, with said allowance to his win-race. This allowance, however, does not waive the application of Rule 7, Section 2, after a horse has been given the benefit of the time allowance to which he is entitled, or allow him to start in a race after he has won in one second or more faster than the class advertised prior to the closing of entries. No other time allowances shall be permitted. A nominator is required to claim time allowance when making entry."

Rule 7 further amended by adding the following section:

"Sec. 7. When a horse with a win-race, made on a mile track, has started on a half-mile track, and won within four seconds of same, if he was entitled to any allowance under Rule 7, Section 6, he forfeits same just as a horse forfeits his allowance under the same rule on a half-mile track when he reduces his win-race on a mile track. He is, however, still entitled to the allowance between his mile and half-mile track win-races when entering on a half-mile track."

Rule 11 amended by adding the following section:

"Sec. 2. A horse that is entered under a racing or stable name, that is not registered with the National or American Trotting Associations, is not eligible to start unless the registration is completed before the race is called."

Rule 31, Section 2, amended by adding the following "if then terminated," making the section read as follows:

"Sec. 2. In a three-heat plan race a distance shall be the same as in heat races of the same length, except that it is waived in the third heat if then terminated."

Rule 42, Section 18, amended by striking out the word "and" in the fifth line and inserting a comma in place thereof, and by adding the words "and a fine of $250" after the word "paid" in the same line, making the section read as follows:

"Sec. 18. An application for removal of expulsion imposed for starting a horse out of its class, or under change of name, or both, shall not be docketed for a hearing by the Board of Review, until all the unlawful winnings are returned for redistribution, recording fee for change of name paid, and a fine of $250."

Rule 44, Section 1, amended by inserting the words "within thirty days" after the word "also" in the nineteenth line, and by adding the following sentence, "if this deposit is not made within that time the appeal is thereby dismissed," making the section read as follows:

"Sec. 1. All decisions and rulings of the judges of any race, and of the several associations and proprietors belonging to the National Trotting Association, may be appealed before the close of the meeting of the Board of Review, to a district board in the proper district, or a board of stewards of a regularly organized circuit, and shall be subject to review by the board appealed to, upon facts and questions involving the proper interpretation and application of these rules; provided, that parties to be affected thereby shall be notified, as the board appealed to shall direct, of a time and place when such appeal will be acted on; and provided further, if the appeal relates to the decision of a race, immediate notice shall have been given to the judges of the race of the intention to so appeal. Findings of a district board or a board of stewards shall be subject to appeal to the Board of Review, and all evidence or other testimony filed or taken by it shall be forwarded, together with the findings of the secretary of the National Trotting Association within two weeks of the close of the meeting at which the matter acted upon occurred. The appellant shall also within thirty days deposit $5 for account of expenses incurred by this association in connection with same. If this deposit is not made within that time the appeal is thereby dismissed."

The present Rule 50 struck out and the following substituted in place thereof:

Rule 50. Conflicting construction of rules.

"Sec. 1. In the event of there being any conflicting construction of the rules by the governing boards of the National and American Trotting Associations, the said construction shall be referred to the presidents of the two associations, whose decision shall be final."

W. H. GOCHER, Secretary.

DEATH OF ZELICA

The news comes from Oxford, Ind., of the death there, a few days ago, of the famous brood mare Zelica, at the farm of her owner, D. A. Messner, Jr., of that place. Zelica was foaled in 1891, hence has almost completed her twenty-seventh year. She was bred by D. H. Patton, Remington, Ind., and was by Wilkesberry 2:30, a son of Young Jim 2009, one of the most noted of the sons of George Wilkes 2:22, who is also famous as the sire of Young Miss, dam of Bingen 2:06¼. The dam of Zelica was Abdallah Belle (also dam of Colette, p, 2:19¼, etc.), by Pacing Abdallah 6038, son of Alexander's Abdallah 15. She passed early in life to Mr. Messner, who, according to report, picked her up "for a song," and rewarded him by making him rich through her son, Dan Patch, sold by him for $20,000 when a five year old, at which time he had a record of 2:04½. Dan was foaled in 1896, at which time Zelica was only five years of age, she having been a four year old filly when mated with his sire, Joe Patchen, p, 2:01¼. Later, to the cover of the same horse, she produced Dan's Brother, p, 2:20¼, noted as the sire of Lelia Patchen, p, 2:04¼, etc., while by Allerton 2:09¼ she produced the stallion Messner, sire of Power Lot, p, 2:07¼. As Dan Patch himself is the sire of 22 pacers in the 2:10 list, headed by Power Patch 2:03½, Zelica has the distinction of being the dam of two sires of 2:05 pacers and three sires of 2:10 pacers —something which few matrons can boast. It is a somewhat remarkable fact, however, that although living to such old age, and producing quite a numerous tribe of offsprings, no other of her foals beside Dan Patch ever became a great or even notable race horse. The case is one of those such as breeding students have long exercised their analytical powers upon without ever being able to arrive at any plausible explanation.

The Electioneer mare Expressive 2:12½, that died recently at Lexington, Ky., was one of the greatest three-year-old trotters that ever took the word, while she made with Palo Alto 2:08¾ the greatest pair of half-bred trotters that ever wore harness. Her descendants have cut a wide swath in the racing world and will continue to do so for many years. Expressive was raced in her three-year-old form by Monroe Salisbury not only against foals of her own age but also in class races against aged horses, and, if the heats were split in any of the events, she was the disturbing element if she did not win.

1918 FOREWORD

[By W. H. Gocher]

It is a pleasure to note that all of the admirers of racing are doing more than their part in the war. All of my father's relatives in England are either on or under the sod of France, from whence their ancestors came in 1660, when Charles II was restored to the throne. The name was then, as now in France, spelled Gautier, pronounced Gocher, but in England the letters were changed to conform with the sound. All of my mother's relatives in Canada have gone over seas, and at Ypres, Verdun and Valmy gave all they had—their lives. Few north country men return. All of my wife's kin in England, Australia and Canada are either on the firing line, or wherever duty calls, and have been for three nerve racking years. One of my sons, William, is in the Quartermaster's Department at Jacksonville, Florida. His brother, Fred, has an application, as a chemist, pending in the War Department at Washington, and will soon be delving in munitions, or assigned to the Department of Fire and Flame, to make vapor or liquid fire in the trenches. The next boy, Frank, only a lad at school, is "doing his bit" as a Boy Scout, while their mother and two sisters are knitting, almost day and night, for the soldiers and working for the Red Cross. In my humble way, I am giving what aid I can to each worthy cause, and keeping the home fires burning, as well as sufficient food in the pantry, to tide the family over until the war is won, or another crop can be grown on the home lot.

In these times dissemblers, and disorganizers are copperheads, bearing gifts from the Germans, grown affluent with sand rope power through the thoughtless indulgence of Americans. Forgive them, as they know not what they do. Their words and deeds will rebound on their own heads, and in time, leave them naked before their enemies. The only ones now worth while are those, who work swiftly and silently, to win the war by cheerfully doing the task assigned them, no matter how menial or disagreeable, and at the same time send a few rays of joy into the lives of those who are made to mourn, by the greatest sacrifice of youth and vigor in the history of the world. How is it with you brother? What of the night Are you and yours doing their full duty? Is your vessel trimmed for the hour when no man can work?

IN MEMORIAM—DAVID BONNER

When I last saw David Bonner it was at the "Mid-Winter" sale at Madison Square Garden, New York City, several years ago. We sought a retired nook and talked over old times. In parting, Mr. Bonner remarked that we probably would never meet again, as the years were beginning to weigh heavily upon him. He was looking very well, not at all changed mentally, and the same modest, unobtrusive gentleman that he was when I first met him over thirty years before. With the passing of David Bonner, the final roll call of the old Metropolitan "Sealskin Brigade" has been about made; in fact, I can recall none that are left of that gallant coterie of nature's noblemen who enlivened and adorned New York's old speedway in the bygone sleighing seasons. David Bonner, like his more famous brother, Robert, was a natural horseman. He figured in a very limited way as a breeder, his penchant being for high-class road horses, of which he owned many, and as a reinsman, no amateur of his day was his superior.

Warm-hearted, sympathetic, impulsive David Bonner! Graced with the excellencies and the polish of the true Irish gentleman, he was the sort of man who made enduring friends, as his character was nothing but lovable. Mr. Bonner was one of the extremely few men who ever sat behind Hambletonian 10, when the great sire was in harness, and he always looked upon those circumstances as red-letter events in his life. For many years a director of the American Trotting Register Association, he kept himself well informed as to the blood lines of the horses of his day. He was also for a long period a member of the Board of Review, N. T. A. A fine starter and presiding judge, he was always popular with the drivers in the days when he thus officiated, as they knew his dealings with them would be just and impartial. That he loved the trotter to the last I am sure, as no man took greater pleasure in driving one or observing harness races than he. Life in the open insured him a ripe old age. He lived honorably, without a stain on his character, and died lamented by all who were so fortunate as to know him.—Chas. T. Harris, in The Horse Review.

Geo. Ryan, superintendent of the Pleasanton Stock Farm, will leave the latter part of February for Chicago, to attend the horse sale which will be held there on March 5th. Mr. Ryan will ship The Anvil 2:02¾, five brood mares and a lot of promising two-year-olds and yearlings to the Chicago sale. The youngsters are an extra fine lot, sired by Mahomet Watts, The Anvil, Vernon McKinney and Joe Patchen, out of producing brood mares. It is a bad state of affairs for the harness horse game in California, when, for lack of patronage, a horse like The Anvil has to be shipped away from the state, but owing to the small number of mares which were bred to him last year it was deemed inadvisable to stand him here for another season.

Thoroughbred Matters

THE TURF

[By F. K. Sturgis, Acting Chairman of the Jockey Club]

We are about to enter into a new year and 1918 will bring to the people of this nation a condition for which there is no precedent, and which will produce results that can only be conjectured. All earnest and right-minded citizens are trying to conduct their affairs so that from a personal as well as public spirited point of view their efforts may trend toward the improvement of national conditions and do justice to the best interests of the people of this country.

Among other broad and interesting subjects which must be discussed and duly considered is that which refers to sport, so called, and the relations which the various sporting interests of this country may bear to the serious side of life and the uplifting of national standards. Foremost among these questions will be that of racing. Will the community approve of and endorse the racing of horses on the various courses of this country in 1918, and will it be for the best interests of the people? To the first query we answer without hesitation in the affirmative, and we may point with confidence to the example in this respect set by the people of Great Britain and France. Racing properly conducted has been countenanced and supported by the best elements of these two nations and we are certain that such will be the case with racing here as it is at present carried on. To the second query, which is a different and perhaps more important one, we also answer strongly in the affirmative.

For over one hundred and fifty years the thoroughbred horse, so called, has been the chief element in breeding animals of courage, substance, general utility and value; from that strain comes not only the race horse of today, but that magnificent animal known as the American trotter, for there is no important animal of this typical American breed of horse that will not trace his pedigree in a greater or less degree to the thoroughbred.

Behind the thoroughbred is the Arab blood with its long history of wonderful endurance, great performance and many attractive and useful qualities.

The racing of the thoroughbred horse enables the breeder frequently to select the best among the animals which he may have bred and trained. By the development of the fittest, therefore, the strain of blood constantly is improved and the quality is elevated. Without racing it is true that much intelligent breeding still would be carried on, but it would not be brought to so logical a conclusion nor would the value of the animal be comparable in any degree with the value placed on him today. A careful record of what the English horse has done on the plains of France for the last three years is the strongest possible endorsement of the above statement and the wonderful batteries of light artillery which have been horsed by animals of splendid breeding bear earnest testimony to the power of this strain for army work.

We may go further and say that the cavalry horse both of France and England claims its strength and endurance largely from the animals selected either from racing stables in Great Britain or France or from the progeny of animals who in their day have been raced. It is well known that the Italian Government and the Austrian Government in their wonderful breeding farms for cavalry horses have long recognized and availed of this fact. In our own country we have failed to do it justice, partly because of the utility of the trotting horse and partly because we were a nation without a standing army of any great numerical strength; but this latter condition is changing and we shall soon know and feel that the government is seeking for the class of horse of high quality, great endurance and able to do prolonged service.

We fully believe that this will be impressed upon the minds of horse-breeders throughout the land and that we shall have a constant improvement in the development of our stock and we may look to some degree, at all events, to the race horse for the selection of the best materials. Let us therefore encourage this industry of horse breeding to the best of our ability, realizing that this is no time to stop in the development of a great work.

Walter Jennings is in California for an extended holiday, most of which will be spent in Woodland. During the absence of Mr. Jennings the big string of A. K. Macomber thoroughbreds at Belmont Park will be under the care of Morris Bernard.

There are forty-five head of thoroughbreds in training at Pleasanton at the present time comprising the stables of Wm. Kyne, T. Craft, W. Getchell, Geo. Van Gorden, Wm. Miller and The Nevada Stock Farm. The trainers are very busy with their charges preparing them in the hope that Tia Juana will reopen its gates this winter. In the event that no racing will be permitted in Mexico it is their intention to ship the outfit to Hot Springs, Ark., for the meeting which will take place at the close of the New Orleans races.

AMENDMENTS TO JOCKEY CLUB RULES

New York, December 18.—One of a number of proposed amendments to the rules of racing of the Jockey Club, provides that anyone may claim a beaten horse out of a selling race. As the rule, which became part of the new code a year ago, stood, a beaten horse might be claimed only by the owner of a starter in the race, though anyone might bid on the winner. The proposed amendment omits the sentence, "beaten horses may be claimed only by owners of starters in the race for their entered selling price, plus the value of the race to the winner and as much more in addition as they may wish to bid." As amended it reads: "If the conditions of the selling race permit any horse to be claimed before the race, he may so be claimed by anyone for his entered price, plus the value of the race to the winner and as much more as the claimer wishes to bid, and any horse so claimed shall be ineligible to start in the race, intended starters in a race when horses are liable to be claimed before the race, shall be in the paddock forty-five minutes before the time fixed for the race and may be claimed from that time up to thirty minutes before the time of starting, when the right to claim before the race expires. Any horse not being in the paddock and being reported to the paddock judge as being present, shall be ineligible to start."

The rule further provides that if it is the condition of a selling race that the winner shall be sold at auction, the sale shall take place immediately after the race, the surplus bid on a horse either claimed or sold at auction, shall go to the association, to be added to the overnight events of the second day following the sale. When the conditions of the selling race permit horses to be claimed before the race, they may, if the conditions so state, be exempted from liability to claim after the race.

Another of the changes introduced by F. R. Hitchcock and seconded by H. K. Knapp and Major E. B. Cassatt, is the time for closing of overnight races. Heretofore these could close two days before the running of the race. The racing secretary, if the proposed amendment is adopted, will have three days in which to secure entries. The substitute amendment reads: "An 'overnight race' is one for which the entries close seventy-two hours (exclusive of Sundays) or less, before the time set for the first race of the day on which such race is to be run."

An important amendment is also proposed to the rule governing jockeys during their apprenticeship. As amended, the rule reads: "All boys who, while under age, have of their own free will, and with the consent of their parents or guardians, bound themselves to an owner or a trainer, for a term of not less than three years by a written instrument, a copy of which has been lodged with the Jockey Club, are permitted during their apprenticeship to claim a five-pound allowance in all selling races, and three pounds allowance in all overnight handicaps, provided no horse carries less than 84 pounds. They will be entitled to this allowance until they have ridden forty winners in any country."

An amendment proposed by F. R. Hitchcock provides that the time fixed for each race shall be printed on the program. If adopted, this rule will do away with the dial on the infield announcing the time of the races.

NEW ORLEANS NOTES

[By Alves]

The Jefferson Parish Fair Association has surely met with enough obstacles and setbacks to discourage any one.

First the matter of transportation caused the loss of hundreds of dollars daily, owing to the inconvenience and difficulty in getting to and from the track. When the traction people finally got the road completed to the entrance a tornado tore the roof off the grandstand and deposited it in a nearby field, and for the next couple of days it rained torrents, the roofless grandstand being of course no protection whatever, the water even coming through the floor of the stand and thoroughly soaking the few regulars and bookmakers in the betting ring. However, at this writing, everything is lovely once more, and with clear and warmer weather the attendance has picked up remarkably and the racing programs better filled with a higher class of horses.

Judge Murphy is doing his utmost—which covers quite a lot of ground—to run a strictly clean meeting, and has succeeded remarkably well, as rough riding on the part of the jockeys has been summarily dealt with in every instance. and the two shady looking races of the meeting so far, were taken hold of with a celerity which has the alleged participants quaking in their boots, and a final decision may be reached any day now.

One good thing the stewards have done at this meeting is the ex-officio notice that "hopping" of horses will not be tolerated, and drastic action was taken in one instance; J. D. Heard, trainer of a stable of a dozen or more horses, being ruled off for violation of rule 279. The evidence was said to have been conclusive and the horse, No Manager, was included in the ruling. Several witnesses are said to have been given the "third degree" by the powers in the stand before the ruling was finally announced, and the effect of the ruling has been noticeable in the dearth of "hot" horses since that time in the different events.

Lexington (Ky.), January 15.—Ultimus, a stallion by Commando brought $26,000 at the largest sale of race horses ever held in this city today when the Wickliffe stud of J. W. Corrigan was disposed of at auction. He was bought in by W. B. Miller of New York; Colin, by Commando-Pastorella, was bought in by Captain P. M. Walker of Virginia for $5,100 while Emil Herz of New York succeeded in obtaining the brood mare, Marion Hood (imported), by Magtagon-Maid Mariam, for $17,000.

The auction broke all attendance records when different points of the United States, which were represented, was considered.

My Friend, by Disguise-Playmate, a yearling, brought $12,800. He was obtained by H. A. Porter of Tulsa, Okla., who also bid in Ultima Thule, by Ultimus-Rubia Granda, for $7400.

Charles E. Micklewait of New York obtained Madras Gingham for $3200, while J. C. Milan of Lexington bought Fleeing Shiek for $2300 and John Madden of Lexington and New York bought Swansong for $2600.

Jockey Arthur Johnson, under contract to J. H. Rossiter of San Francisco, had a narrow escape from serious injury at New Orleans last week. His mount, Poppee, fell at the half-mile pole and was killed, and most of the ten other racers ran over Johnson, but physicians said he suffered only minor bruises.

O. A. Bianchi, more familiarly known as Daggie Smith, has been visiting San Francisco for a few days. Mr. Bianchi was a prominent figure during the many years of racing on this Coast, and met with quite a measure of success during his California career; he won the Burns Handicap at Ingleside with Horton in 1903, and was four times successful in winning the first two-year-old race of the season with a colt of his own breeding. The winners were Lee Rose, Tawasentha, Frank Ruhstaller and Oakland. After the close of racing in California, Mr. Bianchi moved to Kentucky, where he has a stock farm headed by the noted sire Jim Gaffney, sire of Dodge and other well known performers.

Jockey Geo. Archibald, the Oakland rider who has been in Germany since the outbreak of the war, writes that he has not been permitted to ride during the last year. Archibald was married in Berlin and had settled down to make that place his home.

John W. Considine, the well known Seattle and San Francisco sportsman, is laying his plans for a successful debut on the thoroughbred turf this coming season. Considine is back in San Francisco after spending several months in New York and while there he purchased for himself three English-bred thoroughbred horses.

Considine has been prominently connected with almost every other branch of sporting competitions, and he decided he would try his hand with the runners. At a time when his theatrical ventures went to the bad he owned the Woodland Race Track and had his farm stocked with blooded horses. They were of the light-harness type, however. He had some speedy trotters and pacers, but sold them all along with the farm and race course.

Mr. Geo. Wingfield has shipped sixteen head of horses from his Nevada Stock Farm to the Pleasanton Race Track; among the lot are Celesta, Scarlet Oak, Minnow, Gladiola and Jeane d'Arc, the last named in foal to Honeywood, Mr. Wingfield's imported horse. There are also in this lot five colts and a filly sired by imp Cedar Strome which came here by way of Victoria.

The Breeders' Futurity winner, Escoba, one of the best two-year-olds of 1917, property of Kenneth D. Alexander of Woodburn, was shipped on Thursday by John H. Morris from his Bosque Bonita Farm, near Midway, to John S. Ward at Douglas Park, Louisville. Ward will prepare Escoba for his engagements of 1918, among them being the Kentucky Derby, for which he is a strong choice around these parts. Ward will also train for Alexander Monastir, b c, 2, by Broomstick—Starry Night by Star Shoot, which W. J. Young, who developed Escoba and handled this youngster as a yearling, thinks is an even better horse than Escoba. Mr. Morris says Escoba has wintered splendidly and that he is in great shape for his 1918 work.

A. K. Macomber started the year 1917 with one of the largest and most pretentious racing stables in the country. Predictions were freely made that he would carry off the majority of the richest turf prizes of the year with his star racers of the choicest American and English breeding. Misfortune, however, seemed to pursue the stable right from the start. North Star III., favorite for the Kentucky Derby, went wrong on the eve of that historic race, while mishaps of one kind or another prevented other stars of the stable from fulfilling their engagements in many valuable stakes. Notwithstanding this series of disappointments, Mr. Macomber had the satisfaction of finishing at the head of the money-winning owners for the year, with stable earnings of $68,578 to his credit, quite a distinction and achievement for on identified with the sport for such a short time.

THE MIDAS OF THE TROTTING TURF

[By W. H. Gocher]

No emigrant ever demonstrated that the United States is the land of opportunity more than the late John H. Shults of Brooklyn and New York. He was born in Alsace in the latter part of the thirties and decided to sever the home ties with that now disputed territory while a small lad. Nominally French, his parents were thrifty Germans, but from the day he landed in New York, he became a full-fledged American and never recrossed the Atlantic.

One day while walking along a street in New York he called attention to a "Boy Wanted" sign in a window and remarked that one like it gave him his start in life or as he remarked: "I walked down the gang plank with all of my worldly possessions in a little bundle. While near Fulton Market I saw a sign in a window. I applied for the job and in ten minutes I was behind the counter, working for $3.00 a week with the privilege of sleeping under the counter."

Days ran into weeks and weeks into years. In the interval the sturdy lad from Alsace learned the English language and saved his dollars, although they came in slowly. One stormy day a man who delivered soft drinks at the store told him he wanted to sell out and get an inside job. Young Shults asked him how much he wanted for the business. As soon as he told him, much to his surprise, Shults purchased it, borrowing a portion of the capital from a friendly butcher in the Fulton Market.

The "pep" that Johnny Shults put into the "pop" business resulted in a very rapid growth. In a few months he had half a dozen wagons on different routes while the proprietor of the new enterprise never missed an opportunity to purchase or trade for a bad acting or balky horse that other people could not get along with. His iron will that never deserted him through life, great strength, and the "tope" rope soon put the outlaws on their good behavior and it was not long before the sale of horses of this kind brought in more money than the soft drinks business. At the same time the vigorous young owner had an eye for speed in harness and was frequently seen on Third Avenue and the Bloomingdale Road behind the Poughkeepsie pacer and a number of other local celebrities whose names were never recorded.

When the bank account connected with the combined ventures began to show a healthy growth, a Brooklyn man offered to trade a run-down bakery for it. While John H. Shults knew nothing about baking bread, he decided to take a chance and removed his headquarters across the East River. In a short time the residents of Brooklyn and Manhattan began to hear of Shults bread. In four or five years, thousands of them were eating it, while the daily income of the thrifty emigrant leaped into the thousands.

Pleased with his success, John H. Shults soon began adding light harness racing speed to the stable where his delivery horses were kept and on pleasant afternoons he was frequently seen on the Prospect Park drive behind Farmer Boy, Kitty Bates and Lady Pritchard. He purchased the last named because she was a puller that no one could drive with comfort. Under his method she became a perfect road mare and could be driven anywhere with two fingers while under any condition she would stop to a stand still at the word of command.

In October, 1886, when the Glenview Farm trotters were sold at Louisville, Ky., John H. Shults was at the ringside and secured a national reputation in a day by paying $28,000 for Pancoast. At the same sale he also purchased five others including Cuyler and Beatrice, dam of Patron, Prodigal and Patronage, paying $46,350 for the lot. From that date he also became the most enthusiastic auction ring buyer of trotters in the world, and when he wanted a colt or a filly, if anyone got it away from him the price was well up in the thousands. One day in the old rink on Third Avenue in New York City, Scott Quinton was executing a few orders for Marcus Daly of Montana from the L. J. Rose consignment. He had orders to buy a two year old colt named Mascot and he secured him after $26,000 was charged to the Daly account. John H. Shults was the contending bidder while on the same day the purchases for himself amounted to over $60,000.

In order to make a home for his trotters, Mr. Shults purchased the old Deerfoot half-mile track on the Brooklyn Boulevard and added to the property until he had over 200 acres in that section and Flatbush. Long, low buildings were erected to shelter the stock and a splendid mile track constructed. The training operations were carried on on a large scale, such reinsmen as Driscoll, McDowell, Arnold, Saunders, Thomas, Wilson and a host of others being at different times on the pay roll. For some reason or other few of their pupils ever got to the races and when they did usually failed to win, the few exceptions being Edith R. and Town Lady.

No one ever heard the proprietor of Parkville Farm complain of the hard knocks which fortune dealt him. He even came back with a smile when Pancoast was struck by lightning. Cuyler was sold and Stranger took his place in the stud. He failed to come up to expectations. Finally one pleasant afternoon in Madison Square Garden, Mr. Shults made a startling bid of $500 on a chestnut colt bred by A. B. Darling and named Axworthy. The rugged son of Axtell was led over to Parkville Farm and remained there in the stud until the land was sold for more than twice what it and all of the buildings and horses on it originally cost. He was then removed to Shultshurst, a magnificent estate near Portchester, N. Y.

Prior to making this change John H. Shults while on a visit to California offered William Corbett half a million dollars for his farm and trotters, including Guy Wilkes. The offer was declined, and by a strange stroke of fortune he secured for $500 a stallion by the son of William L., brother of Guy Wilkes, that founded a family ten times greater than the one which John Goldsmith made famous. The Axworthy family started slowly as its founder was given but very few opportunities in the stud. As soon as his colts, however, began to appear on the turf such sterling performers as Tom Axworthy, Jack Axworthy, Alta Worthy, Guy Axworthy, Hamburg Belle, General Watts, Hale Worthy and many others soon demanded recognition, and proved conclusively that their sire was as great a stock horse as his sire, Axtell, was a trotter.

While in pursuit of his hobby, John H. Shults spent over a million dollars for trotters and while speaking of it a short time before his mind passed into the shadow, he said that he had made money by the venture as his profits on the real estate investments for farms on which he kept his horses more than offset the losses. He also frequently remarked that half of the pleasure was taken out of his life by all of his ventures except horses which he made in a business way turning into gold.

For all time John H. Shults will be remembered as the greatest buyer of trotting horses at auction. His appearance in the sale ring always made a flutter while his cape overcoat, high hat, and white hair worn rather long, made him very conspicuous. He also adopted the auctions to dispose of his surplus horses, his greatest offering being Axworthy for which William Simpson paid $21,000. He also sold at public auction Guy Axworthy, sire of Lee Axworthy, the champion trotting stallion of the world and the only one that has as yet beaten two minutes, as well as Carpet, when she was carrying General Watts, the Kentucky Futurity winner in 1907 and now one of the leading sires of extreme speed.

MICHIGAN RACING LAW PROPOSED

Detroit, December 5. 1917—Legalized betting by the pari-mutuel system on horse races at state and county fairs in Michigan will be the purport of a bill to be introduced in the next legislature by the Michigan Association of Fairs.

The proposed bill is to limit betting on horse races to meets held by fair associations and to have it placed under supervision of a commission to be appointed by the governor.

Delegates to the annual meeting of the fair association held recently in the Hotel Cadillac asserted that such a law would do away with abuses of betting at races; would benefit the fairs; would permit a man to indulge in his propensity to bet under proper restrictions, and would help in the development of blooded horses.

The question of fathering such a bill was introduced by George W. Dickinson, secretary of the Michigan State Fair. He declared it would be far preferable to legalize betting than to have it the way it is now. "I have heard of cases where $500 had to be contributed to some politician's 'campaign account' to insure non-interference with certain racing meets," he declared.

The delegates were of one mind in condemning bookmaking, which, they said, should be abolished from every track in the country.

The pari-mutuel system is in operation in many states now and was operated last summer in Canada. By its innovation all "bookmaking" is eliminated and all money wagered is pooled separately under "win, place and show" classification, and all is returned to the public with the exception of a small percentage which goes to the state and another which goes to the track. Everywhere that it is in operation it is considered by horsemen to be the fairest system possible.

Delegates at the meeting favored making fair circuits throughout the state, so as to secure attractions at a cheaper rate.

HEMET HORSES AT CHICAGO SALE

The top price of the sale was paid for the crack filly, Zeta Lucille (3) 2.09¼, which was sold to dissolve the partnership existing between the Hemet Farm, which bred her, and Fred Ward, who trained and raced her so successfully and to whose bid she was knocked down. Mr. Ward was also the highest bidder on Allie Son, 2.06½, which he raced last year for himself and the Hemet Farm. Don de Lopez, (4) 2.08¼, the other representative from Hemet, brought $1,000 and was sold to E. E. Schmidt of Chicago who placed him with West Mallow to race in 1918.

Four box stalls and the small dwelling occupied by the keeper at the old race track on the west side of the fair grounds at Fresno were destroyed January 10th, by fire, of unknown origin. The loss is estimated between $600 and $700. Fortunately the buildings were damp and the fire department was able to save the remainder of the row of stalls and sheds. The Supervisors have now made arrangements to put fire mains where they will be available at all times for all the buildings on the track.

CALIFORNIA HORSES TO GO TO THE CHICAGO MARCH SALE

Attention is called to the advertisement of the Chicago Horse Sale Co. in another column of this issue of the Breeder and Sportsman. This sale, which is advertised for the first week in March, will present an unusual opportunity for those who have harness horses to dispose of at the present time, as the demand for fast horses is unprecedented, and sellers can not begin to supply the wants of those who are looking for racing material and good young prospects. No better opportunity will be presented for the sale of horses of this class as the March sale promises to prove the best in the history of the Chicago market. One carload of horses from the Pleasanton Stock Farm, including The Anvil 2:03¾ and a choice lot of brood mares, and young stock sired by Joe Patchen II., Vernon McKinney, Mahomet Watts and The Anvil has already been made up here for shipment to this sale and arrrangements can easily be made for parties with but a few head to ship in conjunction with this lot. The sales already held in Chicago and New York this season have shown that the demand for speedy horses is very great and the prices realized have been both satisfactory and profitable to the consignors. To those who have young stock, broodmares and stallions, we recommend that they apply at once for entry blanks and get their entries made in time for publication in the catalogue of what promises to be one of the most successful sales that the Chicago market has ever known. Remember that the demand is insistent for high class trotting stock and intending consignors should take up the matter at once.

Columbus (Ohio), January 8.—Grand Circuit stewards' meeting here today announced officially that the 1918 racing season will be opened at the North Randall track at Cleveland the week of July 8, one week earlier than had been anticipated, Toledo, Ohio, and Readville, Mass., a suburb of Boston, were officially admitted to the circuit.

The stewards retired honorably the Detroit, and the Goshen, N. Y., associations and declared forfeited the Grand Rapids, Mich., franchise.

Dates for the coming season were allotted as follows:

Cleveland, week of July 8; Kalamazoo, week of July 15; Toledo, week of July 22; Columbus, week of July 29; Cleveland, week of August 5; Philadelphia, week of August 12; Poughkeepsie, week of August 19; Readville, week of August 26; Hartford, week of September 2; Syracuse, week of September 9; Columbus, two weeks following September 16; Lexington, two weeks following September 30; Atlanta, week of October 14.

H. K. Devereaux of Cleveland was re-elected president of the stewards. His re-election caused considerable surprise, as he had previously announced he would not serve again. Other officers re-elected were: E. W. Swisher, Columbus, vice-president; W. H. Kinnan, Cleveland, secretary-treasurer.

THE VENTURA RACE MEETING

The Seaside Park Driving Association, of which Thomas McCormick is President and T. W. McGlinchey Secretary, gave two days of racing on October 26th and 27th at Ventura, Cal. The racing was conducted under the three heat system, every heat a race.

The following are the summaries:

Oct. 26.—Free for all pace; purse $400.

Mack Fitzsimmons, ch g by Bob Fitzsimmons	1	1	3
White Sox, b m by Del Coronado	2	2	1
Bondelin, b h by The Bondsman	3	3	2

Time—2:08¼; 2:08¼, 2:10½.

2:17 trot or pace; purse $400.

Babe, b m	1	1	3
Oro Fino, b g by Copa de Oro	2	2	1
Zomar, ch h by Zolock	3	3	2

Time—2:15¼, 2:14¼, 2:16.

Oct. 27.—2:14 pace; purse $500.

Shamrock, b g by Bonnie Steinway	3	1	1
Flash H., bl m by Dew Hol	1	4	4
Miss Rico, bl m by Manrico	2	2	2
Ambernell, b g by R. Ambush	4	3	3

Time—2:10¼, 2:16¾, 2:14¼.

2:10 trot; purse $500.

Virginia Barnette, b m by Moko	3	1	2
Guy Boy, b g by Guy Dillon	1	2	4
Little Jack, ch g by Teddy Bear	4	3	1
Great Policy, b g by Best Policy	2	4	3
Zolock Zar, br g by Zolock	5	5	5

Time—2:15, 2:15, 2:14½.

Green Class, special; purse $200.

McBoodle, b h by Dictatus	1	1	2
Lady Washington, ch m by Kinney H.	2	2	1
Callens Queen, ch m by Peter the Great	3	3	3

Time—2:39, 2:35, 2:40.

The luck that is attached to the buying of thoroughbreds is proverbial, and although sound judgment plays an important part in the selection of likely winners, luck enters largely into successful purchases. There are plenty of good judges who can advise what not to buy, but none of them can safely pick a sure champion from the untried division.

Notes and News

Wayne Dinsmore, Secretary of the Percheron Society of America, estimates that seventy-five per cent of the artillery horses exported to the Allies have been grade Percherons.

Hot Springs, Ark., December 31.—It was announced here today that the racing situation had been clarified and that Oaklawn Park will be the only track to be operated next spring. Plans for the spring meeting are now being formulated and it is said that the opening will be February 22 and that a meeting of over thirty days is in prospect on account of the early season.

The differences were settled when the Oaklawn Park management took over the Essex Park track interests. Essex Park, which is the pioneer Hot Springs track, had planned for a meeting, but to assign dates to both tracks would prolong the Hot Springs racing and interfere with early racing in Kentucky and Maryland.

The British in France alone use 75,000 tons of hay and 95,000 tons of oats a month. A late report also states that the British Government has purchased 40,000,000 horse and mule shoes.

Bradmont 2:07¼, by Alto Leyburn 2:24¼, was the oldest new 2:10 performer of 1917. This pacer was fourteen years old when he scored his record at Sacramento, Cal., September 15.

Three of the season's new 2:10 pacers were out of daughters of McKinney 2:11¼ and four were by his sons.

Esperanza 2:04, one of the best trotters ever developed on the Pacific Coast, owned by C. J. Berry, has been sold to Capt. Robert Hunt of Chicago, Ill., the transaction was made through Dick McMahon, who was acting for Mr. Hunt. Esperanza is eligible to the 2:08 class trotting purses and has been a sensational performer on the Pacific Coast since her two year old form. The price paid for the mare is said to have been $6,000.

Spriggan 2:08¼ was sold the other day at the Old Glory sale in New York for $600. Spriggan was a more than useful performer for his former owner, Geo. Lowery of San Francisco, who bought the horse at the Pleasanton auction sale in 1914 for $750. Spriggan was put in training and the following spring made his debut at the Panama-Pacific Exposition races and won the $20,000 trotting purse for the 2:10 class; he was then shipped to the Eastern tracks and won eight races out of ten starts, finishing the season with $16,867.50 to his credit. During 1916 he was not in condition and performed disappointingly. In the 1917 season he was raced successfully on the half mile tracks and made a creditable showing, winning several times. On the Grand Circuit he was in the money in the M. & M. and other important stakes but was not lucky enough to win one of them. Spriggan, at the price for which he was sold, looks to be a bargain for his new owner.

At the meeting of the Board of Review held in New York December 4 and 5, 1917, the case of B. F. Townsend against J. E. Montgomery and the b.g. Hal Logan was decided. An application was made for an order as to time made by b.g. Hal Logan in the 2:08 pace at Fresno, Cal., September 27, 1917. It was held that the time of the heat as announced from the judges' stand was correct and the case was dismissed. This decision leaves Hal Logan eligible to the 2:06 class.

Billy Murray, who was for several years associated with the late Frank Skinner in the compilation of the racing form chart, died recently at Tracy, following a stroke of apoplexy. He was in the employ of the Southern Pacific Company at the time of his death.

Loren Daniels, the well known trainer and driver, has brought suit against the Los Angeles Track Association for $20,000 damages. The litigation is the outcome of an accident on the Los Angeles track last summer in which Daniels was thrown out of his sulky, sustaining injuries from which he has not yet fully recovered.

Miss Nutonia, the dam of Mabel Trask 2:02¼, and seven other Standard performers, was purchased at the Chicago sale by Roy D. Mayes of Dixon and the new owner immediately contracted to breed her the coming season to Peter the Great 2:07¼. The noted matron is now in foal to Directum Spier 2:11¼ and will be shipped to Laurel Hall as soon as she foals.

Dr. D. F. Herspring of Woodland has arranged to train and drive the horses of Chas. F. Silva during the season of 1918. Dr. Herspring has had great experience in this line of business and should have a most successful season with the good material placed in his hands.

John W. Considine was a buyer at the sale of thoroughbred horses belonging to the Estate of the late Oscar Lewisohn, held in New York on the 16th of December. He secured Lady Edwina and Benevolent for $2,500 and $900 respectively.

C. A. Durfee is training the horses of Mr. J. L. Borden at Pleasanton. He is very busy educating the two year olds for the stake races of 1918 and has some very promising material in his charge.

G. A. Kelly of Walla Walla has Bonnie McK. and several of his get in training at Pleasanton preparing them for the races on the Northwestern Circuit.

A meeting of the stockholders and directors of the California Fair and Racing Association was held recently at the Manx Hotel in this city; the attendance was very meagre and but little business was transacted. The stockholders elected a board of directors for the coming year and also new officers were chosen. All the old members of the board of directors were elected except D. L. Hackett, whose place was filled by S. H. Cowell of San Francisco. L. L. Cannon of Santa Rosa was elected president of the association, J. E. Montgomery of Davis was elected vice-president, Chas. F. Silva of Sacramento, treasurer, and Joseph Waddell secretary. Treasurer J. L. Borden submitted his report and with it his resignation as treasurer of the association. His report shows a balance of $361.84 in the treasury. Ukiah, Ferndale and Hanford had representatives present, but owing to lack of attendance on the part of other towns no dates were fixed for the proposed 1918 circuit.

The date for the California State Fair has been selected. It will open on Aug. 31 and continue during the first week in September.

Farmer Bunch has a good colt that he thinks is going to be a great two-year-old. He worked him on the Stockton track before the first of the year, as a yearling, quarters in 38 seconds and a mile in 3:01. John Rowen has a good filly that he has been working over the Stockton track, also a yearling, in 35½ seconds, and the first mile he worked her in 2:55, last quarter in 37½ seconds. Both of these colts are out of mares by sons of McKinney and sired by Royal McKinney.

Guy Dillon 2:21¼ was represented at the races the past season by only three performers, but they certainly were fast ones. The trio was made up of Adioo Guy 2:03½, Guy Boy 2:08 and Warren Guy 2:08¼.

The Colorado State Racing Commission will hold its annual meeting January 24 at Denver, for the purpose of electing officers and such other business as may come before it. The commission is composed of the following: W. H. Gates, Denver, president; Dr. M. J. Dunleavy, Denver, vice-president; J. L. Beaman, Pueblo, secretary-treasurer; A. J. Simonson, Denver, and D. W. Thomas, Longmont, directors. The principal topic to be considered at this meeting will be what to do to revive racing in Colorado for 1918. The indications are that some of the fairs in Colorado that did not race in 1917 will race during 1918, notably among them the Colorado State Fair, held at Pueblo.

Ben Walker is wintering at Macon, Ga., and is now getting Auto Zombro and Helen Q. ready for the fray in 1918. While Ben is very near the patriarch's limit in the matter of age, he is still active and can sight a high class performer as well as he ever could. Many of the present day drivers were riding hobby horses or rolling hoops when Ben made his first appearance on the Grand Circuit, and while he has been located in California, for a number of years, he will make his presence felt when he starts on another trip over the tracks along the Atlantic seaboard or through the Middle West if his engagements take him that way. All tracks look alike to Ben Walker, while as a catch driver he has never had an equal since John Murphy was on earth and it is very doubtful if the "Red Prince," who was so popular with the New York owners over 40 years ago, could sight a hobbled bird or even a trotter on sight as well as the swarthy faced reinsman who claims Indiana as his original stamping ground.

The Nevada Stock Farm has quite a string of horses in training at the Tia Juana race track, in charge of Early Wright. The horses are as follows. Atheling, Slippery Elm, Star Shooter, Tombolo, Lycia, Miss Fiedler, and the following two-year-olds:

Icewood g, by Starbottle out of Goldwood.
Snow Queen, f, by Deutschland out of Sugar Maid.
Carey Maid, f, by Joe Carey out of Maid of Avon, and full sister to Avon Carey.
Fireplace, c, by Ossary out of Anna May.
Tabulator, c, by Deutschland out of Fay Muir.
Ladysmith f, by Montgomery out of Busy Bee.
Perplex, f, by Montgomery out of Lady Trinity.
Right on the Spot.

RACING SEASON OF 1917

That the metropolitan racing season of 1917, which closed with the running of the last race at Aqueduct on Oct. 6th, was a great improvement over 1916 and that the quality of the sport, together with the excellence of the horses taking part in the tests, foreshadowed a still greater advance next year was the opinion voiced by Mr. August Belmont, chairman of the Jockey Club.

Speaking about the sport at Belmont Park, he said: "The meeting at Belmont Park was eminently successful, thanks to an indulgent public, who put up with many inconveniences that were incidental to the attempted destruction of our property last spring by pro-German sympathizers, who somehow had gained the idea that the place was to be turned over to the Government. More than $30,000 was expended in the way of restoration before our spring meeting could be held. I suppose you know that the Westchester Racing Association was stripped of all its surplus since 1908 and when we started racing again there was a floating debt of over $120,000. This debt was met by two other stockholders and myself, each advancing $40,000. When the other stockholders were asked to participate, only one—a very small stockholder—took a proportionate share. It was impossible, therefore, to do more than we did in the way of rehabilitation. Now, thanks to the patronage of the public, this year we are in a position to make further improvements for our spring meeting in 1918, which would include an augmented program for racing tests.

"The brunt of the fight to maintain racing has always fallen on Belmont Park. The Westchester Racing Association was the organization selected in time of difficulties to open the season, both on account of its prestige and the tacit acknowledgment that it was not a commercial enterprise, being concerned as a serious addition to the turf. When able to pay dividends they never exceeded 5 per cent, and the average return on the money invested has been 1¾ per cent.

"While not asking for indulgence for mistakes, wilful neglect of duty or any justifiable criticism," resumed Mr. Belmont, "any sane man will question the policy at this early stage of the rehabilitation of racing, in general, of finding fault with the tools we have for the tests, and threatening any racing association with withdrawing its support if a radical alteration of its course is not made. I am referring to the crusade which has been started among certain horsemen and trainers, assisted by some well meaning and loyal turf writers on the subject of racing the 'wrong way' as they call it, at Belmont Park. I have been given to understand that some of these trainers have gone so far as to advise owners not to race at Belmont Park unless the events are run from right to left—the conventional way. One of our most carping critics is a trainer who came to me in the lean days of racing and said that he did not have money enough to support his family. In helping to bring back racing I believe I did this trainer and others of his kind a greater service than would have been conferred by lending him money. We thought we were doing the turf a service by constructing Belmont Park as it stands at present and were actuated by a desire to preserve the natural beauty of our property. Horses are raced abroad from left to right, and go to other courses the following week and run the conventional way. They race up and down hill, and these varying proving grounds test the quality of their horses and help to make them superior to ours. Horses with faulty shoulders cannot negotiate hilly courses. Perhaps the most comprehensive answer to the question is contained in a letter which I recently sent to a well known turf writer in response to a communication to me referring to a change at Belmont Park."

Excerpts from the letter referred to follow:

"You cannot call the racing bad just because some of the trainers and owners do not care to run the reverse way. It is one of the features of racing in this country which some owners and trainers do not like to accept because mere habit and blind custom is broken into. In like manner some owners and trainers make it impossible to establish genuine selling races."

"From time immemorial races have been run from right to left on the flat and over standard courses. All track builders aim at a particular and accepted standard. Abroad races are run over varying ground, either to the right or to the left. Qualities of the horses abroad are very much better established as a reslit than they are in our American racing. The improvement in their breed is therefore admittedly more scientific. It is unwise to pander to these prejudices. I do not think they are entertained by the more intelligent owners and trainers, who know something of racing outside of our own country.

"With regard to racing in the reverse way at Belmont Park, it was in a measure due to the peculiar lay of the land, the necessity for transportation, and the unfortunate fact that the Manice place, wtih its magnificent trees, happened to be located in the southwest corner of the property. The shape of Belmont Park, bounded on the north by the railroad, on the east by the highway and on the south by a highway, is an unequal quadrilateral, its widest portion being on the eastern side, with Fulton street on the south and the Long

(Continued on Page 9)

MADDEN, THE MIRACLE MAN

[By W. H. Gocher]

Not since Noah paired the animals in the ark and led them out to renew breeding operations after the waters subsided has the world seen the equal of John E. Madden of Lexington, Ky., in the production and development of race horses. Within thirty years this powerful athlete has run a shoe string into millions and purchased blue grass farms that extend to the horizon when viewed from the house in which he lives during the winter months.

Glancing back into the early eighties those who know him can recall when he retired from the cinder path and appeared on the trotting turf with the grey gelding Class Leader and failed to make even an impression. Plodding along determinedly he soon made his presence felt. Good things began to come his way while before long this restless spirit owned or controlled a high class of trotters and a number of valuable stallions. When he located in Kentucky a few resented his intrusion but before long everyone was forced to recognize his ability as a dealer while many of them also adopted his original method of doing business.

Early in life John E. Madden decided to never sell a good horse to a poor man and that axiom frequently brought him thousands for selections which in other hands would not bring hundreds for the same kind of material. The uniform success of the horses marketed by him put the mint-mark of merit on his establishment while the lime light of victory followed in his wake not only among the trotters but also into the remotest recesses of the thoroughbred world.

In the gray mare Abbie V., Madden had a trotter that was only a few seconds shy of being a champion and the big horse Wyandotte by Artimus died on the verge of a triumph. He also owned an interest in Robert McGregor when he sired Crescius and selected the Kentucky Futurity winner Siliko as a yearling.

That the trotter still and always has had a warm place in his heart is shown by the careful development given Hamburg Belle, Soprano and Tenara while the splendid series of races which they won brought their own reward. Each of them as well as Siliko were wintered at Hamburg Place under the Madden method, a formula that carried health and strength with it, while he also reserved the right to trim their feet and shoe them when they were sent away to race. No matter where they were on shoeing day the Hamburg Place farrier went to them with a set of shoes made under their owner's supervision, put them on, and departed leaving Andrews or McCarthy to display the farm's representative on race day. Also if the food in the section in which they were racing was not up to the standard, hay or grain was also sent by express. No item was ever too small for Madden to overlook in the preparation of a horse for a race.

When he purchased Hamburg Belle from her breeder it was known that she was a very fast mare but a confirmed knee knocker and worthless for racing on that account. He leveled her feet and shod her so she went clear and in 1908 she won five races in the Grand Circuit, one of them being the $10,000 Charter Oak Purse at Hartford in 2:05, 2:06, 2:04¾, the three fastest consecutive heats on record up to that date. The next year he also saw her defeat Uhlan at Cleveland in 2:01¼, 2:01¾, the present race record of the world and sold her the same day for $50,000. Soprano, supposed to be fourth in the list of great three year olds in 1909, became under his management a magnificent race mare while Tenara, known to be unsound, won a number of important events, one of them being the twenty-eighth renewal of the Charter Oak Purse before she went amiss.

In the thoroughbred world John E. Madden has been equally successful. In that field, however, he added production to development and year after year a group of prospective winners pass between the granite posts at the entrance of Hamburg Place en route for the metropolitan tracks. To name the list of great race horses that John E. Madden has bred or owned would in a measure look like reproducing a handful of pages from the racing guide. He has had horses of all sizes, colors and ages but in his own estimation the greatest of all was Hamburg, which he honored by annexing his name to the place he calls home. He was followed by Yankee, King James, Sir Martin, who came very near winning the English Derby, Salvidere, The Finn, Old Rosebud, and a host of others while Star Shoot and Ogden continue to add to their fame each year among the leading money winning sires of the world.

The success of John E. Madden can be attributed to the faith that he has in his work as well as the constant care which he gives all of the horses that he breeds or owns. When he breeds a horse or purchases one on the strength of his blood lines he does so with the knowledge of the fact that the sire plants the seed and if the sire is a failure, the colt is also very apt to follow suit. The germ of speed is in the seed of the sire. If it is not there the product of the greatest mare will fail. This with the thorough understanding that the family is greater than the individual and that a fair horse of a good family is more apt to succeed in the stud than a champion of a black sheep family is the foundation stone of his establishment. There is, however, still another wheel in the cog work of his success. It is the range given the colt while following his dam and after weaning time and his training after being taken in hand. Without the latter a good race horse is of no more value than an ordinary one. If it is not conducted properly he will drop still lower in the scale and his greatest efforts will under such conditions result in disappointments and losses. Under the Madden method it begins with regular feeding of nutritious food, all of which has been sampled freely and analyzed as to content and particularly as to food value and moisture. This is followed up with constant reports on the behavior of each horse night and day, especially during the nights of days on which he has been worked or raced.

From the time that the work of the stable approaches racing speed each individual is studied constantly and given the exercise that his condition warrants. No two get the same kind of preparation. The delicate or unsound ones are handled with kid gloves while the gluttons are fed and worked accordingly, the former being walked and breezed while the latter are sent out for one or sometimes two repeats and finish flying.

At feeding time and especially after being worked each member of the stable is watched as carefully as a sick child in a convalescent ward and the manner in which they dispose of their rations noted and reported with great care. This is the "open sesame" of success as no one knows better than John E. Madden that the best horse that ever wore a shoe cannot defeat a platter if he is not eating and digesting his food properly. Also when trouble comes as it will in the forms of sprains, bowed tendons, and all that sort of thing, the miracle man of the turf does not fly for the firing iron or a violent irritant. On the other hand he applies a cooling lotion with cotton and a bandage, trims down the feet after removing the shoes to get proper frog pressure and gives the afflicted one a couple of hours run in the morning and afternoon in a paddock. By this method the fever is removed and nature given an opportunity to repair the injury. It may take a little time to do this but it will usually save the horse for future racing.

One day an anxious owner accosted John E. Madden and asked him for a little advice in regard to a valuable colt that had a complaining leg, and wanted his opinion in regard to applying a blister. Without going to look at the horse Madden told him that he would get better results if he applied a light blister where the saddle is placed on the colt's back as it would insure a rest for two or three weeks and by that time a cooling lotion would take the fever out of the horse's leg.

John E. Madden's method of breeding, feeding, care and training are the four sides of the keystone of his success as a racing magnate. No one ever hears of his failures if he has any while there has never been a year that the acid test of the race track failed to award him his share of winners even after he permitted his friends to select what they considered the best in the paddocks at Hamburg Place. The records also show that no man will pay more money for a good horse than John E. Madden and no one has ever sold as many for the high dollar as the owner of Hamburg Place. Still with all of his success on the trotting and running turf there is nothing so near and dear to him as his two splendid sons, Edward and Joe, both of whom are now wearing the khaki of their native land and eager like your sons and mine to give the vigor of their youth and their lives if necessary to make the world safe for a government of the people by the consent of the governed.

FANATICS AT IT AGAIN

It is just one thing after another, and now a dispatch from Washington, published in the daily press, tells of an attempt to shut off racing in the United States during the period of the war. Here is the dispatch referred to: "A movement has been started by the Patriotic Education Society to curtail, if not stop, transportation of race horses." And this in a country where an European war can have but little effect in many ways. Even in the central section of Europe, where the effect has been far more pronounced than it can ever be in America, racing is allowed to continue, and upon the theory that amusements must be furnished in order to allow an over-wrought, or depressed people, to relax and take their minds off from the things that tend to drive them mad. That is true of the conditions in the central powers, and among the allied peoples amusements of practically every form is encouraged for the very same purpose. It appears nonsense, and the merest rot to talk of stopping shipments of race horses in order to furnish a few more cars for regular freight traffic, especially during the summer months, when congestion upon railroad lines is not nearly so noticeable as at other seasons of the year. What is the sense in trying to create a form of hysteria among American people? Why not allow the natural life of the citizens of the nation to continue along the same lines that have prevailed for years? Why try to imagine conditions that cannot possibly exist? Why do a thousand and one things that are not necessary and that the doing of the same would only irritate the public mind, and under no condition could add a jot to the efficiency of the nation? Why not be rational and sane?—Horse Review.

PACIFIC BREEDERS FUTURITY STAKE No. 16

Thirty-six Two-Year-Olds Kept Eligible to This Stake by Payment on January 2d

The following is a list of thirty-six fourth payments made on January 2d in Futurity Stake No. 16. These foals are now two years old and these two divisions will be raced off at the Breeders' meeting this year. This is the last of the Breeders futurities which provides for two year old divisions.

I. L. Borden's b f Cleo Barnato, by Barney Barnato, dam Cleopatra, by Zolock; ch f by Copa de Oro, dam Pavlowa B., by Petigru; br c Robert Barnato, by Barney Barnato, dam Roberta, by Robert I.; b f Miss Stone, by Ed. McKinney, dam Miss Volo, by Antevolo.

J. L. Bulloch's ch c Lindon Hall, by Black Hall, dam Gadsky, by Athablo; br c Chester W., by Black Hall, dam Cora Wickersham, by Junio.

T. L. Carey's ch f Quinie Star, by Hallie's Star, dam Quinie Direct, by Quintell.

S. H. Cowell's b c by Peter McKlyo, dam Dione II, by Cupid; b f by Panama, dam Hulda C., by Dexter Prince; b f by Peter McKlyo, dam Eleanor Sears, by Searchlight.

Wm. E. Detels' br c by Mahomet Watts, dam Daphne McKinney, by McKinney.

W. G. Durfee's b c by Carlokin, dam My Irene S., by Petigru; b f by Carlokin, dam Atherine, by Patron; b c by Carlokin, dam Ezelda, by Del Coronado; ch c by Copa de Oro, dam Subito, by Steinway; b f by Copa de Oro, dam Leonor McKay, by McKinney.

Wm. M. Ferguson's rn f Miss Helmont, by Alton, dam by Jay Bird.

Sam Flynn's b f Healani Maid, by Healani, dam Dictatus Maid, by Dictatus.

L. L. Gilpin's b c Freddie J., by Palo King, dam Beautiful Morn, by Irmu Alto.

H. H. Helman's b g Dick Dillon, by Warren Dillon, dam Mollie McNeita, by McKinney.

H. A. Hershey's b f Mable Bell, by Jim Logan, dam Palo Maid, by Palo King.

F. R. Kohrs' b f Verna Dillon, by Vernon McKinney, dam Miss Harris, by Sidney Dillon.

Roy D. Mayes' br c Master Derby, by Jim Logan, dam Ramona, by Demonio; b f Miss Logan P., by Jim Logan, dam Bally Pointer, by Star Pointer.

J. E. Montgomery's b f by Carlokin, dam La Gitana, by Del Coronado; b c by Jim Logan, dam Edna R. Diablo, by Diablo.

W. L. Selman's ch c Bill, by Otis Jr., dam Miss Delta, by J. J. M. Jr.

C. W. Short's b c Valador, by Skidoo Wilkes, dam Honda Girl, by Rubino; b f Lady Earl, by R. W., dam Keno, by Prismo.

Chas. F. Silva's b f Eleanor W., by Wilbur Lou, dam Zeta W., by Nutwood Wilkes; b f by Teddy Bear, dam Normono, by Demonio.

Jas. H. Spafford's b c Stockton Lad, by Royal McKinney dam Libby H., by Bronzo McKinney.

L. H. Todhunter's bl f Jean McKlyo, by Peter McKlyo, dam Leavinettie, by Zombro.

D. W. Wallis' b c Easter Angelus, by Bondholder, dam Mary W., by Dictatus.

M. L. Woy's br f McKinney B., by Stanford McKinney, dam Loma B., by Stam B.; br f Alice W., by Expressive Mac, dam Strathalie, by Strathway.

SUES THE FRESNO ASSOCIATION FOR DAMAGES

The first suit against the Fresno County Agricultural Association on account of the automobile tragedy on September 29th was filed by Eva Rezner on January 10th in the Fresno courts. She is represented by Everts and Ewing. Secretary Eberhart of the association said that immediately after the accident he sought legal advice on the subject of possible liability and local attorneys advised him that the association could not be held legally liable for damages. However, acting upon a humanitarian impulse and a sense of moral responsibility, the association offered to pay the hospital bills for any of the injured who could not afford to pay them themselves, requiring persons accepting this assistance to sign releases, which all but one did.

In her complaint Miss Rezner, a telephone operator, sets forth that the association "provided certain space and ground within the interior boundary of the circular track, separated by a light board fence." She further says that she, "not knowing that said place and space was not a safe place from which to view the said races," took her place provided.

A. K. Macomber, the Burlingame turf patron, thinned out his string at the recent auction sale at Lexington, Ky., by disposing of the following:

The Cock, ch h, 5, by Poussin-Volodyovski; R. Colston, $500.

Sirocco, br h 5, by Sir Goeffry-Helium; Dr. E. W. Hagyard, $550.

Impetus, ch c, 2, by Uncle-Genius; J. E. Madden, $400.

Narosla, b c, 3, by Sir Geoffry-Sunshine Girl; G. C. Hughes, $100.

THE FIRST COLT STAKES

[By W. H. Gocher]

While reviewing the Kentucky Futurity I stated that the first colt stakes for trotters were given by the Spirit of the Times and the Turf, Field and Farm. These races were like the modern blue ribbon event, open to the world, while they were also stakes in every sense of the word, all of the money paid in and in one instance the gate money going to the winners. As the statement has been questioned, it is worth while to turn to those ancient days so far as harness racing is concerned and not only see what was done but also learn who did it.

In 1866 Wilkes' Spirit of the Times offered what was known as the Spirit of the Times Stake for foals of 1865, to be trotted in 1868. Twenty-one subscriptions at $500 each half forfeit or only $100 if declared out before Jan. 1, 1868, were received. When the list of nominations was published George Wilkes received so many requests for a similar event to be raced the next year that he sent out blanks for another stake open to colts and fillies of 1864 to be trotted in 1867 on the same plan as the original race. It was called the Long Island Stake. Sixteen subscriptions were received. The list included colts which were subsequently known as Young Bruno, Peacemaker, afterwards the sire of Midnight, Cavalier, the first foal of Widow Machree by Hambletonian and that died of glanders in his four-year-old form, Kearsarge, half brother of Dexter and Dictator, and whose sister, Hyacinthe, appears in the pedigree of The Harvester, as well as the two Hartford youngsters, Granite Stake, by Duke of Wellington and Naubuc, the brother of Thomas Jefferson, that after being taken to California sired the dam of Directly.

The race was trotted over the Fashion Course, Oct. 10, 1867, and was won by Young Bruno, Cavalier, who was very lame, finishing second and Granite State third, Ristori by Volunteer and the two Hambletonian colts, Peacemaker and Puritan, being distanced. The winner was owned by Charles Kerner of New York. He was broken by John Mingo, a Shinnecock Indian that lived at Flushing, Long Island, prepared for the race by Carl Burr and driven by Budd Doble. Hiram Howe had the mount behind Cavalier and George Carpenter drove Granite State. The stake was worth $5,150, of which $500 went to Cavalier.

When the bell tapped for the first Spirit of the Times Stake at Fashion Course, Oct. 7, 1868, it was found that of the original twenty-one subscribers all but five had fallen by the wayside, one of the missing being the Kentucky colt Eden Golddust, bred by L. L. Dorsey of Louisville, and that subsequently was taken to Ontario, Canada, where he sired the trotter Gold Ring. Of the five that remained eligible, the owners of the two Hambletonion colts decided to keep them in the barn. One of this pair appears in the stud book as Virgo Hambletonian, the sire of Charley Hogan, while the other was the second son of Widow Machree by Hambletonian, that afterwards fell through a bridge over the Hackensack river and was drowned before his breeder, Captain Rynders, considered him worthy of a name. As for the race, it was over in one heat, George Hitchcock winning it with Highland Ash in 2:48, R. Fletcher's filly by W. H. Denton and Xantheo by Volunteer, being distanced. He received the entire stake, $4,050, as well as the gate money.

The second renewal of the Spirit of the Times Stake was trotted over the Fashion Course Oct. 12, 1869. On that day the turbulent Captain Isaiah Rynders led back the winner, it being Widow Machree's third colt by Hambletonian. Hiram Howe had the mount behind him and after he had distanced the field, the captain named the colt Aberdeen. The time was 2:46, the other starters being the filly Ida Schepper, driven by Dan Mace, and the favorite, Dexter Bradford, a colt that was not foaled until Aug. 4, 1866, and is now referred to as the sire of Amelia C. After the race the captain was given the entire stake, amounting to $2,250, the subscriptions for the event having been reduced from $500 to $250.

Of the prominent spectators who visited the Fashion Course and saw Young Bruno, Highland Ash, and Aberdeen win these events, David Bonner, the sturdy patriarch of the trotting turf, who celebrated his eighty-first birthday Dec. 17, alone remains with us. Also in passing I wish to state that these events are not by any means the first races in which colts participated, as in 1852 Ethan Allen as a three-year-old trotted in 3:20 at the Clinton County Fair, Plattsburgh, N. Y., while Rose of Washington, who was also foaled in 1849, won a race over Union Course in 2:54 April 27, 1852. Also as four-year-olds Ethan Allen defeated Rose of Washington over the Union Course May 10, 1853, in 2:36, establishing a world's record for four-year-olds as well as a stallion record which he subsequently reduced to 2:26¼ in 1859 and which stood as the best on record until George M. Patchen trotted in 2:25 the following year. The three-year-old events referred to above, however, are the first that were open to the world and in which the best colt and filly of their respective years were given an opportunity to "bring home the bacon."

THE CARE AND FEEDING OF HORSES

Hints for Beginners

1. Remember that the horse is an extremely timid animal, and must be handled very gently, though firmly. Always speak to the horse when approaching him; take hold of his headstall carefully, pat him on the neck, and draw his head slowly toward you. In tying him, be sure that the rope is not so long that he can get his leg or foot over it, as painful wounds are often caused in that way.

2. In entering a stall do not put your hand on the animal, as that might cause a vicious or stupid horse to kick, especially if you are a stranger to him; but tell him to "get over," and then step in quickly on the left of the horse.

3. In leading a horse take a firm grip of his headstall or bridle with your right hand, hold the end of the halter rope in your left hand, and keep beside him, not in front of him. If he rears or pulls back, you can let go of the headstall and hold him by the rope,—not trying to struggle with him, keeping your face turned from the animal, but stepping toward him as he goes backward. He must move slowly in going backward, and will soon tire of it.

4. Do not mount a horse equipped only with a halter; and do not attempt to ride a strange horse unless he is bridled, and there is some one with you to hold him, and lead him about at first. You may be willing to take a chance yourself; but a horse never forgets anything, and if he bolts or throws his rider once, he may do the same thing again at a critical moment. The Prince Imperial lost his life because his horse would not stand to be mounted.

5. The stomach of the horse is extremely small, and therefore he should be watered at least three or four times a day, and, if possible, should receive both hay and grain three times a day. The less work he does the more important it is to give him hay often, because a hungry, idle horse is apt to take up some bad habit such as biting, kicking, cribbing or weaving.

6. If the horse knaws his manger or stall it is certain that he needs salt, unless he is very hungry. Keep a lump of salt always before him, if possible.

7. Horses should be watered first and fed afterward; and, if possible, watered again an hour or two after eating their grain.

8. Never water or grain a horse that is much heated;—to do that is likely to "founder" and so ruin him.

9. Never give grain to a tired horse; let him rest for an hour or two first. Otherwise, he is very likely to have indigestion and colic. More horses die from colic than from anything else.

10. Bring your horse into the stable or camp cool and breathing easily, if possible. Nothing is worse for a horse than a chill after being heated. But if for any reason it is necessary to halt or encamp when your horse is sweating,—then blanket him and walk him about, or put him in a sheltered spot and rub him,—according to circumstances. A horse is cold when his ears are cold. Get in the habit of feeling his ears.

11. Use the currycomb very lightly, if at all. It is apt to hurt the skin of the horse. A stiff brush is better,—and much more efficacious if the horse's coat is long. The head and legs should never be touched with the currycomb. You can clean your horse with a wisp of hay or straw vigorously used,—or even with your bare hands. At least an hour a day of hard work should be devoted to cleaning a horse. This helps the circulation, removes dead skin and dirt, and makes the horse feel right and look right. Look out for frosted bits in winter.

John H. Rosseter, the local shipping man, is evidently going right ahead to stock up his Wickiup breeding farm at Burke, near Santa Rosa, with some high class thoroughbreds. At the recent record-breaking auction sale in Lexington, George H. Strate, Rosseter's manager, made the trip from New Orleans to be on hand to pick up some good stock.

Disguise, a twenty-one-year-old stallion by Domino, out of imported Bonnie Gal, was bid in for $4,200, and will likely be installed at the head of the breeding establishment. Four other mares were also obtained by Strate. They were:

Dreaming, 10-year-old brown mare by Ben Brush-Fair Vision, $1,350.

Picric, ch, f, by imported Voter-Gingham, $800.

Problem, 4-year-old chestnut mare by Superman, $350.

Last Rays, 9-year-old bay mare by Peter Pan-imported Sundown.

Racing has been resumed in England, further reports the visitor, and finished up last season in successful style. Meetings are held every other week over the Newmarket course and Robertson declares that more extensive plans are being contemplated for this coming season.

Robertson will remain here several days and then catch a steamer for home, where racing has been running on as big a scale as ever before.

(Continued from Page 7)

Island Railroad running at divergent angles. This would have made it almost impossible, in fact it was impossible, to lay out railroad accommodation for the Long Island Railroad would not consider the construction of its spur on the eastern side, because it would have involved a great curve, whereas going in from the west in the manner in which it was finally established made the property conveniently served by both railroad and trolley.

"Having the precedent of Sandown and numberless tracks abroad for running what people call 'the wrong way,' we believed it for the good of racing that the change should be made, and we were under the delusion that it would furnish a relief from the monotony which it appears now the public seem to prefer. At all events the reasons why seem never to be touched upon and we are criticised for doing something which our critics believed would give us no trouble to change but for our pigheadedness.

"It is unfortunate that just as we are drawing the kind of people to the support of racing who make the turf strong and inspire confidence, those who contribute little but get a great deal out of the turf and are wholly dependent upon it, such as trainers and professional owners, an attack is made upon the association which has stood the brunt of the fight for racing. Mistakes it has made and will continue to make, but its policy has been controlled by its interest in racing and nothing else.

"The dastardly efforts to destroy its property did not wholly succeed, but that we were able to recover from the blow as well as we did, and that we received such indulgent treatment from the public, makes me feel that we may not be as unpopular as you may imagine. This does not mean that we intend to close our ears to what we hear and read, but will respond to the extent in our power.' We cannot do the impossible, however."

THE FARMER'S WORK HORSES

Horsemen have never been called on to meet a more serious condition than they are now facing. High-priced feeds have set people to thinking about the horse problem. The draft horse farmer is making money, but the majority of farmers cannot be classed as such.

The leading market men in the United States claim that less than 5 per cent of all the horses owned on farms will weigh 1,600 pounds in working condition. These buyers further declare that the 1,700-pound horse is exceedingly difficult to find, and when one is located it is usually a mare which the farmer will not sell.

Where are all these big horses which we have been raising in this country For nearly sixty years we have been importing the best draft stallions which Europe produced. City teaming concerns have bought up practically every good draft gelding they could find, and a lot of mares which ought to have been left on the farms for breeding purposes. Horse breeding has been falling off gradually since 1910. Fewer mares have been bred each year. The horses which would sell well were the drafters. Now farmers are up against a stone wall. The bulk of the horses which they have are light-legs and unsound draft stock—the kind of equine stuff for which there is no market demand, unless it can get a war job. Had it not been for this war the horse business would have been in a far worse condition than it is. The army rejects will carry the harness and do farm work in a way, but not with the degree of profit that a good big draft mare does. People have to keep this undesirable kind because they can not sell it. Such horses eat just as high-priced feed as a good horse that would sell for $250 or $300.

There is every indication now that the time has passed when it is profitable for a farmer to raise anything but a good draft horse. If he has any light-legs, he would better get rid of them in some way and not breed any more. Besides, he should cull his draft stuff closely, so as to make certain that he raises nothing but sound, serviceable stock big enough to weigh at least 1,600 pounds in working condition. Many of the 1,000 to 1,200 pound mares have been bred to draft stallions, and the offspring, half grown out because of a lack of feed and care, do not weigh more than 1,300 to 1,400 pounds. The country would be a great deal better off were these mares not bred. The fact that not more than 50 per cent of the mares in some localities have been bred is no cause for alarm. In fact, it is a good sign and points with positiveness toward the draft horse as the most profitable for the average farmer.—Breeders' Gazette.

Frank S. Turner is ill at his home near Santa Rosa. He has been confined to his room for some days under the care of a physician. His condition is reported as serious and his many friends will regret to learn of his illness.

Mr. Geo. Wingfield, owner of the Nevada Stock Farm, met with a severe loss last month; imported Lota, by Sundridge, out of Gourd and one of the best bred mares that ever came to the United States, and Wild Iris, by William III, out of Free and Easy, by Melton, both died at the Nevada Farm.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

The Interstate Trap Shooting Association has issued its new book of rules governing registered tournaments for 1918. The state associations have been reclassified, and the rules are given regarding the conditions that are to govern the Interstate Trap Shooting Association's State handicap. This State handicap is a new event which is to take the place of the subsidiary handicaps which have been discontinued. Send to E. Reed Shaner, Secretary, 219 Coltart Ave., Pittsburg, Pa., for a copy of the rules.

The rapid development of the sardine industry has brought the 1917 pack in Los Angeles County almost to the figures of the tuna pack. The twenty-three canneries report that they have packed 560,000 cases of tuna, valued at $3,360,000, and 500,000 cases of sardines, valued at $2,000,000. This year's pack of sardines will far exceed the last year's pack.

Sportsmen's associations in thirty-seven states have chosen the cities in which the 1918 trapshooting championships will be held—San Jose being selected for California-Nevada, Phoenix for Arizona, Tacoma for Washington, while the place for Oregon has not yet been determined.

Clarence A. Haight, "Daddy" of the trapshooting game on the Pacific Coast and one of the best-posted men in that sport in the country, has been appointed secretary of the Golden Gate Gun Club to fill the vacancy caused by the death of Al Durney. Haight was formerly secretary of the club and had given way to Durney in the fall. He consented to take up the work once more when the president and other officials showed him the need.

A twelve per cent increase in the size of the fur seal herd at Pribylof Island, Alaska, this year, as compared with 1916, was announced by the Department of Commerce. The herd contains 408,692 animals.

On December 16 the sportsmen of Los Angeles, Cal., and vicinity, got together and held a charity rabbit shoot. All the cotton tails that were bagged were given to the poor with the usual Christmas basket. The shoot was staged in the Antilope Valley, west of Palmonde and Lancaster.

A 185-pound marlin swordfish was recently taken by James W. Jump in Catalina waters, California. This catch is the world's record swordfish taken on light tackle.

In the same waters Mr. C. Boschen of New York captured the world's record broadbill swordfish taken on heavy tackle. This giant of the sea pulled the scale to the tune of 463 pounds. The previous record, held by H. R. Johnstone, was just about 100 pounds lighter than Mr. Boschen's prize, weighing 362 pounds.

With the Pescadero lagoon open for the steelhead fishing, local anglers are expecting some fine sport as soon as rain comes. The same applies to the recently opened mouth of the Russian River, which was cleared of waste several weeks ago by men with picks and shovels. At the present time the fish are not running well, but plenty of water is expected to remedy this defect.

Alfred A. Durney, prominent business man of this city and an ardent sportsman, died at the St. Francis Hospital, Christmas morning, from an attack of appendicitis, after an illness of three weeks. Durney, who was well known as a hunter, was a member of the Golden Gate Gun Club, the Alameda Order of the Elks, Elks Gun Club, and several other shooting organizations, and was instrumental in boosting the trapshooting game in this section.

The El Nido Farm Center, Merced, will stage the first of a series of rabbit shoots planned under auspices of the Farm Bureau. It will be held on Sunday, January 27. The drive will parallel the Chowchilla road, on the west side of the road, and will proceed south to the home of the Chowchilla ranch. A free lunch will be served, and ammunition provided free.

On January 8th the new officers of the California Schuetzen Gun Club were elected, and the winners of the different shoots of last year were awarded prizes. The meeting ended with a banquet. The winners were: Championship class, A. Schwartz; first class, L. Wille; second class, E. Heiseman; third class, J. H. Millett; veteran class, Charles Ott; five best bull's eyes, L. Wille.

William C. Clegg of Philadelphia won the Pennsylvania State Live Bird Championship December 29th, defeating the former holder of the title, Davy Hall, in the 25 bird shoot over the traps from the 27 foot mark, killing 23 out of 25, Hall's record being 21 out of 25.

The shotgun has been adopted as a weapon of a number of Home Guard organizations, and the National Association of Shotgun Owners has been formed.

Trap shooting is the most democratic of all American games and the one most enjoyable. The beginner need not be bashful. Let him attend any shoot, announcing his intention of joining, and he will find plenty of guns which will be loaned him and a number of experienced shots who will be glad to teach him how to shoot.

The Russian River bar at Duncan's Mill is open and the steel-heads are running, fishing being good. Fishermen will be pleased to hear this and will take advantage of it and enjoy a day with the gamiest fish caught in California waters.

The Government has established a military school of aeronautics at the State University of California, Berkeley, where aviators are to be taught the use of the shotgun in connection with their other instruction so that in an aeroplane they may use that weapon to good advantage against their foes. Each recruit shoots at something like fifty blue rock targets each week.

There is excellent fishing for black bass in Clear Lake, Lake County. The fish run from three to eight pounds, and it is no trick at all to catch the limit of twenty-five in a day's fishing. It is wonderful sport and just as good fishing as can be found in the State.

The little rain that we have had so far has been sufficient to greatly improve the steel head fishing, large catches being reported from Monte Rio, the Gualla lagoon, Duncan's Mill, and other points. The run of silver salmon this year is unusually large and adds to the interest taken in fishing at these points.

The longest run of the year made at the traps is credited to Frank Troeh of Vancouver, Washington, the 1915 Washington State and National Amateur Champion. He broke 284 straight at Seattle, April 29 and 30. The longest run of the year by a professional was 261 by Hugh Poston, Los Angeles, made at the Pacific Coast Handicap at San Jose.

Sportsmen all over the United States are grieved to learn of the death of W. B. Stafford, who passed away on December 16 at Memphis, Tenn. He had been secretary-treasurer of the United States Field Trials Club, and the National Field Championship, and was an ardent follower of field trials for a score or more years. He was also an expert when it came to wing shooting and a most skillful angler who loved to spend hours matching his skill and patience against the finny tribe. With the passing of W. B. Stafford and Charles Hallock, lovers of out door sports lose the fellowship of two shining lights.

The United States Government has placed the matter of Federal game protection in the hands of the Department of Agriculture.

DON'TS FOR TRAPSHOOTERS

DON'T shoot too quick; get a steady line on the target and then pull the trigger.

AFTER you've had your shot let your gun remain unloaded until your turn to shoot comes 'round again.

DON'T talk to your neighbor. It's disconcerting. Keep your mind concentrated on the work in hand. It's essential to good scores.

WHEN the time comes to change places at the score don't move until the squad moves. Gives the other fellow a show.

DON'T let the loss of a target fluster you. You can't get them all at all times. Keep cool and get ready for the next time.

DON'T get peeved when the target breaks as it leaves the trap. Take your time. Keep your eye on the trap and pulverize the target following.

DON'T blame the gun or the shells if your score is not satisfactory. Remember that the question of personality—temperament and ability—enter into the sport. And it may just be your off day. Such things will occur regardless of alibis.

TRAPSHOOTING ON THE PACIFIC COAST 1917

Trapshooting had its banner year on the Pacific Coast in 1917. The action of the Interstate Association in granting sanction or registered tournaments on the Sabbath; the influx of the membership of the gun clubs by those who desired to learn to shoot—and shoot accurately—so that they might be of service to Our Uncle Samuel at a later period, and the taking up of trapshooting by the guests at the seaside resorts and the promotion of the sport by the resorts, all helped to popularize the sport and make 1917 as a year stand out above all others.

The shooting on the Pacific Coast was up to the standard and in some places it was exceptional. The longest run of the season—amateur or professional—was made by a West Coast amateur, Frank Troeh of Vancouver, Wash., who ran 284 straight in the Washington State shoot on April 28 and 29. In this shoot Troeh broke 395 out of 400 targets—but was beaten for the State championship—for the only five targets he missed were in the State titular race. Troeh was the national amateur champion in 1916.

Troeh was also the high gun in the California and Oregon State shoots, won the Chicago Introductory in the Grand American Handicap—199x200—from 18 yards—a world's record. He was also the high gun at the International Tournament at Toronto, Can., and at the Miwikims tournament at Fox Lake, Ill. Troeh had a high run of 242 at Los Angeles, Cal., on May 21; a run of 147 at Salem, Ore.; 162 at Portland, Ore.; 162 at Chicago, Ill., and 171 and 166 at Toronto.

But Troeh is only one of the many excellent shots on the Pacific Slope. O. N. Fort of San Jose, Cal., is another who "busted" 'em quite regularly, and in the last five tournaments of the season, running 10 days, beginning in Los Angeles on September 16, and finishing in Phoenix, Ariz., on October 13. Ford broke 1912 out of 1950 targets—the best ever accomplished by an amateur 'shot. To get to all the shooting points in this time Ford traveled 2136 miles, which is some feat in itself. At Ray, Ariz., during the Arizona State shoot, Ford broke 439 out of 450 targets—the best three-day performance ever accredited to an amateur. Ford averaged better than 98 for the last 3000 targets thrown for him in 1917. Ford had a run of 230 in the Arizona shoot.

In the California State shoot Heine Pfirrman, the 1916 champion of that State and Nevada, hit 272 targets in succession but lost the State title because what few targets he missed were in the State titular event. F. H. Mellus of Los Angeles won the California State title; J. H. Hopkins of Seattle the Washington championship, and J. W. Seavey of Portland took the Oregon championship. The Pacific Coast Handicap was won by Charles Yocum of Tulare, Cal. 'Some of the best shooting ever done was recorded in the California-Nevada shoot; 362 trapshots fired at 5210 targets and broke 4762—a 92 per cent average.

Mrs. C. E. Groat of Los Angeles proved herself to be one of the best of the Fair Dianas with the shotgun when she won the woman's championship of California-Nevada, with 95x100. She also broke 466 out of 500 targets in the California titular shoot—an average of 93 and at Vernon later broke 193x200.

The longest and best shoot-off of all time took place on the Coast when Andy Flickinger of Vallejo and Owen E. Evans of Los Angeles tied for second honors at Vernon, with 198x200. On the shoot-off each broke straight on the first string and each missed once on the second. Flickinger then ran out with 177 straight and Evans broke 160 before he missed on his tenth string. Final result was 199 to 198.

Hugh Poston of Los Angeles broke 397x400 targets at Ray, Ariz., on October 9 and 10, which is the best professional mark of the year.

Traveling great distances to attend shoots along the Coast is necessary, but E. M. Sweely, mayor of Twin Falls, Idaho, grabbed the long-distance traveling record when he motored 2700 miles to attend the Pacific Coast Handicap at San Jose, Cal. This handicap will not be held in 1918 because of recent legislation by the Interstate Association. There will be a handicap held in connection with each State shoot. With the passing away of the Pacific Coast Handicap the Los Angeles Gun Club is seriously considering the staking of a big handicap to take its place.

A number of traps have been installed at the Aviation School at San Diego and Uncle Sam's fliers are learning to break moving objects with the scatter gun.

PACIFIC COAST BOSTON TERRIER SHOW

The annual specialty show of the Pacific Coast Boston Terrier Club will be held in Los Angeles, Saturday, March 2, 1918. Mr. John Dietschler of Buffalo, N. Y., has been appointed to judge.

This is a good selection as Mr. Dietschler is considered one of the leading authorities upon the breed in this country, and the officers of the club look forward to having over one hundred Bostons benched. There will be a greater list of trophies than has heretofore been offered at any specialty show in the West, and over $200 is to be expended in money prizes and medals which should induce every Boston terrier owner on the Pacific Coast to make an entry.

TRAPSHOOTING AND THE WAR

At the close of the Boer war Lord Roberts was greatly impressed with the fact that a handful of untrained and undisciplined Boers, on account of their wonderful marksmanship, had been able to withstand a greatly superior number of British troops. The British were drilled to do everything but shoot straight; they knew all about marching and the manual of arms. Lord Roberts said: "Shooting is seven-tenths of a soldier's business," and that the soldiers be taught to shoot straight rather than devote a lot of time to other and more showy accomplishments. Lord Kitchener, when organizing the first levy of volunteers that England sent to the front, issued this order: "Never mind how they drill or whether they know their right foot from their left; teach them to shoot and do it quickly." Now, teaching a man to shoot is a long job and no man can learn to shoot in a day, or a week, or a month, either with a shotgun or rifle. The man who is familiar with a shotgun soon becomes an average shot with a rifle. He knows how to judge the shorter distance, knows how to avoid the recoil, and has a general idea of the mechanism of fire arms. Because trapshooting teaches all of these things and because it gets a man out in the open where he will meet other fellows in keen but friendly competition, it has been well styled the "Patriotic Sport," and when the history of the present war is recorded, the marksmanship of America will be given due credit, and in that credit trapshooting will have a large share. The past year has been a great year for trapshooters. Let 1918 beat it.

NAVY'S CALL FOR BINOCULARS, SPY-GLASSES AND TELESCOPES—"THE EYES OF THE NAVY"

The navy is still in urgent need of binoculars, spy-glasses and telescopes. The use of the submarine has so changed naval warfare that more "eyes" are needed on every ship, in order that a constant and efficient lookout may be maintained. Sextants and chronometers are also urgently required.

Heretofore the United States has been obliged to rely almost entirely upon foreign countries for its supply of such articles. These channels of supply are now closed, and as no stock is on hand in this country to meet the present emergency, it has become necessary to appeal to the patriotism of private owners, to furnish "eyes for the navy."

Several weeks ago, an appeal was made through the daily press, resulting in the receipt of over 3000 glasses of various kinds, the great majority of which has proven satisfactory for naval use. This number, however, is wholly insufficient, and the navy needs many thousands more.

All articles should be securely tagged giving the name and address of the donor, and forwarded by mail or express to the Honorable Franklin D. Roosevelt, Assistant Secretary of the Navy, care of Naval Observatory, Washington, D. C., so that they may be acknowledged by him.

Articles not suitable for naval use will be returned to the sender. Those accepted will be keyed, so that the name and address of the donor, will be permanently recorded at the Navy Department, and every effort will be made to return them, with added historic interest, at the termination of the war. It is, of course, impossible to guarantee them against damage or loss.

As the Government cannot, under the law, accept services or material without making some payment therefor, one dollar will be paid for each article accepted, which sum will constitute the rental price, or, in the event of loss, the purchase price, of such article.

Toward the end of January, it is proposed to distribute throughout the country, posters making an appeal to fill this want of the navy.

SIX MILLION TARGETS THROWN IN REGISTERED SHOOTS DURING 1917

Iowa plucked the honors for holding the greatest number of registered trapshooting tournaments and for organizing more gun clubs than any other State in 1917, but to Illinois goes the credit of throwing the greatest number of targets, with Pennsylvania second. Without the Grand American Handicap Pennsylvania would have exceled, as the difference between the States is a little more than 200,000, while more than 300,000 were thrown in the Grand American.

Illinois trapped 821,885 targets for its shooters, which, as far as we know, is the greatest number that has ever been trapped in any one State in one year. Records of the Interstate Association for 1917 show that 504 tournaments were held, and that 493 have made reports. In these 493 tournaments 6,175,848 targets were thrown. This is the greatest number of targets ever thrown. The record of 1916 was 6,366,110, which was two millions more than the year previous.

There wasn't as many trapshooters in competition in 1917, however. 1916 records show that 10,528 individual shooters faced the traps, while this year's figures contain the names of 8765. The average number of targets thrown at each tournament in 1916 was 12,700. The average in 1917 was 12,554.

ACTIVITIES OF THE AUDUBON ASSOCIATION

Responding to the slogan issued by the U. S. Department of Agriculture "Conserve the birds of your State," the Audubon Association of the Pacific tenders its services to the agriculturists of California. Consult them about the beneficial and harmful varieties of birds; report the species most common upon your lands; what "pests" are most numerous; what "crops" you propose to raise.

Every assistance will be given free of charge upon application at the Publicity Department at the A. A. P., 312 Phelan Building, San Francisco. Lectures are held under the direction of this association the second Thursday evening in each month at the Lecture Hall of the California Development Board in the Ferry Building, to which the public is invited.

FIRST SHOOT AT SHELL MOUND

Members of the Shell Mound Pistol and Rifle Club started the 1918 season Sunday, January 6. There was competition in both branches, with the pistol as well as the rifle. Scores were reported as follows:

Rifle scores, 200 yards—Class A: F. P. Poulter, 184, C. W. Seely 221, 223; E. R. Schurbaum 215, 190; L. E. Ericksen 196, 190; H. L. Thompson 215.

Class B—F. A. McLaughlin 174, 160; R. W. Ballard 192, 169; H. W. Klinebroich 184, 194; C. M. Kraul 159, 181; Chris Otten 184.

Class C—T. H. Johnson 167, John Bender 164.

Unclassified—G. P. Rudolph 108, 109; P. Kulic 148, 199; James Santos 177, 162.

Pistol scores—C. Seely 82, 85; M. Sherbaum 87, 79; M. Lillimo 90, 94; M. Bridge 84, 85; M. Glaughlin 56, 48; A. Thompson 74, 79; N. Guild 82, 75; Johnson 71, 70; C. Gaetjen 79, 82; W. A. Siebe 81, 93.

CANADA IS BREEDING BUFFALO

An Advisory Board on Wild Life Protection has recently been appointed by the Canadian Government, and special efforts will be made to preserve the fur-bearing animals and big game that constitute the chief natural resources of the Northwest territories.

In this connection it is interesting to learn that more than 3000 head of bisons are now under Government protection in Canada. These include about 2400 in the herd, originally of 750 head, purchased in the United States in 1907 and kept in the Buffalo Park at Wainwright, Alberta; and a wild herd of about 500 in the Peace River region, southwest of Great Slave Lake.

The Canadian Government is carrying on experiments in crossing bison with domestic cattle.

DUCK HUNTING IN AEROPLANE

The rich who have time on their hands are on the trail of a new form of sports, although it may be said in its support that men of the aviation corps have a very good argument in its favor as an aid to marksmanship.

This new sport is nothing more or less than hunting ducks by aeroplane, the incentive, of course, being the opportunity for wing shooting against double speed. That is, the machine is traveling at bird speed while the ducks are likewise doing record work.

One of the army corps says:

"There could be no better practice for marksmanship than to hunt fast-flying birds like wild ducks in aeroplanes. The problem of maneuvering would be about the same as would be encountered in combat with a hostile flyer, and hitting flying ducks from an aeroplane going ninety miles an hour would require a steady eye and hand."

BAKERSFIELD FIELD TRIALS

Arrangements have been completed for holding the annual California Field Trials at Bakersfield and stakes were offered and judges selected.

H. L. Betten of Alameda was named as presiding judge, with Phil Wand of San Francisco and William Dormer of Oakland, associate judges.

The stakes will be run as follows:

Derby, with approximately twelve entries, on opening day, Monday, January 21.

All-age stake, with approximately twelve entries, Tuesday, January 22.

Members' stake, with approximately eight entries, Wednesday, January 23.

It is expected that there will be about fifteen active participants from this part of the State and that the southland will furnish as many more.

The winners of last year's stakes are already at Bakersfield, which insures good competition for the events this year. J. Walter Scott's Floretta, winner of the all-age in 1917, is re-entered, while Maggie D., the Derby winner, from the kennels of Wilkes & McKeon, is another competitor for the all-age.

True Blue, F. de Augustine's dog, who placed in the Derby, and Delta Mohawk, who has already captured two Derbies this season, are among the high-class dogs to take part.

Dr. Beardsley will have an entry in the competition, while Mrs. A. G. Wilkes is training several dogs for the trials.

There were present at the meeting on the 14th the following members from this part of te State who will attend the trials: A. G. Wilkes, president; Roy S. Avery, secretary; William Dormer, Phil Wand, J. S. French, John W. Considine, J. Walter Scott, F. de Augustine, Joe Chancellor and Harold Havens.

THE WHITE CROWNED SPARROW

These songsters summer either in Alaska or at the very crests of the Sierras. Their clear, whistling note is familiar to mountain climbers. This sparrow is a lover of what Kipling calls "the mountain coolth." They are to be found close to the glaciers and near talus heaps, where the conies are storing their piles of winter feed in the rock crannies that are to be covered by the next winter's snow. These handsome black and white crowned birds commence each year to leave the mountains and the far north with the first flurries of autumn snow. Soon they are to be found throughout the valleys of California, where they remain during the winter.

Every California boy should know the difference between the native sparrows, such as the white-crowned and that unwelcome pest, the English sparrow. The native sparrows are daily helping Hoover through their love of our native weed seeds. The English sparrow, on the contrary, is driving out the native weed-seed eaters and insect eaters just as unrestricted Asiatic immigration would drive the white man from California. There is no better way of learning to tell our native birds than by studying such books as Mrs. Brailey's "Birds of Western Northern America," which can be obtained through most of the 2141 County Library Branches throughout California.

GRAND FINISH BY FORD

O. N. Ford, the San Jose veteran, traveled 2136 miles to take in five consecutive shoots, beginning at Los Angeles, September 16, and winding up at Phoenix, Ariz., October 13, and this mileage does not include the return trip to San Jose. Ford missed only 17 targets out of 600 in three days' shooting at Los Angeles, four in 200 in a one-day shoot at San Jose, six in 400 in a two-days shoot at Vernon, 11 in 550 in three days' shooting at Ray, Ariz., and finished up by breaking 200 straight at Phoenix. Besides the runs mentioned previously he has 44 better than 50 and 6 better than 100. Of the last 2125 targets Ford shot at he broke 2085, about 98 per cent. Ford's five consecutive tournament mark is an amateur record. For the year Ford shot at 6000 targets and averaged 95.30.

ADVANTAGES OF THE PEEP SIGHT

Strictly speaking there are three classes of sights, those commonly known as open, telescopic and peep. Specifically the open sight consists of a straight bar with a notch in the form of a V, a square U or the regulation U, and in combination with this open sight a plain front sight is ordinarily used, consisting of a blade, a globe, a pin-head or straight up and down sight.

The peep sight may be described as a disc with an aperture in the center. This aperture may be of any size, depending on the option of the shooter. The front sight used in combination with the rear peep sight for target shooting is usually the globe sight, but many shooters prefer the aperture sight, which completely rings the bull's-eye of the target and allows a line of white around the bull's-eye. For hunting purposes a large rear aperture sight in conjunction with a front open sight is ideal.

The telescope sight, while used on high power sporting rifles by sportsmen in pursuit of big game, is also used extensively for target shooting on both low and high powered rifles. A telescope sight for hunting is useless unless the hunter is thoroughly familiar with it. The telescope is a delicate instrument and the slightest jar is liable to damage or throw it out of adjustment.

To sum up, therefore, for target shooting the best results are obtained with the peep sights because the eye automatically and consistently centers the object each time. With open sights this is not so and the results are uncertain. The telescope sight is best for target shooting at very long ranges when used by an expert.

It is possible to place the peep sight adjustable for windage or elevation changes on the tang of any standard make of rifle.

There is no reason, therefore, why anyone interested in target shooting should be handicapped by using inferior equipment. Plain open sights are all right for very short distance shooting but for fine target work the peep sight is indispensable.

PART OF SEQUOIA FOREST RESTORED TO PUBLIC DOMAIN

Upon the recommendation of Secretary of the Interior Lane, the President has recently signed a proclamation excluding from the Sequoia National Forest in Eastern California a large amount of land. There will be restored to the public domain under this proclamation about 303,000 acres, chiefly surveyed land.

It is reported that the lands restored are generally sage brush foothills with about 20,000 acres of agricultural land and the rest better adapted to grazing than other purposes. The lands are in scattered areas along the eastern, southern and western boundaries of the forest in Fresno, Inyo, Kern and Tulare counties. They will become subject to entry only under the homestead laws requiring residence at and after 9 o'clock a. m., February 14, and to settlement and other forms of disposition on and after February 21, 1918.

For detailed information concerning these lands, communications should be addressed to the United States Land Offices at Independence, Sacramento and Visalia, Cal.

LAGUNA MOUNTAINS

San Francisco, December 19.—A road connecting the Imperial Valley-San Diego State Highway with the Laguna Mountains will be completed early in 1918, according to a statement given out by the acting district forester today. This road will be a lateral of the State Highway, ten miles long, and will cost approximately $30,000. It will have an average grade of 5 per cent, and nowhere will be more than 8 per cent.

The completion of this road will throw open for recreation purposes one of the finest outdoor regions in the National Forests in California. The Lagunas, owing to their comparative inaccessibility, have heretofore been visited only by the cattlemen and occasional hunter. Before the right-of-way for the road was cleared, they could be approached only by rough road and trail through miles of chaparral hills. Long before the coming of the white man the Lagunas were favorite hunting grounds of Indians. Visitors can still pick up arrowheads, and bits of Indian pottery, and the holes worn in the rocks by Indian women grinding acorn meal are to be seen in many places.

The chief feature of the Laguna region is a broad plateau of about 5000 acres containing long rolling meadows, streams and lakes. The low hills are covered with giant oaks and pine, and for the most part are free of brush, all of which gives the region a park-like appearance. The altitude of the plateau is between fifty-five hundred and sixty-three hundred feet. From the highest point, Monument Peak, a wonderful view of the mountains of Mexico, the Salton Sea, the Colorado Desert and Imperial Valley is obtainable.

The Forest Service has reserved the entire region for the recreation seeker. Under the direction of Frank A. Waha, professor of landscape engineering at Amherst College, and consulting engineer of the Forest Service, the tracts have been surveyed and subdivided for building purposes, and for public camp grounds. Lots averaging half an acre in size will be rented by the Government for summer homes and permanent camps. Sites have been reserved for public, municipal and playground camps, athletic fields, including baseball diamonds and golf courses. More than five hundred lots will be available for occupancy in the spring, and more will be laid out as needed. The Lagunas can be reached within about twenty-five miles by railroad from Campo, and upon the completion of the new auto road will be three or four hours away from San Diego and El Centro by automobile.

DOGS SAVE MANY LIVES

"The military dogs are no hobby; their usefulness has been amply demonstrated. In Europe they are used, in the main, for three purposes—as ambulance assistants and searchers out of the wounded, as scouts and messengers, and as sentries. To a small extent they are used as ammunition carriers as well, while terriers have been used to rid the trenches of rats. Of these activities the most valuable, probably, is the first. Stories lead me to believe that not a day passes on the French and Belgian fronts that does not find some dog, unmentioned in the orders of the day, braving shell fire and bullets in the discharge of his appointed duty, and perhaps laying down his life in the heroic effort.

"For the dog can do what no man can do. He can dash through shot and shell swiftly, and to a position where it would be sure death for a man to go. He can find the wounded by his superhuman sense of smell, distinguishing the living from the dead. He can bear water and restoratives to the stricken soldier, and then, by bringing back a helmet or other object, inform his masters of the wounded man's presence, and then lead them there when it is safe to go."

FAMOUS DOG POISONED

Baldy Bruno, famous for his feat in saving 18-months-old Houston Dewey from the attack of two huge eagles on the summit of Old Baldy, and one of the best-known dogs in Southern California is dead. Some malicious person having given him powdered glass. His master, W. B. Dewey, has offered $100 for the arrest and conviction of the person responsible for his death.

Bruno was also accorded the distinction of being the only wild dog in captivity, having been taken from a wild dog runway in a wash between Redlands and San Bernardino some eleven years ago when but a small puppy. His rescue of the Dewey baby occurred several years ago when Mr. and Mrs. Dewey conducted a hotel on the summit of Old Baldy and his act at the time attracted wide-spread attention.

An eagle had already taken the child in its great talons and was rising into the air, when Bruno, with a mighty leap, jumped on the bird's back and brought it to earth.—Ex.

Dates for the Midwinter Handicap of the Los Angeles Gun Club have been changed from January 21st and 22d to February 25th and 26th, with the 24th as practice day. The date was changed at the request of several eastern shooters who wish to attend the Pinehurst shoot, and then come to California, notably H. E. Dickerman and W. E. Phillips, Mr. Dickerman writing to Secretary Teepe that with a change of date, a full squad will journey to the coast, and a number of shooters are expected from Montana, Idaho and Oregon. The Los Angeles shoot will be a $500 event.

"LEARN TO SHOOT"

How our admiration kindles and our respect deepens as we turn back the pages of history and read how our hardy forefathers wrestled a livelihood from the frontier of a wild and uncultivated country which afforded the utmost of desolation and danger in many and terrible forms, and demanded the utmost of sacrifice and privation from those who challenged its supremacy.

Who in this advanced age can conceive, let alone appreciate, the hardships the early pioneers suffered. Far from the haunts of civilization they made their homes. Generations before the advent of the steam engine, the telephone and telegraph, and the application of electricity for lighting purposes, in the days when the stage coaches were the only means of transportation at the disposal of the public, and the delivery of mail over comparatively short distances was a matter of months instead of hours as at present, when the nearest neighbor might live a distance which could not be covered within several days travel, and such refinements as churches, doctors, etc., were not thought of because they were beyond the bounds of possibility, the very nature of life on the frontier was such as to make for a hardy, vigorous and resourceful people.

Methods of removing the forests and tilling the soil were necessarily crude, because of the absence of even the imperfect tools and implements of the time. And so men came to depend in large measure for sustenance, and even life itself, upon the rifle which was an essential part of their equipment. They became expert marksmen who made every shot count because powder and ball were expensive and difficult to procure, and because a shot wasted often invited serious consequences.

Out of this crucible, then, it is not strange that a race of marksmen should emerge, whose supremacy has often been proven in the succeeding years. And it has ever been our boast that whatever else we may have neglected in the way of athletics we must still be reckoned with on the rifle and shotgun ranges.

With the advance of civilization, the necessity for knowing how to shoot became less and less pressing, with the result that while we may not have lost our inherent love of firearms, it certainly cannot be said that the proportion of our men are now expert marksmen as was the case two, three or four generations back.

In time the art of shooting even came to be frowned upon in certain circles and among certain peoples, who advanced the theory that when you thaught a man to properly care and use firearms you also thaught him how to kill his fellow men, and therefore the art of shooting should be dispensed with as being dangerous to society at large.

And these serious, through misguided theorists were not lacking in followers. Unheeded went the lessons thaught by the Boer war when time and time again mere handfuls of South Africans who knew how to shoot defeated and put to route some of the best drilled regiments that ever came out of the British Isles. Unheeded were the lessons learned in our own experiences with England, with the Indians and with Mexioo.

Even Great Britain heeded not the lesson learned in the Boer war, despite the repeated urgings of Lord Roberts, and when the present war had to be faced as a stern reality England was sadly lacking in men who knew how to shoot.

"Shooting" said Lord Roberts, "is seven tenths of a soldiers' business." And when Lord Kitchener was getting England's men ready for the present war, he asked that they be thaught to shoot, and that quickly, regardless of whatever else they learned.

4610 TRAPSHOOTING CLUBS

Beginning the year of 1918 there are 4610 trapshooting clubs in the United States, Alaska and Canada.

One year ago the number of clubs was 4638.

The failure to meet the figures of one year previous is attributed to conditions over which we as individuals have no control.

Trapshooting is more firmly intrenched now than it was a year ago. In past years trapshooting clubs were fly-by-night affairs, but now they are substantial affairs; 326 clubs saw the light of day in 1917.

Trapshooting clubs are also to be found in the Bahamas, Philippines, China, Cuba, Panama, New Zealand, Australia and Hawaii.

FOOD VALUE OF FISH

Some simple facts about the food value of fish are given in the Butchers' Advocate by H. F. Taylor, a scientist of the Bureau of Fisheries. Pound for pound, he says, there are nearly if not quite as much protein in fish meat as in beefsteak, and fish could be substituted for all other kinds of meat every day in the year without ill effects. Oily fish, like shad, herring, and eels, are especially nutritious, affording a large quantity of fat as well as protein. Fish roe contains more protein than beef, with some fat. Fish meat is quite as easily digested as other meat, and is a suitable form of protein for sedentary workers. Practically every fish taken from pure water is fit to eat, the only objection to some varieties being toughness and coarse texture, which can be remedied by proper cooking. Sharks, for instance, furnish an abundance of wholesome meat of good flavor—there is nothing against them except that they are sharks.

as regards trapshooting ability is proven by a perusal of the 1917 averages compiled by the Interstate Trapshooting Association.

It is singular, likewise remarkable, and it does not seem possible that the combined averages of the highest ten shooters from each section of this great country should be the same—.9644, but that is what the Interstate Association "dopester" says they are. That is just about as close as any one could expect in one year's shooting.

But we did a little figuring on our own hook and getting the thing down to the smallest of fractions we find the West has a fraction the better of the statistics, viz.:

West, .964419; East, .964353

That isn't much difference, to be sure, but we didn't want to proclaim to the world that the high ten shooters of the East and the highest ten of the West deadlocked to the fraction on 55,000 targets, and have some other "dopester" writing to the editor informing him that the figures were incorrect. Whatever joy there is for the Western shooters in the margin given above they are welcome to.

This is the first time in three years that the West has outshot the East in the averages. Ty Cobb beat Nap Lajoie for the American League batting crown one year by an even smaller margin than the West put it over on the East this past season, so that fractions are worth something, after all.

California, the Hope of the West

Eastern leaders fired at 29,035 and broke 28,000, while the Western stars shot at 26,700 targets and smashed 25,750. The West owes much to California for its excellent statistics for four of the high ten shooters are from the Golden State, and two of them are from Los Angeles. New York contributes four of the Eastern team's ten.

Woolfolk Henderson, C. H. Newcomb and Frank Wright have been on all three of the Eastern teams and Frank Troeh and J. R. Jahn have been on all the Western teams.

This idea of comparison of the East against the West and the Professionals and Amateurs in Trapshooting will bring forth as many arguments as the selection of All-American baseball or football teams, for there are more active participants in trapshooting than any other sport.

Just such a yarn as this a couple of years ago gave the Westy Hogans an idea to stage an East against the West shoot, and in years to come this will be one of the biggest events on their card.

HE NEVER SPOKE AGAIN

A ventriloquist who had a worthless dog and no money hit upon a clever scheme to convert the former into the latter. Going into a restaurant he took a seat, the dog sitting on the floor beside the chair. When the waiter came the centriloquist turned to the dog with the query: "Well, Jack, what will you have!" The waiter nearly collapsed when he apparently heard the dog answer, "A ham and beef sandwich." Then he hastened to the proprietor. "I say, gov'nor," he exclaimed, "there's a dog over there that can—talk." It immediately struck the proprietor that such a dog could draw custom, so after hearing the animal talk he began bargaining for him. The dog during the haggling over the price begged in so realistic a manner not to be sold that the restaurant keeper became the more determined to have him, and at last agreed to the ventriloquist's price, 20 pounds sterling. As the trickster started for the door with the money the dog inquired: "Have you really sold me!" "Yes, Jack, I've sold you," was the reply. "Well," said the dog, "mark my words, I'll never speak again!"—Illustrated Kennel News.

THE FARM

ENLISTING THE SNAKES, HAWKS AND OWLS

A Kansas farmer recently printed in the Abilene Register, that State, the following advertisement:

"Notice—I have put a bull snake in my alfalfa field north of town to catch the gophers. Please do not bother or shoot him, as he is a good, well-behaved snake and harmless except to gophers and mice."

Whereupon Eastern newspapers clipped it as a piece of humor.

But there is a very definite food-saving idea here. All over the country we have harmless snakes, capable of rendering the utmost service provided they are left alone. But even country people find it difficult to let harmless snakes follow, unmolested, a snake's legitimate business.

There is a certain big black snake throughout the East common in fields and around farmhouses. He is not only harmless but whenever one sees him about the premises he is diligently at work catching mice or cleaning up refuse. But he looks deadly enough to the inexperienced eye, and, moreover, has an unfortunate curiosity. When he hears a horse coming down a field row hitched to a cultivator, guided by a boy, his natural desire to know what is coming leads him to raise a quarter of his length from the ground and take a look, and nine times in ten the boy stops the horse and virtuously slaughters Mr. Snake, thus killing a mouser capable of catching far more rodents than any tabby cat.

It is the same with hawks and owls. The owner of a flock of hens sees an enormous hawk sailing over the barnyard and brings it down with a rifle, believing that he has destroyed an enemy. But only two varieties of hawks in this country prey upon hens, and neither of them sails over the barnyard in that manner, for their line of attack is stealthy, through trees and brush.

Likewise, with owls, which are most persistent destroyers of small animals harmful to crops and food stuffs. There was a campaign of owl and hawk killing through the East some years ago which went far enough to upset the balance of nature locally and bring on perfect plague of mice. When diseases reduced the number of coyotes in the Northwest, some years ago, the farmers' joy at what they considered relief from a pest was soon turned into alarm, as a plague of jack rabbits and gophers followed, the chief food of the coyote.

In the conservation of food we need these helpers, not merely in war, but permanently, in the production and conservation of food.

GROUND SQUIRRELS COST THE STATE $30,000,000 ANNUALLY

The State Commissioner of Horticulture, G. H. Hecke, is preparing to carry on an extensive campaign the coming year to control the California ground squirrel. It is estimated by the U. S. Biological Survey that the damage from rodents in the State of California is in excess of $30,000,000 annually. The squirrels, which do the larger part of this damage, can be practically eradicated for a mere fraction of this amount.

The U. S. Public Health Service is already spending $70,000 annually in the Bay counties in the campaign to eradicate squirrels, and the U. S. Biological Survey is doing the same work in the forest reserves. In all probability the money will be appropriated by the State to control squirrels on the State school lands and to support a campaign of education in an endeavor to get all the counties interested in the work. The Commissioner expects to ask for the designation of a squirrel week in May or June in which a vigorous campaign can be carried on by all the land owners of the State.

A WORD ABOUT THE BROOD SOW

She Will Return Many-fold the Good Care Bestowed Upon Her

The successful raising of a crop of pigs requires that much forethought and attention be devoted to various phases of brood sow management.

The brood sow, if a gilt, should be as growthy as possible, medium to good in condition but not fat. It is well that the gilt make a reasonable gain during the breeding season. If the sow is mature and has been carried along on good pasture during the summer with only enough grain to keep her from losing excessively in weight, an increased grain ration and the addition of a fifth to a third of a pound of meat meal tankage will be of benefit at breeding time. The sow that is gaining is more likely to conceive with less services and to produce a larger litter than a sow that is barely holding her own or is losing weight.

Dry, well-bedded sleeping quarters are in order. Exercise is to be encouraged. Lice must be controlled. Water and feed in sufficient amounts to keep the sow gaining during the entire pregnancy period must be provided.

The sleeping quarters must be dry, well bedded, and as free from draughts as possible.

The sows can be made to exercise by feeding some distance from the sleeping quarters or by allowing them to work manure piles. Care should be taken that they do not sleep here, especially if they are allowed to work over the manure from horse stables.

Lice are easily managed through the crude oil method.

The combination of corn and tankage probably comes as near as any to the ideal brood sow ration from the standpoint of the health and strength of the sow and the new-born litter. Corn should make up the greatest part of the grain ration, as it is one of the best and cheapest feeds when results are considered. The young sow needs a greater proportionate amount of protein supplement than does the mature sow, but from .2 to .4 pound of meat meal tankage should cover the range.

Buttermilk or skim milk most efficiently takes the place of tankage, giving splendid results if 3 pounds to 8 pounds are allowed.

Ground alfalfa, alfalfa leaves or a good grade of alfalfa hay can be used to a good advantage along with corn in place of meat meal tankage or skim milk. It is essential, however, that the pregnant sow eat from 1 to 1½ pounds of the alfalfa a day if good strong litters are wanted. In case the alfalfa is not eaten from the racks to this extent, some substitutes should be provided or else methods of alfalfa feeding should be adopted to insure this minimum consumption of hay.

Such feeds as wheat middlings and linseed oil meal may sometimes be used to advantage, but as a rule the other feeds would be preferred.

Treat the well-selected brood sow kindly and intelligently and she will respond in full measure with a fine litter of pigs at weaning time.

PRINCIPAL HOG-MARKETING MONTHS

More hogs are marketed in December than in any other month of the year, according to studies of hog marketing now being made by the U. S. Food Administration. During the hot months of the year, July, August, and September, the shipments are only about one-half those of the winter months. After January, receipts at packing centers decline in each of the succeeding months until May and June, when there is another increase. The two high points of the year in December and June reflect the marketing of the two crops of pigs that are produced each year and are finished for market during those months.

Since its occupation of Northern France, Germany has seized 2,700,000 French and Belgian cattle. By this means and by drastic measures of restriction at home, Germany has succeeded in maintaining practically her original stocks of cattle.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENY,
BONY TUMORS,
LAMENESS FROM SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES

BUNCHES or BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANY ONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard VETERINARY REMEDY

Always Reliable. Sure in Results.

None genuine without the signature of *The Lawrence-Williams Co.*

Sole Importers & Proprietors for the U.S. & CANADAS. CLEVELAND, O

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CRANER, Training Stables, 990 Jennings Street, New York City.

Sole Agents for the United States and Canada.

UNION STOCK YARDS, CHICAGO, ILL.

PALMER L. CLARK, President.

CURE BEEF AT HOME

Farmers can not only reduce their living expenses but they can perform a patriotic service by curing their own meats. Many farmers cure pork sufficient to supply the family needs, but very few attempt to cure beef. P. F. Trowbridge of the University of Missouri College of Agriculture offers the following suggestions for curing beef on the farm.

Any of the brine or dry mixtures which give good results in curing pork can be used satisfactorily for beef, but since beef is leaner than pork it should not be allowed to remain in the brine or mixture quite so long or it will become hard and salty.

Dried beef should have the same cure as corned beef, but it should not be allowed to become too salty. It should then be washed to remove the excess of the cure, and smoked if the smoke flavor is desired. A very good country practice is to dry cure the beef with salt and brown sugar, using about a fifth as much sugar as salt, rubbing the meat very thoroughly with the cure every two or three days for about two weeks. It should then be washed, wiped, and hung up to dry in a warm place or transferred to the smoke house and given a light smoke.

Corned beef is at its very best when it has been in the cure about ten days. If kept in the cure more than a month, it needs considerable freshening before cooking. If the red color of the beef is to be preserved, use a small amount of saltpeter, not more than two oz. to each hundred pounds of the meat. This improves the color of the meat but is detrimental in that it tends to harden the lean fibres.

SWINE RECORD ASSOCIATIONS.

A notable move, recently animated, is toward combination by the two Dunroc-Jersey record associations. Committees have been designated by each organization, and for the good of the breed it is expected that they will get together. The American association increased its capital stock from $25,000 to $50,000, and voted to issue $2,500 additional shares of stock. Its officers were re-elected.

The (Chester) White Swine Congress was dissolved by joint action of the Chester White Record Association and the Ohio Improved Chester Swine Association. This means less co-operation and more conflict of interests between Chester White breeders.

HOLDING ON

Horse owners, those who posses good blooded stock, have caught on to the fact that now is not a good time to part with their belongings. They figure that from now on the demand for good stock is going to be more intense than ever before and though it is costing them high prices for food they will more than even up by holding on to what they have. This is particularly so in the case of mares. When this war is over watch and see if the government does not take a stronger hand than it ever has taken in horse breeding. Americans have been taught a lesson that likely will never be forgotten, as to their neglect in systematizing horse breeding. There should not be a single cull on American farms nor would there be if breeders were made to understand that catch-as-catch-can methods in mating is good and sufficient enough only so long as the result is a thing with four legs and having the exterior evidence of horse. And when this great and needed change takes place other plans will be developed by states in co-operation with horse loving people to provide means whereby horses may be driven with safety on highways of both country and city. All it needs is organization of horsemen to have such means approved and carried out and when this is done it will not take longer than five years when as many drivers, saddlers and carriage horses will be used everywhere.

CARE FOR FLOCK OF GUINEAS

Although the nervous, excitable disposition of the guinea cannot be overcome by gentle treatment and petting, the guinea is easily taught to return home from its wanderings at night, if it is so taught while young, and for this reason it is usually better to buy eggs and hatch them under a chicken hen rather than buy old birds and remove them to a strange place.

The guinea is very tender while young, and it is best to have them hatched during the warmer part of the season. They must have dry quarters and if hatched under a chicken hen they must be confined in a coop or box so closely that they cannot escape and run away for a few days until they learn the hen's call.

After they are a few days old they are better if allowed to run at large to gather their own food. They may be fed mornings and evenings, but will gather most of their food. The guinea hen has a rather bad reputation as a mother, but it is according to nature for every species of animal life to know how to care for its own young, and our experience is that under ordinary conditions the guinea hen knows better how to care for her young than any foster mother. Of course a guinea hen, or any other hen, for that matter, cannot succeed in rearing a flock of young keats if they are hatched late in the fall.

VALUE OF A GOOD SIRE

Aside from testing as a means of building up the dairy herd, the selection of a good, purebred sire is of great importance. Raising the heifer calves of good, high-producing cows is a fundamental requisite for the best and easiest improvement of the dairy herd. Many times too little attention is paid to the quality of the sire. Calves receive their qualities from both parents, and it is important that the calf have good parentage on the male side. In a herd of forty cows each one each year represents 1-80 of a future herd, forty cows represent 40-80, and the sire represents 40-80, or one-half of the capacity for milk production and everything transmitted to the calves which are to constitute the succeeding herd. In this way the sire becomes three-fourths, seven-eighths, fifteen-sixteenths, etc., of the herd. From generation to generation a succession of well selected sires increases and intensifies improvement. So the sire may be much more than half the herd when judged by the cumulative effect of the characteristics transmitted for five or six generations, which brings the breeding down to a pure proposition.

The beef trust is at its old game again to have the oleomargarine tax removed, and the pernicious propaganda is appearing in the daily newspapers that are favored with its general advertising, and which, by the way, has never gone to the agricultural press. Yellow is the natural trade mark of butter. The beef trust and its allies have spent hundreds of thousands of dollars to get it for their imitation products, all for the purpose of getting more money for their bull butter. A large oleo manufacturer when appearing before a committee of congress said that the natural color of oleomargarine was white; that such oleomargarine was a better quality, because it contained a higher grade of refined oils, but he added, "Of course, there is more money in the yellow." Now the beef trust is trying to add new burdens to the creamery interests by recommending to the joint committee on definitions and standards of food that the fat standard for butter be increased from eighty to eighty-two and one-half per cent.

1st and 2nd AMATEUR TRAPSHOOTING AVERAGES for 1917 were won with

Peters Shells

The known superiority of the (P) brand is a factor that trap and field shooters are quick to take advantage of. Sportsmen of all classes and in every section of the country have been made strong advocates of **Peters** Shells because of their exclusive and superior features. In the 1917 trapshooting averages, two representative shooters captured first and second honors, and both depended upon the (P) brand in achieving this success.

1st. W. H. Heer, Guthrie, Okla., shot at 2050, broke 1997. Average, .9741.
2d. Woolfolk Henderson, Lexington, Ky., shot at 2570, broke 2502. Average, .9735.

SIX TIMES IN THE PAST 8 YEARS THE HIGHEST AMATEUR HONORS HAVE BEEN WON WITH THE (P) BRAND.

In the 1917 official professional averages, Mr. L. H. Reid, of Seattle, Wash., shooting **Peters** Shells has an average of .9722, winning second place and High General Average for the Pacific Coast.

Remember the old saying "the Best is the Cheapest in the end" and insist on having PETERS.

THE REAL LADY 2:03

World's Champion Two-Year-Old and Three-Year-Old Trotter

$2500.00 GUARANTEED $2500.00 GUARANTEED

THE STATE FAIR FUTURITY No. 10

(FOALS OF MARES COVERED IN 1917)

TO TROT AND PACE AT THREE YEARS OLD

TO BE GIVEN UNDER THE DIRECTION OF THE

CALIFORNIA STATE AGRICULTURAL SOCIETY

ENTRIES TO CLOSE MARCH 1, 1918

MONEY DIVIDED AS FOLLOWS:

TROTTING DIVISION
$1500 FOR THREE-YEAR-OLD TROTTERS

PACING DIVISION
$1000 FOR THREE-YEAR-OLD PACERS

ENTRANCE AND PAYMENTS—$2 to nominate mare on March 1, 1918, when name, color, description of mare and stallion bred to must be given; $5 June 1, 1918; $10 on yearlings June 1, 1919; $10 on two-year-olds June 1, 1920; $10 on three-year-olds June 1, 1921.

STARTING PAYMENTS—$35 to start in the three-year-old pace and $50 to start in the three-year-old trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse entered is a Trotter or Pacer.

CONDITIONS

Races three heats: money divided 30 per cent to the first heat, 30 per cent to the second heat, 30 per cent to the third heat and 10 per cent to the race according to rank in the summary. Money divided in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before January 1, 1919, her nominator may sell or transfer his nomination or substitute another mare or foal regardless of ownership, but there will be no return of payment nor will any entry be liable for more than amount paid in or contracted for.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments.

This Society is liable for $2,500.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors of this Society.

There will be no more moneys in each division or heat than there are starters.

Entries open to the world.

Other than exceptions made on this entry blank, rules of the National Trotting Association to govern.

Address all communications to the Secretary.

JOHN M. PERRY, President.

Columbus, Ohio, September 16-28.
Lexington, Kentucky, September 30-October 10.
Atlanta, Georgia, October 14-18.

Any breeder of standard horses who will read the reports of the auction sales can not fail to note that colts that have state engagements have a far greater value than those that are unstaked, and this excess value is much more than the cost of engagements. But a few of the California breeders of standard stock can spare the time and expense necessary to train and race their colts in the big futurities that are decided every year on the Grand Circuit, consequently it is necessary that they should patronize the home stakes if they desire to race their colts here, or sell them to those who will race them. The State Fair Futurity will soon close for the nomination of mares covered in 1917. The date for the closing of this state is Friday, March 1st, 1918. The value of the stake is $2500, and it costs but the small sum of $2 to nominate. If the reader will refer to the advertising columns of the Breeder and Sportsman he will find all the conditions of State Fair Futurity No. 10 there set forth, and it would be well for him to make a note of the date of closing and determine to send Secretary Charles W. Paine his nomination on or before March 1st. There will probably be no more than three stakes for the three-year-olds of 1921 to race for in California, and if a colt can win all three of them he will earn about $2500, which is worth while. Let everybody get busy now and see if we can't pull a larger number of nominations than usual for the State Fair Futurity No. 10. A small boom has been started in trotting horse affairs in this country, and every person interested should aid in keeping it going. March 1st, 1918, will be the last day for making nominations in this state.

A well-known breeder of thoroughbred horses expressed the opinion to the editor of this journal, the other day, that a meeting and conference between the breeders of thoroughbreds and the breeders of trotting and pacing horses might be held in this state that would result in great benefit to both interests. Time was in California when at every fair, that had a racing programme, the runners and the harness horses were alike provided for and all the prominent breeders of the state met at these fairs in friendly association and rivalry for the honor of winning. This was before the advent of the bookmaker, the individual who made wagering on a horse race so obnoxious to the general public that the Legislature adopted a drastic law that has put the thoroughbred and almost put the trotter off the map in California. The writer believes that the state and every county fair association in California should make up its racing programme with both running and harness events. He also believes that the California State Agricultural Society should announce stakes of futurities for thoroughbreds as well as those now offered for standard-breds, and that every legitimate inducement should be given to the breeding and development of both breeds of horses in California. A meeting such as suggested between representatives of both breeds of horses would result, we believe, in something being accomplished whereby the sport of racing both thoroughbreds and trotters could be revived in California on a higher plane than it has enjoyed for many years, and out of such a conference might come some plan by which Californians would have the pleasure of seeing their horses raced here at home, and racing become what it should be—the most popular of all sports, with the best people of the land.

Dates for the California State Fair and Racing Association, that will mean harness races in connection with fairs from July 30 to October 26 in California and an extra week at Phoenix in November, were adopted yesterday afternoon at a conference of association directors and representatives of the various associations held at the Manx Hotel. Many of these dates are tentative, as some of the fair associations have not fully decided on holding meetings.

It was revealed in consequence of the announcement of the program that efforts are being made to hold a meeting at Oakland, which has been allotted the week from September 16 to 21. Asa Mendenhall, member of the Oakland Driving Club and an enthusiast, while not able to attend the conference, sent word that he is satisfied it will be possible to arrange for the construction of a speedway in Oakland and the holding of races in conjunction with a two months' fair that is planned.

Mendendall is likewise interested in arranging for a meeting at Stockton, though other members of the association are anything but hopeful as regards these two cities. The last harness race meeting held in Oakland was in 1908, when a program was run off at the Emeryville track. It was anything but a success from a financial and attendance standpoint.

The tentative program is:
Salinas, July 30 to August 3.
Ukiah, August 5 to 10.
Eureka or Areata, August 12 to 17.
Ferndale, August 19 to 24.
Santa Rosa or Woodland, August 26 to 30.
Sacramento State Fair, August 31 to September 7.
Stockton or Fresno, September 9 to 14.
Oakland, September 16 to 21.
Hanford, September 23 to 28.
Ventura, September 30 to October 5.
Riverside, October 7 to 12.
Hemet, October 14 to 19.
Los Angeles, October 21 to 26.
Phoenix, November 11 to 16.

Among the cities set for racing, there is anything but a certainty so far as the following cities are concerned: Santa Rosa, Stockton, Oakland and Los Angeles.

Fresno may later apply for dates, and if so, will doubtless be awarded the Stockton time, as it is generally agreed there will be no meeting at Stockton.

As the program was originally framed, Santa Rosa was set to close August 31, with Sacramento opening the same day. Charles Payne of the State Fair Association objected to the clash in dates, and it was agreed that Santa Rosa will close on Friday in case of racing.

The officers and directors present included:

L. L. Cannon of Santa Rosa, president; C. F. Silva of Sacramento, treasurer; Joseph Waddell, secretary; J. E. Montgomery of Davis, C. A. Durfee, S. H. Cowell, Walter Tryon and M. L. Woy of Fresno.

In addition there were present: Charles Payne of the Sacramento State Fair, J. Long of Eureka, David J. Reese of Ventura, M. I. Wheeler of Riverside, F. E. Ward of Hemet, representing Los Angeles as well; and W. J. Kenny of San Francisco. C. K. Eversol of Ukiah telephoned his regrets that he could not be in attendance.

President Cannon assured the members that in his opinion the circuit, while liable to changes, promises to be carried through in fairly good shape. M. L. Woy of Fresno was not so optimistic, and declared that unless there was a change he didn't believe there would be more than three weeks of racing on the circuit.

The directors have full power to act in the matter of making changes in the program as they see fit, and to allot dates.

P. C. T. H. B. A. DIRECTORS' MEETING

A meeting of the board of directors of the Pacific Coast Trotting Horse Breeders' Association was held on Wednesday, February 13th. There were present Directors Borden, Brown, Dalziel, Durfee, Giannini and Paine. A number of horsemen were invited to attend the directors' meeting, including the creditors, to whom balances were due from the Bakersfield meeting last year. The harness horse situation was discussed at some length, and it was the sentiment of the directors of the Breeders' Association present that should satisfactory arrangements be made, it would give its usual harness race meeting this year, and in any event make provisions for the racing of its futurity stakes. It was shown that since the Bakersfield meeting it had collected sufficient funds to pay fifty per cent of its indebtedness for the balance due on purses and stakes at that time, and it was ordered that this money be disbursed. The money due the futurity stakes which have not taken place, is held to be trust money, and will not be used for any other purpose except the particular stakes in which it was received for entrance.

PACIFIC BREEDERS FUTURITY STAKE No. 15

A total of twenty seven payments was made February 1st on three-year-olds in Pacific Breeders Futurity Stake No. 15—for foals of 1915—the three-year-old divisions of which will take place this season. The list of those kept eligible to this stake is as follows:

G. D. Armstead's b g, by Wilbur Lou, dam Fiesta Queen, by On Stanley.
S. S. Bailey's bl f Vesta Vernon, by Vernon McKinney, dam by Oh So.
I. L. Borden's b f by Major's By Guy, dam C. D. K.; b f by Ed McKinney, dam Miss Nutwood, by Nutwood Wilkes.

L. H. Todhunter's foal by Peter McKlyo, dam Zombowyette, by Zombro.
M. L. Woy's br c Strathalie Hall, by Black Hall, dam Strathalie, by Strathway.

WHAT DID THEY GET FOR THEIR MONEY?

A year ago Joseph Waddell arrived in California and announced his intention of forming a racing and fair circuit throughout the state. His stock in trade consisted chiefly of assurance and promises. He boasted of his ability to organize a racing association and to raise funds to conduct meetings and to induce horsemen to make entries and ship in large numbers from the Northwest and the Middle Western tracks. A meeting was called and The California Fair and Racing Circuit organized, with L. L. Cannon president and Joseph Waddell secretary. Contributions were asked for and about $2800 was subscribed and paid in, for the purpose of financing the organization. This money was all expended during the 1917 season and none of it used for racing. What is there to show for it? But two new towns, Petaluma and Ukiah, were added to the regular Circuit through Mr. Waddell's efforts. Minimum purses were given at both places, and it has been reported that, in one instance, some of these are still unpaid. Santa Rosa, the home town of the president of the organization, contrary to its usual custom, gave no meeting. No entries were received from the Middle West, and but one from Oregon, and the horse entered was not shipped here. This is a plain statement of facts, and it looks very much as if no one got a run for his money except Mr. Waddell. No impediments were placed in Mr. Waddell's path, and no knocking was indulged in, and it was the intention of this paper to make no comments upon Mr. Waddell or his circuit, but let the facts speak for themselves. The foregoing paragraphs were provoked by the publication of letters signed by Joseph Waddell in the Horse Review of February 6, in which he makes an attack upon the Pacific Coast Trotting Horse Breeders' Association and its officials. The article in question was written in a spirit of malice and misrepresentation and is false in every essential particular.

New York, January 23—Jacob Pincus, the oldest jockey in America, died here today. He was born in Baltimore over eighty years ago, and since his early boyhood his energies have been wholly employed in the riding and training of racehorses. The greatest distinction held by Mr. Pincus was that he was the only American trainer who ever sent an American-bred horse to the post to win an English Derby, and he accomplished this distinguished feat with Iroquois for the late Pierre Lorillard in 1881. His first mount was at New Orleans in 1852.

PRIZE MONEY IN ENGLAND

("Kettledrum" in the "Sporting Chronicle")

Racing in England is a very expensive amusement. Regarding it from the point of its cheapest conditions, the expenses to the ordinary man are much higher than those entailed in following any other form of sport. I mentioned the other day the case of owners. Their complaint concerns the comparatively small amount of money that is added by race promoters, who stand as the middlemen between those who provide the sport and those who pay to witness it. The middlemen, of course, say that they can give only in accord with their resources, and that expense connected with upkeep and in the cases of race companies, dividends absorb so much that increased stakes could only come from increased public support.

"The public could only be attracted in greater numbers either by a higher class of entertainment or decreased charges of admission or by decentralizing racing, that is to say, distributing it over wider areas. It is argued in this connection that the park meetings in the metropolitan areas are granted too many favors, and provincial courses, where quite as good a class of entertainment could be provided, too few. In the provinces, no doubt, are resources which would yield a better return if they were only sufficiently exploited. In the large, industrial areas of the Midlands and the North, the sporting instinct is probably more strongly developed pro rata to the number of the population than in the metropolis, which has to support so many meetings, and, except on important occasions, chiefly by the regular followers of racing.

"In France, both the owner and the public are able to participate in racing on much easier terms, and the one receives, in the shape of prizes, a greater proportion of the amount which the other pays to see them run for. There are not big capitalized enterprises, so that public money exerts a more material influence upon the development of the sport. This is seen by the values of the races promoted under the aegis of the Steeple chase Society, as compared with which that of those on this side are, in a general way, ludicrously small, although they are, probably as large as circumstances will permit, and in this country, at any rate, weather conditions are, as a rule, not conducive to large assemblies in the steeplechasing season.

"One readily imagines that numbers of owners of a very desirable type would come into racing, each with two or three horses, if the terms were made easier, but when it costs so much to win so little, even a hobby ceases to have its charms, and it is felt make better bargains for those who are primarily concerned in the upkeep of racing. The establishment of the pari-mutuel was advocated some time back, with the idea of tapping one source of revenue and applying some of it to the better endowment of stakes. The idea had powerful support, and also met with a good deal of opposition.

"There is something to be said on both sides, but the popularity, or otherwise, of such an innovation on English racecourses could only be proven by trial. In France the machine naturally met with the strenuous opposition of the big betting owners, but the latter is a class of turf supporter whose room is always preferable to his company, and French racing would appear not to have missed much by his dropping out. His absence from English racing for a very long period has been for the good of the sport.

"To the average Frenchman who goes racing a lottery appeals with irresistible force, and my experience of him has been that he treats horseracing much as he treats a game of chance. The English racegoer, on the other hand, bets with a set opinion on the merits of the competitors, and in calculating prospects likes to know before-hand if the price offered is in fair proportion to the chance. What has succeeded in other countries might not be a success in this, but it could, at least, be given a run, as an after-the-war experiment, to see if its advantages overweighed its drawbacks or vice versa."

Jockey Lawrence Allen, who has been at the Good Samaritan Hospital, this city, since last September, undergoing treatment for a broken leg, is now quite on the road to recovery, and will leave the hospital Monday attended by a trained nurse, for his home in New Mexico. Allen was jockey for George W. Loft's stable last year, and Trainer Max Hirsch has seen that the boy has had the advantage of the best attention and medical skill. It will be remembered that Allen rode the Futurity winner, Papp, in nearly all of his winning races, and he came to Kentucky to have the mount on the son of Peter Quince in the Breeders' Futurity, but was thrown from a yearling shortly before the race and sustained a fracture of the leg, which has caused his retirement from the saddle for many months. While Allen's leg is still in a cast and he will be on crutches for some time to come, his ultimate recovery and use of the leg are assured by his physician.

Albert Roberbach, who purchased the Ultimus filly Royal Ensign, out of the Wickliffe sale, for $2700 disposed of her almost immediately afterwards to W. C. Clancy, former trainer of the Wickliffe Stable at a considerable advance on the purchase price.

TO LOVERS OF THE HORSE!

The duty of the hour for horsemen is to "stand by their guns." On every side we see and hear of the necessity for "keeping the game alive." We are too prone to be a people of one idea, which means apathy towards old friends and avidity for the new. This is all right in the sense of concentration upon the occupation of the hour; but it is wrong from the standpoint of general, steady progress. We should not knock down that which we have builded, or let that which we have builded tumble into ruins through neglect, simply because we have become enthusiastic in the improvement, addition to or elaboration of our scheme of things. The tendency to this flighty shifting from one intensity to another would make us a nation of faddists. That is a characteristic to be discouraged, the same as we would discountenance the erection of our institutions on the crepitating sands of the tide-washed beach. Demolition of that which has passed the period of its usefulness is an exception to this doctrine which we advance. The horse, we maintain, has not declined to that stage, being, on the contrary, more than ever useful and more promiseful of usefulness in the future. But his friends forget him, at times, in their scramble for the latest ideas! History is only repeating itself, however, as to how our lovable and most invaluable friend has from time to time been cast aside and temporarily forgotten. Patiently and without protest the beautiful creature, a dumb slave to our wants and whims, keeps on his way and when needed or fancied is ready to be again picked up and idealized. When the bicycle came into favor the horse was doomed. When the automobile began to grow in popularity the horse was doomed forevermore. Yet, in spite of these predilections against him, in spite of the construction of street pavements unsuited to his best efforts, in spite of the ignorance displayed as to his health, care and comfort and the lack of scientific application of his economic mechanical forces, the horse still lives. In this connection, it is a travesty on the terms "horse lover" and "sportsman," to let it be noted with what occasional indifference the horse and his accessory institutions are by them treated. Sports connected with the horse and the industries that thrive upon him should never be permitted to languish during hard times, war times, or times of peace. War or no war, peace or no peace, good times or bad times, the horse is a necessity, whether used commercially, or militarily, or as a form of healthful exercise for the human being. He is an essential factor in all these lines and as such is so inalienably interwoven with our fabric of existence that he cannot be ignored. In England when the war had begun, racing was partially stopped, horse shows were numerously suspended and polo and hunting were almost entirely wiped out. The Government shortly after the first steps were taken to conserve resources, went so far as to put an embargo on the feeding of horses used for spot and foxhounds were killed to save provender. But it was not long before all this was found to be unnecessary and a mistake. Now, racing has been resumed there and promises to be almost up to normal and the prospects for 1918 exceed all past years. Horse shows also have been resumed, except in such buildings as are used for hospitals and other exigencies of the conflict. Hunting has been kept alive by the wives and sisters of the masters who have gone to the front—many, alas, having sacrificed their lives to the glorious cause. Government has not only given countenance to this resumption of these organizations, but has encouraged them in every way possible, and done everything within reason to repair the losses caused by the earlier prohibitions. In America, the Government has not found it necessary to resort to the same drastic measures as marked the initial course of England, fortunately having avoided those mistakes by virtue of example. Nevertheless, not all the persons of wealth "in the game" are sufficiently imbued with the responsibility that lies upon them to protect and maintain the horse in his proper estate against the claims of other encroaching interests. They must, however, take heed of these requirements lest those respected terms, "horse lover" and "sportsman," fall, as related, into disrepute. The Rider and Driver stands for the horse, first, last and all the time, recognizing the motor as his savior from drudgery, and, as the only paper of its kind, asks for the co-operation of the real "horse lovers" and the real "sportsmen" on the foregoing grounds. —Rider and Driver.

The death of Gold Lace, dam of Big Smoke, Textile, The Kaiser and other good winners, occurred last week at Graceland Farm. Gold Lace was a bay mare, foaled in California, in 1897, and was, therefore, twenty-one years old at the time of her death. She was a winner, being by imp. Ormonde-Libbertiflibbet, by Bullion; second dam Flibbertigibbet, by Kingfisher. She was full-sister to George C. Bennett, Honiton, etc., and the dam of Alencon, a stake winner; Roman Gold, Mechlin, Reticella, Golden Oriole, Lorenzo, Textile (stake winner), The Kaiser (stake winner in England), Silver Thread, and Big Smoke, her last foal, winner of the For Thomas Stakes at Latonia in 1915. She was mated to imp. Brummel last year, but was barren at the time of her death.

George H. Strate, manager of J. H. Rosseter's Wikiup Ranch, Burke, California, has been as busy as the proverbial bee since he landed in Lexington to attend the dispersal sale of the Wickliffe Stud, but that his time has been well spent is shown by the several valuable thoroughbreds that are now the property of Mr. Rosseter. Everybody knows that Strate would not be denied when the once great race horse and even greater sire, Disguise, was led into the ring at Kingston Farm, on January 15. It is a matter of deep regret that the sire of Iron Mask, Maskette, Melisande, Harmonicon, Bulse and the highest priced and justly so, youngsters at the sale, My Friend, about as perfect an individual as one would care to see, could not have finished his illustrious career in the Blue Grass, but Kentucky's loss is undoubtedly California's gain, and so well does Disguise carry his more than a score of years and so well has he been taken care of, that several years of usefulness may safely be predicted for him in his new home, and if such be the case, what a rare buy he will prove for his present owner. Mr. Strate also secured at the sale Picric, a four-year-old chestnut daughter of Voter and Gingham by Domino; Dreaming (dam of Vague) b m, 1908, by Ben Brush out of Fair Vision (dam of Trance, Peter Quince, etc.), by Touchet, in foal to Disguise; Last Rays, nine-year-old bay daughter of Peter Pan and Sundown, Peep O'Day's dam, by Springfield, in foal to Delhi; and Problem, c m, 4, by Superman, out of Query, by Voter, her dam Major B. G. Thomas' famous old Himyar mare, Quesal. Problem is in foal to Delhi. While this week he purchased privately from John E. Madden, the beautifully bred stake mare Coquette, full sister to Celandria, by Celt, out of Adriana, by Hamburg, in foal to Disguise, for which Madden went as high as $4800 before he secured her at the Wickliffe sale; Swan Song, another Wickliffe Stud product, a brown daughter of Ben Brush and Pink Domino (dam of Sweep) by Domino; and a bay or brown two-year-old colt by Dick Finnell, out of Peace, by Midlothian.

Disguise was shipped from Paris on Wednesday to California, but the mares will be left in Kentucky until after the breeding season is over. Strate has about completed arrangements for all of them. Last Rays and Dreaming will be sent to Ballot, Picnic to Uncle or Star Hawk and Problem to The Finn.

The sixth biennial report of the Kentucky State Racing Commission to the Kentucky General Assembly, as required by the law creating the commission, has been made public by Secretary Samuel C. Nuckols.

The report covers the activities of the commission during the past two years and quotes the enactment of the General Assembly last year, under which the race tracks in this state are required to pay license for each day of operation.

The amount of license paid to the state last year is given as $46,700. Of this the Kentucky Association, Lexington, paid $4200; New Louisville Jockey Club, Churchill Downs, $9500; Douglas Park Jockey Club, Douglas Park, Louisville, $10,000, and Latonia Jockey Club, Covington, $23,000. The Federal war tax applied only during the last ten days of racing at Latonia in the fall and produced $7000. The commission estimates that the average production to the Government from this tax at the spring meetings should approximate $1000 daily.

A detailed account of the premiums awarded at exhibitions of the commissions' Breeding Bureau stallions is embodied in the report, and the racing rules adopted and amended during the year are set out in full.

The report, which is signed by the five members of the commission, concludes with the statement that the effect of Kentucky's legislation has been highly beneficial to racing and the horse industry in other states. The Kentucky act has been used as a model for legislation in other states. The commission, instead of being a burden upon the state, has enriched its treasury and has brought great benefit to the state's live stock interests.

San Diego, February 12.—The Lower California Jockey Club will not resume operations this spring, and possibly not this year. This much seems certain if the reticence of President Coffroth is to be taken as a criterion. Coffroth admitted tonight that he has no immediate plan tending toward the resumption of racing at Tijuana.

He intimated that at present he is interested in an Eastern racing venture, which is being fathered by a syndicate of Eastern owners. Coffroth refused to make public any details of the proposed new organization in turfdom, but will leave for the East shortly on an extended stay.

United States officials here in close touch with the racing situation assert that the present passport regulations will remain in effect for the duration of the war.

How stringent are these regulations may be judged by the fact that the passport of a well-known horse-owner was revoked today because it was found he was visiting the gambling halls across the border.

Horses that continued to remain at Tijuana are fast being shipped away. George Wingfield sent his stable to Pleasanton, Cal., this morning, the shipment including Atheling, purchased in England a short time ago for $30,000.

Bill Carroll will leave for the East with the A. B. Spreckels stable on February 20.

Harry Trowbridge's stable leaves for Bowie on March 1.

Thoroughbred Matters

AMENDMENTS TO THE RULES OF RACING

Some important amendments to the rules of racing were adopted finally by The Jockey Club at its annual meeting. These rules were discussed when the amendments were offered and they relate to the apprentice rule, the selling race rule and the rule that defines overnight races.

The old rule fixed the term that an apprenticeship of a rider should extend for a year from the date of his riding his first winner. The amendment makes the apprenticeship continue until he has ridden forty winners. As amended, the rule reads:

"171A. All boys who, while under age, have of their own free will and with the consent of their parents or guardian, bound themselves to an owner or to a trainer for a term of not less than three years by a written intrument, copy of which has been lodged with The Jockey Club, are permitted during their apprenticeship to claim a five-pound allowance in all selling races and three pounds allowance in all overnight handicaps, provided no horse carries less than eighty-four pounds. They will be entitled to this allowance until they have ridden forty winners in any country."

Another important amendment has to do with the claiming rule and it grew out of the test case of Major Cassatt at Saratoga, where in a race that was intended to be patterned after the French system of claiming only before a race, Major Cassatt made his claim after the running, and he was upheld by the stewards of the Jockey Club. The amendment seeks to make claiming before the running only possible in such races.

"If the conditions of the selling race permit any horse to be claimed before the race, he may so be claimed by anyone for his entered price, plus the value of the race to the winner, and as much more as the claimer wishes to bid, and any horse so claimed shall be ineligible to start in the race; intended starters in a race where horses are liable to be claimed before the race shall be in the paddock forty-five minutes before the time fixed for the race and may be claimed from that time up to thirty minutes before the time of starting, when the right to claim before the race expires. Any horse not being in the paddock and being reported to the paddock judge as being present, shall be ineligible to start."

"When the conditions of the selling race permits horses to be claimed before the race they may, if the conditions so state, be exempted from liability to claim after the race."

The change in the definition of an overnight race makes it one for which the entries close seventy-two hours, or less, before the running.

This amendment was adopted so that surplus run-up money in selling races might be added to overnight races, as well as other overnight events.

Joseph E. Widener was appointed a deputy steward to represent Major August Belmont during his absence. The board of stewards elected for the next two years is composed of August Belmont, F. K. Sturgis, John Sanford and Richard T. Wilson.

There were present at the meeting Robert L. Gerry, Francis C. Bishop, F. G. Griswold, Francis R. Hitchcock, H. K. Knapp, Andrew Miller, John Sanford, F. K. Sturgis, Joseph E. Widener and William S. Woodward.

Following the meeting of The Jockey Club there was the annual session of the stewards, and Major August Belmont was re-elected chairman, with F. K. Sturgis vice-chairman, H. K. Knapp secretary and treasurer, and Algernon Daingerfield assistant secretary.

Applications were received from Thomas McTaggart and M. Nathanson for jockey licenses. These were referred to the license committee. McTaggart lost his license early in the past season, and his various efforts for reinstatement have been unavailing. He has had many flattering offers for his services just as soon as he is restored to good standing, and he will be with one of the foremost racing stables should the stewards act favorably on his application.

W. Crump was the leading jockey during the 1917 season, with F. Robinson in second place, and Albert Johnson third. Johnson is one of the most promising young riders seen on the turf in many years, and gave Robinson a great struggle for second place, lacking only two winning mounts to tie him, while Robinson needed but five more winning mounts to pass Crump for first place.

Breeders of thoroughbreds and trotters in attendance at Farmers' Week at the University of Kentucky last week passed a resolution urging a national commission to look after the horse breeding interests. Among the trotting horsemen present were Hunter C Moody and Henry M. Jones, of Lexington, both of whom addressed the meeting on the subject.

PAN ZARETA A GREAT MARE

Pan Zareta, the great racing mare, which died last week, was insured for $10,000, but her loss to the turf is far beyond any money value.

She has been called the Queen of Sprinters, and rightfully, for few horses ever developed in this country have shown such remarkable consistency and speed over a stretch of six racing seasons.

She holds the distinction of having won one race or more over every track on which she has started, and she has started on practically every track in United States and Canada.

Pan Zareta was a chestnut mare by Abe Frank-Caddie Griffith, and turned eight years of age on January 1. She had won eighty out of 150 starts in six seasons on the turf, an average of something over 50 per cent. She passed Kingston's mark of seventy-five winning races at the Empire City Track last summer, and was on the high road to equal or better Logan's remarkable record of 100 victories.

Pan Zareta was amazingly popular, and no wonder. From the day she became a two-year-old she has been raced almost continuously winter and summer. Her only respite came for a short period in the summer of 1916, when she was turned out for a well-deserved rest.

From New Orleans to Canada by way of the Middle West and back again was her yearly pilgrimage until she was taken to the New York tracks, where she quickly earned the same popularity that marked her career from the beginning. She won race after race, usually under big weight, to the marvel of horsemen and to the profit of her owner and her many ardent followers.

Her most striking performance, perhaps, was six furlongs in 1:12 2-5 under 140 pounds, but her first race in the East at the Aqueduct Track last summer compared favorably with any she ever ran. On that occasion she took up 128 pounds, and raced five and a half furlongs in the fast time of 1:05 3-5, establishing a new track record.

Behind her on that day were such good sprinters as Top o' th' Morning, High Noon, and Wood Trap among others. In truth, she probably had no equal at any distance up to six furlongs among the older horses.

In her six years of racing she has averaged just under fourteen races a year, a record perhaps that will never be equalled in the history of the American turf. On top of this, she was rarely outside of the money, usually finishing second or third when beaten.

Eddie Taplin, the Fresno boy, has been signed to do the riding this coming season for J. K. L. Ross, the wealthy Canadian sportsman, who is rivaling A. K. Macomber in the purchase of high-priced thoroughbred horses. Taplin sent word of his good fortune to his folks in Fresno. H. B. Bedwell trains for Ross and was instrumental in getting the jockey under contract. In the Emeryville days, Taplin and Bedwell made up a combination that was a sensation for a couple of seasons in putting over winners. Ross only recently bought Cudgel for $30,000, and Taplin will be astride of the prized runner.

Matinee, Harry Payne Whitney's bay daughter of Broomstick and Audience, which has been somewhat of a traveler in her still short life, once more is in this country, after having made two trips to England and return. This mare, which is a full sister of Whisk Broom II., has just reached New York, and is quartered at Dr. McCully's stable on Lexington avenue, along with a leanling foal by Prince Palatine, considered one of the greatest sires in England, says the New York Telegraph.

That great things are expected of this youngster, which is a coming yearling, and not expected to race before 1919, goes without saying. Prince Palatine, the sire, is a star in England and stands for a stud fee of $2000. Matinee, still a young marton, having been foaled in 1908 and shipped to England in 1910, when in her two-year-old form, is a royally-bred daughter of the great Broomstick, for she is out of Audience, which was by Sir Dixon and out of Sallie McClelland by Hindoo, and such breeding stands out in this country.

After being returned to this country in 1912, Matinee again was shipped to England more than four years ago, where she foaled Matinee Idol, a two-year-old gelding, which ran in the colors of the Cleveland Stable during the past season, she having been bred to All Gold, sire of Matinee Idol, before her reshipment. Both Matinee and her present foal are reported as having stood the recent journey well, and soon will remove to the Whitney Brookdale Farm in New Jersey. In the shipment with Matinee were three mares for F. Ambrose Clark.

Jockey Albert Johnson, who has been spending a vacation in California, will leave next week for the race meeting at Hot Springs, Ark., where his services will be in demand, as he proved himself to be one of the leading jockeys of the country during the 1917 season.

The American jockey, Walter Miller, arrived in Sydney yesterday. He has a splendid record in his own country, but he may need a bit of luck to make headway in Australia, where owners naturally give preference to local talent.—The Referee, December 12.

Seattle (Wash.), January 26.—(Special.)—"Give me the 'sport of kings'— the days of real sport," said Ed Cudihee, veteran three-time Sheriff of King county and former owner of many well-known thoroughbreds and standard-bred race horses. Mr. Cudihee was in a reminiscent mood today as he sat in his office at the Broadway Stables, as a groom led out Floradora Z., the fast trotting mare that has been campaigning for Cudihee & McCormack for the last three years.

"Look out, Pete, that one of those Chevrolets don't run that mare down," said Cudihee to the groom. "She is the 'last of the Mohicans' with us."

Turning to a group of men in the office, Cudihee's eyes lighted up with the old-time fire and the usually silent horseman began to tell of the olden days when horse racing was at its height in the West.

"Racing was never so crooked as it was alleged to be," he asserted. "True, the bookmakers, or some of them, were a bad influence, but the thing that stopped horse racing was the greed of the track owners, and that is true of the entire country.

"The greed of racetrack owners brought on adverse legislation. The purveyor of feed-box information, commonly known as the tout, was another evil of the turf. The tout made substantial business men put down good money on a supposed fixed race that did not go through as 'touted.' Then the tired business man yelled about 'crooked racing.'

"The bookmaker is a thing of the past. But horse racing is not dead and never will be. Why? "I'll show you. At the 43d running of the Kentucky Derby at Louisville, last year, 60,000 persons entered the gates. I expect to see the 44th running of this classic race this year. At New Orleans the game is running and big crowds are attending. The laws there allow oral betting, which is the same system used on all New York state tracks.

"Clean, high-class racing, conducted by honest, efficient men, who have standing in the community, is a source of great pleasure and recreation that always will live. The better class of business men are taking an interest in horse racing now. The sport is coming back and coming back soon."

Cudihee told of the racing days of such celebrated racers as Longfellow, Ten Broeck, Molly McCarthy, Clifford, Proctor Knott, Emperor of Norfolk, Broom Stick, Plaudit, Ben Brush, Ed Ball, Step Around, Silver Dollar, and how in the olden days in the East, Phil and Mike Dwyer thought little of betting $50,000 or even $100,000 on their horses. "Those were the happy days— the days of real sport," declared the lover of the bangtails.

SOUTH AMERICA'S FASTEST RUNNER

The fastest runner ever seen in South America has made his appearance at Buenos Aires, in the Argentine Republic, where he set the record for a mile at 1:37 2-5, and was unbeaten at last accounts. In all his races he has shown such superiority that only two other three-year-olds could be found to start against him in the race in which he lowered the record. Reports of the race state that he set the pace and won as he liked.

Botafogo, as the colt is called, is by the wonderful native horse Old Man, that outranked the English Derby winner Diamond Jubilee as a sire of winners a year or two ago, and his dam is the chestnut mare Korea, exported from Kentucky to South America in 1910 by Mrs. T. J. Carson. Korea was bred in England, but came to the United States by the side of her dam, Ulla, imported by H. P. Headley in 1902. She raced with indifferent success as a two-year-old, and as a three-year-old at Worth, St. Louis, and other merry-go-rounds in the West. Her sire, Raeburn, was a son of St. Simon, while Ulla was by Barcaldine, the grandsire of Omar Khayyam.

Botafogo's fast performance has been beaten by more than a second in a race in this country, where the record is 1:36¼, made by Amalfi on the firm, hard trotting track at Syracuse in 1914. Stromboli, Short Grass, Sam Jackson and other horses have covered miles faster than 1 37, but that the tracks on which they ran were faster than those in the South is probable.

In England, where they run on the turf, Caiman is credited with a record of 1:33 1-5, made with 128 pounds up, at Lingfield, on July 13, 1900. This is the world's record. The Australian record is 1 37¼, made by Montcalm, with 126 pounds up, at Randwick, New South Wales, on April 14, 1900.

Hot Springs, Ark., is getting ready to open up a thoroughbred race meeting on February 28, after the close of the sixty-five day term at New Orleans. Practically all the horses that are campaigning at New Orleans will move on to Hot Springs.

California will be represented by a formidable string of stables. George Van Gordon, the veteran breeder and owner, and Fred Kraft will have eleven head ready to face the barrier. The bunch left here the other day to get get on the track to be "prepped." There is a brother to Kahtan, a full brother to Florence Roberts and a trick named Elizabeth Roberts.

MURPHY, BOY AND MAN

(By W. H. Gocher)

The Broadway Limited was boring its way through one of the worst storms that ever swept over the Pennsylvania mountains. It was late and everyone was out of humor. All of the newspapers had been read, and current topics discussed, until they were worn to a frazzle. The time had come for a little personal talk, something that all would be pleased to hear, and which the narrator could tell without an effort. Turning to a tall, slim individual who was half dozing on the couch of the drawing room of the car, I said: "Tommy, how did you ever get into the racing business?"

Removing his hat from his face, the party addressed replied, with a smile: "I scarcely know," and when urged to move along a little, he continued: "From boyhood I always wanted to be driving something with my hands, but the opportunity never came until one summer down on the Long Island farm, I had an attack of typhoid fever. It was followed by a relapse and pneumonia. What life I had left did not appear to be worth saving, so I refused to take any more medicine or nourishment. The doctor had decided to give me up, and let exhausted nature do the balance, when a neighbor called and said that he would give me a goat to drive if I would obey the doctor's orders. That was certainly something to live for, and in a few hours the goat was hitched to a stout post outside of my window. His cart was run under a tree and the harness was brought into my room and hung on a nail.

"While the doctor did not know it, I was from that moment determined to get well, and there was nothing in his medicine chest I would not have swallowed in order to be able to drive that goat. In a few days I was propped up in bed so I could see Billy prancing around the post while the reins on the harness were adjusted so that I could hold them and make myself believe that I was stepping the goat down the road, while I kept one eye on him through the window.

"The remedy worked like a charm, and it was not long before I was out driving the goat. It also received better care and more training than any goat that ever lived.

"My next move in the driving line was on the front of the milk wagon. When I was placed in charge of the outfit the old farm horse did not suit, and for $75 I succeeded in getting a pacer that had been raced but was discarded on account of a spavin and a few other trimmings which are not valued very highly as horse furniture. He had the whiz, however, and on the trip home from the depot with the empty cans if anyone passed the outfit he had more speed and racing manners than was ever seen in that section of Long Island.

"Farm boys work long hours, and mine were no exception, but I managed to save a few dollars, and then decided to buy a real horse. My selection was a mare that was owned by a saloonkeeper. She could pace in about 3:10 and cost $125. I was permitted to use the track on a neighbor's farm, and soon had her under way. The Guy Wilkes horse Rupee was being trained over the same track, but I did not see him very often, as he was aired in the morning while my pupil usually put in her appearance at sundown after the day's work was done. From a mile in three minutes she soon dropped to one in 2:24¼. This pleased me so much that I called her Blue Bird, and sold her for $1500.

"With that money in the bank, I began to feel as if there was something in driving, so I began to look around for another horse. At that time Mr. Willis had Island Wilkes near by and Howard Hayden was training for him. He had a racing stable, and when it returned home I heard that he had a horse called Dr. Dewey which was fast, but could not be raced on account of cross-firing. Something told me to take a chance with him, so I drove over and bought Dr. Dewey for $225. After a few experiments I managed to shoe him, so that he went clear, and while the shoes were rather crude, alongside of what are now used, they did the work. The next step was to get him ready for the races, and while it was all new to me, I guessed offhand what was required, and what I did not know the horse and his condition showed me.

"Finally I entered him in a race at Huntington, N. Y., and went there to start him. The day I arrived I also saw a horse called Connor, which was owned by the New York speed merchant, John McGuire. As soon as I put my eyes on him I was convinced that Connor would make a great race horse, and that there was nothing for me to do but to buy him. McGuire priced him at $1500, so my next step was to sell Dr. Dewey. While I was running this matter over in my mind, W. F. Steel, who afterwards hung the Harry Thaw jury, and Mart Demerest, both of whom had been watching me work Dr. Dewey, came to the stable and said they wanted to buy him. In a flash I saw that I had a chance to get Connor and asked them $3500. Steel fell dead when he saw that I would not take less, but did offer me $1000. I laughed at him, but before leaving he moved up to $1500. That did not tempt me, as I was satisfied that I could win that much with Dewey.

"Before going, however, Steel took me aside and told me three or four times that I was a poor boy and could not afford to own such a horse.

"Dr. Dewey was to start the next day, and when I was getting him ready Steel came around again and said: 'I am going to make you one more offer, and you can take it or leave it. I will give you $2500 for Dr. Dewey just as he stands.'

"At that time Connor looked very close, and I said: 'Mister, you have bought a horse.' He shipped Dewey to Boston to make a killing, but before starting he removed my cross-firing shoes, putting on what was considered proper, and was distanced. He also wired me to come on and help him out, but I decided to remain on Long Island.

"By the time the sale was made Connor had been shipped to New York, so I started off to buy him. When I arrived at McGuire's little stable on Broadway I learned that John was out of town and instead of remaining over night at an expense of about a dollar and a half, I returned home. The next day something came up so that I could not go to the city, and on the following one McGuire, with tears in his eyes, told me that Connor had been sold to a man in Rochester. That jarred me more than anything that ever happened in my career, for, while I was only a boy, I was satisfied that Connor would make a great horse, and possibly a two-minute pacer. The records also show that he came very near it.

"My next selection was the Pamlico mare Nellie Gay. She was my first trotter. I do not know how many races I won with her, but there were a lot of them, and I sold her for $10.000. This satisfied me that if I did not prove a trainer, I would at least make a good salesman, so I decided to remain in the business."

A call for lunch interrupted the conversation, which was not renewed, but the records show the balance of the career of Thomas W. Murphy, who has proved one of the most successful men that ever sat in a sulky. Each year he has brought out a formidable list of champions, and big money winners; Hetty G., leading off for two seasons, the first campaign being over the half-mile tracks and the second over both, the trip closing with a series of victories from Poughkeepsie to Hartford, by way of New York, Brooklyn and Providence. She brought the modern wizard of the sulky into the big line, to which his skill as a reinsman has added lustre each season, with such a splendid group of horses as Rudy Kipp, Susie N., R. T. C., Charley Mitchell, Native Belle, Peter Scott, Frank Bogash, Jr., Peter Volo, Directum I., Anna Bradford, Butt Hale, The Real Lady, and scores of others. During the past fifteen years he has also placed over a hundred horses in the 2:10 list, many of them being below 2:05, and two below the two-minute line, while horses trained and driven by him have won over $700,000 in purses.

As a boy and man, Thomas W. Murphy never worked an hour for anyone. Depending upon his own resources, even when they were very limited, he paddled his own canoe through surging rapids of the racing world until he landed with a bang in the big pool of success. During all of the years that he has been before the public he has never failed to win a race or even a heat if his mount had the semblance of a chance to come through. He started out with the idea that there was nothing gained by waiting for what looked like a better opportunity, only to find that three or four others were sitting on the same limb. His motto has been to get what a horse has to give, and what he is done get another, and keep going.

Murphy's seat in the sulky is light and graceful. With a hand as light as a feather, he always has sufficient control of his mount, to take advantage of every opportunity presented by the shifting positions in a heat, as well as a brush to nip the leader at the wire if he can get within a length of him. No one ever found him asleep at the switch after the starter gave the word, or trying to win at the half-mile pole, when the purse is paid at the wire.

After entering a plea of guilty to a high misdemeanor before the Santa Rosa justice of the peace, Louis Richardson and J. F. Farrance, both of Healdsburg, went before Judge Seawell in Department One of the Superior Court late Thursday afternoon and pleaded guilty to taking steelhead with a seine from the Russian River. They were held in $150 bail by the committing magistrate.

Judge Seawell forthwith fined the violators of the game laws $110 each. The warrant was sworn to Monday by the local fish and game commissioner.

According to one of the German forestry journals, the Kaiser, in 1908, killed 1,995 pieces of wild game, including 70 stags, elk and roebuck. At that time he had slaughtered a total of 61,730 pieces of game, more than 4,000 of which were stags, and was the leading exterminator of wild life in the world. As a slaughterer of men, women and children since 1914, however, he has been the foremost exterminator of human life in all history.

PASSING OF THE LIVERY STABLE

That long, low, rakish structure which, until yesterday, as it were, and as far as the memory of the average man runneth backward, abutted on the main street or main traveled highway through hamlet, village, town and city, and was known to resident and stranger as a livery stable, has either passed or is rapidly passing from the scene. The passing has been so gradual as to have been scarcely noticeable, and one is surprised to realize that this institution has passed, or is in the last stage of its passage.

Few can recall exactly when the signs, "Livery and Boarding Stable," "Livery and Sales Stable," "Horses for Hire and for Sale," "Carriages and Buggies for Hire," and so on, ceased to have interest, so gently have the former days merged with the present. It seems no time at all, when one begins to think about it, since one paused before passing the entrance to the livery stable, to let a brougham, a victoria, a landau, a landaulet, a phaeton, a buggy, a trap, or a sulky pass in or pass out.

In the summer time there was always the livery stable proprietor sitting in tilted chair on one side of the archway and a town character sitting in tilted chair on the other and there was the physician just turning in his horse or the preacher taking his out, or the politician calling for his "rig" or the "drummer" planning for a road wagon and a driver for tomorrow morning at six; and inside there was the stamping of feet in the stalls, the munching of feed at the manger, the neigh of satisfaction, and the hard breathing of the hostler as he curried the horse that had done his mile in 3:10. Then there was the return of the picnic outfit, and all the harnessing and unharnessing that made up the two or three hours until the last vehicle was in, the last horse brushed down, the red light over the office window extinguished, the ward politician departed for home, and the big door closed for the night.

The livery stable was the last remnant of the stage-coach period. It preserved, for three-quarters of a century in the United States, the traditions of inn. In the village and the smaller town it was the resort of the masculine gossip and the small politician. To be received into the "barn crowd" was a distinction; to be able to maintain one's place in it, was to be considered some day, for something, in the county convention. The livery stable was a center of democracy. Every man, of any consequence, dropped into it and left his opinion with the livery man or with one of the hostlers, or with one or more of the regular patrons or sitters, at least once in the course of a week. There was no better place, in any neighborhood or small community, a few years ago, for guaging the trend of popular opinion, than the livery stable. In the winter time, the livery stable office, with its hospital drum or straight-shaft stove, would hold the company until the livery man arose, yawned, and said he guessed he'd make for home.

Nobody appears to have noticed the gradual disintegration of the "barn crowd" in politics, and few, as has been said, seem to have observed the gradual disappearance of the long, low, rakish building that was a stable below and a hayloft above, and that was never completed without a weather vane outside and a goat within.

In its place we have the garage; instead of an odor of hay, there is the smell of gasoline; instead of the hostler, there is the chauffeur; instead of the family carriage, there is the automobile. There is nothing in the garage to invite sitters, or to hold a group of gossips and politicians. The atmosphere of hospitality, so characteristic of the livery stable, is absent; the garage is no more inviting, as an evening resort, than a machine shop. One misses the scent of leather, the clanking of bits, the straining at halters, the sound of restless hoof on the floor, the soothing voice of the hostler, and the whinny of his favorite horse.

That is, one misses these things, when one recalls them.—Christian Science Monitor.

EXAGGERATED REPORTS

Mark Twain once said: "The report of my death has been very greatly exaggerated." This remark of the noted writer was instantly recalled to our mind on receipt of the following:

The report published in a Yakima paper to the effect that trainer and owner William Hogoboom, of Walla Walla, Wash., died while undergoing an operation, is wrong. Mr. Hogoboom is recovering from his illness, which was of a most serious nature, and his many friends are certainly glad to learn that "Billy" is not dead; furthermore, his many friends, the writer included, congratulate the popular reinsman and will be more than pleased to congratulate him when the North Pacific Racing Circuit opens in 1918.

Mr. Hogoboom is a most kindly man and, when either winning or losing, he at all times wears a smile and has a pleasant word for everyone.

I take great pleasure in requesting you to spare space for the correction of the report of Mr. Hogoboom's death and, in closing, will say that Billy may have died during the course of the operation, but if so he has done what many great men failed to do—Billy came back.

Yours truly, C. A. HARRISON.

Notes and News

If you want to get the money at the gate, track managers must give their meetings plenty of publicity. Do not stop with a small advertisement now and then, but dig up a lot of news about what they are going to do the coming season.

John E. Madden, whose operations in the horse market during the past decade prove him to be about as astute a judge of conditions as can be found in this country, says that after the war the demand for live stock of all kinds will be enormous, and those fortunate enough to have trotting horses to sell will find a good market abroad, therefore there is no reason for anybody to feel gloomy. Mr. Madden thinks that at the coming sales buyers will do well not to let any bargain escape, for the foreigners wil come with a rush, as soon as peace is declared, for trotting stock to replenish their depleted supply.

W. G. Durfee, the leading reinsman of the Pacific Coast, has decided to retire, it is said, after a long career of brilliant success. The announcement comes from Clarence J. Berry, of San Francisco, for whom Durfee has trained and driven several years, and it is accompanied by the announcement that Berry himself will also retire, for the reason that he will not have any other trainer. Durfee has made several trips over the range and has taken some notable California horses to the Grand Circuit, notably Manrico (3), 2:07¼, winner of the most memorable Kentucky Futurity, and Helen Stiles, 2:06¼. His last celebrity was Esperanza, 2:04, by Calorkin, 2:07½, that he raced the past season and that was recently bought by Dick McMahon, acting for A. G. Hunt, of Chicago.

Wert Mallow is particularly pleased with Don de Lopez (4) 2:08¼, a recent acquisition by his stable. The large black gelding, which now holds the world's record for trotting geldings of his age over a two-lap ring, is in grand order, and will be prepared for a campaign over both mile and half-mile tracks.

At the annual meeting of the directors of the American Trotting Register Association, held on Wednesday, February 6, Mr. Frank E. Best, for so many years the registrar of that organization, was elected its secretary, taking the place left vacant by the death of the late W. H. Knight. Mr. Best was also re-elected to the registrarship.

The directors of the Riverside County Fair Association met at the county seat Monday evening and elected officers for the present year as follows: C. H. Lewis, president; J. F. Backstrand, vice-president; Robert L. Taber, secretary; A. H. Brouse, treasurer; J. E. McGregor, manager. The directors are considering changing the name to the Southern California State Fair at Riverside. Nothing definite has been done about this as yet, although the change is highly probable.

As will be seen by an advertisement in another column of this paper, Jay Frank of Pleasanton is offering a green pacer for sale that is a good buy for anyone looking for one of the best racing prospects in California for this season.

The Wickliffe stud dispersal sale held last month at Lexington was the most notable ever brought off in Kentucky. A grand total of $227,175 was realized for the 136 sold, an average of $1670 per head. Nine four-year-olds brought $15,850. Twenty-four three-year-olds, $24,350; twenty-seven two-year-olds, $52,425; twenty-three yearlings, $18,725; six stallions, $41,000; fifty-six mares, $74,825. Total, $227,175.

Ed Geers and Tommy Murphy stand tied for the honor of having driven the greatest number of trotters to their 2:10 records, each having forty-eight; Lon McDonald comes next with forty-two; Walter Cox with twenty-nine, and Billy Andrews and Johnny Dickerson are next in order with twenty-eight each.

There are quite a number of horses in training at the Fair Grounds at Sacramento. Walter Tryon has eight head, including John Mack 2:07¼, Albaloma 2:08¼, the pacers Butt Hale 2:02¾, Rastus 2:04¾, and four colts; Thomas Hill has the three General Watts three-year-olds owned by George Lowery of San Francisco; James Thompson has eight head, with Peter McKlyo heading the list, in addition he has McKlyo Boy, Bon Watts, and Sweet Bow, also a three-year-old by Peter McKlyo, and a filly by Tregantle. Mr. Thompson expects to race in the Middle West this season.

Thomas Holmes is training a brother to Little Jack and two two-year-olds, the property of C. F. Silva.

The stables of C. F. Silva, W. Stuart and J. E. Montgomery are quartered at Woodland. Silva has fifteen head, Montgomery ten and Stuart six.

M. Keefer is at Sacramento with The Proof and two colts.

Fair and racing associations in all parts of the country have passed resolutions endorsing the idea of consolidating the two trotting associations and the American Trotting Register Association. It now looks like the time for real action.

During one of the races of 1917 a hobbled pacer had trouble at the first turn and put on a song-and-dance performance right in front of the field, who were well bunched. The result was that one of the field hooked into his sulky, leaving the driver and horse in rather a hopeless condition. As no one was to blame, the judges exonerated the driver who hooked the other's bike, but that did not suit the driver, who said: "Possibly he was not to blame, as my horse not only stopped, but swerved out from the pole, but what got me was that the darned cuss never stopped to find out if I was injured."

Thomas W. Ames will soon bring his two thoroughbred stallions Intone and Bladen to his big horse ranch in the Big Horn Basin of Wyoming. There are 350 mares on the ranch and not one of them under fifteen hands high, so Mr. Ames has a wonderful stock from which to produce army horses by using thoroughbred stallions. The mare are for the most part the get of sons of the good thoroughbred Onondaga, and, accordingly, have a deal of thoroughbred blood in them at the present time. The Jockey Club of New York has promised that four more stallions will be sent to Mr. Ames before the breeding season opens and with other sires in view he proposes to build up a wonderful enterprise with the breeding of horses for the army the sole object of the ranch.

The Pueblo State Fair Association, which shows signs of returning to life after a lapsus of two years, has gotten out a racing program for the week of September 24th. The purses are for $500 for the principal harness events, while the running numbers call for $100 except a derby, for which $250 will be hung up.

The Colorado State Racing Commission has held its annual meeting and re-elected its old officers, who are: W. H. Gates, Denver, president; Dr. M. J. Dunleavy, Denver, vice-president; J. L. Beaman, Pueblo, secretary-treasurer; A. J. Simson and D. W. Thomas, directors. They considered what to do to revive racing in Colorado this year, but ground out nothing except to issue a license for the fall meeting at the State Fair in Pueblo in September. There is some talk about a race meeting in Denver, but nothing has as yet been decided upon.

A dispatch from Lexington, Ky., dated February 4, states that Notelet, the noted daughter of Moko, that produced The Harvester 2:01 is dead as the result of a fall sustained while running in the paddock. Notelet was 19 years old and was the dam of three other standard performers besides The Harvester.

The Colorado State Fair for the year 1918 and all future years will be operated by a commission appointed by Governor Julius C. Gunter, in compliance with an act passed by the last Legislature. It will in the future be maintained by a tax levy upon all property in Colorado. The commission is composed of influential and well-known business men of Colorado. Mr. Martin Walter, Jr., of Pueblo, is president; Hon. J. J. Tobin, of Montrose, secretary, and Hon. Wyatt Boger, of Burlington, treasurer. At the last meeting of the commission they selected J. L. Beaman, of Pueblo, as manager of the 1918 fair. Mr. Beaman was manager of the State Fair in Colorado from 1910 to 1915, and is well known by all the exhibitors and horsemen in the West. The fair for 1917 was declared off on account of the Federal troops occupying the grounds. The dates for the 1918 fair have not been fixed, but undoubtedly will be at a meeting to be held in Denver the latter part of January, where there is to be a meeting of all Colorado fair men.

George C. Roeding of Fresno was elected president of the State Agricultural Society at a recent meeting of the directors. Mr. Roeding is a man of great reputation throughout the state, and has many friends. He is an old time friend and admirer of Luther Burbank and is greatly interested in his work. In the past he has been an ardent supporter of the state fairs and in his new capacity will probably make things hum for progress.

George H. Strate has purchased from John E. Madden the two-year-old chestnut colt by Dick Finnell, out of Hanoverine, by Hanover. Strate evidently likes the get of the sire of Westy Hogan and Liberty Loan, as this is the second colt by Dick Finnell he has bought within the week.

Directors of the Riverside County Fair Association are urging ranchers in the country to prepare now for their exhibits at the fair next fall by planting the product they intend to show and tending it carefully. In this way they hope to have an exhibit at the fair this year that will surpass all previous ones.

Sacramento, February 6.—George C. Roedig, Fresno, was elected president of the State Board of Agriculture to succeed John M. Perry, Stockton, at the annual election held here today. E. Franklin, Colfax, was re-elected vice-president, and I. L. Borden, San Francisco, was re-elected treasurer.

The board of directors and officers of the Kentucky Trotting Horse Breeders' Association were re-elected at the annual meeting held last Thursday. The officers are Ed A. Tipton, president; R. C. Estill and J. R. Hagyard, vice-presidents; J. W. Williams, secretary; Miss Gertrude A. Matlack assistant secretary; City National Bank, treasurer. President Tipton was chosen to represent the association at the meeting of the stewards of the Grand Circuit at Columbus this week. It was decided to change the conditions of the Kentucky Futurity for foals of 1918 so that the three-year-old division in 1921 will be decided under the two-in-three system instead of three-in-five, as has always been the case with the exception of 1915, when the two-in-three plan prevailed.

Frank Rees, who has been trainer at the Hemet Stock Farm for the past nine years, on account of the farm's discontinuing training, has opened a public stable at Hemet, Cal. Mr. Rees has been remarkably successful, especially with colts, as, during the time of his connection with the Hemet Farm, he trained, among others: Hemet (3) 2:08¼, Futurity winner; Allie Lou 2:06¼, Miss Gaily (3) 2:12½, Don de Lopez (4) 2:08¼, Louise de Lopez (2) 2:14¼, Zeta Lucille (3) 2:09¼, Futurity winner; Edith Carter (1) 2:18¼, Hemet Queen (1) 2:16¼, Fiesta Lou (1) 2:25, half-mile track; Viceburn (3) 2:13½, and a number of others. His work has been limited to training at the farm, but it is through his handling that these great youngsters were prepared for the races. Their records proved his ability, as they won big money in stakes, and made world's records. When he severed his connection with the farm he secured a number of promising youngsters that are all well staked and which he is now offering for sale, as will be seen by his advertisement in another column of this paper.

Frank S. Turner, the well known Santa Rosa horseman, underwent an operation Wednesday at a local hospital and was reported Thursday as to be getting along nicely. For some time past Mr. Turner has been suffering with a complication which has proved baffling to physicians and surgeons, and the operation was determined on to correct the evils. Mr. Turner's many friends will be glad to learn that he is doing well, following the operation.

Walter Jennings of Woodland, manager of A. K. Macomber's extensive string of classy thoroughbreds, is getting ready to take his departure for New York after spending a couple of months' vacation here at his home. He plans to get in action at Belmont Park on March 1, with forty head of gallopers to be put in training. A. K. Macomber will have seventy horses sporting his silks on the tracks this season. Besides the string that Jennings will personally handle himself around New York, the second trainer, Murphy, will put a string of thirty through the workouts in Kentucky. The stable will be split up on the Kentucky, Maryland and New York tracks.

Owing to the retirement of Harry Morrissey as starter on the Kentucky tracks and the appointment of A. B. Dade, it will leave a vacancy on the Maryland tracks. It is reported in horse circles hereabouts that Mars Cassidy may be appointed on the Maryland tracks, excepting Havre de Grace. If Mr Dade cannot arrange to be on hand, James Milton will be at Havre de Grace as usual.

HANDBOOK BILL REPORTED FAVORABLY

Frankfort, Ky., Feb. 5.—To furnish necessary legislation to stop handbooks in the large cities of this state where this form of gambling prevails, the Committee on Criminal Law today reported favorably the bill of Representative John T. Murphy, of Covington, providing a penalty of one month to twelve months in jail for operating a handbook.

John Hachmeister, General Manager of Douglas Park and Latonia race tracks, has announced that the same stakes which have formerly been decided at these two courses in the past years will again be run this year and the added money values will remain the same as last year, but in the event that conditions warrant it, the value of overnight events will be increased by the management.

GEERS, THE SILENT MAN

(By W. H. Gocher)

January 25, Edward Geers sailed into port sixty-seven on his cruise through life. He was born on a farm near Lebanon, Tennessee, in 1851, and has always been a resident of the state, except during a period of about ten years, when he was in the employ of the Hamlins at Buffalo, N. Y. In his day he has seen the pacers come to their own in light harness racing, while he also did more, than any other driver, to make them popular. With the exception of Little Brown Jug and Storm he either developed or raced the best of the Hals and proved conclusively, over all kinds of tracks, that they were the gamest and most consistent breed of race horses that ever looked through a bridle. While doing this the trump of fame carried his name over the land until it is now as well known as that of anyone who ever lived in Tennessee. It has also become synonymous with integrity in the racing world, while his skill as a trainer and reinsman has made him the dean of his profession.

Ed Geers drove his first race in 1871 for a Tennessee preacher and his last in 1917 for a New York lady, who owns St. Frisco, the greatest racing graduate of his school, the honor roll of which presents the names of over a score of champions.

During the first twenty-five years of his career Geers developed and shipped from the sunny southland a formidable array of pacing horses, whose breeding was unknown to northern folk until he made their blood lines familiar by topping the race summaries with Mattie Hunter, Joe Braden, Brown Hal, Hal Pointer, his formidable half brother, Star Pointer, the first horse to beat two minutes in harness, Frank Dortch and the powerful Hal Dillard. They were followed by the flying squad of winners from the Village Farm, and when that establishment disappeared others took their places from the new training quarters at Memphis.

As a lad, Ed Geers developed and sold a few horses near his home town before he made a trip to Nashville in 1873, where he met George Fuller, and made arrangements to work for him the following year. During the 1874 campaign Fuller took in a few Grand Circuit meetings and what Geers saw there convinced him that there was considerable to the racing business. In 1875 he hung out his shingle as a trainer at Nashville, where he soon attracted the attention of Major Campbell Brown, who had a large farm near Spring Hill. Major Brown decided to send him a few horses, and in order to be near his new patron, Geers located at Columbia, and made it his headquarters for the next twelve years.

The Almont filly Alice West was one of the first horses trained by Geers at Columbia. In 1877 her young trainer made his first trip north, winning with her at Cincinnati, where she defeated Keene Jim and Kentucky Wilkes, and at Fleetwood Park, New York, where she finished in front of Hogarth and Sir Walter, whose son Sir Walter, Jr., afterwards sired the dam of Uhlan. The following week Alice West appeared at Hartford and was defeated by Hogarth after a six-heat contest that was spread over two days. The first heat of this race was won by Lester Dore's father with Galatea, and when doing it she reduced the world record for four-year-olds to 2:25¾. On the next trip Hogarth was marked for life at 2:26. Alice West then won a heat in 2:29¼, after which Hogarth showed in front again and Geers secured the fifth heat with the Almont filly. The race was then postponed, and after a night's rest, Hogarth was able to win in 2:26¼. This was also the race to which reference was made last September, when the Connecticut Fair Association presented Geers with a silk flag in commemoration of the forty years since he made his first start over Charter Oak Park.

In 1878 Geers brought out Mattie Hunter. Her first races were paced over the sandy southern tracks that fall and after she had defeated Sleepy George a few times he was convinced that she would do for the first flight in the Grand Circuit, which, in 1879, opened its first series of races for pacers. The free-for-all was the class selected, but that did not stop Geers, as a few weeks after the season opened he was racing head and head with Rowdy Boy, Blind Tom and Lucy, his handsome mare being the fourth member of the "big four," and that Mattie Hunter was as fast and game as any of them was shown at Chicago, where she was only beaten a neck by Blind Tom, when he reduced the world record to 2:12¼.

The sale of Mattie Hunter put Geers out of the bright light and while he came north almost every year with a few horses, he failed to locate another top liner until 1889, when he arrived at Cleveland with Brown Hal and Hal Pointer. He won with both of them. Brown Hal pulled up lame and was retired, while Hal Pointer started on a career which was continued successfully for six seasons, and during which he proved one of the greatest race horses that ever lived. In 1889 he won all of his races but one, his single defeat being over a heavy track at Rochester. The following year Hickok came over the mountains with Adonis and failed to defeat him, one heat at Cleveland being all that he could secure. In 1891 California tried again with Yolo Maid, but she could not even win a heat, but Direct, another product of the Golden State, caught Hal Pointer in Tennessee late in the season and defeated him, not only at Nashville but also at his home town, Columbia.

In 1891, after Harry Hamlin purchased Hal Pointer, a number of the Village Farm horses were placed in Geers' stable, the list including Belle Hamlin, Globe and Justina, with which he made the triple team record of 2:14 to wagon, as well as that sterling race mare Nightingale, Moonstone and Glendennis. C. J. Hamlin was so well pleased with Geers' methods that in 1892 he made a contract with him to locate at Buffalo. It was the best investment Mr. Hamlin ever made in the horse business.

With Geers in charge, the Village Farm stable shipped east early in 1892. Among other places it appeared at Fleetwood Park, New York, where Glendennis was started in a slow pacing race, one of his competitors being a little knee-sprung gelding called Robert J., that did not appear to have enough strength to ramble around a race track. After a couple of heats the little gelding had Glendennis down and out, and while he was gasping for breath, Geers told his owner to step over and purchase Robert J. The transfer was made and through it Geers secured a horse that combined all the elements of extreme speed, gameness, endurance and gentleness, second to no horse that ever lived. For several seasons he appeared at all of the leading meetings, defeating every horse that ever started against him, and retired a champion with a record of 2:01½. Also, while at the Village Farm, Geers bred his Tom Hal mare, Bessie Hal, to Direct, the old rival of Hal Pointer, and developed her foal, which, under the name of Direct Hal, made a sweep through the Grand Circuit and retired from the turf unbeaten. He also made a sweep from Detroit to Lexington with The Abbott, before he drove him to the world record of 2:03¾, and won scores of races with Nightingale, Fantasy, Bright Regent, The Monk, Heir at Law, Lady of the Manor, Lord Derby and a host of others.

After returning to Tennessee, Geers continued the winning habit with such speed marvels as Walter Direct, Anvil, Dudio Archdale, the beautiful Ardelle, The Harvester, which he took an unbroken colt and retired a champion; Etawah, Napoleon Direct, the first horse he drove below two minutes; Billy Buck, Peter June and St. Frisco. Each year he swings into line with something new or with one that has improved on the form shown during the preceding campaign, and that he usually gets what he aims at during the winter and spring months is shown by his uniform success in trotting turf fixtures. At Detroit he won the Chamber of Commerce and the M. & M. five times, while at Hartford he won the Charter Oak Purse with Nightingale, Billy Buck, The Harvester and St. Frisco. At Lexington Geers has always been very fortunate. The summaries show that he won five of the Walnut Hall Cups, The Transylvania twice and the Kentucky Futurity with The Harvester and Etawah.

Geers does not make a spectacular figure in the sulky. Wearing a black cap and jacket, he sits rather low, leaning forward more now than he did in the high wheel sulky days. As a rule all of his horses are good mannered and race from behind. A shift of the bit or a light tap of the whip appears to be all of the encouragement given to any of them in a close finish, but, like good ball players, they look for the signal and give him all that they have without being punished. The mutual understanding which exists between Geers and his horses is one of the mysteries of the turf and make him in reality the Silent Man from Tennessee.

PREPARE NOW FOR TRADE AFTER THE WAR

(By John E. Madden.)

The recent successful sale of thoroughbreds should be encouraging to all horsemen—excellent prices being obtained when least expected. The trotting horsemen should take heart and not be unduly depressed by the low prices at recent public sales, bearing in mind the price for which The Harvester sold last year, nearly $31,000, and the $50,000 paid for Peter the Great. This shows that a first-class trotting horse still commands a good price and the figures above quoted compare favorably with the $26,000 bid for Ultimus last week. The sales of The Harvester and Peter the Great show what a strong hold the trotter has on the affections of admirers of the harness horse.

After the war, the demand for live stock of all kinds will be enormous, and those fortunate enough to have trotting horses to sell will find a good market abroad, therefore, one should not be too downcast by present conditions. At future sales, buyers will do well not to let bargains escape, for, in future years, the demand will exceed the supply. Foreigners will come in a rush for trotting stock to replenish their depleted supply.

(John E. Madden should know about the foreign trade, as he sold Tenare 2:05¼ for $15,000; Soprano 2:03¼ for $15,000; Magowan, three-year-old, 1:10¼ for $10,000; Vice Commodore 2:11 for $8000 and others to foreigners.—Ed.)

W. M. Cain, the newcomer into racing from California, has completed negotiations for the contract on Jockey E. Sande. The price that J. B. Goodman received for the contract is said to have been $5,000.

TRAINING ARTILLERY HORSES

Artillery horses require a special training, as most of them are required for draught purposes, and in addition to the training the charger or troop horse gets the artillery remount has learn his business in the gun team, writes a correspondent of the London Live Stock Jurnal.

So, first of all, he is harnessed and led about until he is accustomed to the feel of his gear, and then he is harnessed up in company with five old stagers. It would, of course, be sheer folly to hook in a team of six raw remounts and expect them to pull in unison straightaway, although, as a matter of fact, one remembers an occasion on which it was necessary to take a team of six absolutely green horses, so far as gun work was concerned, fifteen miles to fetch a gun through a downpour of rain; nor will one forget the occasion in a hurry. The locking of a wheel round a lamppost was among the least of our troubles.

As a preliminary, the horse's head rope is undone, and he is led up to his place in the centerdrive, the team meanwhile standing just out of draught. The horse's traces are fastened quietly, and he is petted to allay any fear he may feel. When the command "Walk March" is given the five old stagers do the pulling, while a dismounted man walks beside the novice and leads him along by the head rope, and the center driver soothes him with hand and voice. As time goes on the remount is changed about until he goes well and is a willing worker in any position in the team.

The gun horse needs to be well trained, too, for his is a trying life on active service, and it is no wonder that the men say that the teams go mad under shell fire, for no amount of peace training will prepare a horse for the hell of an artillery bombardment.

Take, for example, an incident from the battle of the Aisne. Behind a range of hills, the Germans were getting one of their great guns, drawn by forty-two horses, on the move to a new position, to attain which they had to cross a gap, and, doing so, were spotted by our gunners, but they were too far off to use their guns effectively. In an instant out dashed a battery of Royal Horse Artillery, galloping furiously, the gun bounding behind over ground which it would be unwise, in the ordinary course of events, to cross at a walk, but the men's blood was up, and they meant smashing up that masterpiece of Krupp. Shells burst all around; the guns leapt and slithered from rock to rock, but still went on; whips cracked and men shouted, and still they went on, and then—the guns are in action; the enemy's cavalry escourt is shelled out of the way in an instant; the forty-two German horses are slain where they stand, for the great Krupp gun is stuck and immovable, a fair mark for our men, and once they are on to the target, that gun is soon no better than scrap iron.

After a run of seventy-five years, W. H. Manville passed away in December. He was a product of the oil country, and for a time fortune smiled on him, but when a few bad investments scattered his world's goods he selected the cap and whip and took to the sulky for a living. Being short and slim, he had no trouble in making the required weight, but his full beard gave him a Dr. Day look when out behind a good horse. Attention was first called to him in 1891, when he dropped off at Cleveland for the Grand Circuit meeting after making a little trip through the oil country and getting a good trimming in the M. & M. by Temple Bar. His prize pupil that year was a little roached back stallion that was bred by W. S. Ritchie of Cannonsburg, Pa., and registered under the name of Yes Eye See. When Vandergrift and O'Dell purchased the colt they decided he was badly in need of a change of name, so they called him Lakewood Prince, and told Manville to get him ready for the races. He won with him in 2:25¾ the first time out at Warren, Pa., but lost to Jeff Davis at Jamestown, J. B. Richardson at Bradford, and Charley C., at Pittsburg before he made a dive for the $10,000 purse at Detroit. On his showing there the little chap looked like a fair 2:20 trotter when the bell tapped at Cleveland, and the betting was on the same scale. Notwithstanding that fact, he carried a lot of oil country money, as in those days coin was plentiful in that section and it looked like a crime for any of their horses to be alowed to start without a bunch of tickets on him. In the Cleveland race Manville was stacked up against Hamlin's Nightingale, Abbie V., New York Central and three or four others, any one of which was considered a 2:17 trotter to high wheels. On the first trip New York Central came through in front with Abbie V. in the place in 2:20¼, while the book tickets on Trim were cashed in the next heat. By that time Manville had his pony ready and whisked out in front with him for three miles, the fifth and deciding one being trotted in 2:16¼. This was also Lakewood Prince's last day in the limelight, as after a defeat by Little Albert at Buffalo the following week, he disappeared from the turf.

TROTTING GOSSIP

(By W. H. Gocher)

John Goldsmith was but 36 years old when he died at Washingtonville, N. Y., in the house in which he was born and from which as a mere lad he went forth to make a reputation as well as a fortune on the trotting turf. In his brief span of life he made a reputation for a few volunteer trotters, swept through the Grand Circuit with Director, started the Sidneys on the high road of success, and established the fame of the Guy Wilkes family. The returns show that he reduced the yearling record with Freedom, made a new three-year-old mark with Sable Wilkes, won the first $10,000 Charter Oak purse and the first Kentucky Futurity, as well as hundreds of other races. Also while he was busy starting the big round dollars rolling toward his father, Alden Goldsmith, and his first employer, Monroe Salisbury, as well as Count Valensin and William Corbett, he did not overlook his own welfare, as when his estate was probated it showed that he was worth over $100,000 in hard cash, all of which was made with trotting horses. He never owned a share of stock or a bond, but he did train and race horses that could win, and he was also clever enough to know when they were fit to go to the front and get a decision in his favor. John Goldsmith was the first reinsman to adopt the extreme high arm style of driving, and he made a success with it. At times he seemed to carry a tired horse along at top speed on his finger tips, while the gloved hand of steel was ready at all times to take back one that faltered or showed a disposition to make a mistake. By this method he appeared to be able to give the most sensitive touch to the bit of a trotter that was all out of the end of the mile. Thomas W. Murphy, the modern wizard of the sulky, uses the same style of driving in his finishes, and that the results are satisfactory is shown by the fact that during the past seven years horses trained and driven by him have won over half a million dollars.

* * *

The Real Lady is still in Thomas W. Murphy's stable at Poughkeepsie, N. Y., and, as she is in perfect condition, it is to be hoped that her owner, A. H. Cosden, will reconsider retiring her at least one season. With her in the field the race-going public in 1918 would have an opportunity to see the greatest series of free-for-alls that was ever contested in the history of the trotting turf. The class shown by this filly in the deciding heat of the Kentucky Futurity would lead anyone to believe that she has more than an even chance to reduce the world's race record of 2:01¼, which Hamburg Belle made when she defeated Uhlan, and possibly add another name to the two-minute list. On their racing form there is very little difference between the fillies, Miss Bertha Dillon and The Real Lady, and that royal pair of battlers, St. Frisco and Mabel Trask, both of which are now being prepared for their third trip down the line in the first flight of trotters. To this class it will also be necessary to add Lu Princeton and Early Dreams, as well as Miss Directed and Straight Sail if they are raced again, as the fastest class in the Grand Circuit will be for 2:06 trotters.

* * *

During the Grand Circuit meeting at Philadelphia the pacer, Butt Hale 2:02¾, attracted more attention than any other horse at Belmont Park. He is a Pennsylvania product and was at one time rated as a counterfeit. The manner in which he disposed of his fields at Columbus and Cleveland, as well as at Philadelphia, however, proved that in proper form he was not only a high-class pacer, but a very fast one. One morning while Butt Hale was at Belmont Park, a stranger stopped in front of his stall and after looking at him for several minutes, turned away with the remark: "I must have been a dummy when I tried for a year to make a trotter of that horse."

* * *

The death of the Kentucky Futurity winner, Rose Croix 2:11¼, deserves more than a passing comment. She was the fourth one to secure the honors, the event that year being worth $25,000, and of the twenty-five that appear in the list of winners, she is the only one that was bred, developed and owned by the man who drove her in the race. Myron E. McHenry was awarded that honor, and it is very doubtful if it will ever be duplicated. In 1892 McHenry sent the Billy Wilkes mare, Lizzie Ryder, to Ash Grove Farm and mated her with Jay Bird. Rose Croix was the foal. Before being taken to Lexington in her three-year-old form she won at Davenport and Janesville, while she also made Stanley B. trot in 2:16¾ to defeat her at Dubuque, and George C. step in 2:16 in a class race at Decatur. The week following the Kentucky Futurity she appeared again in the Kentucky Stake, where she was distanced by Bingen after winning a heat in 2:13½.

* * *

The records made at the last Atlanta meeting proves that the Southeastern Fair Association has one of the fastest tracks in the country. It is built around an old reservoir in which the water is allowed to remain. This keeps the bed of the track moist and the footing perfect. Should the southern member of the Grand Circuit decide to open a few colt stakes in the near future it is almost certain that the world's records made each year at Lexington would get another cut at Atlanta as soon as they began to mature.

* * *

John Hogan, who brought out Mabel Trask and Mignola, the son of Allerton, which his owner drove in 2:03¼ at Lexington, is now training a public stable at the Avon half-mile track a short distance from Rochester, N. Y. It is very doubtful if he will find another trotter in that section that will measure up with the pair that he trained in Iowa. They are also the fastest pair that ever passed through one man's hands with the exception of The Harvester and St. Frisco, both of which were Geers' pupils.

* * *

Measured by actual performances, the bay gelding, Baron Atta, is to all appearances one of the best bargains ever picked up at the New York auctions. He was bred at the Hudson River Stock Farm, Poughkeepsie, N. Y., being by the Kentucky Futurity winner, Oakland Baron, out of Laureatta 2:08¼, by Prodigal. He was foaled in 1912 and was sent to the sale ring in his three-year-old form, Roger Rourke, of Greenfield, Mass., getting him on a bid of $110. At that time Baron Atta was a trotter and the following season he showed a quarter in thirty-five seconds at that gait. On the strength of this Star Lee, of Athol, Mass., gave $500 for him. He placed him in Ed Rowe's stable. After sampling him for a time Rowe decided that Baron Atta would make a good pacer and that he was right in the matter is shown by the fact that during the last two years he won nineteen races with him and gave him a record of 2:09¼ over a half-mile track. The returns also show that he paced the last quarter of a fourth heat at Springfield, Mass., in 31¼ seconds, and the middle heat of a winning heat at Plattsburgh in 1:02. Baron Atta will in all probability be seen on the mile tracks this season.

* * *

There is a decided probability that this year the horse show will be an increasingly popular feature of such county fairs as have one or more good-sized towns to draw exhibits from. During the past two or three years county fair managers who have paid special attention to making a horse show worth while, are convinced that the public takes just about as much interest in the contests in the show ring for ribbons as they do the track contests between the harness racers. It has been learned that two or three fair associations which have made the horse show a feature of their fairs will this year divert a large part of the money heretofore appropriated for free shows to the horse show, so popular has that feature proved. There is no getting around the fact that, while everyone is ready to take advantage of the automobile as a means of rapid travel, nine-tenths of those who do so have just the same love and admiration for a horse that they had before the auto came into vogue. As a matter of fact, Americans seem to possess an inborn love for the horse that, so far as can be seen now, will never become extinct. The most enthusiastic user of the automobile will, as a general rule, turn his head to look at a handsome horse in harness or under saddle when he meets or passes one on the road. In the cities, too, the persons of means who use the auto on the city streets and for extended trips into the country, have, on the advice of their physicians, taken up equestrianism in order to secure, in some degree, the exercise in the open air, which is necessary to the persons whose business hours are spent in an office chair. It will surprise anyone who has not kept in touch with the trend towards exercise in the saddle, which marks life in every big city in the country, to learn how far this trend has gone. Cities that never had an organized riding club until recently have such organizations now, big, healthy clubs, and the larger cities where there used to be one or two such clubs, now have five or six of them. Road driving, of course, has become a recreation of the past, but park driving has picked up in a remarkable way during the past two years. As the users of saddle and park horses are usually persons of means, they buy high-class horses, and a place to show them in contests for ribbons and honor appeals to them strongly. Any fair association so situated as to get the horses of such persons to show can well afford to make the horse show a feature of its fair. Not only can they afford to do so, but they cannot afford not to do so if they wish to take advantage of a real drawing attraction at a smaller outlay of money than would be required in almost any other way.—The Horse World.

AN AMERICAN HORSE WINS IN ENGLAND

Cases of American-bred horses racing in England are now few and far between, but one, Castleton, by Peter Pan—Mintcake, won a steeplechase at Gatwick January 21, with the substantial burden of 171 pounds up. Castleton was sent to England by James R. Keene, for whom, as a three-year-old in 1912, he won the Mt. Felix Maiden Plate at Sandown Park, Marlborough Stakes at Gatwick, Richmond Plate at Kempton Park, and Kennett Plate at Newmarket. He was an extremely fast horse and in subsequent years won many good races, becoming in time a crack hurdle racer. His half-brother, Basil, has shown at New Orleans recently that he too is gifted with some measure of the speed Castleton displayed in English flat racing.

ADVANCE NOTICE OF CONVENTION MEETING OF ALL HORSE BREEDERS

Arrangements have been made by some of the leading horse breeders for calling a meeting of delegates and members of horse-breeding associations to be held in New York, Monday, Feb. 25th, to formulate a plan of co-operative breeding for the purpose of supplying horses for army service.

The plan is to form a corporation with sufficient capital to put the plan into execution at once by which means all owners of registered horses suitable for such breeding may become associated in the work.

The plan of operation suggested is a modification of that put into effect by the Department of Agriculture several years ago, but instead of buying the produce of such breeding at the age of three years it is to be bought by the Association at the time of weaning and later the Association will sell the geldings to the Government for army use and retain the fillies for breeding purposes. There will be a fixed uniform price for the weanlings from approved mares and the purchase guaranteed.

The plan for maturing the young stock has been well thought out so as to attain the best development at the least cost. For this purpose the Association will have several centers for assembling the young stock where the conditions of soil and climate are most favorable.

A system of branding has been suggested by which the breeding will be marked on each horse with a number attached by which every type of horse and each breeder will have due credit for the produce and can be referred to as long as the horse lives.

The schedule of prices suggested is $50 to the owner of the mare, $15 to the owner of the stallion, and the Association to add enough to cover its expenses dependent on the time that the Government will purchase. With the co-operation of the breeders and the Government the estimated cost at three years of age is under $200. One great element of economy is in handling the stock in quantity instead of the retail management of individual farmers.

The date of the meeting is selected as just preceding the Fasig-Tipton sale of trotting horses at which time many breeders will be in New York.

The war has shown that the breeding of horses for the army must be taken up at once in order to prevent a shortage, and it is hoped that the meeting will devise a plan of co-operation that will be permanent and result in making a well recognized business of raising horses for the army.

This is so important a subject that every suggestion will be welcome at the meeting.

A formal invitation to the meeting will shortly follow but all breeders will be welcome even though they may not receive a personal invitation.

"Every farmer and horseman in the country should devote part of his attention to the breeding of horses suitable to army use as his share in aiding the goverment in the war," declared Ernest I. White, acting president of the New York State Breeders' Association, at its annual meeting in Syracuse recently. Mr. White pointed out to the members of the organization that before the war, there were only twenty-two million horses in the United States. This number included all sorts of animals, the majority of which could not be used for war purposes.

During the years before we entered the war, foreign buyers combed the country for animals and there are now approximately 4,500,000 on the battlefields of Europe, more than a million and a half of which are from this country. He declared that animals are more necessary than munitions to win the war, for without horses, food and ammunition could not be taken to the soldiers in the trenches.

Mr. White told the members of the association that, as patriots, they were bound to aid the American Red Star Animal Relief, formed for the care of animals on the battlefield. He offered the following resolution which was unanimously endorsed by the members:

"Resolved, That the annual meeting of the New York State Breeders' Association cordially endose the work of the American Red Star Animal Relief in its endeavor to sucor horses wounded in the war and in this way helping to maintain the efficiency of the American forces at the front."

Mr. White referred to the Royal Society for the Prevention of Cruelty to Aniamls of England which has hospitals behind the lines equipped for 12,500 horses and has succeeded in curing 84 per cent of the animals which were turned over to its care by the British veterinary corps. He declared that "horsemen and breeders of America can render no better service to the cause than to support the American Red Star Animal Relief, which will work along similar lines to the Royal Society for the Prevention of Cruelty to Animals."

Numerous other organizations throughout the country have endorsed the work of the Red Star and are planning to aid it. The headquarters of the organization is in Albany, N. Y. It was formed at the request of the Secretary of War and is conducted under the auspices of The American Humane Association, the head of anti-cruelty work in the United States. Dr. William O. Stillman, for twelve years president of The American Humane Association, is director-general of the Red Star.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

FIXTURES

The Interstate Trapshooting Association's Nineteenth Grand American Handicap Tournament, under the auspices of the South Shore Country Club, Chicago, Illinois, August 5, 6, 7, 8 and 9, 1918; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

The two largest albacore taken at Avalon, Catalina Islands, weighed, respectively, 54½ pounds and 41 pounds. It took 27 minutes to land the largest one.

Ducks have been more plentiful in the Sacramento valley this season than for a number of years past. This is probably largely due to the rice fields, as there have been fewer ducks in the marshes along the coast.

This has been a good season for quail hunting and hunters have reported good bags from almost everywhere.

The reported kill of deer in California during 1916 was 8117, and probably not less than 12,000 were killed, furnishing somewhere near 450 tons of fresh meat. It is likely that the kill for 1917 will exceed that of the previous year.

Anglers along the southern coast during the past few months have found the mackerel fishing good and large net hauls have been made all along the long wharf at Santa Monica.

The Golden Gate Gun Club invites all persons interested in trapshooting to attend its shoots every Saturday and Sunday afternoons, commencing February 22d. Clarence Haight, the genial Secretary of the club, wants it understood that anyone interested in trapshooting can come over and have as much fun and take part in the sport whether they have weapons or not, and that the members of the club will do all they can to make it pleasant for them.

The Pacific Coast Field Trials Club plans to lease a 4000-acre ranch near Bakersfield as a hunting preserve and where, each year, the club can stage its field trials. The preserve will be stocked with quail and other birds. Armed guards will patrol the grounds at all times. At a meeting held recently the following officers for the ensuing year were elected:

A. G. Wilkes of San Francisco, president; John Schumacher of Los Angeles, first vice-president; J. Walter Scott of San Francisco, second vice-president; J. A. Chanslor of San Francisco, third vice-president; Philip Wand, San Francisco, secretary and treasurer.

The inaguration stake of the Yolo and Solano Coursing Club meet held February 2nd and 3rd, out of Dixon, was won by P. Brosman's greyhound, Napa Girl. Young Royal Gold was second and Roy S. Avery's Polymelus was third. Shamrock Kid of the Sacramento Kennel Club was fourth in the meet. The dogs made an excellent showing, in view of the fact that the ground was poor. Lee Hoffman of Woodland was the judge.

The Oakland Kennel Club has announced its intention to hold a show sometime during the early spring. A meeting will be held on March 20th, at which time a place and plans for the show will be discussed.

The two crack Airedales, Tintern Tiptop, belonging to Mrs Baldwin, and Ralston T. Wilbur's Killarney Shawn, will be exhibited at the Pasadena Kennel Show. It was a toss up between these two dogs at Los Angeles. Mrs. Baldwin also intends to exhibit her old dogs at the same time. It was reported that the Los Angeles Kennel Club will hold a show on March 17th and 18th under the superintendency of R. C. Halstead, and Jack Bradshaw will be one of the judges. The premium list will be advertised within a fortnight.

Irving C. Ackerman has purchased from the Vickery Kennels in the east eleven wire fox terriers, including Vickery Wire Collar Girl, and these dogs will be quite an addition to the Ackerman kennels.

The "old reliable" Parker gun has again achieved a remarkable victory, enabling Mr. Lester S. German to break all yearly official records by scoring 6137x6285 targets, an average of 97.64 per cent. From the fact that so large a number of targets were shot under many adverse conditions, over a large and varied country, extending during all of 1917, it is very apparent that both gun and man deserve great praise for so meritorious a performance.

The Committee which will allot handicaps to entrants in the Nineteenth Grand American Handicap, scheduled to be held at Chicago, Illinois, on August 5, 6, 7, 8, 9, 1918, under the auspices of the South Shore Country Club, is constituted as follows: B. S. Donnelley, Chairman, Chicago, Ill.; G. K. Mackie, Lawrence, Kans.; G. V. Dering, Columbus, Wis.; F. U. Rosebery, Baltimore, Md.; R. A. King, Delta, Colorado.

The E. I. du Pont de Nemours & Company has just issued an attractive booklet entitled "Trapshooting Equipment For the Country Club". It deals with trapshooting at country clubs and the trapshooting facilities of many well known clubs are pictured. It is well printed and each page contains a striking illustration. The double spread center pages contain a splendid picture of the Trapshooting Branch of the South Shore Country Club of Chicago. The last few pages of the book consist of a complete buying guide for trapshooting equipment. Everything needed for the sport is mentioned. Sport lovers desiring a copy of the book should write the home office of the company at Wilmington, Del.

The fishing is excellent at Duncan's Mill on the Northwestern Pacific Railroad, and large catches of steelhead are being made not only there but at other points on the Northwestern Pacific.

The season's run of herring has been unusually large. There has been a big fleet of fishing boats engaged in netting herring in San Francisco bay, around Belvedere Point, and in Raccoon Straits, the average boat taking a number of boatloads every day. The fish are sold to the Booth Canning Company. The fishermen are paid $10 a ton and the catch so far must have amounted to several thousand tons.

The price for fishing tackle the coming season will be from ten to fifty per cent higher than last year. Split bamboo rods of the various grades have increased in price. Steel rods have advanced twenty per cent, imported hooks from twenty to fifty per cent, and none are procurable outside of the ones carried over from last season. Domestic hooks have advanced from ten to twenty-five per cent, silk lines anywhere from ten to twenty-five per cent, linen lines twenty per cent, and so on all down the line.

There is no fish in the sea more maligned than the shark. All the smaller varieties are good eating, some of them among the most delicious fish that exist. Many of the ray species are excellent. Many of the varieties of shark are fastidious in their choice of food. There is no reason at all why the flesh of many varieties of shark should not be canned under its true name, as after eating, the prejudice against the name will be overcome.

TRAPSHOOTING AT SAN JOSE

The San Jose Gun Club opened the trapshooting season for this part of California Sunday, the 10th. There was a good attendance and much enthusiasm, and notwithstanding it was so early in the season, high scores were made.

Hal McLachlan was high gun for the amateurs, with 96 out of 100 targets. W. A. Joslyn and Lem Hawxhurst were tied for high professional with 97 each. For the Santa Clara county medal, A. F. Baumgartner and George H. Anderson were tied with 49 apiece out of 50 targets. There was a triple tie for the Everding trophy, with Anderson, Baumgartner and H. Lorenson of Newman still in the running. The scores:

Amateurs

Hal McLachlan	96-100
George H. Anderson	95-100
H. Lorenson	95-100
A. J. Van Dusen	92-100
Ed Garrott	92-100
Dr. C. Linderman	92-100
George Thomas	90-100
O. N. Ford	75-75
A. F. Baumgartner	49-50
C. H. Nash	46-50
A. M. Barker	44-50
A. J. Smith	42-50

Professionals

Lem Hawxhurst, Oakland	97-100
W. A. Joslyn, San Francisco	97-100
Hugh Poston, San Francisco	95-100
Fred Willett, San Francisco	94-100
W. J. Terry, Oakland	91-100
L. Middleton, San Francisco	90-100

BIG GAME IS DISAPPEARING

Although the wild life of North America is more abundant than that of other continents of the northern hemisphere and has only Africa as world rival, yet our present-day richness in this respect is decidedly poor, compared with the abundance and variety of mammalian life that roamed our plains before the advent of the white man, while the vast number of species which disappeared even before the Indians came to inhabit the land is even more astonishing.

Such are the facts brought out in a communication to the National Geographical Society by E. W. Nelson, chief of the United States Biological Survey, which also gives an amazing account of North American wild life in prehistoric times. A portion of the communication made public is as follows:

"The original buffalo herds have been estimated to have contained from 30,000,000 to 60,000,000 animals (the latter figure is 6,000,000 greater than the total number of cattle in the United States, according to the census of 1901), and in 1870 it was estimated that about 5,500,000 still survived—exceeding by 1,400,000 the number of mules in the United States in 1910.

"A number of men now living were privileged to see some of the great herds of the West before they were finally destroyed.

"Dr. George Bird Grinnell writes:

"'In 1870 I happened to be on a train that was stopped for three hours to let a herd of buffalo pass. We supposed they would soon pass by, but they kept on coming. On a number of occasions in earlier days the engineers thought that they could run through the herds and that, seeing the locomotive, the buffalo would stop to turn aside, but after a few locomotives had been ditched by the animals the engineers got in the way of respecting the buffaloes' idiosyncrasies.'

"Astonishing as was the number of buffalo which roamed the plains of old, even more numerous were the antelope, though the latter did not attract as much attention as the larger mammels. Besides, these, the chroniclers of the colonial days give many interesting accounts of the incredible number of other wild animals, including bears, wapiti, white-tailed deer, and turkeys on which the wolves made fierce war. One writer narrates that during the winter of 1670-71 fully 2400 moose were snared on the Great Manitoulin Island, at the head of Lake Huron.

"The wealth of animal life found by our forbears was one of the great natural resources of the new world. Although freely drawn upon from the first, the stock was but little depleted up to within a century. During the last 100 years, however, the rapidly increasing occupation of the continent and other causes, together with a steadier increasing commercial demand for animal products, have had an appalling effect. The buffalo, elk and antelope are reduced to a pitiful fraction of their former countless numbers.

"Practically all other large game has alarmingly decreased, and its extermination has been partly stayed only by the recent enforcement of protective laws."

DUCKS DIE AT SALTON SEA

From about August 15 to the last of October, 1917, large numbers of ducks and other water birds died at Salton Sea, in the Imperial Valley. In the early part of October pintail ducks died by the hundreds and formed a windrow along the shore. I counted forty dead bluebills and fifteen canvasbacks in a distance of fifty rods along the shore of the lake on October 14. The birds lose the use of their legs and then of their wings, and finally are absolutely helpless. After developing these symptoms they are certain to die in from one to four days.

Although cormorants and white pelicans are numerous, they do not appear to be subject to the disease. Geese also, though abundant, do not seem to be affected.

Several persons have eaten the meat of diseased ducks with no ill effects, and cats feeding upon the dead birds show no symptoms of poisoning.

All evidence points to the view that this is the same sort of disease that has appeared at Tulare and Buena Vista lakes in California and at Great Salt Lake in Utah.

Apparently ducks affected with the disease are benefited with a change to fresh water. My man and I have picked up a great number of birds so affected and have placed them on sandbars at the mouth of the river. Here they appear to do better, but most died or were eaten by coyotes, which are plentiful here.—Charles E. Davis in "Fish and Game."

"Vickery Selected," a wire fox terrier, winner at the recent Boston Dog Show, arrived from the east yesterday morning, consigned to Irving C. Ackerman. The dog cost Ackerman $750, and will be shown at the Pasadena Show. The new dog has been a consistent winner in the east for the last several months. Ackerman last night shipped to New York a brace of "wires," which he thinks will go to the top at the Westminster Show in New York on Washington's Birthday. They are Humberstone's Warrant and Squaw, and will be shown by Walter Reeves.

VAN DUZEN POOL
A Famous Fishing Resort on the Eel River

MUDHENS GOOD FOOD

Believing that "conservation" means making use of every valuable food-product, the California Fish and Game Commission has launched an extensive publicity campaign in behalf of the common coot or "Mudhen," which already has established itself as a valuable bird in the South and parts of the East, but in the presence of so great a supply of more choice wildfowl, thus far has failed to find general recognition in the Golden State.

This is a time when everything edible should be given careful consideration; for months the Fish and Game Commission urged upon the people the greater use of fish, and in the present phenomenal increase of demand is seen a considerable ripening of the fruit in whose cultivation the commission was a pioneer on the Pacific Coast.

The using of all perishables, and becoming better acquainted with every novel food product has become a patriotic duty wherein all may render aid of daily value. Realizing that only through wide publicity could the people be made familiar with the many good foods that annually go to waste, the State Board has been stimulating all possible the use of birds that most hunters throw away —a thing for which there can be no excuse, as if not worth using, why kill or waste costly ammunition that could serve better purpose?

The worst thing about the "Mudhen" is its name, and the prejudice that this has built up against it. "Give a dog a bad name" has proved its truth. As a matter of fact, there is nothing new in the use of mudhens on this coast. Leading hotels have served them as "water chicken" in San Diego for years; and as "tule hen" they appear on Fred Harvey's celebrated bills of fare regularly. Known South as "Poule d' Eau" and served a la Creole, they attained a more than local fame down New Orleans way, great center of bon vivants that it is.

Mudhens are perhaps better relished by their French name, which is more truly descriptive of their habits, as they are a water bird rather than a mud frequenter. Their diet is identical with that of ducks, and in dry seasons when there is not much grass the flesh stays hard. In general they are to be handled like rabbits in preparation for the table. Stews are the general method of cooking; but those willing to pluck fat ones can roast them and have a bird little inferior to duck except milder in flavor, hence relished by some to whom the gamy flavor of a duck is not acceptable. They are easy to skin, but the process removes the rich and valuable fat, so is to be condemned, as all such fat should be made useful. To add other fats, such as bacon, is needless extravagance.

Soaking the birds several days in cheap claret imparts a most delicious flavor, and is a method followed by some of the most celebrated cooks, one of whom has been serving "mudhens" in his cafe for nearly twenty years in Los Angeles as "Salmi of Duck," delighting thousands who never suspected that they were eating the same mudhen that had been left to lie before their guns as supposedly worthless.

Nowadays, as a result of publicity, one sees strings of the blackish birds, nor are sportsmen ashamed to admit their shooting them, either; for the making use of anything hitherto wasted is realized to be a most practical form of patriotism, and to be a proper source of personal pride.

The common ruddy duck or "wiretail" is a delicious bird on the mountain lakes when fed on the rich, sweet aquatic food-plants so relished by the big ducks, and sportsmen are also making wide use of these fat little fowls this season.—Edwin L. Hedderly in "California Fish and Game."

IT WAS SOME GUN

Here's a story that T. E. Doremus, former president of the Interstate Association, says he has carried in his mind for 20 years. It is worth while —has improved with age, like they tell us certain fluids do.

It was along about 1896 when Harvey McMurchy of Fulton, N. Y., at that time sales manager for the Hunter Arms Company; the late Ed Fulford, of the Remington Company, and Jack Hull, of Parker Bros., began to argue about the respective shooting qualities of their guns, to the delight of a crowd at the New York State Fair.

Fulford claimed for Remington guns (they were making double-barrel guns in 1896) that they would kill ducks at a distance of 150 yards. Hull insisted that the Parker was good for 25 yards more. That seemed to about settle the argument.

Suddenly McMurchy horned in and in his quiet, serene manner told how one day he was out hunting partridges and, upon looking heavenward, saw a small object sailing around 'way up in the clouds. Although somewhat doubtful about the chances of making a kill, he nevertheless let drive. The result was most startling. The object seemed to stop for a moment, then it began to fall toward the earth in a wide, circling flight, and at last gracefully landed on a knoll some 200 yards away.

All curiosity, McMurchy said he hurried to the spot, and his surprise was beyond imagination when he discovered that he had injured a baby angel. He carried it to a near-by farmhouse, and after a few days' nursing it recovered from the gunshot wound and flew back home.

The Smith gun was unanimously voted some gun.

$1000 FOR EACH TARGET

Fred Gilbert, Ton Marshall and Bill Crosby, three of the members of the American Trapshooting team that invaded the British Isles nearly a generation ago and proved to the residents of these isles that Americans were just as effective with the shooting iron as ever, attended a trapshooting tournament at Anaconda, Mont., several years ago as the guests of E. P. Mathewson, then the general manager of the Anaconda smelter.

Anaconda will never forget the occasion; neither will the trio of shooters. For the comfort of the spectators a grandstand had been erected behind the traps. And with such celebrities on hand the stand was crowded. Before the tournament began Mathewson drifted in front of the stand and called Gilbert, Marshall and Crosby to the front and stated that Anaconda appreciated the presence of each one and to show how marked the appreciation was and how generous the people were, and their willingness to take a chance, three targets would be thrown, one for each of the professionals—and to each man breaking his target $1000 in gold would be given.

This seemed too good to be true. Gilbert, Marshall and Crosby had shot in every State in the Union—and some outside—but never did anyone offer to hand them money before. Marshall, being the spokesman for the shooters, was first called to the traps. He knew that Crosby and Gilbert would break their target and he made up his mind to get his. He gave the word and held exactly where he wanted to shoot, but the target sailed on, and $1000 sailed with it. Gilbert was next. Determination was written all over his face. He suffered the same fate as Marshall. It was no different with Crosby.

After Crosby had fired the trap puller ran into the field and gathered up the three targets and returned them to Mathewson, who held them up for the benefit of the crowd and said: "This Anaconda advertises. Here are three copper targets, embellished with lead pellets, until they have the appearance of a porous plaster."

The good people of Anaconda knew all the time that the trio of shooters would not get the money, and the shooters vowed that when anyone offered them money hereafter to break targets they would inspect the targets first.

THE CANADIAN BUFFALO HERD

The largest herd of buffalo in the world is now owned by Canada.

They form a picturesque group as they roam over the new national reserve set apart for them near Wainwright, a city that has sprung up 125 miles east of Edmonton, Alberta.

Canadians recognized the need of action if the bison were to be preserved, and before Americans realized it they had purchased the entire herd of 600 from Michael Pablo, of Montana, who hao protected them on his ranch near Ravalli.

The history of this herd, now the largest in the world, dates back to 1873, when a Pend o'Reille Indian captured four little bison calves—two bulls and two heifers—by cutting them out of a stampeded herd on the Flathead reservation in Montana.

The Indian in question gave them to the Mission of St. Ignatius, where they were kept as pets and became as domesticated as ordinary cattle. When the heifers were four years old each had a calf. From that time on they gradually increased in number, until, in 1884, there were 13 head, and, finding the care of them too great a tax, the Mission decided to sell them. Ten head were bought for $250 apiece by Pablo, who was shrewd enough to see that specimens of what was even then almost an extinct animal would eventually become very valuable.

The herd increased under his supervision, and in a few years it became possible to sell specimens at high prices. Some idea of the average rate of increase may be deduced from the observed fact that half the cows give birth to calves every year, while the twin calves are not uncommon. As a rule the bison calf is a very hardy creature.

In 1906, Hon. Frank Oliver, then Canadian Minister of the Interior, obtained for the Dominion Government an option on the 600 head, and they were bought for $200,000. The "round-up" lasted two months, and was carried out by 75 cowboys, and was accomplished with a loss of less than 1 per cent. Today the herd numbers 2077.

Although kept within the boundaries of the reserve the bison can hardly be said to be in confinement. Their stamping ground covers an area of 107,000 acres—165 square miles. It is 25 miles in an air line the longest way across. A wire fence eight feet high and 73 miles long incloses it.

When the fence was completed it was found that 12 wild deer and one elk had been fenced in. Eighteen small lakes and a number of streams are within the park. Prairie chickens, ducks and other game find a resting place here undisturbed by the hunter.

The park is truly a buffalo paradise. The grounds bear every evidence that in other days they have been a favorite haunt of the lords of the plains. Everywhere are outlines of old buffalo trails and wallows.

Aroused by the loss of these buffalo, the United States has established a national bison range in the Flathead Indian reservation in Montana, comprising 12,800 acres, near the towns of Ravalli and Dixon, and it was stocked by the American Bison Society.

TRAPSHOOTING HAS A NEW NAME

Trapshooting has long been known as the "Sport Alluring," but of late it has been given a new title, which its followers feel is more in keeping with the purposes the sport is now being made to serve. The new name for trapshooting is "The Patriotic Sport," and the reason for the change is fully explained in Bulletin No. 7 just issued to the members of the Nebraska State Sportsmen's Association by the Secretary, Mr. George L. Carter of Lincoln, Nebraska, one of the best known sportsmen and authorities on game protection and propagation in the United States. Mr. Carter's Bulletin says:

"Trapshooting, formerly known as the 'Sport Alluring,' has willingly has its name changed to the 'Patriotic Sport.' Why the Patriotic Sport? Because the U. S. Government has recognized it as a long step toward preparedness and has adopted the shotgun as a most valuable defense weapon.

Think of the chances of the enemy getting into our trenches for a hand to hand conflict with a bunch of American trapshooters stationed there with magazine shotguns, each containing ten loads of buck shot. Shotguns are also to be used for the destruction of the hand-thrown grenade.

Thousands of trapshooters have gone to the colors and when they arrived at the training camps they took to the army rifle like ducks to water. Officials in the army said, if all recruits were as prepared as the trapshooters they could step to the front and win the war in a few months by expert shooting. The Government recognizing this, immediately established traps at every training camp. Their first order was for six million clay targets, some of which went to the boys in France. Expert shooters are at all camps and aviation schools, teaching the boys to shoot.

It is the patriotic duty of every club in our Association to open their traps to the public with no charge except for actual expenses and it is the patriotic duty of every member to get the boys, who have registered for service, to the traps and teach them to shoot. It will not only save the Government the time to prepare them after they arrive at the training camps, but it may actually save their lives.

THE FUNDAMENTALS OF TRAPSHOOTING

[By Dr. Leroy Newton, Seattle, Wash.]

First of all, trapshooting and sociability are inseparable, and it is the sociability of competition; the friendly striving to do as well or a little better than the other fellow.

Secondly, trapshooting takes one absolutely and entirely away from any and all business, which affords complete relaxation from business or professional cares; and I know that this one thing alone is worth the price.

Trapshooting is an outdoor game. The shooting grounds are usually located a little out of town, in the open, where lots of room and fresh air is assured. And there is a goodly amount of exercise connected with the game. The raising of an eight-pound gun to the shoulder a hundred times; the swing of the gun to follow the flight of the swiftly flying target, and the set of the muscles against the recoil of the load; the telegraphic message from the eye to the target, back to the brain and then to the trigger finger in the smallest fraction of a second, means exercise with a capital E. And one of the very first important valuable facts one learns early in the game is that the nervous system must be in "tune," or as near perfect as is humanly possible

This is one sport that will make a man cut out bad habits, when he learns (as he will) that bad habits and trapshooting cannot go together.

I know men who train for a tournament just as carefully as does the prize-fighter. They leave off the alcohol, tea and coffee, cut down the tobacco to the minimum amount and eat plain food, seeing particularly that the waste products of the body are eliminated, and when they step out on the firing line they feel fit to "break them all." This is the ideal condition, and not always possible for the doctor, who may have been out all night on an obstetric case; or who has worried for twenty-four or forty-eight hours over a seriously ill patient; or the business or financial man who is worried over a big deal; but if he has once tried trapshooting, he will find himself thinking of the subject frequently, and will gradually adopt a course that will give him the maximum amount of good health.

Now, don't go out to the traps with a light gun. Eight pounds, or over, is the proper weight to take up some of the recoil. The light gun will pound you unmercifully, especially if the gun does not fit you; and don't let your enthusiastic friend induce you to shoot at more than twenty-five targets the first time out.

I have known many men to quit trapshooting after the first attempt, just because they were persuaded to shoot at a hundred or more targets on their first visit to the traps. After three or four trips to the shooting grounds, you will find that the shoulder has adjusted itself to the recoil so nicely (especially if the gun fits) that a hundred shots may be fired without any discomfort.

Don't take your field gun to the traps and expect to do good work with it. The brush or field gun is too light and the stock is too "crooked." In other words, the trap gun must have a very straight stock (around a two inch drop), and not very much difference between the drop of the "comb" and the "heel."

There is no use to go into all of the reasons for these facts in this short article, but I may say that they have been learned at the traps by men of experience, after many years of experiment, and adopted by both professionals and amateurs. There are several "try-guns" that can be taken to the traps and adjusted to fit anyone, so they may be fired at targets, and in that way get a practical fit.

Don't be induced to shoot a heavy load; anything above three drams of powder is not only superfluous, but actually militates against accurate shooting.

After you have been fitted with a gun, let it alone. Don't be continually changing it. You will find many shooters who are constantly altering their guns. They get a new gun made to order that fits them, make good scores at the traps, and then some day they go out not feeling quite "fit," make a poor score, and immediately "lay it to the gun"; forgetting entirely that guns don't change, but men do.

The only reason for changing a gun that was fitted to you is that you may grow stouter or thinner, then the gun may be altered to fit the change in you.

You should master the few rules usually posted up in all club houses, and then you need never think of accidents. I will venture to say that among the five hundred thousand trapshooters in this country, there is not one accident in five years. In fact, there is not as much danger as in baseball, football or other sports.

Lastly, but not least, you will find the best bunch of real sportsmen in the trapshooting game, with fewer exceptions, than any other game, bar none, in the world.

It is not a commercial game, but the trapshooter is always a trapshooter for the real sport, and very, very few for any other reason.

Age is no bar. I have known several men well over seventy, who could shoot through a two day tournament around ninety per cent.

Try it; it will keep you physically fit, and make a better man of you in every respect.

TRAPSHOOTING PLANS FOR 1918

The Tournament Committee of the Interstate Trapshooting Association—the national body—has completed its labors and announced the plans of the association for the 1918 season.

Nearly all of the functions of the Inter-State Association come under the head of the Tournament Committee, which is comprised of former President T. E. Doremus, as chairman; Luther J. Squirer, Frank G. Drew, J. Leonard Clark and J. T. Skelly.

The Interstate Association contributes in the neighborhood of $25,000 in cash and trophies yearly for the promotion of trapshooting, besides aiding clubs and organizations in various other ways, and it is up to this committee to say how the cash and trophies will be distributed.

There will be no change in the generous policy of the association, the committee deciding to adopt the same liberal plans that have been found so successful in the past, but with the discontinuing of the four subsidiary handicaps and the inauguration of the State handicaps the committee has considerable work to do in reclassifying States.

The States were divided into four classes—A, B, C and D—according to the number of trapshooters registered. Here is the way the States have been reclassified:

A—California-Nevada, Illinois, Iowa, Kansas, Nebraska, New York, Pennsylvania and Wisconsin.

B—Connecticut, Indiana, Michigan, Minnesota, Missouri, Oklahoma and Virginia.

C—Colorado-New Mexico, Delaware, Idaho, Kentucky, Maryland-District of Columbia, Massachusetts, Montana, New Jersey, North Dakota, Oregon, South Dakota, Tennessee, Utah and Washington.

D—Alabama, Arizona, Arkansas, Florida, Georgia, Louisiana, Maine, Mississippi, New Hampshire, North Carolina, Rhode Island, South Carolina, Texas, Vermont, West Virginia, and Wyoming.

The United States Navy was not classified. The committee felt that the officers and men in the navy would be kept pretty busy this year and wouldn't have time for trapshooting tournaments. The shooting they will do will be of another kind.

Class A States will be awarded $325 for State tournaments; Class B, $300; Class C, $275, and Class D, $200. To this amount each class, A, B, and C, State association, is asked to add $50 to the purse and to give the winner of the handicap event a gold watch valued at $50. The Class D States are asked to add $25 and a watch. Each State association is requested to conduct a handicap event, open only to residents of the State giving the tournament, at 100 targets, with handicaps from 16 to 23 yards. The trophies will be distributed under the same division that prevails in the Grand American Handicap.

The Handicap Committee for each of the State handicaps will be chosen by the State Sportsman's Association—not by the club giving the tournament or the Interstate Trapshooting Association. The committee, which shall be of three or five, must be residents of the State in question.

Resident amateurs may shoot for targets only in any of the State tournaments and be eligible to win any of the trophies given by the Interstate Association. Non-resident amateurs and professionals may shoot for targets only, but shall not be eligible to share in the purse nor win any of the prizes. Each State association is requested to conduct a professional State championship event in connection with the amateur championship. There shall be no prize in this event.

The committee went on record as being opposed to too much shooting. There is such a thing, and it is harmful to the sport; therefore, applications for one day registered tournaments will be given the preference. Last year several clubs were granted one day sanctions and then run a second day's shoot at non-registered targets—which really made the shoot a two-days' event. This is not in keeping with the spirit of the sport, nor the ideas of the committee, and clubs that follow this practice this year will be penalized in the future.

Applications for the registration of tournaments, excepting State tournaments, must be made by February 15. Applications for State tournaments may be filed any time. The Interstate Association will give $50 to each registered tournament, preferably in trophies. It is necessary for a club in making its application for a registered shoot to have the approval of its State association.

It will be necessary for clubs conducting shoots to have the reports of the event, long runs, etc., in the Interstate office no later than 30 days after conclusion of the shoot. Clubs which do not comply with this rule will not receive their contributions, nor will the scores be counted in the official averages.

No more than two registered tournaments will be granted to any one club during the year.

The committee will continue the donation of trophies to all newly-formed gun clubs and for team competition.

Mr. Rosseter's Wikiup (Indian name for meeting place) Ranch comprising about three hundred and twenty acres, is fifty miles from San Francisco, and there he is collecting a small but select stud of which any man might well be proud.

PACIFIC COAST FIELD TRIALS

Sonoma Boy, owned by J. A. Chanslor of San Francisco, won the finals in the derby of the second day of the field trials of the Pacific Coast Field Trials Club at Bakersfield January 22. True Blue, owned by F. de Augustine of Pasadena, finished second, while show honors were divided between Kenwood Bessie, Mr. Esterbrook, owner, and Kenwood Duke, owned by F. H. Bishop.

In the all-age stake the work of Flueretta was exceptionally good and sharp on birds, and she showed all the qualities of a high-class all-age dog. Melrose Jack also ran an exceptionally good heat in this stake. The other braces of dogs displayed in the all-age were:

Melrose Rod and Launa, Flueretta and Melrose Tessie, Melrose Jack and Bender's Bee. Tomorrow's braces in the all-age will probably be: Fordney Blondie and Maggie G., Old Forester and Paliacho, Jr., while Sweet Marie drew a bye. The all-age stake will be finished tomorrow afternoon and the members' stakes will probably go over until Thursday. The Pacific Coast Field Trials Club held an executive session at a local hotel late tonight.

Arthur S. Beardslee's Blossom Considine, a beautifully marked Llewellyn setter, won the members' stake in the finals.

Fluerette, owned by J. Walter Scott of San Francisco, won the all-age stake. She made an exceptionally fine showing on birds. Melrose Rod, owned by A. G. Wilkes of San Francisco, finished second, while Launa, owned by Jack McKeon of Taft, finished third. The field trials were well attended, though the weather conditions made the trials extremely difficult. The lack of rain here has caused a great scarcity in birds, and this also interfered with the showing of the dogs.

BIG INDUSTRIES ENCOURAGE TRAPSHOOTING

The Western Electric Co. is a mammoth manufacturing industry which recently recognized The Sport Alluring, and holds weekly shoots upon its own grounds in Chicago.

Primarily, the Hawthorne Club, made up of employes of this company, with a membership of 3000, fostered many varieties of social and sporting activities, such as dancng, photography, archery, casting and tennis.

The name was subsequently changed to the Hawthorne Rod and Gun Club, with greater scope given to its recognition of sports and an important and constantly-growing adjunct is the trapshooting feature, the inception of which occurred in November, 1915, with a charter membership of 60.

Now the Western Electric Company fathers one of the largest trapshooting organizations in America. This is borne out by the fact that 107 novices turned out for the Beginners' Day shoot last year.

And while we are on the subject it might be apropos to mention the fact that trapshooting is encouraged and has a prominent place in the list of sports of the Pennsylvania Railroad Co. (at more than 30 division points), Oneida Community, National Store Specialties Co., Curtis Publishng Co., Philadelphia Electric Co., du Pont Powder Co., United Shoe Machinery Co. and other concerns of equal performance.

HOW TO START A GUN CLUB

By all means try to locate your grounds within easy reach. Be careful about transportation facilities.

Having decided upon your site, the next essential is equipment.

If you prefer to start in a small way, you will find that one or two expert traps, costing about $4.50 to $6.50 each, will afford plenty of amusement for quite a few shooters. If, on the other hand, you feel financially strong, the automatic trap is undoubtedly the best.

This trap, of which there are two varieties, is officially recognized and used in all of the big shoots or tournaments. One style is sold outright at $35. The other is rented on a basis of $30 for the first year and $10 for each succeeding year. A refund of $15 is given when the trap is returned to the manufacturer. Complete instructions for installation accompany each trap. Clay targets for use in any trap cost about $6 a thousand.

Naturally, you will need a trap house. This may be constructed of heavy planking, banked with earth, or it may be built of concrete. If you are handy with tools you can knock out a first-class trap house yourself.

Now we come to the "score" or firing line. This should be located 16 yards back of the trap house. At this mark five pegs should be placed in the ground. These pegs should be arranged in an arc, and each should be a similar distance from the trap.

Right here, perhaps, it is best to add that in laying out the "score" it will be wise to arrange it so that the shooters will face the northeast when in position to shoot. This will obviate any trouble from the sun during either morning or afternoon events.

This, in a practical way, covers all the items of lay-out and equipment. There will be other details, of course, such as clubhouse, arrangement of shoots, trophies, etc. Information on these subjects will be gladly given by the Interstate Trapshooting Association.

THE FARM

KILL GRUBS IN BACKS OF CATTLE

If the grubs which cause the lumps or swellings under the skin in the backs of cattle are allowed to remain, they will complete their growth, drop to the ground and transform to heel flies, which may reinfest the cattle during the spring and summer. The grubs weaken the cattle, cause them to fall off in flesh and milk, and decrease the value of the hide. The beef in the immediate vicinity of a grub becomes slimy and of a greenish color, and is known to the butcher as "licked beef." The damage to the hides is usually placed at one-third their value, and the loss of beef to each infested animal ranged from $4 to $6 in prewar times. The cattle are also injured in the spring by the presence of the fly which causes them to fret and stampede. The grubs injure the hides and beef from January until June.

The grubs may be pressed out through the opening at the top of the swelling. A sharp knife and a pair of tweezers will often facilitate the work of removing the grubs. Care should be taken to crush all the grubs removed, to prevent their further development and transformation into flies. It is advisable to examine the cattle for lumps or swellings over the back every two or three weeks during the late winter and early spring in order to destroy the pest. Various oils are often used, which may be either smeared over the infested regions, or applied to the mouth of the breathing hole of the grub. One or two applications are usually sufficient.

The treatment may also be given wild cattle by driving them through a chute with a man on either side of the chute equipped with an oil can filled with kerosene, mercurial ointment or turpentine. As the cattle pass through the hand is pressed over the backs of the animals and each lump or swelling is treated with the oil by inserting the slender nozzle of the can in the opening at the top of the lump.

Arsenical preparations and tobacco decoctions are often used as sprays or washes for the backs of cattle but the greasing lotions and oil sprays are usually more effective because they are more penetrating.

GOVERNMENT WILL SELL YOUR WHEAT

Farmers and shippers of wheat unable to obtain satisfactory service from country dealers or commission men may utilize the Food Administration Grain Corporation. This agency is not desirous of undertaking to sell grain or to enter the field of the dealer and offers its services as sales agent only to cure dissatisfaction and where fair treatment can not otherwise be obtained by farmers. In such cases where wheat is of carlot volume the Food Administration will find a market at a commission charge of 1 per cent.

In cases of disagreement between farmers and local buyers or between country dealers and millers as to grade, the zone agent of the Food Administration is empowered to settle differences, and will render this service when a 2 pound sample is sent him for examination.

The zone agents of the Food Administration Grain Corporation are second vice-presidents of the corporation and serve without pay. Like other officials of the corporation, they have divorced themselves from the grain business for the time of the war.

The zone agents and their headquarters follow:

Edw. M. Flesh, St. Louis, Mo.; M. H. Houser, Portland, Ore.; C. B. Fox, New Orleans, La.; H. D. Irwin, Philadelphia, Pa.; P. H. Ginder, Duluth, Minn.; Frank L. Carey, Minneapolis, Minn.; Geo. S. Jackson, Chicago, Ill.; Chas. Kennedy, Buffalo, N. Y.; R. A. Lewin, San Francisco, Cal.; D. F. Piazzek, Kansas City, Kans.; Chas. T. Neal, Omaha, Nebr.; E. F. Newing, Galveston, Tex.; Geo. S. Jackson, Baltimore, Md.

AYRSHIRES

The Ayrshire cow originated in Scotland and comes to us with all the strength of constitution acquired from generations of endurance of severe climate, and hunting her living on the moors and highlands.

In her conformation she combines all the requirements of a perfect dairy cow, handsome shape, attractive color, a tough rugged cow weighing from ten to fifteen hundred pounds. She readily adapts herself to any condition of food and climate, returning to her owner the highest yield possible for what he bestows upon her. She is not at all particular about the quality of her food but eats with a relish whatever is given her.

While she is peculiarly adapted to a rough country with scant food supply, she readily adapts herself to luxury and repays with correspondingly increased dairy returns all the extra food and care bestowed upon her.

While she is distinctly a dairy cow, her conformation of heavy hind quarters, thick loins, small bones, taken with her easy keeping quality makes her a profitable all 'round breed for both dairy and beef.

She will not fatten while in milk, but as soon as she is dried off she quickly takes on flesh and makes the best kind of beef, attractive looking, juicy and tender.

She is a profitable cow to old age, and between calvings is dried off with difficulty.

She is the poor man's cow and the mortgage lifter.

PACIFIC COAST AYRSHIRES WIN TROPHIES

The Pacific Coast is well represented in the prize list of French Cup winners in the announcement just issued by the Ayrshire Breeders' Association.

The French Cups are annually offered for the highest record made during the year in each of the seven Advanced Registry Classes.

Washington State represented by J. W. Clise, Redmond, wins two of the cups, winning the Senior Four Year Old Class with Willowmoor Happy Girl C. with a production of 16478 pounds milk, 650.40 pounds fat and the Junior Three Year Old Class with Willowmoor Lily 5th with a record of 14577 pounds milk, 663.53 pounds fat. California secures a trophy which goes to E. B. McFarland, San Mateo, on Willowmoor Vesta 4th with a record of 17753 pounds milk, 753.18 pounds fat.

MORE GOVERNMENT CONTROLLED FEEDS

By proclamation of the President, which took effect February 15th, live stock and poultry feeds are placed under the supervision of the U. S. Food Administration in addition to bran, cottonseed products and other staple commodities already so controlled. Alphabetically arranged, the feeds covered by the new regulations are:

Alfalfa, animal or fish products or by-products, baled alfalfa, baled hay, baled straw, barley, beans, broom corn, buckwheat, cane, seed, copra, corn (ear), corn (shelled), dried brewers' grains, dried distillers' grains, dried yeast grains, emmer, feterita, grain and seed screenings, hay, kaffir, lentils, linseed oil cake, linseed oil meal, malt sprouts, millet, milo, oats, palm kernel, palm nut, peanuts, peas, rice, rye, sorghum grains, soy beans, spelt, straw, sugar beets, sugar cane, sunflower seeds, tankage, velvet beans, wheat.

With specified exceptions, all persons, firms and associations importing, manufacturing, mixing, processing, storing or distributing these feeds are required to secure a license from the U. S. Food Administration and be subject to its regulations for the duration of the war. The exceptions include farmers, gardeners, co-operative associations of farmers and gardeners (including livestock farmers), common carriers, and retailers whose gross sales of food commodities do not exceed $100,000 annually.

The purpose of the control is to prevent speculating and hoarding, to stabilize prices and secure distribution through most direct channels.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Gombault's Caustic Balsam will give you immediate *Relief.* A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

PRODUCTION OF DAIRY BREEDS

In farmers' Bulletin 893 of the United States Department of Agriculture, "Breeds of Dairy Cattle," the average productions of five breeds most generally known in the United States are shown. For Ayrshires the average of the 2,598 cows that have completed yearly records for advanced registry is 9,555 pounds of milk testing 3.95 per cent of butter-fat, amounting to 377.51 pounds of fat. The ten highest milk producers of this breed range from 25,329 to 18,745 pounds of milk and the average of these ten highest producers is 21,538.8 pounds of milk. The ten highest butter-fat producers among Ayrshires range from 995.56 to 744.73 pounds, with an average, for these ten, of 855.4 pounds of butter-fat.

In the Brown Swiss breed the average of 199 cows that have completed yearly records for the register of production is 10,868.7 pounds of milk, testing 3,995 per cent, amounting to 433.45 pounds of butter-fat. The ten highest milk producers of the breed range from 19,460.6 to 16,496.7 pounds of milk with an average, for these ten, of 17,372.2 pounds. The ten highest butter-fat producers of the Brown Swiss range from 798.16 to 647.30 pounds, with an average, for these ten, of 683.72 pounds of butter-fat.

In the Guernsey breed the average of 6,200 cows that have completed a year's record for advanced registry is 8,934.44 pounds of milk, testing 4.99 per cent, amounting to 446.01 pounds of butter-fat. The ten highest producers of this breed range from 24,008 to 17,297.51 pounds of milk with an average for these ten, of 19,337.9 pounds of milk. The ten highest Guernsey butter-fat producers range from 1,098.18 to 910.67 pounds, an average, for these ten, of 976.75 pounds of butter-fat.

Among Holsteins, 3,220 cows that had completed a yearly record for advanced registry averaged 14,622.7 pounds of milk, testing 3.424 per cent butter-fat, amounting to 500.7 pounds of fat. The ten highest producers of this breed averaged from 31,246.9 to 28,826.4 pounds of milk, an average for these ten, of 29.898.34 pounds of milk. The ten highest Holstein butter-fat producers averaged from 1,205.09 to 1,017.28 pounds, an average, for these ten, of 1,090.89 pounds of butter-fat.

In the Jersey breed, the average of 5,244 cows that had completed yearly records for the register of merit was 7,792 pounds of milk, testing 5.35 per cent, making 417 pounds of butter-fat. The ten highest milk producers ranged from 19,694.8 to 16,633.2 pounds, an average, for these ten, of 17,703.4 pounds of milk. The ten highest butter-fat producers range from 999.1 to 875.2 pounds, an average, for these ten, of 943.1 pounds of butter-fat.

WHY LIVESTOCK IS SCARCE

The present shortage of meat animals offers the livestock man the greatest opportunity that has been held out to him for many years. He has a double opportunity—for patriotic service and for advancing his business. How the shortage which opened this opportunity came about is given in a lecture delivered by F. B. Mumford, dean of the University of Missouri College of Agriculture, in a recent meeting of Missouri pork producers.

"During the three years of war, the belligerent nations have found it necessary to reduce their livestock in order to sustain their armies and their civilian population," said Dean Mumford. "They have made this reduction to get meat and fat enough for their people. They had a further reason in that they needed the land which was maintaining these animals for bread grain production. They have not had land enongh and labor enough to produce food grains for their livestock. As a result the reduction in the number of livestock in European countries has reached almost staggering proportions. The cattle population has been reduced by 28,000,000 head in the allied countries and in Germany and Austria. The number of sheep has been reduced 54,000,000 head. There has been a total net decrease in livestock for the world of 115,560,000 head.

"The belligerent nations must have meat and fat. Their own supply is so depleted that they must depend upon the supplies of exporting countries. Presumably the condition which brought about the decrease in livestock during the three years of war that have passed will become more acute and the number of livestock will be decreased perhaps more rapidly as the war continues. Two facts are apparent from these statistics: The first is that no matter how long the war lasts the demand for livestock products will be greater and greater and greater. The second is that even though peace should come immediately the demand for livestock will not be changed because the supplies of all nations are depleted, and they will have just as many people to feed in peace as in war. It is possible that these same people will need more meat and fat after the war than they are now eating under enforced conservation. War or no war, therefore, there will be a world wide demand for meat production."

COTTON IN CALIFORNIA

The growing of cotton in California is not a new industry so far as Imperial Valley is concerned, but the movement commenced at Fresno and the formation of the California Central Valleys Egyptian Cotton Association has a potential import. It is believed by cotton experts that the San Joaquin and Sacramento Valleys have the lands and climatic conditions that will place cotton in the same category as rice.

An authority on crop production states that the San Joaquin Valley within the next five years will be producing $10,000,000 worth of cotton. The promoters of the industry will insist that only the long staple variety be planted, and possibly 2,000 acres in the San Joaquin Valley and 1,500 acres in the Sacramento Valley will be planted to the Yuma variety this year. Ultimately, the Pima will be the only variety grown in these valleys because of its superiority over all others, but there is no seed available this season. Incidentally 100,000 acres are being planted in Arizona to the long-staple cotton this season. The demand for this type is tremendous, the government and tire manufacturing companies being lamentably short in supply.

Long staple cotton is now averaging 70c per pound, and it is more than possible that the price will reach as high as $1.00 per pound. At present prices this variety of cotton will return to the planter upwards of $150 net per acre. It should be stated that the cotton planting this year is not in the nature of an experiment, only so far as the labor is concerned, the soil and climatic conditions having been proven.

CALIFORNIA CHEESE

While the production of butter in 1917 showed a marked decrease, there was a corresponding increase in the production of cheese, the total output for 1917 amounting to 9,236,663 lbs. as against 7,745,125 lbs. for 1916. Santa Clara leads all other counties with 1,567,305 lbs.; Monterey was second with 1,336,727 lbs. This is a reversal of places for these two counties, Monterey leading in 1916 and Santa Clara being second.

The total value of cheese output amounted to $1,827,012.

The production of condensed, evaporated and powdered milk shows an increase of over 7,000,000 lbs., while the production of casein has increased over 200 per cent.

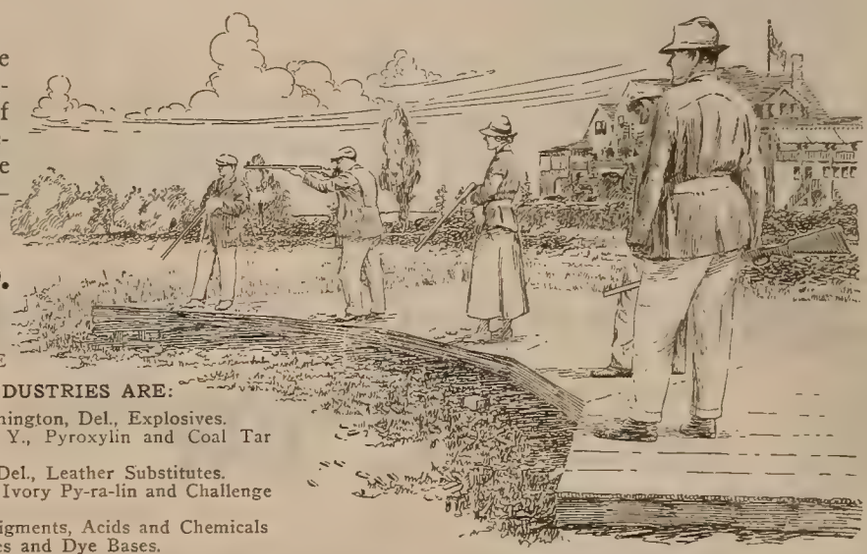
DU PONT AMERICAN INDUSTRIES

Clay Pigeons Know No Game Laws

There's no limit of season, law nor time--no long-distance time-taking trip to the shooting grounds--never any disappointment because game is scarce when there is



Trapshooting

on the sporting calendar of the club. The targets' speedy flight and elusive turns give more thrills than you usually get with your gun in the woods and hills.

Everybody,—men and women,—should learn to shoot and to hit what they shoot at. The gun club is the place to learn trapshooting,—the patriotic, distinctly American sport,—a recreation which provides instruction and also protection.

Find Out How---Now!

Our free booklet describes the lure of the flying clay pigeons and contains illustrations and descriptions of famous trapshooting events and celebrities of the sport. Ask for name of nearest gun club and booklet,—The Sport Alluring.

1st and 2nd AMATEUR TRAPSHOOTING AVERAGES for 1917 were won with

Peters Shells

The known superiority of the (P) brand is a factor that trap and field shooters are quick to take advantage of. Sportsmen of all classes and in every section of the country have been made strong advocates of **Peters** Shells because of their exclusive and superior features. In the 1917 trap-shooting averages, two representative shooters captured first and second honors, and both depended upon the (P) brand in achieving this success.

1st. W. H. Heer, Guthrie, Okla., shot at 2050, broke 1997. Average, .9741.
2d. Woolfolk Henderson, Lexington, Ky., shot at 2570, broke 2502. Average, .9735.

SIX TIMES IN THE PAST 8 YEARS THE HIGHEST AMATEUR HONORS HAVE BEEN WON WITH THE (P) BRAND.

In the 1917 official professional averages, Mr. L. H. Reid, of Seattle, Wash., shooting **Peters** Shells has an average of .9722, winning second place and High General Average for the Pacific Coast.

Remember the old saying "the Best is the Cheapest in the end" and insist on having PETERS.

ENTRIES CLOSE FRIDAY, MARCH 15, 1918

CONDITIONS

By subscription of $15.00 each, foals of 1917, to be paid in cash at time of entry, March 15, 1918. Colts and geldings, 122 lbs. Fillies, 119 lbs. The Latonia Jockey Club to add in cash $15,000.00; divided as follows:

DIVISION OF STAKE

To the Winning Owner (estimated)	$42,000.00
To Owner of Second Horse	3,000.00
To Owner of Third Horse	2,000.00
To Owner of Fourth Horse	1,000.00
To Original Nominator of the Winner	1,000.00
To Original Nominator of the Second Horse	500.00
To Original Nominator of the Third Horse	300.00
To Original Nominator of the Fourth Horse	200.00
Total Estimated Value of Stake	$50,000.00

DECLARATIONS AND PAYMENTS

Cash Entry Fee March 15, 1918 ..... $15.00 each
(No further liability if declared on or before January 1, 1919)

TO REMAIN ELIGIBLE THE FOLLOWING PAYMENTS MUST BE MADE:

Cash Payment due January 1, 1919	$ 25.00 each
Cash Payment due January 1, 1920	$ 50.00 each
Starting Fee, additional	$500.00 each

Providing proper transfer of the engagement has been filed with and accepted by the Latonia Jockey Club, the original Subscriber or nominator will be released from further liability from date of acceptance.

STAKE EVENTS to be Run at SPRING MEETING in May, 1918

ENTRIES CLOSE FRIDAY, MARCH 15, 1918

THE KENTUCKY HANDICAP.—$10,000 ADDED.
For Three-Year-Olds and Upwards.

For Three-Year-Olds and Upward. By subscription of $50 each; $250 additional to start; $10,000 added, of which $1,500 to second, $800 to third., $400 to fourth. Weights six days before the race. Winners of $1,500 after publication of weights, 5 lbs. extra. Acceptances through the entry box the day before the race at the usual time of closing. **One Mile and a Quarter.**

THE MEMORIAL HANDICAP.—$2,000 ADDED.
For Three-Year-Olds and Upwards.

For Three-Year-Olds and Upward. By subscription of $15 each; $50 additional to start; $2,000 added, of which $400 to second, $200 to third, fourth to save its stake. Weights three days before the race. Winners after publication of weights, 5 lbs. extra. Acceptances through the entry box the day before the race at the usual time of closing. **Six Furlongs.**

THE SPRING TRIAL STAKES.—$2,500 ADDED.
For Two-Year-Olds

For Two-Year-Olds. By subscription of $15 each: $85 additional to start; $2,500 added, of which $500 to second, $300 to third, fourth to save its stake. Winners of $1,000, 3 lbs.; $1,000 twice, or $2,000, or three sweepstakes of any value, 6 lbs. extra. Non-winners of a sweepstakes allowed 4 lbs. if non-winners of three races, 7 lbs.; maidens never placed in a sweepstakes, 10 lbs. Starters to be named through entry box the day before the race at the usual time of closing. **Five Furlongs.**

THE SPECULATION STAKES. SELLING.—$1,500 ADDED.
For Three-Year-Olds and Upwards.

For Three-Year-Olds and Upward. By subscription of $10 each; $50 additional to start; $1,500 added, of which $350 to second, $150 to third, fourth to save its stake. The winner to be sold by auction; $3,000, 3 lbs. above scale; 1 lb. for each $200 to $1,600; 1 lb. for each $100 to $1,000; 2 lbs. for each $100 to $600. Starters with selling price to be named through the entry box the day before the race at usual time of closing, and all so named to be liable for the starting fee. **One Mile and a Sixteenth.**

DATES CLAIMED

THE GRAND CIRCUIT

North Randall, Ohio, July 8-12.
Kalamazoo, Michigan, July 15-19.
Toledo, Ohio, July 22-26.
Columbus, Ohio, July 28-August 1.
North Randall, Ohio, August 5-9.
Philadelphia, Pennsylvania, August 12-16.
Poughkeepsie, New York, August 19-23.
Readville, Massachusetts, August 26-30.
Hartford, Connecticut, September 2-6.
Syracuse, New York, September 9-14.
Columbus, Ohio, September 16-28.
Lexington, Kentucky, September 30-October 10.
Atlanta, Georgia, October 14-18.

PACIFIC COAST CIRCUIT

Ferndale—Aug. 19 to 24.
Sacramento State Fair—Aug. 31 to Sept. 7.
Riverside—Oct. 7 to 12.

Races will be held in the Pacific Northwest this year as usual and contrary to the belief in some quarters, the indications are that there will be more interest in races than in the past.

The principal change in the circuit is the adding of Boise, Idaho. Business conditions are better than ever in past history up in South Idaho, and there is every reason to believe that a good race meet such as would be put on through the association will be well patronized.

The dates and places of holding races under the auspices of the association are as follows:

Vancouver Exhibition, Vancouver, B. C.—August 19 to 24.

Southwest Washington Fair, Centralia-Chehalis—August 26 to 30.

Grays Harbor County Fair, Elma, Wash.—September 2 to 7.

Spokane Interstate Fair, Spokane, Wash.—September 9 to 14.

Washington State Fair, Yakima—September 16 to 21.

Oregon State Fair, Salem, Ore.—September 23 to 28.

Idaho State Fair, Boise, Idaho—September 30 -October 5.

Provincial Exhibition, New Westminster, B. C. —September 30-October 5.

A minimum of eight harness races will be given by members and in the following classes:

Trotting—Free-for-all, 2:14, 2:19, 2:24. Pacing —Free-for-all, 2:14, 2:19, 2:24.

Entries close July 15. Five per cent to enter and 5 per cent from money winners. Conditions as to number of heats to be left to each member.

American Trotting Association rules will govern.

When two or more horses enter from one stable an additional 1 per cent entry shall be charged.

This is the very last opportunity owners of yearlings (foals of 1917) will have to enter them in Pacific Breeders' Futurity Stake No. 17, for foals of that year. The time for making substitutions in this stake expires on April 1st next, and unless application is made before that date, the foals cannot be entered at any later time. Anyone having a yearling that is not staked would do well to write to Secretary F. W. Kelley at once, and the nominations he has on hand for sale will be awarded in the order in which applications are received. The amount due on substitutions, including the payment of April 1st, is $17, and the payments made by the original nominator are returned to him.

WE PRINT on another page the announcement of the programme of the nine stakes, carrying an added valuation of $27,500 to be run at the coming spring meeting of the Latonia Jockey Club. The Latonia Derby at one mile and a half, with $10,000 added money, heads the list.

The Cincinnati Trophy, with $4,000 added, is the richest of the two -year-olds stakes for the Spring Meeting. Entries to these stakes close on March 15. Conditions are also published for the Queen City Handicap for two-year-olds at a mile to be run during the fall meeting of this year.

It will be noticed in some of the stakes that the conditions read: "Weights six days before the race, instead of three days before the race, as heretofore." Mr. Hachmeister explains these conditions by saying that it will give any one who owns a horse at a distance from the track plenty of time to digest the weights, and then if he sees that he has been liberally treated by the handicapper, he can ship his horse and take his time about doing so. It is believed that these conditions will become quite popular, especially with the Eastern owners.

SECRETARY HACHMEISTER of the Latonia Jockey Club has published the conditions for the second renewal of the Latonia Championship Stakes for foals of 1917 to be run in 1920, and in connection therewith urges us to say a word to horsemen that will induce them to lend liberal support to what promises to be the biggest stake in the world. It would hardly seem possible for us to make an appeal that would be more eloquent than the conditions of the stake itself which has been advertised extensively in England, France and Ireland, as well as in this country. Last year 471 entries were received for 1919, and Mr. Hachmeister expects to receive the entries of one thousand foals of 1917 for the running of the 1920 stakes.

At the suggestion of some of the breeders some slight changes have been made in the Latonia Championship event. Heretofore it has been necessary for an owner to declare his horse out or stand for the payments. In 1920 he makes the original payment, and then, if constrained to do so, he makes the other payments. In other words, he is automatically out unless he declares himself in. This stake is estimated to be worth $50,000, divided as follows:

To the winning owner	$42,000
To owner of second horse	3,000
To owner of third horse	2,000
To owner of fourth horse	1,000
To original nominator of the winner	1,000
To original nominator of the second horse	500
To original nominator of third horse	300
To original nominator of the fourth horse	200
	$50,000

With this large valuation and the easy conditions prevailing, it is conclusive as anything can be that if the breeders and owners do not patronize this event liberally they are singularly negligent of their own interests.

THE STAKES to be run at the Douglas Park spring meeting in 1918 are the Kentucky Handicap for three-year-olds and upward at one mile and a quarter with $10,000 added; the Memorial Handicap for three-year-olds and upward at six furlongs, with $2,000 added; the Spring Trial Stakes for two-year-olds, at five furlongs, with $2500 added, and the Speculation Stakes, with selling conditions, carries an added value of $1500 and is for three-year-olds and upward at one and one-sixteenth miles.

The entries for these stakes will close on Friday, March 15, 1918, full conditions for which appear in announcement in this issue.

Manager Hachmeister will endeavor to increase the value of overnight events to a considerable amount over that of previous years, and will work with his accustomed zeal to assist in the collection of the $300,000 to be donated to the Red Cross by racing people in Kentucky this year.

"In our stakes to be run at the spring meetings we did not put in a clause giving 10 per cent or the winner's share to the Red Cross," remarked Mr. Hachmeister. "I did not understand it that way. When we met in Lexington it was distinctly stated that the Red Cross contribution of $300,000 to be raised by the Kentucky horsemen was to be a voluntary offering. For that reason we did not see fit to insert the 10 per cent clause in our stake conditions. If the horsemen's association believes, or rather decrees, that 10 per cent of all stake earnings shall go to this fund, it will be up to the horsemen to give that amount, but at present we have no authority to hold out or deduct 10 per cent."

THE CONDITIONS for the Stanford-Occident Stake No. 4 are published in the advertising columns of this issue of the Breeder and Sportsman. This Stake is offered for the foals of mares covered in 1917 and is to be decided at the meeting of the California State Agricultural Society in 1921. The guaranteed value is $3,000, of which $1,800 is allotted for trotting foals and $1,200 for the pacers. Entries close April 1, 1918.

THE NEW A. T. A. SECRETARY

Previous to the biennial congress of the American Trotting Association, in Chicago, last Tuesday, 19th inst., it was pretty well understood that practically all candidates for the duel position of Secretary-Treasurer of the organization, left vacant by the death of William H. Knight, last December, had been eliminated with one exception, and that this exception, Mr. W. H. Smollinger, was certain of election. The bestowal of the position upon him by the board of directors, in their session immediately following the congress was, therefore, a surprise to few people who had closely followed the trend of affairs.

In the opinion of the Review, Mr. Smollinger is the ablest man to fill such a position that has yet been called to it, in either of the parent bodies, and we think this will be the general verdict among those competent to judge. His credentials surpass those of any and all of his predecessors in the A. T. A., and they compare similarly with those men, past and present, who have been identified with the N. T. A.

Mr. Smollinger is in his sixtieth year, is a man of splendid health and vigor, and has behind him a distinguished record of achievement as a horseman, executive and business man. He was born in Milwaukee, Wis., in 1858, his parents removing to Aurora, Ill., when he was five years of age, and this State has been that of his residence for most of the subsequent period. About ten years ago, however, he removed to Iron Mountain, Mo., where he resided until last season, when he again became an Illinoisan, making his home at Hillsdale, where he has large farming interests. For more than twenty years past Mr. Smollinger has been active in trotting affairs. He began first as a breeder in a small way, then became identified with racing as the secretary at Galesburg, Ill., his success in this position being such that he was soon made secretary of the Great Western Circuit, a post which he still occupies, and has for many years discharged with most satisfactory results, to the organization itself, its campaigning patrons and the public. It should be noted in this connection that, as long as he was at the helm at Galesburg, the success there was unvarying, and it was only after his removal to Missouri had led to his giving up the management that Galesburg's fortunes waned in the dismal manner in which they have.

Owing to his success in these fields and as a breeder, when the death of Hon. Norman J. Coleman of Missouri, left a vacancy on the board of appeals of the A. T. A., in 1911, Mr. Smollinger was elected to replace him and was also made one of the directors of the organization. From the moment of his debut as a member of these bodies he made his presence felt, both in an individual and a general way. It was owing to this excellent work that his selection to succeed Mr. Knight was decided upon. Two years ago he would hardly have been available, but, owing to his sale of Iron Mountain Farm, his extensive Missouri establishment, and return to Illinois, he was in a position which enabled him to arrange his affairs so as to assume new duties.

There is no branch of a horseman's activities in which Mr. Smollinger has not had extended experience, if we make the one exception of those of a reinsman. As a breeder he has a long list of good performers to his credit, headed by that splendid mare Belford Bell 2:06½, and including also George Muscovite 2:08¼. He is perhaps best known to race-goers as the owner of Angiola 2:06, who, in 1907, won the historic Charter Oak, also the Ohio stake, and was the largest money-winning trotter of the season. Another noted trotter raced with great success in his colors was Lulu Lumine 2:06¼, sold by him later for a high price to enter T. W. Murphy's stable. His principal stallion has been Echo Bell 2:21¼, son of Allerton 2:09¼, and Palo Alto Belle, 3, 2:22½, by Electioneer, and the sire of Belford Bell 2:06½, and sixteen others, almost all bred by himself. He has for a number of years been one of the board of directors of the American Trotting Register Association.

We know of no other man who has ever served as secretary—which means virtually the directing manager—of either of the parent organizations, who has entered upon his duties so well equipped through activity as breeder, owner, track manager, circuit secretary and association official; while in addition he is a man of thorough business training, has been accustomed to handling large affairs, has shown himself able to meet and mix with all kinds of people, and handle all kinds of circumstances that arise in the turf world. He has a high reputation for probity and intelligence, and combines with it clearness of perception, and forcefulness in thought and action.

In forecasting the future incumbent of the A. T. A. secretaryship, some weeks ago, we stated that the position, at this critical time demanded both a strong man, and a good one. Mr. Smollinger is both, and from the standpoint of the Review, we do not well see how his appointment could have been bettered by the A. T. A. Under his guidance we look for it to gain in strength and usefulness, for not the least of his qualifications is the fact that he is an able and earnest man, thoroughly devoted to the entire light harness industry, and anxious to do everything possible to promote its welfare.—Horse Review.

Thoroughbred Matters

JOCKEY CLUB STEWARDS ALLOT RACING DATES

Eastern Racing Dates for 1918

Southern Md. Agricutural Association, Bowie, Md., Monday, April 1st to Monday, April 15th.

Harford Agricultural and Breeders' Association, Havre de Grace, Md., Tuesday, April 16th, to Tuesday, April 30th.

Maryland Jockey Club, Pimlico, Md., Wednesday, May 1st, to Friday, May 17th.

Metropolitan Jockey Club, Jamaica, L. I., New York, Thursday, May 16th, to Saturday, May 25th.

Westchester Racing Association, Belmont Park, Queens, L. I., New York, Monday, May 27th, to Saturday, June 15th.

Metropolitan Jockey Club, Jamaica, L. I., New York, Monday, June 17th, to Saturday, June 22d.

Queens County Jockey Club, Aqueduct, L. I., New York, Monday, June 24th, to Friday, July 12th.

Empire City Racing Association, Yonkers, N. Y., Saturday, July 13th, to Wednesday, July 31st.

Saratoga Association, Saratoga Springs, N. Y., Thursday, August 1st, to Saturday, August 31st.

Westchester Racing Association, Belmont Park, Queens, L. I., New York, Monday, September 2d, to Saturday, September 14th.

The racing season in the East will open, as in former years on April 1st at the Bowie racetrack. In New York the opening will be two days earlier than last year, or on May 16th instead of on May 18th, as in 1917. And those who have been awaiting the meeting of the stewards of the Jockey Club to ratify the dates may now be glad to know that racing will be continuous, six days each week throughout the season.

The memorandum of dates given at the head of this column will show just what days the sport will be conducted on the various racecourses of New York and Maryland. There are few changes to be noted from those allotted last season. However, the allotment this season means that the opening at Jamaica on May 16th will conflict for two days with the end of the meeting at Pimlico, which opens on Wednesday, May 1st, and ends on Friday, May 17th.

Also there is something else new, inasmuch as Saratoga will have twenty-seven days of racing during the month of August, whereas this track never has raced for more than twenty-six days heretofore. The dates alloted for Saratoga are from Thursday, August 1st, to and including Saturday, August 31st, with an immediate opening for the fall meeting at Belmont Park on Monday, September 2d, which will be Labor Day. So far as allotted at yesterday's meeting the dates will wind up on Saturday, September 14th, at this track.

Nothing was done about fall dates for Aqueduct, where the sport was continued last fall until the last of September. However, these extra dates for Aqueduct were not announced until after a meeting of the stewards of the Jockey Club held at Saratoga in August, and it is still possible that extra dates may be allotted to this track, the same as last year, when it was given an extra meeting for the fall, over that of the previous year.

The Metropolitan Jockey Club will have ten days of racing at Jamaica, after which there will be twenty days of continuous sport, barring Sundays, at Belmont Park, winding up on Saturday, June 15th.

After the close of the spring meeting at Belmont Park there wil be a return to Jamaica for one week or the six days from Monday, June 17th, to Saturday, June 22d. The Queens County Jockey Club comes in for a meeting of eighteen days from and including Monday, June 24th, to Friday, July 12th.

James Butler will have three Saturdays at his Empire City track, for the meeting at Yonkers is scheduled to open there on Saturday, July 13th, running sixteen days, and closing on Wednesday, July 31st. The Saratoga meeting is to open on Thursday, and will close on a Saturday, giving five Saturday half holidays to the big meeting at the Spa.

Of course it is possible that there may be no fall racing in New York after the closing at Belmont Park on September 14th, at which time Havre de Grace probably will open the fall season in Maryland, but there is still the chance that the New York dates may be extended as was done last year after the popular demand for the sport through the fall months became known.

Those present at the meeting of the stewards yesterday were Major August Belmont, chairman; Frank K. Sturgis, vice-chairman; Andrew Miller and H. K. Knapp, making four of the board of seven stewards present. The only other business of public importance transacted at the meeting was the ratification of the list of officers announced for the various spring meetings in Maryland.

MARYLAND GOSSIP

The Havre de Grace session this spring will, as in the past, follow the Southern Maryland Agricultural Association's meeting of fifteen days, beginning April 1st, which will usher in the Eastern racing season at Prince Georges Park, Bowie. The horses will be at Harve de Grace fourteen or fifteen days. The Jockey Club of New York, under whose auspices Maryland racing is conducted has not yet announced the Eastern date schedule for 1918.

Indications point to a brilliant session of sport at Havre de Grace, which is situated midway between Baltimore and Philadelphia and within an hour's ride by motor car of Wilmington, Del., on the main line of the Baltimore & Ohio and Pennsylvania railroads. There are in Maryland and the District of Columbia already upward of 500 thoroughbreds. Most of them are at Benning, Bowie, and Gentlemen's Driving Park and Pimlico. But the strong stable of J. K. L. Ross of Montreal, which represents an investment of upward of $250,000, is at Laurel. The establishments of Thomas Clyde, Samuel D. Riddle and Mrs. Walter W. Jeffords of Philadelphia are in private quarters on the Eastern shore of Maryland, and the establishments of Alfred Hennen Morris of New York and Robert J. Walden of Maryland are at Bowling Brook Farm near Middleburg.

Among the stables at Benning are those which belong to Edward B. McLean, Samuel Ross, Wilfred Viau, John Lumsden, Richard F. Carman, Joseph E. Davis, Captain Ral Parr, Captain Joseph E. Davis, Captain Charles K. Rockwell, J. S. Tyree, William Garth, W. L. Maupin, Harry Payne Whitney and one or two other well known Eastern horsemen. James McClelland, Kimball Patterson, J. E. Owenby, Grant Hugh Browne and several others are at Bowie, and H. R. A. West, Edward McBride, William Jennings, Jule Garson and three or four others are at Pimlico and the Gentlemen's Driving Park.

In addition to furnishing racing folk of Philadelphia, Wilmington and Baltimore with a fine article of three-year-old racing, Havre de Grace will attract this year the best horses of the matured division and many first-rate steeplechasers. For there is no better race course anywhere for spring racing, and both matured flat racers and steeplechasers will be readied up here for the $5000 Pimlico Spring Handicap, the Green Spring Valley Steeplechase, another event of $5,000 this season, and the first-class races for horses of various ages and classes that will be decided on New York tracks later on.

Among the famous thoroughbreds now in Maryland and in the District of Columbia that will move over to Havre de Grace as soon as winter breaks are the four-year-olds Westy Hogan, Omar Khayyam and Cudgel, all three of which will try this year for the Pimlico Autumn Handicap. The Harford, Susquehanna and Philadelphia Handicaps probably will attract all these horses, also many of the smartest campaigners of the stables of August Belmont, Joseph E. Widener, Richard T. Wilson, George D. Widener, Willis Sharp Kilmer, Hal K. Knapp, James Butler, George W. Loft, John Sanford, Gifford A. Cochran, A. K. Macomber, Morton L. Schwartz, Charles Schwartz, E. R. Bradley, H. C. Applegate, Major E. B. Cassatt, F. Ambrose Clark, W R. Coe, Emil Herz, C. E. Clement, F. D. Weir, Edward F. Whitney, R. H. McCarter Potter, A. A.Reilly, John H. Rosseter, Samuel C. Hildreth and David J. Leary.

Albany, N. Y., February 18.—The annual report of the New York State Racing Commission for 1917 will show a remarkably prosperous condition of the turf for war times. In a statement by W. L. Powers to W. C. Percy, secretary of the commission, it is shown that the average price realized for yearling thoroughbreds at auction compared favorably with any season since 1900. For 209 sold by the Powers-Hunter Company in New York and Saratoga the breeders received $238,500, or an average of $1141. The highest price was $10,000 for a colt by Vulcan, out of Rose Tree II., the dam of Roamer

In its two meetings of 1917 the Latonia Jockey Club gave owners $337,165, $54,110 more than it did in 1916 and thereby became the leader among our racing organizations in gross total of money distributed. The Saratoga Association was second in this respect ($263,535) followed in order by the Westchester Racing Association ($240,603), Cuba-American Jockey Club ($238,910), Maryland State Fair ($211,240) and Queens County Jockey Club ($211,105).

M. A. Silvers has shipped the three thoroughbreds recently purchased from Major August Belmont to Lima, Peru. The horses are Pecksniff, Money Lender and Lady Lusty who are consigned to Fred Wakeham. They were purchased for both racing and breeding purposes.

Mr. Silvers also expects to shop during the early part of March, the horse, Torchbearer, recently purchased from Phil Chinn, to another turf breeder in Peru.

SARATOGA RAISES ITS STAKE VALUE

That the directors of the Saratoga Racing Association have every reason to expect a banner meeting for the mid-summer season is proved by the increase of value made in the stakes to be run at that time.

Secretary A. McL. Earlocker yesterday gave out a list of stake events, entries for which are to close on April 1st, and an added value is shown in practically every instance. Not only this, but there will be at least one new feature for the thoroughbreds to shoot for. This stake, which is new this season, is the Schuylerville, with a guaranteed value of $3000 for two-year-old fillies over the five and a half furlong route.

Aside from ten events for the jumpers, there are twenty stakes awaiting entries, most of which are for horses, three years old and upward. These include the Saratoga Handicap, which this year will have a guaranteed value of $7000, or $1000 more than last year. The distance of this race, which is for three-year-olds and upward, will be a mile and a half this year instead of the mile and a quarter of last August.

The value of the Saratoga Cup, at a mile and three-quarters, remains the same as last year, however, with $3000 added. The Champlain Handicap, at a mile and a furlong, has been raised from $3000 guaranteed to $3500, as has the Merchants' and Citizens' Handicap, at a mile and three-sixteenths, and the Delaware Handicap, at a mile.

The stakes for the two-year-olds, which closed earlier in the year, all showed an increase, and there is also an increase for all the two-year-old events for this later closing date.

WINNING OWNERS AT NEW ORLEANS

The fourth annual meeting of the Business Men's Racing Association, which began January 1st and came to a close February 12th, embraced thirty-seven racing days, during which time two hundred and fifty-two races were decided and $183,790 distributed in stakes and purses. This compares favorably with the $188,410 distributed last year during forty-two days of racing. The meeting was a success in every particular, although financially it did not reach the record of last year due in a great measure to the most unreasonable weather experienced in years and the fact that there was no Mardi Gras this year to attract thousands of visitors. The racing itself was high-class despite the changeable track conditions. There were more horses available for racing this winter than ever before, with the result that the limit number of starters faced the barrier in nearly every race. In many instances the number of entries to a race ran into the hundreds.

Clarence Buxton was the most successful of the owners participating in the meeting, his stable earnings amounting to $7705. J. F. Sweeney is second on the list with $6164 to his credit.

A large part of the biennial report of the Kentucky State Racing Commission to the Kentucky Legislature is devoted to the work accomplished by the breeding bureau established by that body. This bureau has done a great work with limited means and limited support. With the proper kind of support, not only from the Racing Commission, but from the breeders, it should be and is one of the strongest arguments for a continuation of racing as at present conducted in the State. Some time ago the commission adopted a resolution setting aside $5000, which was assessed against the race tracks, for the operation and maintenance of the bureau. This sum could hardly go very far, but those in charge of the bureau have had some really excellent results for this small sum. Not only should the Racing Commission appropriate more money, but the breeders themselves are the ones most benefited and they should take a hand in this work. The offspring of thoroughbred stallions and cold-blooded mares makes the best army horse in the world, and if the operation of this bureau will tend to prepare this country and produce only a small percentage of the horses required in war times it has performed a national service. Prof. Hooper, head of the Department of Animal Husbandry in the Kentucky University, is the head of the Breeding Bureau and the work thus far accomplished reflects great credit on him and his assistants.

George H. Strate, manager of J. H. Rosseter's Wikiup Rancho at Burke, Cal., reports the first foal of the year at their place, a chestnut colt by General Moberts out of Mauretania by Cunard out of Tower of Candles, and therefore own sister to the good race mare Bayberry Candle. Mauretania will be bred to Disguise. Strate writes that Disguise shipped in fine shape in record time, and is doing well in his new home and that Mr. Rosseter is much pleased with him.

Jockey Lucien Lyne, who has renewed his contract to ride a second year for King Alfonso of Spain, obtained his passports a few days ago in New York and has come back home to spend a few days with his family until the sailing of the ship on which he expects to make the trip to Spain.

HORSE-TRAINING IN ELIZABETH'S TIME

As long ago as 1599 Gervais Markham published a volume on "The Secrets and Art of Training and Dieting the Horse for a Course, Commonly Called Running Horses." Markham flourished in the days of Queen Elizabeth, and, besides books relating to horses and horsemanship, he left behind a record of many remarkable experiences, among them a trial by the Star Chamber for libelling Lord Darcy, after a quarrel in the hunting field, which culminated in a fine of 500 pounds and committal to prison.

As a soldier he served with distinction during the reign of James I. The first principle laid down by Markham with regard to race horses was to breed from the Arab stallion, which he described as of reasonable stature, neither too high nor too low, small, lean head, eyes like fire; ears sharp, small but somewhat long; crest high, thin and firm; short, strong back; long, upright buttocks; small, clean legs; slender and round of body; in short, peerless, possessing all the purity and virtue of other horses plus wonderful hardihood of constitution and indomitable pluck. He regarded the period between mid-March and mid-May "when the moon had newly changed," as the best time for mating mares.

Of the training of the horse "whose shape, countenance, and demeanor promised assurance of great swiftness," the first necessity was to see that being "fair and fat" when first taken up, he should for the "space of three weeks or a month be fed on wheat straw and oats." After that hay was substituted for straw, and bread was provided composed of a strike of beans, two pecks of wheat, one peck of rye, ground together, sifted and kneaded with water and bran, baked thoroughly in loaves of a peck each, and not to be used for food until they were at least a day old." This feed appears to have continued until the day prior to the race, when the regimen was cut down to a very light supper, so that the horse might "be passing empty" in the morning. On the eventful day he was taken out for an hour or two before being well rubbed down, his legs were thoroughly annointed with either neat's-foot, treane, sheep's foot, or linseed oil, and for food he had "a penny loaf, cut into slices, toasted, steeped in Muscadine, and placed between hot cloths and thoroughly dried again before the fire." Failing this diet, a peck of fine, well dried oatmeal will serve equally well, being light and easily digested, though not, perhaps, so palatable. After being fed his muzzle was to be put on and "a great store of littler provided, his surcingle was to be unloosed, so that his clothes may hang about him and allow him to rest until he was led forth to run his wager, not suffering any man to come within his stable for fear of disquieting him." Finally, before leading him out, Markham's advice was to "gird on his clothes handsomely, bridle him up, and then take your mouth full of strong vinegar and spurt it into his nostrils, whereof it will search and open his pipes, making them apt for the receipt of wind. This done, lead him to the race, uncloth him, repeat the vinegar process, and bequeath him and yourself to God and good fortune."

THE KING'S PLATE ON VICTORIA DAY

Ontario Jockey Club Gives $3,000 for Race Without Betting

Though racing in general has been suspended in Canada since July last, there will be no break in the continuous running of the King's Plate, the oldest fixture on the American continent. That was decided Tuesday last when the Ontario Jockey Club directors granted the use of Woodbine to the Toronto Hunt for an open-air horse show on May 24 and 25 and to permit the running of the King's Plate. The purse of $3000 in added money and the fifty guineas donated by His Majesty will be given by the Ontario Jockey Club which will receive no revenue of any kind in return for the disbursement.

No other races than the Plate will be allowed at the show, nor will betting be in any way sanctioned or permitted on the premises.

The number of Province-bred two-year-olds in training last season before the suspension of racing gives practical assurance that there will be a good field for the Guineas. On account of the absence of opportunity at home a number of youngsters were taken across the border last autumn and would thus be disqualified had not provision been made that all such would retain their eligibility if registered with the Ontario Jockey Club for export under this condition of affairs.

John H. Morris, Bosque Bonita Farm, received on February 16, a letter from Kenneth Alexander, dated January 19, and written from Milan, Italy, where he is in the Ambulance Service, stating that he would shortly be granted a furlough and hoped to be able to get home in April. In any event, unless something untoward happens, young Alexander will reach home in time to see his great Broomstick colt Escoba, go to the post in the Kentucky Derby, and to have him returned the winner would be a pretty "nice welcome home."

Philip J. Otis, a jockey who was famous in the earlier days of racing at Emeryville before the fire and was known as well on Eastern tracks, died lately in a Redwood City sanatorium, and was buried at Cypress Lawn with services in San Francisco. Otis was 37 years old and, after retiring from the tracks, engaged in amusement enterprises, and was the local manager for the Remick company, a song concern. Otis rode on Eastern tracks in the early part of 1900, capturing the Crescent City Stakes, New Orleans, in 1901; Latonia Derby on Harry New in 1902, and the Excelsior Handicap, Sheepshead Bay, on Judge Himes, 1903. He is survived by a mother and brother, who reside in New York City.

The Nevada Stock Farm has sold to Tryon and Mallory of Reno, Nev., the five-year-old horse Bengali, by Cedarstrome—Malespina, and the four-year-old Mallomat by Cedarstrome—Malespina and the 4-year-old Mallomat by Cedarstrome—Kitisas. Dr. Geo. Bamburger also bought from Nevada Stock Farm two two-year-olds by Cedarstrome, from Lady Souffle and Irish Daisy.

O. A. Bianchi, familiarly known to racing folk as "Daggey Smith," has been to his home in California for a winter visit, and is back in Kentucky to get his horses in shape for 1918 racing. He has nine in his string at Churchill Downs. Five are two-year-olds and three of the five are by his good stallion Jim Gaffney. The youngsters have all been named, as follows:

E. J. Lynch, ch c, 2, by Jim Gaffney—Pepita, by Hanover.

Sennings Park, ch c, 2, by Jim Gaffney—Irish Queen, by Bearcatcher.

Lady Rachel, b f, 2, by Jim Gaffney—Viola B. (dam of Emerson Cochran and Lucky B.), by St. Avonicus.

Olive Merle, b f, 2, by Plaudit—Top All, by Top Gallant.

Lady Order, b f, 2, by Order—Madame Junot, by De Beauvoir.

The only three-year-old in the party is Lucky B. The other three are Redland, Jack Snipe and Executor. They have all wintered well and are ready for the preparation they are to get.

When he shipped his mares to Kentucky from California Bianchi left with his friend, Roy S. Avery, of San Francisco, a half-sister to Viola B., which he says has developed into a fine, big mare. She is Las Flores, now nine years old, by Bearcatcher out of Resignation II. She is in foal to Joe Carey and is to be mated this year to Disguise, which was bought by John H. Rosseter, of San Francisco, at the Wickliffe Stud dispersal here January 15, and shipped out to Rosseter's Wikiup Rancho at Burke, in Sonoma county, California.

"Mr. Rosseter is erecting a very handsome training barn at his place," said Bianchi. "I have never seen anything quite soo pretentious as it is. He has a wonderful farm, and when he gets it properly stocked it is going to be one of the show places of the coast."

J. H. Rosseter has purchased the mare Katherine G., from Tobe Ramsey. The mare, although only an ordinary racing tool, is prize bred and a most beautiful animal. She is a full sister to Westy Hogan, being by Dick Finnell—Carrie Jones. Katherine G. will be bred to Mr. Geo. Wingfield's imported Atheling.

New York, February 21.—A. K. Macomber has nominated eleven of the yearlings by Uncle, which he purchased from Headley & Miller as weanlings last fall for the Futurity of 1919. Uncle is the sire of each, the dams being Xarco, Star Dreamer, Planutess, Nigella, Qualify, St. Ursula, Continental, Dike, Last Cherry, La Pucelle and Winifred A. Mr. Macomber has a great fancy for the progeny of Uncle, having raced several last year by that good sire, including Motor Cop, Tracksend and War Machine.

Willis Sharpe Kilmer, owner of Sun Briar and many other good horses, is a candidate for Congress from his up-State district of New York.

Pat Dunne has decided to return to the turf this season with a small but select stable, mostly two-year-olds. Mr. Dunne, who is a first-class horseman, will be most welcome to the ranks, as he is very popular with all classes.

Egan Bros. of Petaluma have sold their good three-year-old colt High Cost to Emil Herz of New York for a price said to be $10,000. High Cost was raced very successfully as a two-year-old last year, winning nine out of eleven races in which he started. He was sired by Mr. Edw. Cebrian's horse Von Tromp, out of Mitten, by King Eric. Mitten is also the dam of Coppertown, Paystreak and Envy, the good filly lately purchased by Mr. Geo. Wingfield for his Nevada Stock Farm.

THE MADDEN TWO-YEAR-OLD

Louisville, February 28.—John E. Madden today gave out for publication the names he has claimed for the big band of two-year-olds that are being trained at Churchill Downs, and which will shortly be transferred to Belmont Park for the opening of the metropolitan season of racing. In bestowing these names, Mr. Madden has not followed any set rule. He has, however, succeeded in selecting some appropriate nomenclature. He had been guided in most instances, not by fancy, but by a desire to give some indication of pedigree.

A few instances of Mr. Madden's appropriate selections are seen in such names as Whistle It, which is out of Love Note; Who's Who, out of Masquerade; Vesper Hour, whose dam is Sanctuary; Stickler, out of Plaster; Venetian Boy, dam Miss Canale, and Fitness, out of Parisian.

The highly prized chestnut colt, by Star Shoot—Lady Sterling, has been named Sir Barton and is regarded as one of the very best of this year's juveniles. Lady Sterling is considered one of the best producing mares of Hamburg Place, being the dam of Sir Martin, the best horse ever sired by Ogden and winner in this country of $78,560. Who's Who is another highly regarded youngster. He is by Ormondale out of Masquerade, the latter a sister to Maskette, a Futurity winner and considered the best filly of her time.

Following are the names and breeding of what Mr. Madden regards as his choicest two-year-olds:

Who's Who, b c, by Ormondale—Masquerade.
Sir Barton, ch c, by Star Shoot—Lady Sterling.
Western Dream, b f, by Ormondale—Western Lady.
Brimful, b f, by Sir John Johnson—Witful.
Tetley, b c, by Ormondale—Tea Enough.
Vesper Hour, b f, by Star Shoot—Sanctuary.
Summer Sigh, ch c, by Ormondale—Summer Night.
Stickler, b c, by Star Shoot—Plaster.
Fitness, ch f, by Ormondale—Parisian.
Fortune's Favor, b f, by Ormondale—Pamela.
Maggie Maitland, b f, by Star Shoot—Our Lassie.
Venetian Boy, b c, by Ormondale—Miss Canale.
Molusca, b f, by Ormondale—Molly Mathany.
Far Beyond, b f, by Star Shoot—Little Buttercup.
Lutetia, b f, by Star Shoot—Largo.
Starlight Dance, ch f, by Star Shoot—Lady Tarantella.
Looking Up, b f, by Star Shoot—Lady Hubbard.
Whistle It, b f, by Ormandale—Love Note.
Sweet Briar, ch f, by Star Shoot—Lady Bedford.
The Tramp, b c, by Ormondale—American Girl.
Pyrape, b f, by Sir Wilfred—Bohemia.
Val Verde, b f, by Ormondale—Catherine Carson.

Down at old Gravesend the trainers are beginning to show real signs of preparation for the opening of the racing season, and the springlike weather has resulted in many of them having their horses out on the track, where they were jogged and cantered smartly.

George Odom was one of the first to appear with the eighteen of the Brighton Stable that he has in his care. The lot is a uniformly, good-looking one, and it will be surprising if they do not make good when they are brought to the races.

Nash Turner had all of the T. P. Thorne horses under saddle, and he has some truly impressive horses in his string. For the most part the Thorne horses are foreigners, but they have been pretty well acclimated by this time and there are several in the string that should be brought to the races early in the season.

Frank Weir brought out Old Rosebud, the remarkable old gelding, and he was as frisky as a two-year-old. On looks, there is every reason to expect that he will be as good a horse in 1918 as he was last year. Jack Hare, Jr., was also on the track. He has grown into a magnificent three-year-old, and the present intention is to point him for the $15,000 Preakness, to be run at Pimlico next month. In recent years Weir has been in the habit of fitting his horses in Kentucky, but the campaign this season will be confined to the tracks in the East.

T. R. Queen had Uncle Sand out, and he went along nicely. This is the three-year-old son of Uncle and Golden Sand that Queen purchased recently from Major August Belmont. The A. A. Reilly horses were cantered and there were several other stables represented during the day.

William Shields will take over ten of the horses of the Brighton Stable to campaign in Maryland at the spring meetings.

It was rumored at Gravesend that the Harry Payne Whitney two-year-olds that Albert Simons has at Bennings were all, more or less, ailing. The general health of the other horses at the old course of the Washington Jockey Club is said to be excellent.

Matt Dooley has contracted to take four horses from New York to Pimlico by motor van. This is more or less in the nature of an experiment, for the trip is a much longer one that has ever been attempted before. He will leave with the horses Saturday, and it is possible that other owners will try the motor van route if trouble is experienced in obtaining the proper shipping facilities by rail.

THE CURTINS OF IOWA
(By W. H. Gocher)

In 1857 John Curtin disposed of his business in Angelica, Allegheny County, N. Y., and turned his face towards the setting sun. With a drove of horses, and other equipment, he aimed at Chicago and hit Decorah. He went there to sell but remained to buy and grow up with the country. The star of the state had been shining for eleven years in the group on Old Glory when he crossed the Mississippi River and while the red skinned chiefs no longer smoked their pipes on the clay hills near Council Bluffs, the ink on the Indian bill of sale to President Pierce for the site of Omaha across the Missouri was scarcely dry.

While John Curtin could not be rated as a pioneer, with the French-Canadian, Julian Dubuque, whose fort on the Mississippi bank fastened his name on one of the fairest cities in Iowa, he dates back to the tall grass days, in the horse business, while his son Ed has kept the ball rolling up to date.

Everyone in Iowa knows Ed Curtin, and while not a sage by any means, he is identified with such a large number of enterprises, many of which have been wished on him by his friends, that he is forced to keep a card index in order to appear at the proper place at the right time. Both Dunn and Bradstreet bear silent testimony to the fact that he is an officer of two national banks in North Dakota as well as the president of a bank in Decorah, where he resides, while his friends report that he is the President of the Great Western Circuit, the only rival of the Grand Circuit, is responsible for the brand of racing at the Iowa State Fair as well as the county fair at his home town, and also pays the bills on a stable of race horses that are aired annually on the half-mile tracks of the Mississippi valley, or on the larger ovals if they develop enough speed.

Trotters, pacers, and hoppled birds, all look alike to Ed Curtin. The only question that he asks his horses, when they are fit, is to race for the money, or sell for the high dollar in true western style. Win or lose he keeps them going, and if a few of them come home limping or wheezing it is a very easy matter to find others that can make another bid for the pot of gold at the end of the rainbow.

In the early days the Curtin family dabbled in Indian ponies, light drivers, and Morgans, there being a strain of Vermont blood somewhere although at times it was rather hard to find. Those were also the days when trainers had to sit up by candlelight trying to devise contrivances that would make a speedy horse go on a trot, and when owners were forced to lay awake nights, planning ways and means to pay the bills, until a stranger came from the city looking for a prospect. In the early seventies if a horse took a hop, skip and a jump occasionally, nothing was said, so long as he kept on a trot part of the way, even if it was of the dot and carry one variety, but it required more than hand-picked judges to convince a buyer that he could win with a wild eyed one that persisted in running at least a quarter of a mile in each heat. The head of the Curtin family was well aware of this fact when a farmer named Barefoot drove into Decorah early in 1872 with a horse that he considered a fair prospect. He looked him over carefully and found the prize package was a close made, six year old, black gelding of the Morgan type, and also a true bred one, as he was by King Herod out of a mare by Young Green Mountain Morgan. His owner called him Billy and for a green one fresh from the fields he certainly could trot fast. John Curtin bought the gelding and as he lead him away he told his former owner that he would call him Billy Barefoot if he was ever fast enough to go to the races.

That fall as soon as the fairs started the new trotter was turned loose and before the close of 1873 every one in the western world, or at least that portion of it between the Missouri and Mississippi rivers, knew that John Curtin had a trotter which could win in almost any company in that locality. As the news spread it landed among the white tops of the Barnum, Bailey, Cooper and Hutchinson circus which was making a trip across the state. Both Bailey, who afterwards owned and raced J. B. Thomas, Tony Newell, and the beautiful mare Florence, and Cooper decided to purchase the Iowa trotter. Cooper secured the prize, the deal being closed after banking hours and as in those days it was customary for a circus to pay for everything in cash, Cooper went to the ticket wagon, drew $5,000 and exchanged it for the black trotter. John Curtin went home to supper with the bundle of bills under his arm, and throwing it on the table said: "That is a pretty fair price for one horse to bring." At that time Ed was a lad eight years old and it looked to him like all the money in the world.

Cooper took Billy Barefoot to Philadelphia, where he was raced for the text ten years and closed his career with a record of 2:28½ made over Belmont Park in 1878, in a race that Mike Goodin won with Lady Crossin. In his day Billy Barefoot was started in forty-seven reported races of which he won eighteen, was second in fourteen, third in seven and fourth in two. He defeated such old timers as Modoc, George A. Ayers, Sorrel Tom, Snow Flake, Gray Chief, Lew Ives and Clothesline, a trotter that broke Frank Hedric and Lem Ulman three or four times, while he was in turn defeated by Stewart Maloney, Ripton, Little May, Grey Salem, Black Frank, Carbolic and a few others. Chester in his Trotting and Pacing Record also states that Gus Glidden rung him under the name of Nick in Michigan and Indiana in 1873. The returns, however, show that he got him mixed with another horse as at that time Billy Barefoot was in John Curtin's stable in Decorah, Iowa. This horse was, however, started under the name of Billy Foot and Nick in 1879 after Mr. Cooper sold him.

The safe of Billy Barefoot for $5,000 made the trotters' boom in the vicinity of Decorah, and also encouraged the Curtin family to remain in the business. It kept coming back year after year with horses of all kinds, colors and descriptions so long as they could race. It also prompted Edward to take a few flyers in the same direction and he has now been at it so long that he does not know how to find his way out. In his day he has raced enough horses to equip a wild west show and while some of them would have been more at home there than on a race track, the check list shows that a lot of them made good; the trotters including Look Sir Maid 2:12¼, Peter Chinn 2:14¼, Vestalene 2:14¼, Foreign Prince 2:15¼, and a bunch of over forty others, while such pacers as Major Ong 2:03½, Hal J. 2:05¼, Princess Margarett 2:06¼, Len Medium 2:08¼, and Tally B. 2:09¼, munched a few bushels of oats in his barn.

Last year Ed Curtin grabbed the end of the rainbow when he dropped into the Great Western Circuit with Hal J. He won the first time out on the mile tracks and played his high card at Miuwaukee. At that meeting Hal J. took the word with a field of eleven and looked on paper to have as much chance as a feather in a smudge. On the first trip Pointer Queen whizzed by in 2:05¾ with the yellow bird Baxter Lou in the place. The next heat went to Loyal W. in 2:04¾, Hal J. managing to finish second, while the northern wildflower, Peter Nash, that bloomed for a day at Columbus, was third. After that it was Hal J. all the way, his fastest heat being finished in 2:05¾.

THREE KALAMAZOO DAYS
(By W. H. Gocher)

There is an Indian legend, that the spirit of a brave chief is permitted to return, to the scene of his triumphs, in time of peril or rejoicing, and mingle with the young warriors inspiring them with his daring or eloquence when reciting their deeds on the war path. This is the red man's tribute to the memory of those who are gone or as Longfellow phrases it in the Psalm of Life:

"Lives of great men all remind us
We can make our lives sublime,
And, departing, leave behind us
Footprints in the sands of time."

By applying the Indian version to horses the wraith of Princess must have hovered many times over American tracks when the descendants of Happy Medium were reducing world's records, or winning stubbornly contested races.

Princess was foaled in 1846, on a farm in Vermont, and was inbred to imported Messenger through Andrus' Hambletonian and Burdick's Engineer. As she was mixed gaited, her owner did not value her very highly, and traded her for a second hand wagon. Drifting about from town to town under the name of Topsy, she in time became the property of D. M. Gage of Chicago. She was also started in a few paces, but failing to make good was sold, and taken across the plains to California.

In her new home, the Vermont mare was called Princess, and started for a $2000 purse at San Francisco against New York. Princess won in 2:30, which was fast on the Pacific Coast in 1858. Her success also attracted the attention of the driver, James Eoff, who passed into history as "Dismal Jimmy", and it is almost a crime that Bret Harte never met him. Oakhurst, Kentuck and the Heathen Chinee were cherubs when compared with Eoff. While his methods were elusive, no one ever questioned his skill as a trainer. It was also soon demonstrated with Princess, as on January 3, 1859, he won with her at two miles over Jim Barton in 5:17, and followed that success with a match at ten miles to wagon for $36,500, with Glencoe Chief. They met on March 2 and Princess won in 29:10¾. Also when the Glencoe Chief people were not satisfied with the result, he made another match to harness for $5000 at ten miles to be raced the following day. Princess won again in 29:16¼.

In these two races Princess made the greatest exhibition of endurance ever shown by a trotter to harness, and she also lived up to her reputation when Eoff appeared with her on the Long Island courses. Her first start in the vicinity of New York was against Flora Temple on June 16 at three miles to wagon. Flora won in 7:54, 7:59½. The following week they were out again at two miles to harness and Princess won in 5:02, 5:05. This race was followed by eleven specials, all of which were won by Flora Temple, although in a few of them it looked as though Eoff did not try very hard, while the money was divided fifty-fifty. Towards the end of the season the long campaign, including a trip across the continent, told on Princess. She became stale while her feet also bothered her.

The star event of the season was staged at Kalamazoo, October 15, 1859, during the Horse Fair. It is also the first day at Kalamazoo and a memorable one in the history of the turf. Early in the week Magna Charta won and made a world's record of 2:35 for four year olds. That, however, was lost sight of by the thousands that went to National Park to see Flora Temple, Princess and the Wisconsin trotter, Honest Anse, in the special. Both Princess and Honest Anse were off, the latter being drawn after the second heat, while the little bob-tailed mare was on edge. In the first heat, she raced to the half in 1:11½, and jogged home in 2:32½. Her second heat was trotted in 2:22½, one second slower than the time made at Cincinnati the preceding week, when she defeated Ike Cook. In the third mile Flora passed the quarter in 33 seconds and was at the half in 1:09. McMann kept her going and tapped her with the whip when near the distance. The gallant little trotter responded and finished the mile in 2:19¾. This was the first mile ever made by a trotter below 2:20, while it also stood as the world's record until Dexter reduced it in 1867.

At the close of the season Princess was shipped east and retired. In 1863 she produced her only colt, Happy Medium. He retired unbeaten with a record of 2:33½. In time he also became the sire of the champion stallion Maxey Cobb 2:13¼, and Nancy Hanks. She reduced the world's record to 2:04 and retired unbeaten, having lost only one heat during her career. While owned in Philadelphia Happy Medium also got a grey colt called Pilot Medium. He was injured and taken to Michigan where he became famous as a sire of speed. Among others he got a colt for D. D. Streeter of Kalamazoo. His arrival in 1895 makes the second day in Kalamazoo, as in this colt the "celery city" sent out not only a Kentucky Futurity winner but also the greatest sire of light harness racing speed that the world has ever seen. His breeder named him Peter the Great, while his pedigree shows that he stands three removes from Princess.

August 2, 1916, is Kalamazoo's third day in the Princess line. On that date the $10,000 purse for 2:08 trotters was on the programme, at the Grand Circuit Meeting. There were seven starters, but the issue was between Mabel Trask and St. Frisco. The former was by Peter the Great, a descendant of Princess, and the latter by San Francisco, a product of California, where the gallant old mare first showed her quality as a trotter. Under the conditions, the horses in this event were required to race four heats, and Mabel Trask won all of them in 2:07¾, 2:03¾, 2:05½, 2:05¼, showing on that day, as well as many others, that she is without doubt the greatest race mare that ever wore harness.

To those who ask repeatedly "what shall the harvest be?" the descendants of Princess supply an answer. Her son, Happy Medium, was rated as a sire of trotters that were fast and good gaited but could not go the route when the heats were split, until Nancy Hanks raced all comers to a standstill and was never to a drive in any of her races. Many had doubts about the Pilot Medium trotters until Jack and Peter the Great were seen in front in the fastest company. J. Malcolm Forbes also discarded Jack as a road horse and Peter the Great as a stock horse, but in the blue grass country the latter gave the turf Mabel Trask, Grace, Peter Volo, Volga, and a host of others to convince the world that Sadie Mack was the advance courier of a flock of champions, all of which trace to Princess, and whose successes show the strides that have been made, in developing the light harness horse, in the fifty-nine years that have elapsed since Flora Temple started the 2:20 list at Kalamazoo.

RACING IN COLORADO

Harness racing as well as running seems to have taken a new life in Colorado for this year, and just now it looks very bright.

That there will be a running meet in Denver at Overland Park of twenty days the last of June and closing the 4th of July is now a settled fact. There will undoubtedly be two harness events each day for the first week.

Colorado Springs will undoubtedly build a good track and grand stand for twenty days racing during the tourist season.

The Colorado State Fair Commission has adopted a racing program for the State Fair to be held at Pueblo Sept. 23 to 28. Purses will be $500.00 each in the harness classes. Mr. J. L. Beaman, Manager, Pueblo, will be glad to send speed programs to any one asking.

Rocky Ford, the watermelon town, will give harness racing at their Fair this year, Sept. 2 to 7. The usual $800.00 purses will be given on "Watermelon Day."

The Colorado State Racing Commission through its Secretary, Mr. J. L. Beaman, has called a meeting of all the fair secretaries in northern Colorado to meet in Denver March 5th, to consider reviving the old Colorado-Wyoming Circuit which gave seven successful race meetings in 1915.

This year the Colorado State Racing Commission will leave nothing undone which will tend to revive the game for this State. For the past two years there were but very few race meets held in this State, principally for the want of some one to take the initiative.

MAX.

Notes and News

Andrew Albright Jr. proprietor of Prospect Farm, Hilton, N. J., is sojourning in California.

The pacer Homer Mac 2:0$\frac{3}{4}$, has been sold by J. W. McClain, Los Angeles, Cal., to W. J. Skinnard, Medicine Hat, Alta. The stallion is reported to be in excellent condition, is being jogged daily and will be raced this year.

Tommy Murphy, the veteran Grand Circuit driver from Poughkeepsie, N. Y., is now the owner of Oro Fino, who made the three-year-old world's pacing record of 2:06 on a half-mile track; he paid the handsome sum of $5000 for the four-year-old son of Copa de Oro and Lily Mack.

Joe McGuire writes from Denver that he has a real nice stable of horses in training, fifteen in all, and that some of them look like the best he has ever had.

On opening day of the mid-winter sale in Madison Square Garden at New York, Miss Harris M., the best free-for-all pacing mare in the world today, with a Grand Circuit record of 2:00, was sold to Tommy Murphy of Poughkeepsie for $5100. She was campaigned by Lon McDonald for a couple of years.

Lock Logan 2:07$\frac{1}{4}$, half-brother to Jim Logan 2:01$\frac{3}{4}$, brought $500 at the mid-winter sale in Madison Square Garden, New York, last week. The price paid for a horse of his class shows that there is a healthy demand for light harness horses in the Far East.

Potrero Boy, well-known campaigner on the California Circuit, was sold to W. E. Urban of Buffalo, N. Y., for $610.

With much pleasure we announce the fact that Frank S. Turner, who was operated on some weeks ago, has so far recovered that he is able to receive visitors. Mr. Turner has been one of our best known and successful breeders of harness horses, and his many friends will be pleased to hear that he is in a fair way to recover his health.

Mr. R. J. Mckenzie's stable of harness horses, including Miss Perfection 2:06$\frac{1}{4}$, the Pointer Queen 2:04$\frac{1}{4}$, Terry Patchen (2) 2:25$\frac{1}{2}$ and Carl Vernon p (3) 2:22, is now quartered at Billings Park, Memphis, Tenn., in charge of Dick McMahon, who has twenty head in training at the Memphis track.

At the annual meeting of The American Trotting Association, held in Chicago, Tuesday, February 19th, 1918, the following directors were elected:

W. P. Ijams, Terre Haute, Ind.; Thos. H. Gill, Milwaukee, Wis.; C. E. Cameron, Alta, Ia.

A committee was appointed to confer with like committees of the American Trotting Register Association and the National Trotting Association on the subject of amalgamation.

At the directors' meeting, held on the same day, the following officers were elected:

President—W. P. Ijams, Terre Haute, Ind.; vice-president—Thos. H. Gill, Milwaukee, Wis.; secretary and treasurer—W. H. Smollinger, Chicago, Ill.

A colt may be weaned, and the mother dried up so gradually that it will scarcely know when it is done, by extending the time they are kept apart, in the meantime supplying the colt with whatever it will eat with a relish, being careful all the time to keep the bowels and kidneys working freely by the use of boiled oats, scalded bran mash, a little oil meal, fresh grass, etc. And do not forget that nature supplied a large amount of sugar in the mother's milk, and this supply ought to be kept up by the use of sugar or sweet apples.

At the Washington State Fairgrounds John B. Stetson is almost a modern Robinson Crusoe. John has Hal Boy's sister, Brook Nooke Hero and May Day Hal. The last named is wintering nicely and it is believed she will make a glib pacer this year, especially if nice preparation goes for anything. My King Red steed is a fine four-year-old and acts like a trotter.

H. R. Miller, manager of the Brook Nooke Ranch, visited the track and was very much pleased with the way the colt is coming. Miller broke him as a yearling and drove him an eighth in twenty seconds. I bought from Brook Nooke Ranch, through Miller, a three-year-old sister of Sea Waif 2:14, so I am pretty strongly in the King Red family.

Charley Guion arrived at the grounds with Starost 2:13$\frac{1}{4}$, by The King Red, and began right away to prepare him for the season. F. F. Tolson of Kent, Wash., recently bought from W. McCormick of Tacoma, Wash., the pacer, Admiral W. 2:21$\frac{1}{2}$, by Garvan Wilkes. This hay destroyer goes to some trainer on March 1.—C. A. Harrison, Seattle, Wash.

Hemet Stock Farm, at Hemet, Cal., has been leased by F. E. Ward, who will also control Wilbur Lou 2:10$\frac{1}{4}$. Mr. Ward also bought from Hemet Farm, Louise Carter, dam of Wilbur Lou. Louis has a fine suckling filly by Kinney de Lopez 2:23, which is the fourth foal she has had by this sire. Mr. Ward has bred her to Doctor Mayo 2:12$\frac{1}{4}$. To Tom Pollock, Flagstaff, Ariz., Mr. Ward has sold Hemet Queen, 1, 2:16$\frac{1}{4}$, who worked last year over the farm track at two years in 2:13$\frac{1}{4}$. He has Edith Carter, 1, 2:18$\frac{1}{4}$, and will race her in the three-year-old trots, and will also race with others, the Lynwood W. trotter that was second to Don de Lopez last year at Phoenix, that is owned by Wm. Howell, of Boise, Ida. Frank Reese, for many years with Hemet Farm, is working a public stable of ten horses, four of them yearlings bred at the farm.

A thousand head of goats have been hired by the Forest Service to clear the brush from the firebreaks in the Angeles National Forest, according to the Acting District Forester. The goats were shipped to the slaughter houses in Los Angeles and were destined to be sold in the butcher shops. The butchers, however, refused to accept them, whereupon the owner rented them to the Forest Service for $20 a month, to keep the fire-breaks clean.

The fire-breaks are trails 50 feet wide and about 35 miles in length, along the ridges in the San Bernardino mountains. They were built for the purpose of preventing the spread of forest fires, and in order to be effective, they must be kept clear of all inflammable litter. To keep them clean has cost the Government in labor as much as $5000 a year. The goats will do it for $20 a month, and thrive on the feed besides.

Entries to harness turf futurities are being made public and both full and partial lists so far announced, while not up to the figures of boom days, are quite satisfactory considering all circumstances. They are more promising than breeders and horsemen have expected, judged by reports concerning the great falling down in light harness horse breeding operations. It is now certain that leading breeders, whether owning large or small number of mares, are carrying on the their operations the same as in the past, while the best and most select breeding stock available is used for the production of the highest class trotters. According to all reports from the East, the same appears to be true for thoroughbreds and all other types that are distinct by themselves, recognized as separate breeds, have their admirers.

Sales of the consignment of W. G. Durfee to the Madison Square Mid-Winter Sale were as follows:

Oro Fino, pacer, b s, 4 years, Thomas Murphy, Poughkeepsie, N. Y.; $5000.

White Sox, pacer, b m, 10 years, G. D. Fenwick, Sussex, N. B.; $2775.

Manuelito, trotter, ch s, 5 years, George H. Watson, Tea Neck, N. J.; $675.

Helen Stiles, trotter, b m, 13 years, W. Clarkson, East Orange, N. J.; $450.

Byron, trotter, blk g, 6 years, A. J. Furbush, Brighton, Mass.; $460.

Albany, N. Y.—According to the latest statistics filed at the offices of the American Red Star Animal Relief in this city, the number of horses in the United States army is now more than 344,000, an increase of 278,000 since the beginning of the war. This does not represent the number of animals purchased by the government since we declared war on Germany, however, as thousands of animals have died in the various camps and stations throughout this country.

During the six weeks ending January 12, figures have been compiled showing that 4,777 horses died from natural diseases, entailing a loss of approximately $835,975 to the government. During that period, however, the percentage of deaths weekly diminished from .52 to .25 per cent.

The majority of deaths were from influenza, known among horsemen as "shipping fever." This disease has long puzzled veterinarians and they have yet to discover a satisfactory treatment. Therefore, the only means of combatting the ailment is to give the victim the best of care and rest amid comfortable surroundings.

Many of the camps and remount stations have been aided in reducing the number of deaths among their horses by the Red Star which has responded to numerous requests for drugs, bandages, and other materials needed in the care of horses. Besides this, representatives of the Red Star have visited the camps and given advice and aid for the care of the animals. Dr. William O. Stillman, for twelve years president of the American Humane Association, is Director General of the Red Star and is in charge of its work throughout the country.

Pavana, the black gelding by Stanford McKinney—Strathalie, consigned by Mr. M. L. Woy to the Midwinter Sale at Madison Square Garden was sold to Louis Albano of New York for $230.

Al Schwartz has removed his stable of horses in training from Alameda to Woodland, where he will remain until the opening of the California Circuit.

MR. BEST A. T. R. A. SECRETARY

As suggested by the Breeder a few weeks ago, Mr. Frank E. Best of Chicago has been elected secretary of the American Trotting Register Association to succeed W. H. Knight, whose death occurred in December. Mr. Best again was chosen registrar of the organization, and now is the incumbent of the combined offices. For more than a quarter of a century he has been connected with the association as registrar, having been chosen to fill that position in 1891. Now that he is in complete control of the A. T. R. A. office, it is confidently expected that he will effect needed reforms, which will result in a better Year Book than heretofore has been published.

The move of the directors of the Register Association in combining the two offices is not of as much moment, however, as the fact that the Register now has no connection whatever with the American Trotting Association. This is as it should be, as previously pointed out in these columns, for the very fact that the same man held the secretaryship of both bodies has worked to the disadvantage of the Register Association and breeding interests in general. It is another step toward compulsory registration, which should be put in force at the earliest possible date.—Horse Breeder.

The recommendation of the National Trotting Association's congress that each member giving a race meeting, either separately or in connection with an agricultural fair, do something toward raising war charity funds, will apparently be obeyed. The resolution, which was passed by a standing vote, called on track associations to raise funds first of all for the Blue Cross, then Red Cross, Y. M. C. A., and also undertake the selling of Liberty Loan bonds and War Savings Stamps.

The resolution was particularly directed to fair associations because the Government, at the request of a committee headed by Secretary Gocher, had agreed not to charge the regulation 10 per cent tax, with a promise from Director General McAdoo to the effect that no efforts will be spared to facilitate transportation of livestock and all other exhibits to the fairs, which, of course, will include horses.

Secretary Al Saunders of Belmont Park track, Philadelphia, is the first Grand Circuit member to announce a Liberty Loan stake in his early closing program, and it looks certain that others will follow. He has named a $2,000 stake for 2-year-old trotters the Liberty, and states in the published conditions that owners of winning horses will be given bonds instead of cash.

Mr. Saunders will announce in due time eight late closing or class races for amounts from $1,000 to $2,500 and may decide to make his conditions such as the winners will be paid in War Savings Stamps in certain amounts and even up to $100 to the winners, with certain assurance that no winning owner will object to it. For other war charities he is planning to set aside certain percentage of incomes from gate receipts and privileges, which, unfortunately, are not many.

FUTURITY HAS AN ENTRY LIST OF FIFTY-FIVE

Fifty-five nominations have been made for the California State Futurity that will be raced at Sacramento in the fall of 1921. The stake has a guaranteed value of $2,500. These nominations stand for twenty-six owners throughout the State, the rich prize drawing entries from the south as well as north.

Entries closed on March 1 and the list is as follows:

J. L. Bulloch, Tulare, Cora Wickersham; J. M. Clark, Woodland, Little Lucille and Ruby C.; S. H. Cowell, Santa Cruz, Dione II, and Hulda C.; Mrs. D. W. Cunningham, Stockton, Bell Bon; Dr. M. C. Delano, Sacramento, Eloise Dell; J. F. Dunne, Gilroy, Letter B. Jr. and Salva; W. G. Durfee, Los Angeles, Subito and Honey Healey; A. Edstrom, Oakland, Sweet Hallie and Red Bluff; William A. Ferguson, Dixon, Helen Kelley; E. A. Cammon, Hood, Sweet Adena; Alex Grant, Los Angeles, Sona and Sima; D. H. Helman, Salinas, Hallie D.; A. T. Jackson, Stockton, California; J. R. Lambert, Phoenix, Mabel Uon; R. D. Mayes, Dixon, Madeline, Balley Pointer, Leota and Miss Nutonia; J. Elmo Montgomery, Davis, Atherine, Winnie Bond, Beautiful Bird and Margaret M.; R. O. Orr, Hollister, Benito B.; H. T. Owen, Bakersfield, Irene Ayers; W. L. Selman, Phoenix, Miss Delta; C. W. Short, Santa Maria, Honda Girl and Nelmonio; Charles F. Silva, Sacramento, Camille, Normona, Perlo, Grace Zolock and four unnamed; L. H. Todhunter, Sacramento, Leavenitte and Janet Bondsman; D. W. Wallis, Los Banos, Mary W.; Fred E. Ward, Hemet, Emily W., El Bell Maden, Louise Carter, Hemet Girl, Eradiate and Lady Zombro; Jay Wheeler, Sacramento, Carita; M. L. Woy, Fresno, Loma B., Florence B., Strathalie and Martha McEwen.

REPORT OF BIENNIAL CONGRESS, N. T. A.

The Thirtieth Congress of the National Trotting Association was held at the Murray Hill Hotel, New York, February 13. John C. Welty, president, called the meeting to order as per previous notice.

The report of the Committee on Credentials was presented by W. J. Carter, chairmen of the committee. It showed that two hundred and seventy-seven associations were represented by person or proxy and read as follows:

	Votes		Votes
C. A. Chapman	17	T. M. Arrasmith	16
J. I. Chapman	1	J. Lewis Baldwin	1
H. D. Smyser	1	W. J. Wadsworth	1
John H. Vanderveer	1	F. O. Beal	2
W. K. Dickerson	2	J. C. Simpson	1
M. G. Bulkeley	1	DeForest Settle	12
H. P. Murphy	2	Edward Moulton	13
John C. Welty	26	R. M. Striplin	16
C. M. DeGarmendia	19	Pierre Lorillard Jr.	1
Ray M. Colby	34	Harry S. Nealley	2
J. F. Seldomridge	20	Edward Thompson	1
A. P. Sandles	35	W. H. Gocher	10
W. J. Carter	14	Geo. S. Devine	1
Harry N. Cochran	6	E. W. Swisher	1
A. E. Brown	15		

On motion of C. A. Chapman, seconded by A. P. Sandles, report of the committee was accepted.

The following amendments to the By-Laws, having been approved by the Board of Review, were adopted by the Congress:

Article 7, Section 1—Amended by striking out the words "second Wednesday in February" in the second line and inserting "first Tuesday in December" in place thereof.

Article 9, Section 1—Amended by changing the word "eighteen" to "fifteen" in the first line.

Fourth paragraph of Article 9, Section 2—Amended by inserting the words "Virginia, North Carolina and South Carolina" after the word "Maryland" in the second line.

Article 9, Section 2—Further amended by striking out the fifth and sixth paragraphs and inserting the following in place thereof:

"The Southern-Western District comprising the states of Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Tennessee, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, and all of the western states and territories not included by name in this or other districts."

Article 9, Section 3—Amended by changing the word "six" in the third and seventh lines to "five."

Article 9, Section 4—Amended by striking out the period after the word "corporation" in the ninth line and adding the following: "and appoint committees with power to revise and amend the rules."

Article 19, Section 1—Amended by changing the word "two" to "six" in the third line.

After the amendments to the By-Laws were adopted the resignations of John Early, member of the Southern District, and E. W. Swisher and A. P. Sandles, members of the Western District, were presented and accepted.

R. M. Striplin submitted the following list of officers and members of the District Boards for consideration of the delegates: President, John C. Welty, Canton, Ohio; first vice-president, Morgan G. Bulkeley, Hartford, Conn.; second vice-president, E. P. Heald, San Francisco, Cal.; third vice-president, F. O. Beal, Bangor, Maine; Eastern District Board for six years, Edward Moulton, Worcester, Mass.; Atlantic District Board for six years, Pierre Lorillard, Jr., Tuxedo Park, N. Y.; Central District Board for six years, Reese Blizzard, Parkersburg, W. Va.; Southern-Western District Board, E. W. Swisher for six years, A. P. Sandles for four years, John Early for two years; Pacific District Board for six years, I. L. Borden, San Francisco, California.

After reading same he also moved that the nominees be accepted. Ray M. Colby seconded the nomination and particularly Pierre Lorillard, Jr., from New York state as representative of the town and county fairs. Said report was unanimously adopted, and the officers and members of the District Boards declared elected for the terms fixed by the By-Laws.

R. M. Striplin presented the report of the Rule Committee. It was taken up section by section and adopted as follows:

Rule 3, Section 3, amended by changing the word "third" in the third line to "second"; making the section read as follows:

"Sec. 3. In a two in three race a horse must win two heats to be entitled to first money. If the race is unfinished at the end of the second heat a horse not standing for money shall be ruled out."

Rule 3, Section 4, amended by changing the word "fourth" in the third line to "third," the word "fifth" in the fourth line to "fourth," and the word "sixth" in the sixth line to "next," making the section read as follows:—

"Sec. 4. In a three in five race a horse must win three heats to be entitled to first money. If the race is unfinished at the end of the third heat, a horse not standing for money shall be ruled out. After the fourth heat, only heat winners shall start, unless two horses have each won two heats. In that event they only shall start in the next heat."

Rule 3, Section 5, amended to read as follows:—

"Section 5. A three heat plan race is an event limited to three heats, with the money divided as provided in the published conditions, less ten per cent of the purse, which shall be awarded to the horse standing best in the summary except in the event of three horses each winning a heat. In that event they shall go a fourth heat to determine the winner."

Rule 4, Section 2, amended to read as follows:—

"Sec. 2. All horses must be entered in the name of their bona fide owners, and must so appear in the published list of entries. Horses cannot be entered in the name of a party other than the owner, except in the case of leases, certified copies of which must be registered with The National Trotting Association. Racing or stable names may be used by owners or lessees, if registered, together with the names of the person using them with The National Trotting Association upon the payment of a fee of $25. One registration shall apply to the tracks of both the National Trotting Association and the American Trotting Association and two stables cannot be registered under the same name."

Rule 7, Section 6, amended to read as follows:—

"Sec. 6. After a horse has acquired a winrace he shall be allowed, whether raced or not, one second for each calendar year until he reduces it. At the beginning of each year a horse is entitled to his full allowance, and can start in a class, to which he is eligible, with said allowance added to his winrace. This allowance, however, does not waive the application of Rule 7, Section 2, after a horse has been given the benefit of the time allowance to which he is entitled, or allow him to start in a race after he has won in one second or more faster than the class advertised prior to the closing of entries. No other time allowance shall be permitted. A nominator is required to claim time allowance when making entry."

Rule 7 further amended by adding the following section:—

"Sec. 7. When a horse with a winrace, made on a mile track, has started on a half-mile track, and won within four seconds of same, if he was entitled to any allowance under Rule 7, Section 6, he forfeits same just as a horse forfeits his allowance under the same rule on a half mile track when he reduces his winrace on a mile track. He is, however, still entitled to the allowance between his mile and half-mile track winraces when entering on a half-mile track."

Rule 11 amended by adding the following section:—

"Sec. 2. A horse that is entered under a racing or stable name that is not registered with the National or American Trotting Associations is not eligible to start unless the registration is completed before the race is called."

Rule 31, Section 2, amended by adding the following "if then terminated;" making the section read as follows:

"Sec. 2. In a three-heat plan race a distance shall be the same as in heat races of the same length, except that it is waived in the third heat if then terminated."

Rule 42, Section 18, amended by striking out the word "and" in the fifth line and inserting a comma in place thereof and by adding the words "and a fine of $250" after the word "paid" in the same line; making the section read as follows:

"Sec. 18. An application for removal of expulsion imposed for starting a horse out of its class or under change of name, or both, shall not be docketed for a hearing by the Board of Review, until all the unlawful winnings are returned for redistribution, recording fee for change of name paid, and a fine of $250."

Rule 44, Section 1, amended by inserting the words "Within thirty days" after the word "also" in the nineteenth line and by adding the following sentence, "If this deposit is not made within that time the appeal is thereby dismissed;" making the section read as follows:—

"Sec. 1. All decisions and rulings of the Judges of any race, and of the several associations and proprietors belonging to The National Trotting Association, may be appealed before the close of the meeting to the Board of Review, to a District Board in the proper District, or a Board of Stewards of a regularly organized circuit and shall be subject to review by the Board appealed to, upon facts and questions involving the proper interpretation and application of these rules; provided, that parties to be affected thereby shall be notified, as the Board appealed to shall direct, of a time and place when such appeal will be acted on; and provided further, if the appeal relate to the decision of a race immediate notice shall have been given to the Judges of the race of the intention to so appeal. Findings of a District Board or a Board of Stewards shall be subject to appeal to the Board of Review, and all evidence or other testimony filed or taken by it shall be forwarded, together with the findings to the Secretary of The National Trotting Association within two weeks of the close of the meeting at which the matter acted upon occurred. The appellant shall also within thirty days deposit $5 for account of expenses incurred by this Association in connection with same. If this deposit is not made within that time the appeal is thereby dismissed."

The present Rule 50 struck out and the following substituted in place thereof:—

Rule 50.

"Sec. 1. In the event of there being any conflicting construction of the rules by the governing Boards of The National and American Trotting Associations, the said construction shall be referred to the Presidents of the two Associations, whose decision shall be final."

When the report was completed it was moved and seconded that the rules with the above amendments be adopted. Carried. On motion of A. P. Sandles, seconded by J. F. Seldomridge, the financial statement of the treasurer, printed copies of which were sent to the members in December, was accepted and placed on file.

On motion of Edward Moulton, seconded by W. J. Carter, the President was authorized to make the usual appointments of Rule and Credential Committees for the next Congress and designate the place of meeting. Carried.

When taking up the matter of new business, President Welty said:

"As new business, I want to present to this congress a matter that has been discussed in and out of the press. First of all I wish to thank you for your vote of confidence in my re-election and just in a few words I wish to summarize some of the work that this association has done in the past two years.

"The first step was taken to assist in the publication of the Year Book. The American Trotting Register Association felt that the other two associations should join in it. On behalf of this association with the authority vested in your officers we made an agreement for the publication of the Year Book which is now a joint publication and each association pays a third of the expense. Our authority has ended. That will be one of the matters of new business—if you want to have a committee to arrange for the publication of the Year Book from now on.

"At the time that the last Congress met the American and National Trotting Associations had two sets of rules. You authorized a committee to meet with a committee from the American Trotting Association and agree, if possible, on uniform rules. That committee met and adopted uniform rules and I think it has been most gratfying to all concerned. There were a few rules that evidently, by your action at this meeting, needed amending.

"In addition thereto this association has taken on other work. It has taken the initiative in many new situations and the special one to which I refer is this. Something has been said about amalgamating the three associations or the two associations. Personally I have expressed myself as favoring amalgamation. I adhere to it. I believe it would be a wise thing if it could be done along fair lines. I am not for peace at any price, but I am for peace at the right price. I believe in amalgamation along lines which would be for the benefit of horsemen in the future and I think it can be accomplished. It would do away with the expenses of the overhead.

"The associations would now perhaps under uniform rules not be benefited by the amalgamation of the two associations. Perhaps there are some who carry membership in both. They might be interested in amalgamation. But the members of the different associations now have the same rules and they are not, generally speaking, very much concerned. It is perhaps the officers who are responsible for the management financially of the two or three associations who are more particularly concerned. By amalgmation perhaps the three can be operated by one association.

"The National Trotting Association has a very broad charter. It includes not only all of the territory in the United States but the surrounding or adjoining territory and provides for the management by districts. It also provides that the members control the association. It is not a stock company, where a company owns stock and they control it. Every member is a voter in this association.

"Now I am told that the American Trotting Association is an incorporated company, although I am not certain whether they are members or stockholders or just how they are fixed, but these matters will have to be considered thoroughly to see how the amalgamation could be made for the best interests of all concerned.

"It would be six years before either association could be eliminated entirely. Their corporate existence would have to be kept up for that period although one would not be active as suspensions run for that period. Either association, however, if the amalgamation is made could be kept in use although not active. I see that a number of you have expressed yourself in favor of amalgamation and I think it is due to us to make an honest effort toward that end. If it meets with your pleasure, I would be pleased to have the authority to appoint a committee to confer with a like committee from the other association so that we can meet and discuss proposed plans of consolidation."

It was moved by A. P. Sandles, seconded by C. A. Chapman, that a committee of three be appointed, with the President as chairman, and with the power suggested by the President. Upon making the motion the President stated that this authority is to confer with the American Trotting Association. Said motion was carried and the President appointed E. W. Swisher of Ohio, and DeForest Settle of New York, as the other two members of the Committee.

On motion of W. J. Carter, seconded by T. M. Arrasmith, the matter of the Year Book was re-

ferred to the Board of Review at its May meeting. Carried.

The President then stated: "David M. Look, President of the American Trotting Register Association, advised me this morning that a resolution was passed at their recent meeting asking the co-operation of the two associations in the registration of horses racing. Under the present rules no change could be made unless it was by and with the consent of both associations. I am bringing this matter up and perhaps a committee —the same committee that has the amalgamation matter on hand—could attend to it."

On motion of R. M. Striplin the matter was referred to the Amalgamation Committee. Carried.

The following resolution was presented by A. P. Sandles, seconded by DeForest Settle, and carried:

"Whereas, Through the efforts of W. H. Gocher and other representatives of the National Trotting Association at Washington, D. C., the ten per cent war tax on all agricultural fairs, organized not for profit, was eliminated in the Senate after having been passed in the House of Representatives.

"Therefore, be it Resolved, that Mr. Gocher and all who helped him in the good work done at Washington be commended for saving the state, district and county agricultural fairs of the nation from an additional burden, which if imposed, would have brought many fairs to the brink of bankruptcy, and

"Be it Resolved, that in appreciation and recognition of the government exempting fairs from this war tax that all fairs identify themselves with war work of the nation and assist in raising funds for Red Cross, Red Star and Y. M. C. A. work, and encourage the sale of Liberty Bonds and War Savings Stamps so long as the war lasts and the government needs such assistance."

The following resolution was presented by J. F. Seldomridge, seconded by Edward Moulton, and duly carried:

"Whereas, There is a recognized need of stimulating the public interest in the breeding and racing of the light harness horse,

"Therefore, be it Resolved, that we commend the officers of The National Trotting Association in establishing a Publicity Bureau in the interest of the breeder and racng and recommend its continuation."

On motion of W. J. Carter, seconded by T. M. Arrasmith, the Congress at 1:10 p. m. adjourned, sine die.

W. H. GOCHER, Secretary.

HORSE LOSSES FROM DISTEMPER AND SHIPPING FEVER

One of the greatest causes of loss among horses in the United States is the disease known as influenza, or distemper. This disease seems to occur in a variety of forms and with varying severity. There is practically no class of horses immune to its attacks. Its most serious inroads are noticed among horses that are being shipped from one point to another, and frequently through large market centers and among young horses on farms. Vaccination and other medical treatments have been given, but there still seems to be some cases which refuse to yield to treatment. Army officials tell us that in their experience vaccination, except against "strangles," is of little avail.

Statistics on the subject are difficult to secure, but some data has recently been secured by the Quartermaster Department of the U. S. Army which is interesting. The number of horses owned by the United States Army has been increased from 66,144 on hand at the outbreak of the war, to more than 350,000 at the present time. A careful record has been kept of the number of deaths among horses owned by the United States Army for six weeks, beginning December 8th. Up to that time the ordinary precautions had been taken to prevent the development of influenza, but from that date forward active effort was made to see that all cars, stock yards. stables and other quarters in which horses were confined, were properly disinfected. During that six weeks period the losses dropped from .52% weekly to .24% weekly. It is true that there may have been some other causes which contributed to this decrease in the horse mortality. The authorities burdened with the responsibility for this matter, however, are very optimistic over the results which may be obtained from proper sanitation. If we take in connection with this the prevalence of the disease in those stables or yards where proper sanitation is difficult as compared with those under other conditions where sanitation is a less difficult matter, there seems just reason for an anticipation of greatly decreased losses when proper sanitary conditions can be established.

With such accurate data as this in hand it is an easy matter to see what our losses mean when placed on a money basis. Figuring army horses and mules at $175 a head, the average weekly loss during the six weeks beginning December 8th was 796 head, with a value of $139,300, or a total loss during the six weeks period of $835,975. With a realization of the losses which accrue largely from this cause it is quite probable, and certainly highly advisable, that some means be taken to minimize such losses.

TROTTING TURF WIT
(By W. H. Gocher)

Bonner and Beecher

In the seventies when Robert Bonner was driving Dexter on the road in New York City he frequently hitched him to a two-man wagon and invited a friend to have a ride through Central Park and along the Bloomingdale Road behind the champion. General Grant after he was elected President was included in the number and in memory of the event a local firm published a colored print showing the two celebrated men riding behind Hambletonian's fastest son. The noted divine, Henry Ward Beecher, while writing his novel Norwood for the New York Ledger, also had a ride behind the horse which Charles J. Foster referred to as the "son of the morning." After jogging through the park Dexter felt the speed spark snapping and rushed off at the top of his clip. For a brief period he was beyond control, but when Mr. Bonner managed to take him back a trifle he noted that his passenger was clinging to the seat rail with both hands while tears were coursing down his cheeks. Also when he asked him if he would stop the horse Mr. Beecher, whose voice had thrilled two continents, replied: "Do not stop him, Mr. Bonner. Do not stop him, sir. What you see are tears of joy over a ride behind such a magnificent horse."

Making Speed Rapidly

Al Blake was a hard luck trainer that was located for many years at the old Cleveland Driving Park. It was a very rare event for him to get a horse that was good enough to go to the races, but he always lived in the hope that someone would bring him a trotter or pacer that would under his management, prove a Dexter or a Darby. One spring day when all trainers' hopes are high, two young men living in Cleveland brought him a handsome mare. In their opinion she was perfection and had a chance to be a second edition of Goldsmith Maid. Notwithstanding all of Blake's skill, however, he could not drive her a quarter faster than forty seconds. As Blake did not have very many horses, he knew that if the owners were convinced that she would not improve he would be minus a boarder. So whenever they came out to see her perform, she had either been worked that morning or the day before, or had a little mishap that would make it unadvisable to take an airing. Finally one summer day Secretary Fasig moved the Judges' Stand some distance toward the three-quarter pole so that the spectators in the grand stand could have an unobstructed view of a Knights of Pythias drill in the infield. As soon as Blake heard of it he sent for the owners of the mare and told them that she was ready to step a quarter that would astonish them. After locating them in the Judges' Stand he told them he would let her hum the last quarter. It was in the high wheel sulky days and when their favorite made the trip in 33 seconds they were astounded. In order to be sure that they made no mistake they asked Blake to repeat her and this time she whizzed by in 32½ seconds, a 2:10 clip. Being positive that they had a champion the two owners decided that Blake could never train one of that kind so they settled with him, and sent her over to Splan with instructions to hold her over. Splan obeyed orders but when he started her up the following spring she hung at a quarter in forty seconds. After trying everything that he could think of he asked Blake for the key that would unlock her speed and while he was miffed over the matter he finally told Splan to go over and have Fasig move the Judges' Stand.

An Unusual Present

For a number of years Deacon Partridge won the county race at his home town in northern New York. In fact it became such a regular event that a few people suggested that the association give him first money in the spring and let him spend it when it would do the most good. Finally one bold spirit decided that he would call a halt so he slipped down to Syracuse and purchased a real trotter. His selection was a handsome gelding and after bringing him home he started in on a long slow preparation that always brings results. At every opportunity he worked out with the Deacon and was soon satisfied that he lay over his prospect at least four or five seconds. Finally when race day came the insurgent decided to let the Deacon have the first heat so as not to give the old gentlemen too much of a jolt and also to find out just how fast he could step. On the next trip he decided to make a close finish so as not to get a faster record than necessary and when he won by a head as he thought, he was somewhat surprised that the judges gave the heat to the Deacon. As he finished on the inside, however, he thought that they must have overlooked him. This exasperated him so much, however, that he won the third heat by an open length. Also as he passed the stand he looked up at the judges and shouted: "Please give that heat to Deacon Partridge." Solomon in all of his glory was no prouder than that man when he jogged back to the stand only to hear the judges announce: "Third heat and first money to Deacon Partridge by request of Mr. Smith. Mr. Smith second and second money."

Jock Bowen in Eclipse

In 1869 Robert Bonner purchased a chunky brown gelding by his horse Edward Everett, and named him Joe Elliott, after the sporting editor of the New York Herald. After driving him a half to wagon in 1:11 he turned him over to John Murphy to train. He made good progress with the gelding and worked him a mile in 2:19¼. His deportment, however, went to the bad while he also became a confirmed puller. At that time Jock Bowen was the strong man of the racing world and Mr. Bonner shipped Joe Elliott to him at Boston. Jock managed to get him ready for a fast mile, but before it could be delivered the horse refused to go the right way of the track. At this time the world's record was 2:16¾, held jointly by Goldsmith Maid and Occident, and every one with a fast trotter was trying to reduce it. Mr. Bonner was satisfied that Joe Elliott could do it, if he would behave, so he went over to Boston to try him out. After several attempts he suggested to Bowen that he turn the horse and drive him the reverse way of the track. Joe Elliott appreciated the change and reeled off a mile in 2:15¼, one and a quarter seconds faster than the world's record. Bowen was astounded when he saw the time, as that was before the day of watch carrying drivers, and when he asked Mr. Bonner how he happened to think of the reverse trip, the latter made no reply. He did, however, step up to Bowen and after removing his cap took his own high hat and put it on Jock's head. As he released it the rim dropped to the reinsman's shoulders and when Bowen emerged from the eclipse he did not require any further explanation.

Explaining the Market

John H. Shults and J. W. Daly were two very wealthy men. Both of them were fond of trotters and had large farms on which they bred them. Both of them also purchased and sold at the auctions, their selections nearly always costing large amounts and their offerings as a rule selling very low. One day when both of them were having their usual run of luck in the sale ring, Daly approached Mr. Shults and said: "Mr. Shults, can you tell me why it is that when you and I want to buy a horse the prices hop up into the thousands while if we want to sell it is a hard matter to find buyers." Almost like a flash Mr. Shults replied with a smile: "Daly, every horseman in America considers you and I the two greatest judges of trotters in the world. As soon as we bid on one they know it must be first class or we would not look at it. They try to get it away from us and we have to pay top price to get it. Then when we start to sell a few they know that they cannot be any good or we would not part with them and of course that accounts for the low prices."

HORSE BREEDING IN BRAZIL

The commission recently appointed by the President of Brazil has compiled a census of live stock taken from the report of the municipalities in that country. The report shows that there is a total of 6,065,230 horses and 3,221,910 mules. The creation of a national equine stud is now under discussion in the Brazilian congress.

Brazil is one of the very few countries left in the world where vast stretches of natural pasture still exist, undisturbed by fencing and homesteads, and these vast rolling plains are ideal for live stock breeding, and it is the purpose of the commission to encourage the breeding of a real type of Brazilian cavalry horse. A bill will be introduced that provides that the government shall select a suitable type of cross breed and distribute foreign registered horses for stud purposes throughout the country by means of a central station in Rio Janeiro, which will be charged with the work of importing the required type of sires and distributing them to the various state stations, keeping their pedigrees and their records, establishing prizes for successful breeding, creating subsidiaries wherever necessary to encourage the work, etc. This central station would be managed by a board composed of cavalry officers of high rank, assisted by sub directors and inspectors, veterinary surgeons, etc.

Breeders in the United States who are interested in this matter can secure further information by addressing General Alfred L. M. Gottschalk, Consul, Rio Janeiro, Brazil.

ARMY READY TO BUY HORSES AT FREMONT

The remount depot at Camp Fremont will begin next week to inspect and purchase horses and mules for the United States Army, it was announced recently through the American Red Star Animal Relief of San Francisco. Captain Carlton Burke, purchasing agent, will examine horses and mules at the depot next Monday, at Watsonville next Tuesday and at Milpitas next Wednesday.

The United States will pay $140 for every mare or gelding accepted by the agent. Horses must be six to ten years old, fifteen to sixteen hands high and 1000 to 2000 pounds in weight. Mules fifteen to sixteen hands high, 1200 to 1400 pounds in weight, and five to ten years old will be paid for at the rate of $215 a head. The Army is in the market for an unlimited number of animals. Owners may ship their horses or mules direct to Palo Alto, where they will be cared for at Government expense.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

FIXTURES

The Interstate Trapshooting Association's Nineteenth Grand American Handicap Tournament, under the auspices of the South Shore Country Club, Chicago, Illinois, August 5, 6, 7, 8 and 9, 1918; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

The Los Angeles Gun Club announces that it will hold its first Pacific Coast Handicap May 27, 28 and 29 with $1500 added money.

Not until 1930 will it be lawful to shoot mountain sheep, mountain goats, elk, or antelope in the state of Nevada.

The game laws of California now requires anyone killing a deer during the open season to retain the skin and the part of the head bearing the horns until ten days after the close of the season, and to produce this evidence upon the demand of any game warden.

New Mexico places the value of its annual fish and game kill at $8,000,000.

C. S. Benson of Fresno county, after thirty minutes' fight, landed a 45 pound striped bass. Not being provided with a gaff he was obliged to play the fish into shallow water where he despatched him after shooting him three times with a 22 calibre rifle.

Ed. Elliott at the Los Angeles Rifle and Revolver Club shoot on February 16th, tied E. C. Crossman, the victor at 500 and 600 yards, but lost out at the 300 foot range when Crossman topped his 68 by one point with a score of 69 and 211 to Elliott's 210. There were fourteen contestants at the shoot and good scores were made.

Trapshooting records for 1917 compiled by the Interstate Association, show that O. N. Ford of San Jose is a real leader among amateur trapshooters of the United States. Ford shot several times as many targets as the nominal leaders, he having shot 4000 targets more than the 2000 necessary to get an official rating, and came out at the end of the season with a percentage only a point or two below the top guns. He broke 95.46 per cent, shooting at 6025 targets. He traveled 12,000 miles to attend tournaments and met all the noted shooters in the United States. Last year ten gunners shot at 5000 or more registered targets, and O. N. Ford led the bunch with 95.46 per cent.

At a meeting of the Woodland Liberty League last month the matter of the destruction of rice and grain crops by wild ducks and geese was discussed at length, and it will probably be suggested that the laws be so changed as to lengthen the open season. It has been suggested that officials be appointed to work in the grain fields killing the fowls so that there will not be an indiscriminate slaughter. The matter will come up for discussion at the next meeting of the legislature when the farmers will ask for relief.

Point Pinole and vicinity used to be considered one of the best hunting and fishing points on San Francisco bay for ducks and striped bass. Sportsmen have been complaining for several years that the oil on the waters in this vicinity, and in fact from Point Richmond to Antioch, is so covered with oil that fish and ducks taken in this vicinity are not fit to eat, being fairly impregnated with the petroleum flavor. At Pinole where the tide brings in the oil hundreds of water fowl, particularly canvasback ducks, are to be seen floundering around the mud flats unable to fly on account of the thick coating of oil on their wings. They soon die and the loss is not only immediate, but as they are on the way to the breeding grounds, the result is that the ultimate loss can be numbered by thousands. The clam beds are also thickly covered with oil and most of the clams found are decayed. Somebody should be prosecuted even though it hits the big corporations, and the Fish and Game Commission would do well to find out who are the guilty parties. It is against the law to dispose of refuse oil by putting it in the bay waters.

Close to ninety shooters, amateurs and professionals, participated in the opening merchandise shoot of the Golden Gate Gun Club on Washington's birthday at the club grounds in Alameda. W. S. Pearce and H. Lorenson did the best shooting among the amateurs. In the three events they had a score of 48 out of a possible fifty. W. A. Joslyn, a professional, was tied with the same score. Joslyn started with a straight 20 then had an 18, and finally a 10 in the finish. Lorenson had a 20, then a 19, and at the close 9. Considering weather conditions and the fact that it was the opening shoot there were some excellent scores made. The interest manifested by the members of the club and their guests speaks well for the coming trapshooting season.

The quinnat salmon of California have been introduced into the waters of New Zealand and the rapid increase is considered most satisfactory. The method of introduction has been to take the salmon eggs from the hatcheries in this state at a time when they have developed to such an extent that the eyes are plainly visible but still a month at least before the time they will hatch. They are packed in specially constructed crates and are kept at a low temperature and upon the arrival at their destination the eggs are kept in water at the fish hatcheries on the New Zealand rivers until they hatch out, when they are introduced into the streams. The New Zealand run this year which takes place during the last two weeks in February and all through the month of March has been far ahead of last year's run, and it is no exaggeration to say that the salmon in the Waitaka and its tributaries this season number tens of thousands of fish. New Zealand has the distinction of being the only country in the southern hemisphere which has successfully acclimatized salmon, and on the authority of experts it is said to be the only country in the world which has been successful in acclimatizing quinnat salmon away from its native habitat.

The Big Time Gun Club of Sacramento opened the season with a shoot on March 10th and have selected shooting dates on every other Sunday commencing at that time, with a big merchandise shoot on May 5th. They invite new shooters and out-of-town visitors to attend their shoots and enjoy the sport.

On March 17th the Golden Gate Gun Club will hold its regular monthly shoot and a barbecue will be one of the features of the day. It is expected there will be a good attendance of members and their friends. The registered shoot of the Golden Gate Gun Club will take place on April 28th; practice day April 27th.

Capt. John Barneson and Carlton E. Miller, wealthy members of the San Francisco Yacht Club, and well known enthusiastic yachtmen and clubmen, are organizing a fishing club to be located on Carmel Bay, near Pacific Grove, which when completed will be one of the most elegantly appointed clubs of its kind in the country. It is proposed to limit the membership of the club to one hundred, which will include fifty charter members. Already more than forty of California's wealthiest sportsmen have signed the roster. Probably no sportsman is better posted on fishing than Capt. John Barneson and he declares that there are few places in the world where there is better fishing than in the waters of Carmel Bay. It will make that place a great rendezvous for the big yachts and motor boats capable of outside work, as many of the proposed members of the new club are prominent members of the yacht clubs here.

A State Advisory Committee was organized in the office of the Industrial Accident Commission on February 26th for the purpose of aiding the enforcement of the federal law regulating explosives. An executive committee of five was appointed, consisting of H. D. Gaskill (of the Hercules Powder Co.), John M. Griffin, H. M. Wolfrin, Wm. J. Gardiner, and J. W. Stevens. The committee will meet on the second and fourth Tuesdays of each month.

A. Michelson and Cameron Kimball while on a fishing trip south of Napa Sunday caught a 34-pound striped bass.

DOMESTICATED MOUNTAIN SHEEP

"Some attempts are now being made to domesticate the mountain sheep. The lambs are caught and reared in captivity. There is a farmer near Copper Center, about 100 miles from Valdez, who is trying to cross the sheep with some that he has imported from Montana and other cold parts of the states. He has been successful with some of his rams and has bred from about a half dozen mountain ewes. He expects to bring in about 2,000 sheep from the states, and establish a mountain sheep industry. The cross results in a tame, large-sized animal, with a fleece which is a combination of hair and wool. The wool is thick and close to the hide, the hair extending out beyond it. The meat is said to be superior to that of any other than the wild mountain sheep."

CONSERVE THE FOOD SUPPLY BY CONSERVING THE GAME

(By John B. Burnham, President American Game Protective Association, in Du Pont Magazine)

A country-wide agitation has recently been started to remove law restrictions and permit the wholesale killing of our wild game. It is argued that this would furnish a large supply of food and reduce the present high cost of living.

The people who are behind this "war time measure" are men who would profit financially and they are gaining supporters among would-be market hunters, bon vivants, and some real people who imagine food would actually be cheaper as a result. It is urged as a patriotic measure.

Those who have made a lifelong study of game conditions in this country do not agree with the propagandists. The celebrated writer on field sports, Frank Forrester, seventy years ago said that the beginning of the twentieth century would find this country gameless. He said the fields and swamps and woodlands would be depopulated and silent, and he gave as his reason American disregard of laws and the spirit of the spendthrift which characterized the sportsman of his day.

The reason that we have any game today is that the nation has vastly improved since Forrester's time in both respects. We have good game laws and improved enforcement of laws and instead of the sentiment "Nothing succeeds like success," which used to be translated by the shooter in game bag terms, Americans today have adopted the vastly better motto, "Sport for sport's sake."

Game laws at present are founded on the basic principle of frugality. Seasons and bag limits are designed to permit the taking of the natural increase in such a manner as not to deplete the breeding stock. Laws prohibiting the sale of game are designed to give greatest measure of opportunity to the greatest number. Where the sale of game is permitted a few market hunters hog it all, and the rich epicure eats the result. Why should we change a system which has grown out of years of sad experience and under which rich and poor alike may share in Nature's largess for one whereby good livers who can pay from one to five dollars for a bird are the chief beneficiaries?

Such a change in my judgment would mean that we would have no game in two years. Taken as a whole, the game of the country is not holding its own. To turn loose the forces of destruction would mean its annihilation.

Every war in which this country has been engaged has proved that the hunters are our main reliance as fighting men. Most of our presidents have been field sportsmen. The Revolution was won by hunter-soldiers, and such men in 1918 will give us confidence and cause for pride in the present world struggle. Without game we cannot have hunters, and national health and safety would suffer accordingly.

The supply of existing game if it were all killed in one year or two would not reduce the high cost of living. There are 180,000,000 cattle, sheep and hogs in the United States today and about that number are killed annually for food. Less than 100,000 game animals, chiefly deer, are killed per annum, and any considerable increase in this kill for any district means annihilation.

Probably, taking weight into consideration, there is five to ten thousand times as much meat supplied each year from domesticated animals as from game animals. The ratio would no doubt be equally large when poultry and game birds were considered. This country has to live after the war and what man has yet come forward to advise that all our cattle be killed to meet the emergency? The breeding game animals and birds are equally needed for the future. Why kill the goose as long as the eggs suffice for present needs?

While the game which is killed and eaten is not a large supply as compared with cattle and poultry, it is an important food item nevertheless, and as such it is being utilized to the best possible advantage today. For every pound of game eaten a similar amount of beef, mutton, pork and poultry is released for consumption. No game is wasted. Under present laws in many parts of the country for long periods game is the only meat eaten by many people. This is as it should be. The argument that the killing of game should be stopped for the period of the war in order that the facilities of the cartridge companies and powder manufacturers be devoted wholly to the turning out of war ammunition is, in view of the facts cited, not based on common sense reasoning.

How many times have we been told, and rightly, that this war will not be won on the battlefield alone, but on the farm, because there the food for the fighters is produced. The same argument holds here. We need the game for food, and while it may not be sent to the front, the packers will have more meat to ship if game is eaten instead by those remaining at home. There are plenty of men in this country to kill the game—men who cannot go to the front, but who can do their bit in supplying food. The present laws are right. Leave them as they are. The country will profit by the reasonable food supply thus made available.

The American people will stick to the safe middle ground. We will neither deprive ourselves of game nor will we annihilate it. We have too much common sense to be led astray by radical extremes.

Trout Stream at Wilderness Lodge, Mendocino Co., on the N. W. P. R. R.

SHOT GUN OWNERS TO POLICE THE COUNTRY

In the United States it is estimated that there are 10,000,000 shot guns. The shot gun is recognized as the most powerful weapon in case of mobs or riots and has been adopted in every municipality as the proper arm to quell disturbances of that kind. Enthusiastic shot gun men have a feeling that were our soldiers in the first line trenches supplied with modern pump guns, loaded with good old American buchshot and smokeless powder, there would be a great many Boches less in the world and a vast amount of ammunition saved that is now wasted.

There has been organized a National Association of Shot Gun Owners with the object in view of organizing as many of the shot gun owners as possible into a National Home Defense Association with local companies in every community. This would provide a Home Guard in each locality composed of its own citizens who have their own interests and homes to protect, in short, such organizations would furnish a State Guards without expense to the State as the members are all armed and would furnish their own ammunition. There would be no expense for movement of troops as each local town would have its own company. The local companies which are now being organized will elect their own officers from their members who will keep in touch with the local authorities and in case of trouble will mobilize the members on short notice for first aid in the protection of their lives, homes and property.

There are hundreds of thousands of aliens in this country and Mexico and with no protection against mobs, riots and invasion of these enemy aliens, they might make a concerted attack upon our industries, food supply, crops, railroads, manufactories, waterways and shipping.

There is no plausible reason why every shot gun owner should not be a member of the association, for the only qualifications are the ownership of a shot gun and being a loyal American citizen. The national offices of the association are located at No. 17 East Eleventh street, New York, and the national secretary is R. V. Hurst, who will be pleased to furnish further information upon request. Your local gun club should take up this matter.

NOVELTY SHOOTS FOR GUN CLUBS

Some people think trapshooting is just a straight game of hitting targets, that it lacks variety. In this they are sorely wrong. While, of course, the main object is to see who can break the greatest number of targets, there is also the personal touch to every shoot, the renewing of acquaintances, the good natured rivalry for prizes and honors, and last but not least, the various kinds of shoots that a club can "pull off."

Only a few of them need to be mentioned to show that the straight 25 or 50 bird events are not the only means of enjoying trapshooting. Have you ever tried these few?

A Team Shoot—The numbers are chosen alternately, just as the boys "scrub up" for baseball, and give colors, names or nationalities. Let the losers pay for the dinners of the winners, or for the targets or shells.

A Variety Shoot—Put the members on handicap lines, according to their abilities. Make the events 10 pairs of doubles, 20 single targets, pulled when gun is at shoulder, and 10 single targets with the gun held at hip, when the trigger is pulled.

A Quail Shoot—One man shoots at a time, walking from the 23rd yard mark toward the trap house, with his gun in his hand. The targets are pulled on him unawares, at any time during his walk.

Change Guns—Line up in squads of 5. Each shooter uses his own gun, but leaves it there as he moves up, so that he shoots a different gun each of the five positions.

Overhead—From the balcony or roof of the club house, throw targets from an expert or a hand trap, over the heads of the shooters, who stand in their regular position, shooting away from the club house. This will be good sport for the feathered game hunter.

Ghost Target—Paint one or more targets white. Let them be mixed in and thrown whenever the trap boy pleases. The man who breaks the ghost target wins the trophy or pays so much for each "dead" one. Decide ties by drawing lots. Whenever a ghost is missed, it should be replaced by another.

Colored Targets—In a 25 bird event include five each painted white, red and yellow. Scatter these among the regular targets, allowing one point for the ordinary black target, two for the white, three for the red and four for the yellow. Deduct the same amount for each one missed or refused. In a recent big tournament the shooters scattered 200 such red targets through each day's clay pigeons and paid $1.00 for every red bird broken.

Quaker Shoot—The man to call "pull" is penalized by deducting one point from his score. The puller springs the trap whenever he wishes, and the shooter must accept any bird but a broken one. In this Quaker Shoot, no conversation or even ejaculations are permitted, without penalty of losing a point or being disqualified.

Pick-Up Race—Two men in a five teams per squad. The first time down the line, the left-hand man of each pair shoots first, his partner being ready to break the target if missed. The second time down, the right-hand man shoots first and his partner protects his misses. Targets are scored as lost, if either partner shoots out of turn, or if both shoot together, or if the second man shoots after the first has broken the target.

Snipe Shooting—The shooter takes 25 shells and starts walking forward from a point 25 feet in front of the trap. The birds are thrown over his head, at any time or angle or speed the puller wishes. The shooter takes one step forward after each shot. Pump or automatic guns are filled full and most be shot empty before the shooter returns to start over and he must continue firing at the same target until it is broken, or it touches the ground or his gun is empty. He looks for flying birds at all times. The winner is he who scores the most breaks with 25 shells.

HANDICAP COMMITTEE FOR GRAND AMERICAN TRAP TOURNEY NAMED

T. Hayes Kellar, president of the Interstate Trapshooting Association, has appointed Benjamin S. Donnelly, of the South Shore Country Club, of Chicago, Ill., chairman of the Handicap Commitee for the Nineteenth Grand American Handicap Trapshooting Tournament, which will take place over the traps of the South Shore Country Club, beginning August 5 and concluding on August 9.

The other members of the committee are George K. Mackie, of Lawrence, Kan.; Guy V. Dering, of Columbus, Wis.; Frank U. Rosebery, of Baltimore, Md.; and R. A. King, of Delta, Colo.

Messrs. Donnelly, Dering and Mackie were members of the Handicap Committee last year, Mr. Dering being the chairman. These three gentlemen have made a study of handicapping from a trapshooting standpoint, and are well qualified to handle the arduous task which confronts them. King is the present champion of Colorado, and has been champion three successive years, and Rosebery is one of the best shots in the Eastern States, and with a knowledge of trapshooters.

This committee will meet in Chicago on August 2 and allot the handicaps for the Grand American Handicap, which takes place on August 8. The handicaps for the G. A. H. will hold good in the preliminary handicap, which takes place on August 7, and in the consolation handicap, which is to be shot on August 9. The handicaps for the committee members, should they participate, will be worked out by Elmer E. Shaner, manager of the Interstate Association.

The handicapping of any sporting event is a difficult task, but none is more difficult nor trying than handicapping 800 or more trapshooters, and expecting all to be pleased. The early appointment of the committee gives them a chance to keep records of the shooters and keep tabs on those who seldom ever shoot in registered tournaments, but always gather at the Grand American.

HOW ANIMALS HEAL THEMSELVES

Few things in wild nature are more remarkable than how many animals contrive to heal themselves when wounded or unwell. It is because of this instinct that it is so difficult to poison the coyote, for as soon as the animal feels the poison at work in its body it seeks for a clump of grass, tetsa grass, which is very wiry and edged like a saw, and by means of making itself sick through eating this grass the coyote throws off the poison. Many dogs, and wolves, do the same.

Cats when unwell chew a certain kind of grass, best known as "cat grass," and so get well again; and these great cats, the pumas, often unknowingly show their whereabouts to the hunter by the well chewed clumps of cat-grass in the neighborhood of their lairs.

Birds eat certain berries when they are unwell, which, when they are healthy again, they will not even look at. Again, in the spring the reindeer when in poor condition makes its way to the swamps many miles from its usual feeding grounds, to eat there a certain kind of moss that grows very plentifully among the rushes and water grass.

Sheep travel great distances to get ivy, which has a most wonderful power of relieving their sufferings and restoring them to good health. Though oxen and wild cattle also munch ivy when feeling unwell, few other animals avail themselves of this plant that is so dangerous when eaten by human beings.

Dogs, as is well known, both wild and domesticated, are great eaters of a certain kind of grass, that enables them to be sick, and so throw off the poison or other thing upsetting their stomach.

The Indian, following the trail of a deer, can tell the condition of the animal he is after long before he sees it, simply by taking note what particular herbs it eats on the way. If the animal has stopped at the foot of each oak tree to paw the ground for acorns, this is sure proof that it might be in better health, for acorns are a recognized tonic of the wilds. A deer in sickly condition will dig out certain healing herbs known to the Indian, whereas a deer in good health does not trouble with seeking such tonics.

But the most remarkable instance of animals healing themselves is found with the bighorn sheep of the Rocky Mountains.. They make annual trips to the salt rocks, or salt licks as they generally are called, and travel great distances in order to procure the salty tonic. They remain for some days beside the rocks licking and drinking, then finally they return once more to their far distant mountain haunts. A wounded bighorn will lie beside the salt licks for days, till finally it is enough recovered to return to its kind.

These recognized salt licks have been visited by wild creatures for many ages, with the result that the so called rocks are worn away into a labyrinth of caves and deep recesses, which follow the course of the salt seams. Among these caverns the sheep hide themselves, and can sometimes be approached with ease so intent are they in getting the necessary cure.

Old hunters, indeed, make special note of the whereabouts of these salt licks, and lie in hiding by them for such animals as are likely to pay a visit. Wolves, deer, and bears also make regular visits to the salt rocks, and deeply trodden runways are to be found leading in all directions to and from them.

Yet, after all, the two finest tonics in Nature, and two that all animals fall back upon, are sleep and pure water, and when death comes upon the wild creatures it is usully when they are sleeping by some clea. stream or torrent, to which they have made their way when sickness overtook them. For Nature, more kindly to her creatures of the wilds, than to man, has given them the instinct for the healing of themselves.—Exch.

OLD SHELLS THAT MADE GOOD

Several western shooters recently had a very unique experience. While at his gun club, Fred H. Teeple, secretary of the Los Angeles, Cal., Gun Club, saw H. L. Haskins of South Bend, Indiana, looking over some shells. As he was giving them more attention than usual, Teeple wanted to know the reason why; upon being questioned Haskins advised that the shells were bought in South Bend, Ind., in 1895, and that he was thinking of trying them that day. They were Winchester shells, and loaded with 37 grains of Du Pont and 1 ounce of number 7 shot. To have the chance to shoot them off seemed to both men to be a novel event, so they immediately started to break targets. Mr. Haskins broke 21 out of the 25, and Mr. Teeple broke all of the 25.

Teeple stated that the shells had snappy quick loads, in fact he could not tell the difference between their recoil and action from the other Du Pont loads received only the week previous from the factory.

The above bears out the fact that age does not decrease the efficiency of loaded powder, and like some other good things, it grows better with age.

RABBIT SKINS

There is said to be a fair market for jack rabbit and cottontail rabbit skins at from twenty-five to fifty cents a piece for the dried skins. To prepare the skins for the market they should be removed entire, with the exception of the feet and head, and should be dried flat. In view of the importance of conserving and utilizing all available meat products, consideration should be given for organized campaigns to kill jack rabbits in such a way that the meat may marketed. This may best be accomplished by means of drives, the catch being prepared and shipped to the most available market. It is possible to arouse enthusiasm in such drives by arranging that the receipts shall be turned over to the Red Cross, or the animals shipped to the nearest training camp. This matter can be taken up by organized farm centers and there is a field to do much good in several directions.

GEESE PROTECTED BY FEDERAL LAW

A misleading statement appearing in newspapers to the effect that owing to damage to grain crops near Tulare lake people will be allowed to kill geese, has brought countless inquiries to the fish and game commission offices. The statement suggests that, under the circumstances, the fish and game commission will "wink at the law" giving protection to geese. A treaty with Canada, the federal migratory bird law and a state law all provide for an open season of 3½ months, from October 15 to January 31, inclusive. It would take both federal and state enactments to allow a longer open season. It can be seen, therefore, that the fish and game commission has no power to change the present law, even under the pretext of an emergency. Nor will it "wink" at any law on the statute books. An investigation of conditions at Tulare lake showed that although the geese were causing real danger, the rancher, as a rule, simply wanted a chance to protect his crops by herding geese from the field. To allow promiscuous hunting would, in the ranchers' opinion, cause more damage to the grain than the geese. It is known that geese and ducks can be successfully herded when old-fashioned black powder is used. Such powder is both noisy and smoky, and is effective in frightening birds when smokeless powder is not. The present improved powders were made purposely to prevent frightening birds when discharged. The whistle of a rifle ball will keep geese moving. Bombs can be used with small cost. It is right that the grower be given a chance to protect his crops, but no justification can be found for "winking" at a federal and state law.

The Fish and Game Commission herewith warns everyone that the killing of geese at this time of year is a violation of both federal and state law, and that the present law will be rigidly enforced and no leniency shown.

FISH AND GAME COMMISSION.
H. C. Bryant, in charge Education, Publicity and Research.

For the first time since 1913 France will have an open season on game, which is said to have increased in certain sections to such an extent as to become a menace to crops. Hares, rabbits, pheasants and partridges are said to be particularly abundant. Wild boar, which have been driven from their accustomed haunts by the war, have done considerable damage.

ONE DOLLAR PER YEAR

DATES FOR THE GRAND AMERICAN HANDICAP

The Nineteenth Grand American Handicap Trapshooting Tournament—the blue ribbon event of trapdom—and the greatest sporting event of the year—will take place over the traps of the South Shore Country Club, Chicago, Ill., beginning on August 5 and concluding on August 9.

The Grand American Handicap Tournament for years has been conducted during the third or fourth week in August and the advancement of the dates to the first week in August will make it necessary for a great number of the state associations to schedule their state championship tournaments earlier.

The 1918 trapshooting classic will be conducted along the same broad lines as previous tournaments, with a number of innovations which should make the coming event the greatest scatter-gun tournament ever staged.

There will be more prizes for the shooters in this tournament than were ever before given. In the past there were fifty prizes, no matter how many gunners went to the traps. This time there will be fifty prizes for 350 entrants; eighty prizes for 400 shooters; ninety prizes for 450 gunners, and 100 prizes for 500, or more, contestants. Eighty-five per cent of the purse will be given to the first fifty in case of 400 entrants; eighty per cent to the first fifty in case of 450 entrants and seventy-five per cent of the purse to the first fifty high guns in case of 500 or more entrants.

For the past four years there have been more than 500 participants in the Grand American, in fact, the figures have run over 800 in the last two tournaments held in Chicago. There is every reason to believe that there will be just as many contestants in the tournament this year as last, for the war has greatly stimulated interest in trapshooting. Many clubs have thrown their traps open to the young men of draft age and veterans are giving instruction at many of these clubs, so that the future defenders of the Nation will be able to shoot—and, best of all, shoot straight.

Trapshooting is the only sport that has benefited by the world war. Known as the sport alluring for a generation, it has lately been dubbed—and correctly, too—the Patriotic Sport. Every one should know how to shoot, and there is no better way of learning than at the traps.

The Interstate Trapshooting Association will give $4000 or more in cash and trophies for the tournament and guarantees the winner of the Grand American Handicap event $500 and a trophy; the second high gun, $400 and a trophy; the third high gun, $300 and a trophy; the fourth high gun, $200 and a trophy; the fifth high gun, $100 and a trophy. The chances are that the shooter who lands in any one of these places will do better than the guaranteed prize for last year, the winner of which drew down nearly $800. With the entrance fees of the shooters the total amount of the purses will amount to more than $15,000.

The events on the program will be the same as last year—opening with the South Shore Introductory at eighteen yards on August 5; the National Championships at singles and doubles targets and the Chicago Overture on the 6th; the Preliminary Handicap on the 7th; the Grand American Handicap on the 8th and the Consolation Handicap on the 9th. The usual yardage and women's trophies will be awarded in the Grand American. The division of prizes will be the same in the Preliminary and Consolation Handicaps as in the Grand American.

There is a new ruling on the Consolation Handicap, as follows:

"Any entrant who participates in a division of the purse in the Preliminary or Grand American Handicaps will not be eligible for the Consolation Handicap."

There will be no joker traps at this year's Grand American, nor will there be any special events for professional shooters. The professionals will shoot down the line with the amateurs in the eighteen yards event on the opening day, and the professional with the highest score will be regarded as the professional champion of the year. There will be the usual special event for fair Dianas.

Each contestant in the Grand American will wear a number on his sleeve. The number will be of cloth and will be sent to the shooter in advance. A duplicate number will be retained by the committee. Programs will be distributed showing the name and number of each contestant, so that it will be an easy matter for the spectators to keep track of the different shooters.

The Interstate Association has asked the Columbus, Ga., Board of Trade to allow the Columbus trophy to be shot for in the Grand American Handicap. This trophy for years has been shot for in the Southern Handicap. The Southern Handicap has been discontinued, but the Interstate Association does not want the tropy to go out of commission.

THE INTERSTATE TAKES OVER THE LONG RUN TROPHY PLANS

The Interstate Trapshooting Association has taken over the various Long Run Trophy Plans which have been in operation by the Du Pont, Hercules and Dead Shot Companies and it will operate an Interstate Trapshooting Association's Long Run Trophy plan during the Registered Tournament season of 1918.

Arrangements have been made which give those contestants who have already started Long Run Trophy propositions the privilege of choosing: (1) Whether they will try to complete, during the Registered Tournament season of 1918, the competition for whatever Long Run Trophy or Trophies they may be working on now under the Powder Companies' conditions which apply, or (2) whether they will start in on the new Long Run Trophy plan of the Interstate Trapshooting Association at the first Registered Tournament they attend in 1918.

The conditions governing the award of the Interstate Trapshooting Association Long Run Trophies are set forth in a folder that will be sent on application to E. Reed Shaner, secretary, 219 Collant avenue, Pittsburg, Pa.

If a contestant elects to continue any one of the Long Run Trophy propositions of the Powder Companies and later on desires to change to our proposition it will be permissible, with the understanding that there will be no points allowed on the Interstate Trapshooting Association proposition for runs made while operating on the Powder Companies' Long Run plans.

It is to be hoped that this departure will be accepted with enthusiasm and the conditions of award, and the trophies given, will have the approval of trapshooters in general.

PROTECTION FOR BIRDS

As one of the side issues of the war, Congress has now before it an enabling act, to make effective a treaty with Canada for the protection of migratory birds. The treaty was drawn for the purpose of saving the winged creatures that help the farmers. But the coming of the war has greatly emphasized the desirability of bird protection. To get from the earth every potential pound of food is the aim of all patriotic Americans. It is known that migratory birds, with hardly an exception, are friendly to soil tillers. Blackbirds, robbins and hawks may engage in mild delinquencies, but none of their offences is comparable to the general good done by the feathered tribe. They kill the enemies of crops. The robin eats daily several times its weight of worms and insects. The chief food of the maligned hawk is the flesh of rodents, which are the scourge of the farm.

The real truth of bird mission is just dawning on the American consciousness. The merciless slaughter which was once in vogue has been called to a halt. Not as yet, however, have the winged friends of the human race been given the safeguards which belong to land animals. What protection they have as yet depends largely on individual conviction and local laws and regulations. There are many places where hoodlums or cats or gunmen may thrive unmolested. The enabling act now before the lower House of Congress, it having passed through the upper Chamber, will provide equal and rigid enforcement of necessary laws throughout the United States and Canada. It will tend to conserve bird life in every part of those two countries and give these angels of help to soil tillage a guarantee of long life and increase.

It is a well known fact that bird life up to the present time has been dangerously diminished. All fliers were too commonly regarded as objects of prey. But lately there has been a reaction. Now numberless people extend the hand of fellowship to the fliers and give them food. The upshot has been to still further protect them with an international treaty.

FISH IN CLEAR LAKE

Alec Paladini has laid before the State Fish and Game Commission a request for permission to take fish out of Clear Lake with nets. He claims that in the spring of nearly every year Clear Lake overflows and millions of fish are carried into the lowlands, and that when the water is pumped out of these depressions by the farmers so as to till the overflowed lands, hundreds of tons of dead fish are buried, which is a great waste of food material. Paladini claims that this year the usual overflow will not take place on account of the slight rainfall. At the present time the lake is stocked with fish in such great quantities that the surface of it is literally alive with carp, black bass, pike, and other fresh water fish. At present it is illegal to fish in the lake with nets, but it lies in the power of the Fish and Game Commission to permit the use of nets. Paladini says that from ten to fifteen thousand pounds of fish could be shipped to San Francisco every week if net fishing were permitted during the winter months, lowering the price of fish and saving four hundred tons of fish that are usually wasted.

TILLY ALCARTRA, RECORD HOLSTEIN COW

THE FARM

BEEF A FIGHTING FOOD

Food will win the war, and the choicest fighting food is beef. With the farm labor situation economically forcing farming operations more and more, as war drags on, towards extensive, rather than intensive, farming operations, it is up to the beef cattle to take up the slack and "carry on" the production of the all important food from the same or increased acreage.

Already the production of milk in the Chicago district has fallen off over 30 per cent, according to statistics given before the milk inquiry of the United States Food Administration. High priced feed and scarcity of skilled farm labor are responsible, and the tendency is continuing in that direction. The theories of some of our college professors about the making of feeds into meats and milk are going to the scrap heap under the test of war. Dairy cows and hogs may be more economical means of turning rough feeds and grain into human food than is beef, when figured out on paper, but the element of labor changes beef and dairy cattle around under war strain, and the beef animal can make food from hay and grass where the hog is left to compete with the human race for the grain supply. More grass on the farms for beef cattle is the answer to the war call.

"You can't keep a good man down," and this aphorism is as true of cows as it is of men. In proof of which is the news that the famous pure bred Holstein, Tilly Alcartra, is again at her old tricks of rolling up records. She recently dropped her sixth calf, a heifer, and gave such promise of another successful lactation period ahead of her that her owners, A. W. Morris & Sons, Woodland, Cal., decided to put her on test.

She came through with a new mark for seven days with 40.56 pounds of butter out of 729.1 pounds of milk, which shows the pace she is making in the yearly test she is on.

With this record she is the twenty-fifth "forty-pound" Holstein cow.

Tilly Alcartra has to her credit the production of 30,451.4 pounds of milk, yielding 1189.03 pounds of butter, in 365 days. In two years she produced 60,278 pounds of milk, in three years she produced 86,678 pounds of milk, in four years 103,099.3 pounds of milk, and in five years she has produced 123,351 pounds of milk and 4856.5 pounds of butter. She is the champion long-distance cow. At the time of her freshening she was 9 years, 3 months and 2 days of age.

Another Holstein youngster has sold for a small fortune. Majestic Rag Apple, son of Rag Apple Korndyke (8th) went under the hammer at the Liverpool ring, Syracuse, New York, for $35,000. This is the second highest price ever paid for a bull at auction, the record price being $53,200 for a half-brother of this bull,

This is the Kind of Horse the Government Wants

No horse with a Spavin, Splint, Ringbone, Curb, Bony Growth, Capped Hock, Wind Puff, Strained Tendon or Sweeny can now pass the keen-eyed Inspectors of the Government Remount Stations.

Splendid-looking horses—otherwise sound—are being turned down because of some blemish that could be quickly cured with

Gombault's Caustic Balsam

Here is your chance to make money for yourself and at the same time help in the Government's great Thrift and Production movement.

Put your horse into condition with **Gombault's Caustic Balsam.** A safe and reliable remedy.

Gombault's Caustic Balsam if applied immediately after burns, bruises or cuts, is a perfect antiseptic—soothing and healing. An absolutely safe external remedy for man or beast.

Every bottle of **Caustic Balsam** sold will surely give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by parcel post with full directions for its use. Send for descriptive circulars, testimonials, etc.

Capital & Surplus $4,500,000

$10 Due on Yearlings
Monday, April 1, 1918
Pacific Breeders Futurity Stakes No. 17,---$2,500

GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSN.

For Foals of 1917 to Trot or Pace at Three Years Old

Entries Closed Monday, December 4, 1916.

$1500 for Three-year-old Trotters. $1000 for Three-year-old Pacers

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916, when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee only.

Hopples will be barred in trotting and pacing divisions.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

SUBSTITUTIONS

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies BEFORE APRIL 1, 1918, her nominator may sell or transfer his nomination or substitute another mare of foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President.

F. W. KELLEY, Secretary, Post Office Drawer, 447, San Francisco, Cal.

AN OPPORTUNITY

I have two very fine saddle colts, stallions — a yearling and a weanling —for sale——

By LE GRAND McDONALD and out of Black Belle, by Black Rose, by Montrose 106.

The yearling won the colt class at the 1916 California State Fair, this year's colt is a better one.

I want to see some good saddle horse lover who desires to own a future champion get these colts. Prices right.

(FOALS OF MARES COVERED IN 1917)

TO TROT AND PACE AT THREE YEARS OLD

TO BE GIVEN UNDER THE DIRECTION OF THE

CALIFORNIA STATE AGRICULTURAL SOCIETY, 1921

ENTRIES TO CLOSE APRIL 1, 1918

MONEY DIVIDED AS FOLLOWS:

$1800 FOR TROTTING FOALS $1200 FOR PACING FOALS

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on April 1, 1918, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1918; $5.00 December 1, 1918; $5.00 on yearlings April 1, 1919; $10.00 on two-year-olds April 1, 1920; $10.00 on three-year-olds April 1, 1921.

STARTING PAYMENTS—$25.00 to start in pacing division; $55.00 to start in trotting division. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

CONDITIONS

Races three heats; money divided 30 per cent to the first heat, 30 per cent to the second heat, 30 per cent to the third heat and 10 per cent to the race according to rank in the summary. Money divided in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1917.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

13. 2:11 Class Pace $1,000
14. Free-for-All Trot 1,000

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

Entrance and payments on these stakes will be due and payable as follows: 3 per cent June 1st, 1 per cent July 1st, and 1 per cent on or before five o'clock the night before the race.

GENERAL CONDITIONS

ALL RACES THREE HEATS. Money divided 30 per cent to the first heat, 30 per cent to the second heat, 30 per cent to the third heat, and 10 per cent to the race according to the rank in the summary. Money in each division 50, 25, 15, and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

All purse races 5 per cent to enter and 5 per cent from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and four starters.

Money must be sent with nomination.

The Society reserves the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry; also, for any unforeseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one o'clock P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Unless otherwise specified, rules of National Trotting Association to govern.

Entries close June 1st, when all entries must be named and eligible.

Make all checks payable to the State Agricultural Society.

Address all communications to the Secretary.

GEO. C. ROEDING, President.

CHAS. W. PAINE, Secretary, Sacramento, Cal.

Salem, Ore.	Sept. 23-28
Boise, Idaho	Sept. 30-Oct. 5
New Westminster, B. C.	Sept. 30-Oct. 5

Races will be held in the Pacific Northwest this year as usual and contrary to the belief in some quarters, the indications are that there will be more interest in races than in the past.

The principal change in the circuit is the adding of Boise, Idaho. Business conditions are better than ever in past history up in South Idaho, and there is every reason to believe that a good race meet such as would be put on through the association will be well patronized.

The dates and places of holding races under the auspices of the association are as follows:

Vancouver Exhibition, Vancouver, B. C.—August 19 to 24.

THE ANNOUNCEMENT of the early closing events for the North Pacific Fair Association Circuit appears in our business columns. The card offered calls for eight events at each track as follows: 2:14, 2:19, 2:24 and free-for-all for trotters and the same classes for pacers also. Entry closing date is set for July 15 and full particulars governing payments and racing conditions appear in the advertisement. Write any of the secretaries for books and information on the late closing harness races. An attractive running programme will also be offered.

THE SIX MEMBERS of the Rocky Mountain Racing Circuit in Colorado announce their early closing programmes in this issue of the Breeder & Sportsman, and it's not necessary to say that they should receive a warm welcome and strong support from all horsemen who intend to campaign in the Western district. This circuit is made up of towns that make it very short ships. All have good mountain water, and half-mile tracks that will be put in first-class condition by an experienced man. The classes are not entirely uniform, but nearly so, the exception being the State Fair at Pueblo, where the purses will be $500 as against $400 at the other towns. Two or more running races will be given each day. The State Fair Derby, $250, will be run at Pueblo, September 26. The officers of the circuit and the officers of each association will do everything in their power to accommodate and help the horsemen, and make their visit to the Colorado tracks both a pleasure and profitable.

The last published copy of the Year Book, Vol. 33, containing the records and performances of 1917, has quite a number of errors in the race reports, and also omits two world records—that of Butt Hale, by Senator Hale, 2.10¼, who obtained a record of 2.02¼ at Syracuse, N. Y., that being the champion record for a five-year-old pacing gelding. Oro Fino, by Copa de Oro, 2.01, paced a a mile in 2.06 over the Riverside, Cal., half-mile track, which is the world's record for a three-year-old pacer over a half-mile track. All the Eastern turf journals, with the exception of the American Sportsman, have made many adverse criticisms on these matters and seem inclined to place the blame on the compilers of the Year Book. The American Sportsman, however, seems to have gone to the root of the matter, and in a very comprehensive and able editorial on this subject has apparently located the fault where it belongs. Attention has been called many times in California to the existence of conditions in the management of local race meetings, where ignorance and carelessness in reports of meetings were the cause of many complications, such as horses not being given credit for records, suspended horses and drivers being allowed to start, and men under suspension being permitted to act as officials. We are reprinting herewith the editorial of the American Sportsman in the hope that it will be carefully read by secretaries and managers and that they will profit by the advice contained therein: World's records are matters of moment, of interest to the public at large as well as the owners of the horses in question, and failure to include such in the official volume seriously reflects upon its value, yet we do not mean to assert that this was the fault of the office force of the American Trotting Register Association, but place the blame where it lies, the present existence of three governing bodies instead of one, with the consequent failure, for fear of loss of membership, in insisting that proper reports shall be made by the racing associations or the prescribed penalties be inflicted.

It is, of course, very necessary that the financial end of these meetings must be so conducted that the expenses shall be met and very naturally the secretaries devote their closest attention to business details of that nature, but it is also exceedingly important that a competent and efficient clerk of the course be selected in order that a true and correct record of the entire racing program may be made during the time of the actual contests, and not afterward built up from memory or badly-kept score cards.

Speaking from our own personal observation, we have seen too many meetings where fair purses were offered and contests of class occurred that are represented in the Year Book by incomplete and inadequate returns, and we know that many of these reports are the result of copying on the day after the actual racing, or sometimes even during the week following.

The average racing association falls very far short of appreciating, seemingly, that nothing is more essential than the employment of a competent official to perform the task of keeping the judges' book, and also that if the clerk is expected to keep his records up to the minute during the progress of the racing he has enough to do in that one line without attempting to undertake any other duties. And the average board of judges and timers think so little of their part in the making of the proper records that very often they give the clerk more trouble in securing their signatures than he experiences with all the rest of his work.

In the event a report is sent in to the governing body that is afterward questioned for its accuracy, it is a very common thing to notice that the judges and timers are often placed in the position that their testimony shows that they signed the judges' book at the place pointed out to them, but the record they thus officially certified was in effect very different from their recollection of what actually occurred; in effect, an avowal on their part that the duties of the position had been performed in a perfunctory manner and that their signatures were regarded as a mere matter of form and of no value.

If a competent man is filling the position of clerk, his interest is such that he will check up each and every detail and by close attention to his duties will succeed in turning in a report that will be of value and a complete and accurate summary of the meeting, but with careless boards of judges and timers and an incompetent clerk the result is lamentable.

The commonest faults and neglect of duty of these officials that have come to our attention are the following: Judges sign the book each day before the clerk has made an entry, or often sign at the end of the week without comparing the report with any record they have personally kept; timers often keep their slips until the end of the day or week and never compare them with the time recorded in the report, and, in fact, often sign the book before the clerk has made any effort to bring his work up to date; and the clerk often enjoys the races from a good viewpoint, doing no work while they are in progress, and at the end of the day, or week, hurriedly attempts to make out a report from his own score card, with no one present to check up his labors for possible errors.

There is nothing at fault in the system laid down in the rules, for if the timers and judges checked the work of the clerk before making it official by their signatures, it is a certainty that errors would be very few, indeed, but it is lamentably certain that no system can accomplish accuracy when it is more honored in the breach than in the observance.

And it is certain that breaches of the rule will continue, with the resultant evil of inaccurate records, as long as the A. T. A. and N. T. A. have their time so thoroughly taken up with their material welfare that they are unwilling or unable to compel their affiliated members to do their work promptly, and penalize them for any failure to do so.

Personally we counted in Volume 33 no less than 685 horses in the lists of 2:30 trotters and 2:25 pacers whose dams are not given, and no one can possibly believe that such a mass of incomplete breeding statistics could have been forced upon the Register Association if the racing secretaries had made an effort to ascertain the full breeding from the nominators and had then made certain that their official reports would in turn convey this nomination to the governing bodies. Present rules require this, but under present methods a condition has arisen that very seriously affects our statistical records and prevents proper credit being given to the blood lines these performers owe their speed inheritance to.

The remedy lies with the A. T. A. and N. T. A. primarily and they will need no new rules. They should simply insist that no report of a meeting will be received that does not adequately set forth the breeding of the contestants, or definitely state that it is unknown, and insist upon the racing secretaries selecting officials that will do their duty and sign no reports until the summaries are checked and found to be correct in all details.

The State Agricultural Society is the first California association to announce its racing programme for the season of 1918 and its advertisement will be found in another column of this issue of the Breeder & Sportsman. The racing programme of the California State Fair, to be held August 31 to September 8, prepared by Secretary Chas. W. Paine and approved by the State Board of Agriculture, at its last meeting, will be the most liberal offering given for years in any place in the West.

The total of money offered in purses and stakes for the harness races is $22,500. The card includes three $1500 purses, the Governor's stake of $2000, and six $1000 purses. These are all in addition to the Futurity and Stanford-Occident stake. The programme has been made a liberal one by the State Board of Agriculture, because it believes in encouraging the breeding of horses and because vigorous efforts are being made this year to attract attention to the State Fair and to its educational and development features.

It is also planned to have an excellent programme of races for the thoroughbreds. This will not be difficult, as a great number of horses are holding over in this State, as there has been no racing at Tia Juana this year. Arrangements can probably be made with the Nevada Racing Association at Reno, which will hold its meeting following the California State Fair, so that horses brought out there may start here. If the California State Fair management is assured of some good running races, arrangements will be made accordingly.

ACKNOWLEDGMENTS

The following acknowledgments have been received by the National Trotting Association from the American Red Cross and American Red Star Societies in regard to notice of resolution adopted by the Thirtieth Congress in reference to fairs identifying themselves with the war work of the nation and assisting in raising funds for the Red Cross, Red Star and Y. M. C. A., and also to encourage the sale of Liberty Bonds and War Saving Stamps so long as the war lasts:

"Washington, D. C., Feb. 28, 1918.

"W. H. Gocher, Esq., Secretary The National Trotting Association, 1026 Main street, Hartford, Conn.

"Dear Mr. Gocher: It was indeed kind of you to write me as you did under date of February 23rd relative to the action taken at the Thirtieth Congress of the National Trotting Association. This is extremely gratifying and is characteristic of the support we are receiving from all sections of the country.

"Believe me, my dear Mr. Gocher, we of the Red Cross War Council are all deeply grateful to you and your associates. Sincerely yours,

(Signed) "W. P. DAVISON,
"Chairman Red Cross War Council."

"Albany, N. Y., Feb. 20, 1918.

"Mr. W. H. Gocher, Secretary The National Trotting Association, 1026 Main street, Hartford, Conn.

"Dear Sir: Allow me to thank you in behalf of the American Red Star Animal Relief for your assistance in securing from your Congress a resolution mentioning the Red Star as one of your approved war charities. This will aid very materially in interesting the members of your association in the important work of army animal relief.

"Again thanking you for your assistance, I am, with every best wish, Yours sincerely,

(Signed) "SYDNEY H. COLEMAN,
"General Manager."

Burgeia Bros. of Novato report that the first foal of the season arrived on March 20. It is a brown filly by Kenilworth out of Erema by Tremont.

Chas. T. Patterson, who died recently in New York, was well known in California. He formerly trained the stable of Burns & Waterhouse and met with great success with their horses.

Mr. Charles Farrell of Winnemucca, Nev., is starting in a modest way to breed thoroughbreds. He has the nucleus of a stud in the three mares, Fore, Blue Addie and Milosey, all unusually well bred and good race performers. Fore was a frequent winner during her two years on the turf, winning a large majority of her races in the best of company. Blue Addie was a winner as a two-year-old last year, but was started at Tia Juana too early in the season and so was under the ban for the regular jockey club track.

I hope those praiseworthy enthusiasts who are setting to work to revive the glories of coursing see "Punch" regularly. But in case they don't, I must quote for their benefit a joke it recently and very cleverly illustrates, which all readers of "The Referee" will enjoy. The bookmaker, with a long experience of racing, but none of coursing, speaks just before the dogs are to slipped. "I've just laid this gentleman six to four against the fawn, and now, Sir, I'll lay you six to four the black." His friend grips him by the arm and says, in horror, "I say, you can't lay those prices with only two runners." "Why," says the amiable bookie, "ain't the bloomin' rabbit got a chance?"—Antisthenes.

The Eastern thoroughbred horsemen are intensely interested in the two Kentucky classics—the Oaks and the Derby. Both of these great races were inaugurated in 1875 and have never missed a year. They are both set for Churchill Downs at Louisville. Another famous race is the King's Plate, formerly the Queen's Plate of the Ontario Jockey Club. This famous race was first run in 1860, and it has been contested for continuously since that time. It is a race for horses owned by a British subject resident in Ontario. The entrants must be foaled, raised and trained in the province. It comes always on May 24, Queen Victoria's birthday, and will start this year the same as usual.

Louis Lee Haggin, millionaire farmer, sportsman and master of Mt. Brilliant, one of the finest estates of the Blue Grass, has joined the United States army as an enlisted man in the medical corps, and left Lexington Monday under orders of the War Department to report for training to Base Hospital Unit No. 40, Dr. David Barrow directing, at Camp Zachary Taylor.

A grandson and heir of the late James B. Haggin, owner of Elmendorf, Mr. Haggins himself is one of the richest men in Kentucky today. His decision, in spite of the fact that he is many years past the age of selective draft, to give up his home life, his wife and his children to join the country's overseas forces as an enlisted man in the ranks, comes undoubtedly as one of the biggest sacrifices any American has made in the prosecution of the war. Mrs. Haggin will remain here and will continue to reside at Mt. Brilliant with their three children, Bettie, Jimmie and Louis, Jr. The latter, who is the youngest of the three, is only four years old.

Although no inkling of his intentions to enter the service had crept into the newspapers, it is known that Mr. Haggin has for a long time been endeavoring to get into some branch of active war work abroad. His first attempts to enlist in the actual fighting forces, however, were met with flat refusals on the part of the army officials, owing to illness and an operation only recently. He immediately turned to Dr. Barrow, urgently requesting that he be accepted for service with the Lexington unit, but here he was also informed after examination that under the physical regulations it would be impossible to accept him. Last week he went with Mrs. Haggin for a short trip East, stopping in Washington, and when he returned home Saturday it was with orders to report to the Barrow Unit on Monday. "Blood will tell." There are no slackers in the Haggin family.

Tracery so far has not had a winning representative in this country, but Valerius and Orestes each won races in the United States for him last year. Both these colts, by the way, were bred in England by Mr. John Sanford, Valerius being a bay, foaled on March 22nd, 1915, out of the French-bred mare Louli by Flying Fox; while Orestes is a chestnut that was dropped on May 13th the same year, and is out of Kildonan, a daughter of Ladas, that was bred by Lord Roseberry in 1899, and was sent to France, when covered by Gold, in 1902, and returned to England in 1914. Orestes now belongs to Mr. A. H. Diaz, and on February 17th last the colt secured his fourth race this year at the meeting at Oriental Park, Havana, Cuba.—Horse and Hound.

Baltimore, April 12th.—Seventeen thoroughbreds were burned when fire destroyed a stable at the Bowie racetrack early today. Among the horses lost were Fragonard and Valory Telub, trained by Walter House; Moosehead, George W. Avery, Caljer and Fellowship of the Calumet stables, trained by Willie Jennings and owned by James Johnson; Ruisseau, owned by Fox & Woodward; Jem Eagle, owned by George Winifred of Texas. The origin of the fire is unknown. This is the third fire at the Bowie track since its construction. Prince George county authorities are investigating.

The spring meeting of the Monterey Jockey Club at Del Monte, which has been on the turf programme, was formally declared off in an announcement from John H. Rosseter, president of the Monterey Club. Owing to the scarcity of horses, by reason of the failure of Tijuana to stage a meeting, Rosseter explained that it would be impossible to arrange race cards. The next meeting at Del Monte is accordingly put off until the fall. Last September the Monterey Jockey Club was organized and a meeting was held and plans were outlined for the holding of the society race meets every spring and fall. President Rossetter professes confidence in seeing the thoroughbreds galloping again at Del Monte after the season of racing in the East is completed. He believes that many Eastern turfmen will send their strings of horses out here along with the Californians.

Lexington (Ky.), April 6.—The State Racing Commission, at its meeting here today, awarded the spring racing dates for the Kentucky tracks. There will be sixty-eight days of racing, running from April 23, the beginning of the Lexington meeting, until July 13, the end of the Latonia meet. The dates awarded follow: Lexington, April 23 to May 9; Churchill Downs, Louisville, May 11 to 25; Douglas Park, Louisville, May 27 to June 11; Latonia, June 15 to July 13. The Kentucky Derby will be run on May 11.

At the last meeting of the West Australian goldfields a new feature was introduced to totalisator patrons (says an exchange). This was a straight-out commission window. The idea is to afford facilities for investment of amounts of two pounds and upwards without people other than the commissioner knowing what horse is being backed. The commission window is worked in conjunction with the ordinary ten shillings straight-out machine, and the dividends are calculated on the total amount invested. Full details as to the amounts invested on each horse are displayed to the public immediately after the race is started. The special window provided for the purpose only admits one person at a time. There are no tickets visible to the purchaser, and he cannot tell what other horses have been backed. The seller works in a closed compartment, and no one, either outside or inside the totalislator, knows what is being sold. Immediately the starting bell rings the seller displays the tins showing the tickets sold on each horse. A totalisator conducted on these lines would not comply with the requirements of the New Zealand law.—Lancer.

H. T. Oxnard, formerly of Colorado, has two hobbies—sugar beets and racehorses. "I became interested in racehorses," he says, "when, during my numerous visits to Europe, I saw what the governments of France, Germany, Austria-Hungary, Italy and Russia were doing to encourage the raising of thoroughbreds for no other purpose than to insure remounts for their cavalry. Before the war I was told by Count Lehrndorf, head of the German Remount Service, that without thoroughbreds it would be impossible to properly mount an army, and I want to say that in Europe, where nothing but thoroughbreds and thoroughbred crosses are used for cavalry horses, the armies are so much better mounted than our own that there is no comparison. Thoroughbreds—racing, betting and the army—are indissolubly linked, for without racing there can be no thoroughbreds for the army and without betting there will be no racing. Racing is essential to determine the fitness of horses from which to breed remounts."

In the Senate, Senator Helm's bill to tax Kentucky race tracks two per cent of the pari-mutuel business, was reported favorably, but contained an amendment allowing the tracks to take six instead of five per cent of the proceeds, as the existing law provides. The bill providing for a repeal of the daily license on race tracks was also reported favorably.

NEVADA STOCK FARM NOTES

The following foals have been dropped this season:

January 20—Anna May, by King Eric Figleaf, by Martenhurst, foaled a bay filly by Honeywood. Mare returned to Honeywood.

January 23—Lady Vera, by Woolsthorpe—Philura, by Jils Johnson, foaled a light bay filly by Honeywood. Mare returned to Honeywood.

February 9—Imp. Polistena, by Polymelus—Imola, by St. Hilaire, foaled a bay colt by Deutchsland. Mare bred to Ballot.

February 13—Fairy (dam of For Fair and Jim Heffering), by St. Frusquin—Cretan Belle, foaled a brown filly by Honeywood. Mare returned to Honeywood.

February 16—Busy Bee, by First Tenor—Bee Bee, by St. Andrew, foaled a bay filly by Honeywood. Mare returned to Honeywood.

February 25—Alice Carey (dam of Spokane Queen), by Trappean—Abbie F., by Judge McKinstrey, foaled a bay colt by Honeywood. Mare will be bred to Honeywood.

February 20—Schwalbe (dam of Slippery Elm), by Sain—Gratitude, by Hyder Ali, dropped a dead foal Mare bred to Honeywood.

The yearling crop of Honeywood are an exceptionally fine lot and will be entered in all the two-ear-old stakes to which they are eligible.

Although it will be a year before these babies are ready to race, they already have all the earmarks of real high-class runners, and if looks count for anything their owner expects them to all make names for themselves in future turf history.

Maid of Avon, by St. Avonicus—Maid of Fermoy, by Trentola, and imp. Minnow, by Minoru—Slave Trade, by St. Serf, have been bred to Mr. J. H. Rosseter's recent purchase, Disguise.

Imp. Atheling, by Desmond—Wood Daisy, will begin his breeding season of 1918 at Pleasanton, Cal., where a part of the Nevada Stock Farm brood mares are located. Of the mares booked to Atheling, now at Pleasanton, are:

Celesta (present mile and a sixteenth American record holder), by Sempronius—Rezia, by Meddler.

Imp. Gladiola, by Dark Ronald—Ki Ki, by Matchmaker.

Scarlet Oaks, by Dick Welles—Glena, by Free Knight.

Envy, by Kenilworth—Mitten, by King Eric.

Jeanne d'Arc, by Ben Strome—Naoma, by Oddfellow.

Sugarmaid, by Salvado—Saccharoid, by The Judge.

Ida, by Peep O'Day—Hanoverine, by Hanover.

Thistle Belle, by Knight of the Thistle—Belturbet.

Early Wright left last week for Havre de Grace, Maryland, in charge of Mr. Geo. Wingfield's stable of horses, which will be raced on the Eastern tracks this season. The horses, which have been in light training at Pleasanton for a month or more, embrace the unbeaten three-year-old Tombolo, the speedy sprinter Bank, Slippery Elm, Star Shooter, Square Set, Lycia and Miss Fielder. Three fast two-year-olds will also go along with the older horses. They are Carey Maid by Joe Carey, Maid of Avon; Fireplace by Ossary, Anna May; and Snow Queen by Starbottle, Sugarmaid. Great performances are expected of Tombolo, who won his two starts in a gallop.

It has been definitely decided to hold a race meeting at Reno, Nev., this summer. All arrangements to that end have been made and the races will commence on the 15th of June, continuing for nineteen days and closing on the 6th of July.

When Emil Herz purchased High Cost, the bay son of Von Tromp and Mitten, from Roy O. Egan last week, he came into possession of a three-year-old that has every right to be regarded as one of the best of that division. Out of seven starts last season as a two-year-old, High Cost won six races and was second in his other start. At New Orleans he started twice this year, winning one race and finishing third in the other. He is entered in the Kentucky Derby, and it is entirely likely that if he trains up to it he will be a starter. He has shown every indication that he would go a route and, should he start in the Derby on May 11, it is certain that he will be among the first choices, no matter what the company. He is now in the capable hands of Jack McCormick at Hot Springs and later will be shipped to Louisville to join the others of the Herz string. The price reported on this colt was $15,000.

William O. Reynolds, a wealthy banker and mining capitalist of Denver, Colo., has purchased the holdings of W. W. Finn in the Overland Park racetrace. This may clear up the racing situation in Colorado which has been in a state of stagnation for some time.

W. W. Finn has just returned from Cuba and is conferring with some Eastern parties about a racing circuit in the International district. He seems to think the prospects are very bright for an extensive season among the gallopers. There are a few possibilities open for meetings, such as Denver, Cheyenne, Salt Lake, Reno, Alberquerque, Pueblo and Colorado Springs.

MONTGOMERY SOLD

Randall C. Sage, well known Winnemucca stock man, has purchased the famous stallion Montgomery from the Nevada stock farm, also the brood mares Eleven Bells and Chaste. The horses are now at Sage's place, Disaster ranch, near Winnemucca.

Montgomery is a chestnut horse, foaled in 1904, and the winner of thirty-seven races and $82,900. He was thirty-six times second and twenty-three times third. His wins include the Burns handicap, carrying 128 pounds, value $10,000; the Commonwealth handicap at three years, beating among others Frank Gill and Dandelion, and the Crescent City derby, at New Orleans, carrying 117 pounds. He ran second to Nealon for the Suburban handicap, defeating among others such great race-horses as Ballot, Peter Pan, Frank Gill and Fair Play.

Edna F., the first two-year-old by Montgomery to face the starter, was a winner of three races in 1916. Zubelda, a two-year-old of 1917, was a very highly tried yearling, but was unfortunately cut down in her second start while leading and running a winning race.

Montgomery's sire, Passara, was a stake winner and a sire of stake winners, and from the Dance family that produced Domino, Faustus, War Dance, Hamburg and other great horses.

Montgomery Cooper, dam of Montgomery, was by Duke of Kent, a son of Bonnie Scotland, who led the winning sires of America at the age of 30.

Eleven Bells is by Quicklime out of Elsie S. Quicklime ran second in the English derby. Elsie S. was by Powhattan, a son of the great Leamington, who was by Faugh-a-Ballagh, own brother of Irish Birdcatcher. Eleven Bells was a winner of over eighty races at all distances. She is in foal to imported Honeywood.

Chaste is by Jim Gore out of Smoke House. She will be bred to Montgomery.

At Disaster ranch Sage has two other stallions—Ned Warren by The Friar out of Reel, and St. Francis by Rubicon out of Why Not.

His brood mares include Cassall, Chaste, Miss Molly and Nadina Rela, which is in foal to Ned Warren.

Sage has done considerable racing in the past on the fair circuit, but intends going into the game on a larger scale. He expects to be well represented at the coming Reno meeting, where he will in all probability race Disaster Maid, named after his ranch, and which has been nominated for the Nevada futurity. Disaster Maid is by Starbottle out of Cassall.

He will also train Nevada Girl by Montgomery out of Cassall, a three-year-old chestnut filly, named by the way by George Wingfield and Frank Bain, a bay three-year-old colt by Starbottle.

KENTUCKY TRACKS TO HAVE PICK OF JOCKEYS

Louisville (Ky.), April 10.—As the time draws near for the opening of the spring racing meeting on the Kentucky tracks, each day brings new arrivals of jockeys, who have been performing on the winter tracks and others to get in condition for the meeting. Among the latest arrivals are Lambert Garner, who rode at New Orleans, and "Red" Wingfield, who has been riding at Havana.

The prospects are that the Kentucky courses this year will have the pick of the jockeys of the country. Willis Knapp, who piloted the greatest number of stake winners of any rider in the world last year, will have the leg up on Sun Briar in the Kentucky Derby. Frank Robinson, who led the list of jockeys in the number of winning mounts all through the winter, will have for his mount the pick of the horses that Harry Payne Whitney elects to start for the turf classic.

John F. Scherr will bring to Kentucky W. J. O'Brien, who has been attracting attention in the saddle at Hot Springs. O'Brien will join the stable of the Washington newspaper publisher and turfman, E. B. McLean, when that establishment reaches Churchill Downs. Andy Schuttinger, who rode for the J. W. Corrigan stable last year, now under contract to James Butler of New York, probably will come West to ride Recount for Andrew Miller in the Derby. Schuttinger rode the great gelding Roamer in all his races in 1917.

Captain J. K. L. Ross, the wealthy Canadian turfman has obtained the services of Jockey Lawrance Lykes for the season of 1918. Lykes rode a good second to Robinson this winter, both at New Orleans and Hot Springs.

In the event of Judge Nelson Hot Springs lifts the suspension under which Eddie Martin was placed recently, or the Kentucky Racing Commission grants him a license to ride in Kentucky, he will pilot one of the trio nominated by Major McDowell, the Lexington turfman, for the Derby.

Mack Garner and Roscoe Goose are at liberty to take outside mounts in the Derby, their employers not having an entry.

R. Troise has reported to the Emil Herz stable at Douglas Park. This youngster was the find of the 1916 winter meeting and rode around the New York tracks last year.

Among the apprentice riders who have shown ability on the winter courses to be seen here are James Gruber and Harry Lunsford, Louisville boys who have been riding in Cuba, and E. Sands, whose saddle work at New Orleans and Hot Springs has been of the highest order.

MAJOR CASSATT TO QUIT TURF

Major Edward B. Cassatt, who is a member of the Board of Stewards of the Jockey Club and a prominent horseman, has decided to dispesre his racing stable. All his horses will be sold May 27 at Belmont Park.

For several years Major Cassatt has bred his horses at the Chesterbrook Farm, near Berwyn, Pa., and his father before him, the late A. J. Cassatt, raced one of the most famous of American stables. When Major Cassatt went into racing and breeding seriously, he purchased the good English stallion Aeronaut, one that raced with a full measure of success over the American tracks, and he has made good very amply as the head of the stud at Chesterbrook.

Among the good ones he has sent to the races are Trial by Jury, Flying Fairy, in her time the best filly racing, and Spring Board, one of the shiftiest of sprinters of his time. Garbage, a son of Aeronaut, was winner of both the United States and the Grand Union Hotel stakes in his two-year-old form, and he is still a truly useful horse. And there were other good ones.

A few seasons back there was a disastrous fire at Chesterbrook, in which some of the broodmares were destroyed, but there are still left a goodly band of matrons and in addition to Aeronaut, the son of Ayrshire, Major Cassatt has the Frenchbred horse Cavalcadour as his stud.

Some of the horses in training that are to go under the hammer are Buckboard, a son of Aeronaut and Bettie Bouncer, that for a time last year gave promise of being a first-class colt. He was started in the Lawrence Realization against Omar Khayyam and Hourless. Later in the fall Buckboard was a victim of lockjaw and he is one of the very few horses known to recover from that dread affliction. He is back to robust health and he ought to be a first-class four-year-old. Others are Daedalus, Camba, Perigourdine, Trite and old Garbage.

Two-year-olds in the string are Avion, a bay son of Aeronaut and Princess Chic; Cinders, a chestnut son of Aeronaut and Trash, and accordingly an own brother to Garbage; Cavalier, a bay son of Cavalcadour and Miss Perigord; Florom, a chestnut son of Aeronaut and Sweet Flowers, and Equerry, a bay son of Cavalcadour and Sunrise.

Yearlings at the farm are Ford, a bay son of Aeronaut and Bettie Bouncer, and an own brother to Buckboard and Spring Board; Paphank, a bay son of Aeronaut and Sand Bank; Belgian Queen, a bay daughter of Aeronaut and Angler; Flypaper, a bay daughter of Aeronaut and Foothold, and Incinerator, a chestnut daughter of Aeronaut and Trash, and accordingly an own sister to Garbage.

Major Cassatt has taken the liveliest interest in racing ever since his entry into the American turf and from time to time he has officiated in the stewards' stand. He was a member of the committee on the revision of the rules a year ago and many of the changes were of his own suggestion. Last season at Saratoga he made a test of one of the rules that resulted in a further amendment and at all times he has worked earnestly for all that was best in the sport.

His silks, the red, white and blue thirds, were tremendously popular wherever they were shown, and they will be sorely missed the coming season. Just now Chesterbrook enjoys the reputation of being the oldest thoroughbred breeding establishment in Pennsylvania, though the success of Major Cassatt has induced several other sportsmen to go into breeding in the State.

Major Cassatt said that he expected to return to the turf after the war, but that until then he would give up racing and breeding.

FUNERAL SERVICES OF C. T. PATTERSON

New York, March 29.—The funeral of Charles T. Patterson was held at his residence in Queens, L. I., at 11 a. m. this morning. As the interment will be in Lexington, the services usually held at the house were all that took place. Later the remains were shipped to Kentucky.

Although this is a very busy time of the year for horse owners and trainers, there was a large attendance of friends at the Patterson residence, although nearly all present were New Yorkers. Funeral services were conducted by the Rev. J. S. N. Demarest of the Dutch Reform Church at Queens, who, after the reading and prayers, spoke briefly, eulogizing the deceased, dwelling especially upon his uniform uprightness and his unvarying kindness to his relatives, friends and acquaintances.

There were many and varied floral offerings from friends in Lexington, Pittsburg, Manhattan and Brooklyn, as well as other cities; but one which attracted especial attention was a large horseshoe which had been sent by the grooms and other stable attaches who had been in the employ of Mr. Patterson. He was also remembered in this way by many trainers, owners and other turfmen of Belmont Park, as well as Manhattan and Brooklyn.

There were also reminders from members of the trotting horse fraternity who had not forgotten that several years ago Mr. Patterson had been an ardent devotee of harness racing. Indeed, there were many old stablemen who had known the deceased when he was handling and driving trotters, who sent messages of condolence and expressions of heartfelt, personal grief at the loss of a highly prized friend.

Among those who attended the funeral were, besides Charles Patterson's two brothers, Kimball and Rody, both of whom have charge of racing stables, and his younger sister, Miss Margaret, the following personal friends: S. C. Hildreth and Mrs. Hildreth, Thomas J. Healey and Mrs. Healey, William Hogan and Mrs. Hogan, James W. Bean of Washington, Edward E. Buhler, president of Queens Citizens' Association, and Mrs. Buhler, A. J. Joyner, W. B. Jennings, Max Hirsch, W. H. Karrick, Thos. Welsch, Sandy McNaughton, W. C. Fessenden, John McTaggart, J. Loftus, C. Fairbrother, Charles Ebbets, J. P. Leher, John Leher, Jr., W. H. Graves, Jerry Carroll, William Midgley, Dr. C. A. Ross, who attended Mr. Patterson in his last illness; Mrs. Henry Stein, Mrs. George Walden, Mrs. Rene Hayden, Mrs. Sommergill, Mr. Kilsey, Miss Kilsey and many others of the neighbors living in Queens.

R. L. Gerry, Mr. Patterson's late employer, who is in the Army Transport Service, being on duty at the time, found it impossible to be present at the funeral and was represented by his secretary, Mr. Halliday.

JOCKEY WILLIE KNAPP

Willie Knapp won during the season of 1917 more large stake races than any other jockey in the world. Jockey Knapp is not mentioned in the list of the first thirty American jockeys in point of number of races won, says the Binghamton "Republican-Herald." Many riders had more than 700 mounts and some nearly 800. Yet, Knapp won virtually all the big stakes in Saratoga, including the Saratoga Special, the Albany Handicap, the Grand Union Hotel States, the Hopeful, the Great American Stakes at Aqueduct, also the most valuable stake on the Kentucky tracks during the Fall meet.

It requires more skill to win a high-class stake race than to win a cheap selling race. It requires more skill to ride a high-class horse than a selling plater. Anybody can sit a docile farm horse, but it needs a well schooled equestrian to manage a Kentucky saddle horse or a sensitive thoroughbred. There are exceptions to all rules, but competition is generally keener between jockeys in big races; the average talent represented in riders is higher and the horses require finer control and better handling. The big purses bring out the best horses, best efforts of the trainers and the best riders. In other words, there is stronger incentive, a greater demand for superlative effort and ability to win a classic competition than an ordinary race, and the victor is rated accordingly.

Most of Knapp's victories were won on the grand two-year-old, Sun Briar, but Knapp usually had good mounts, a fact that proves that owners and trainers placed confidence in his qualifications.

Practically every race Knapp won was ridden with master hands. His judgment of pace is almost perfect. His imperturbable character gives wonderful control of himself, hence control of his mount. He is exact, unexcitable and clear sighted and quick to take advantage of the rapidly changing conditions incident to every running race.

Willie Knapp is a veteran rider. Frequently during the last season his experience and good judgment was demonstrated in strong contrast against the work of contending jockeys. It is the opinion of Mr. Willis Sharpe Kilmer, owner of Sun Briar, that had Knapp ridden his colt in the United States Hotel Stakes at Saratoga, the horse would have added that race to his laurels, Knapp having won all other major stakes for two-year-olds at this meet. He does not, however, discredit the work of Jockey Troxler, who arose from bed after a serious illness, to ride the great colt Sun Briar.

It is a great accomplishment to win a large number of races, but it is a greater thing to win a large number of big stake races; it bespeaks the possession and exercise of superior endowments as far as the ability of the rider goes.

Willis B. Sink, formerly a prominent horse owner and business agent for the Santa Anita Stable owned by the late E. J. Baldwin, died lately at his residence at Napa, Cal. Deceased was a native of Philadelphia and was born in 1840. He had resided in Napa for the last five years. Mr. Sink was the owner of Sister Mary and other noted performers during his turf career.

CANADIAN SPORTSMEN TO RACE

Messrs. Wilfred Viau of Montreal and Jno. Lumsden of Ottawa, who are wintering strong strings of thoroughbreds at Benning track, and Mr. J. K. L. Ross of Montreal, whose stable of American and British bred thoroughbreds is at Yarrow Brothers' farm near Laurel, are among the heaviest of the nominators in stakes to be decided at Havre de Grace this spring.

Mr. Ross has named his $30,000 Broomstick, four-year-old Cudgel and the imported three-year-olds Hillhampton, Wigstone, Bonnie Dance and Corn Exchange for the Havre de Grace stakes for horses of mature age. Mr. Viau has made similar arrangements for his four-year-olds Westy Hogan, winner last fall of the Bowie cup at Pimlico, and Omar Khayyam, winner of the Kentucky Derby and Lawrence realization stakes of 1917, and Mr. Lumsden has put in nomination his strapping four-year-old Bachelor's Bliss and his three-year-olds K. of K. and Manchura.

LETTER FROM C. A. HARRISON

While in Vancouver, B. C., a few days ago, I saw W. C. Brown selling his good pacer, Prince Malone 2:14¼ by Kinney Lou 2:07¼, to Mr. S. J. Thompson, who put Prince Malone in a box car with 20 draught horses and started for Alberta.

M. S. Rose has just sold ten light harness horses, headed by Frank D. Nichol 2:20, son of Cresceus 2:02. This fleet of hay destroyers were all taken to Alberta.

Ed Bourgoyne has sold the stout shanked and fast trotter, Bon Guy 209¼, to a Mr. Griffith for $1000. Bon Guy also goes to the Canadian prairie country.

J. T. Wilkinson recently sold a very neat four-year-old mare by Ora Wilkes Jr. out of Hazel Wilken by Zombro. This leaves Mr. Wilkinson with but two hay destroyers.

Chas. Guion, the man who did so well with Flora Dora Z. 2:11¼, is at North Yakima. Charley has Starost 2:13¼ by The King Red 2:20 and Bubbles 2:20 by Barney Mack; also a Hal B. mare of the pacing persuasion.

John B. Stetson has wintered at Yakima. Mr. Stetson has May Day Hal, sister to Hal Boy. The pacer should be some good this year, for she has eaten a lot of nice oats and hay and has had nice training by Mr. Stetson since last June, and it is myself who pays the bills. I also have in Stetson's stable a nice four-year-old trotter to King Brook 2:07. This chap was a stallion up to ten days ago, when I gave him the unkindest cut of all. As a stallion, didn't seem to be of much use in the West, no breeding being done.

I think that in ten years Mr. Farmer will be at a loss to know why hay and oats and barley and alfalfa and land are so cheap. But Mr. Farmer will find out that cows and automobiles and tractors can't eat all the grain and hay and that Europe, the Argentines and Russia and Asia will raise more grain and hay and cattle and horses and hogs after the war than ever before, and by that time Mr. Smart Farmer will find that the auto trust and the tractor trust have combined to raise the price of autos and tractors and the cost of land fertilizer will go up and land will get cheap, and the Mr. Farmer who now is listening to the seductive talk of the auto makers and salesmen will find that friend horse was a friend in need as well as in deed and again begin to raise colts on his farm. Just wait ten years and see if I am talking through my chapeau or telling cold facts.

Well, any way, I hope 1918 will be a good year for every man engaged in the harness horse industry. Yours truly,

C. A. HARRISON.

SADDLE HORSES BRING GOOD PRICES

There is a good demand for classy saddle horses. New riding academies as being started in all the larger cities of the United States, and riding is rapidly becoming the most popular diversion of fashionable society. Many prominent members are taking an enthusiastic interest not only in showing their horses at the fashionable shows, but in breeding as well, and are investing big sums for breeding stock that promises to produce prize winners. They are taking a great pride in the possession not only of the horses, but an equipment that goes to make a correct and completely appointed establishment. The automobile has replaced the roadster, and the garage has supplanted the livery stable. The public has lost interest in driving horses on the road for pleasure and a two-minute performer on the track only excites passing comment among a few old-timers.

In this State there are a great many handsome standard-bred mares that at present there is little prospect of being bred this year. To breed mares having the style and conformation to produce high-class saddle horses to such saddle stallions as Le Grand McDonald will be profitable and much more certain of remunerative returns than to breed them to standard stallions hoping to race the produce.

Le Grand McDonald is one of the best representatives of the popular five-gaited saddle horse class in this part of the country and his foals bring big prices.

At the weekly race meeting of the Pinehurst Jockey Club, Pinehurst, N. C., Jockey Whymark performed a very unusual feat during one afternoon. He won the five furlong handicap with Lady Betty, and followed this up by taking the seven furlong handicap with Melly O. He then drove Little Pap first under the wire in the trotting race and finished off the day by winning the mile and a half steeplechase on Dave. Whymark is the regular stable jockey under engagement to C. N. Gibbs of Calgary, Alberta.

Test races in France will again be arranged this season, the Minister of Agriculture having expressed his appreciation of the value of these events from a national point of view to the stewards of the French Jockey Club. The season at Chantilly will extend over twenty-six days, during which 156 events will be decided. The spring meeting will begin on April 29th and continue to May 27th; the summer fixture commences on June 6th and will extend to July 1st; and the autumn reunion will start on September 5th and conclude on October 10th.

TROTTING GOSSIP

[By W. H. Gocher]

One of the most peculiar features in connection with the Kentucky Futurity to which the nominations for its twenty-eighth renewal close on April 15, is that over one-half of the events contested since Oro Wilkes was returned as the winner of the first one in 1893 have been won by men who made but very few nominations. An analysis of the returns discloses the fact that fourteen of the races for the three-year-old division, which is the most important feature of the event, were won by nominators who made only twenty-six entries. The dams of Peter the Great, Sadie Mac, Grace Bond, Miss Abdell, Manrico and Etawah were the only mares named by the men who were recorded as the breeders of these winners in their respective years, while Grace Bond also won the two-year-old division and Peter the Great finished second to Janie T. in 1897. Of those who made but two nominations in the Kentucky Futurity, the breeders of Oro Wilkes, Rose Croix, Nella Jay and Siliko named winners, while Peter Volo would also have been added to this list if he had not been bred in partnership with the owner of his sire. Boralma and Volga were named by breeders who had but three nominations in the Kentucky Futurity in their respective years, and Volga also won the two-year-old division. The breeder of Beuzetta, winner of the Kentucky Futurity in 1894, the year that it was worth $26,430, had but four nominations.

Clarence Cole is getting Jay Ell Mac 2:02¼ ready for the races over the mile track at Indianapolis. Those who are expecting Ben Earl, Roan Hal and Single G. to win all the free-for-alls on the half-mile tracks should not overlook this horse, as he forced Ben Earl to his record at Columbus.

C. E. Pitman is busy training eighteen trotters and pacers at Trenton, N. J. The best known ones in the group are Ben Ali, Premier Witte and Judge Sale, which the New Brook Stable purchased out of a race at Lexington last fall.

F. C. Burnie of Presque Isle, Me., purchased Royal McKinney 2:12¼, after he defeated Hal L. in a $1,000 match race at Fort Fairfield. He is a very fast sprinter and can step a quarter in twenty-nine seconds.

The three-year-old colt Coldstream will be prepared for his futurity engagements by Alonzo McDonald. As he trotted in 2:11¼ last season he has a chance in any company.

Azora Axworthy 2:06¾ is still in Murphy's stable at Poughkeepsie. She was not started last year.

A. E. Dorsey of Findlay, Ohio, expects to duplicate Little Frank D.'s trip through the Grand Circuit with the Redlac horse Un 2:09¼, for which he paid $2,650 at the Chicago sale. Valentine will train him.

Northspur will make his first start in 1918 at Cleveland in the 2:08 class. This little son of San Francisco should not be overlooked, as he was up to a mile in 2:04 last fall.

Stout Bros. will race Blanche Carter over the mile tracks this year.

Of the nine renewals of the Ohio purse at Cleveland, Lon McDonald won three, with Bob Douglass, Lewis Forest and Star Winter. Marigold and Peter Scott placed two of these events to the credit of Tommy Murphy, while he will try and win another one this year with either Kelley DeForest, Peter Vaughn or Peter Chenault.

HORSE AMBULANCES FOR PERSHING'S FORCES

Ella Wheeler Wilcox on Way to France With Offer of Help for American Army Animals

Albany, N. Y.—Mrs. Ella Wheeler Wilcox, the "Poet Laureate of Humanity," is on her way to France as general representative of the American Red Star Animal Relief. She is to see General Pershing and to offer two motor veterinary ambulances, costing $10,000, given by American citizens through the American Red Star.

Dr. William O. Stillman, director general of the Red Star, interviewed at the national headquarters in this city, said the offer was part of the Red Star's efforts to co-operate with the American army. "Our army," he said, "has one horse or mule for every four men and it is necessary for the success of the campaign that the horse supply should be maintained at that high standard. With ships becoming scarcer and the demand for shipspace more imperative, it is essential that every curable horse should be saved.

"The European armies are giving the greatest possible care to wounded animals. The British have a magnificent hospital service so efficiently managed that 84 per cent of the animal cases are being cured and shipped back to the battle-ground.

"The American army must be as well equipped as the best of the European armies in this respect, and we are arranging to have these ambulances sent from England to save time and shipspace. The ambulances are of the newest type and each will carry two horses.

"Of course, the Red Star will send more ambulances and other supplies as they are needed. The offer through Mrs. Wilcox is just a beginning—a rush order to meet the earliest emergencies."

At the annual meeting of the Canadian Thoroughbred Horse Society held Monday last at the Carls-Rite, it was decided that, in conjunction with other breeding associations, representations should be made to the Dominion government with regard to the disastrous effect on the horse-breeding industry of the cessation of racing in Canada. It was pointed out as an anomalous condition of affairs that American jockey clubs had found occasion to provide races strictly for Canadian-breds as an encouragement to breeders of which they were deprived at home.

The report presented by Secretary T. J. McCabe showed a slight increase in registrations and memberships paid as compared with 1916, but a considerable reduction from the previous year. The figures, the report said, "reflected a very strong evidence of the effects of the great war on the thoroughbred industry of this country and now that parliament has, during the past year, legislated against racing for the duration of the war, the natural tendency on the part of breeders will be, for the time being, at any rate, to refrain from adding to their studs by any increase in the number of brood mares, in fact, some prominent breeders have been gradually disposing of their brood stock for months past and abandoning entirely their interest in the industry. This feature, of course, is very lamentable, considering how much Canada, in recent years, has drawn the attention of other countries to our native stock and exporters have risked consignments of bloodstock to be shipped and disposed of to improve our native stock."

Of the amounts of the purses on the courses of the Canadian Racing Association during 1916 the sum of $95,300 was given exclusively for Canadian bred and owned horses, as against only $65,150 last year, racing having been suspended on July 31st. There never was a time when the farmer and breeder needed encouragement and financial assistance for the speeding up of production as at present. England's stock of light horses for remount and saddle purposes was almost depleted, and all European countries would certainly seek to replenish their stocks in the years succeeding the termination of the war and Canada should be in a position to furnish suitable material to supply the demand.

After recounting the action of the Government of Great Britain in giving ear to the representations of the breeders and recognizing the national importance of the industry by resuming racing after a short interruption, it was pointed out that this society should record its views as to the need of a remedial solution for what could only be a calamity if it resulted in allowing breeders to disband their studs and give up their interest.

A feeling reference was made to the public loss sustained by the death of the late John Bright, Dominion live stock commissioner.

On motion of Mr. H. M. Robinson, seconded by Mr. Jas. Bovaird of Brampton, it was agreed that steps should be taken to place the conditions before the proper authorities, the mover pointing out that the present provincial daily license fee was prohibitive of racing for even trifling purses, there being no means of revenue.

The mile track owned by the Kentucky Trotting Horse Breeders' Association at Lexington, Ky., is acknowledged to be one of the fastest, if not the fastest in the world and now holds the following world's records made over it:

One mile trotting, Uhlan, in 1912, driven by Charles Tanner, 1:58.

One mile by a stallion, Lee Axworthy in 1916, driven by Ben F. White, 1:58¼.

One mile with running mate, Uhlan, in 1913, driven by Charles Tanner, 1:54½.

One mile by double team, Uhlan and Lewis Forest, 1912, driven by Charles Tanner, 2:03¼.

One mile paced (with wind shield), Dan Patch, 1905, driver H. C. Hersey, 1:55¼.

One mile by three-year-old trotter, The Real Lady, 1917, driver T. W. Murphy, 2:03.

One mile by two-year-old trotter, The Real Lady, 1916, driver T. W. Murphy, 2:04¼.

One mile by yearling trotter, Airdale, 1912, driver H. C. Moody, 2:15¾.

One mile by yearling pacer, Frank Perry, 1911, driver Wick Curry, 2:15.

One mile by two-year-old colt, Peter Volo, 1913, driver T. W. Murphy, 2:04½.

One mile by three-year-old colt, Peter Volo, 1914, driver T. W. Murphy, 2:03½.

One mile by three-year-old gelding, Peter Thompson, trotter, 2:07½.

One mile trotting, by yearling filly, Anselila, 2:17½.

One mile trotting, by yearling gelding, Anselot, 2:28½.

One mile pacing by two-year-old colt, Poorman (jointly with Directly), 2:07¾.

One mile pacing by three-year-old colt, Peter Look, 2:03.

One mile trotting by four-year-old, Joan and Mary Putney, 2:04¾.

Notes and News

Peter Mac, 2:03¼, will be trained again this year and will start in a few Grand Circuit events late in the season.

Zeta Lucille 2:09¼, the mare lately purchased by S. H. Cowell from the Hemet Stock Farm, is now in training at Sacramento, in the stable of Walter Tryon, in preparation for the California Circuit.

Jas. Thompson is preparing eight head of standard breds, the property of L. H. Todhunter, for the Chicago Sale. Peter McKlyo 2:06 is in the lot which will be shipped about April 25.

There is as the result no lessening of the number of race meetings to be held and already owners and trainers are scouring the markets for racing prospects. Money is unusually plentiful and good prices are being paid.

There is no longer any uncertainty as to the position the government will take as to racing, it having been decided that racing will be encouraged and a tentative agreement has been made that transportation will be furnished as well as other assistance so far as possible.

M. C. Keefer will send The Proof and C. F. Silva will ship Little Jack, Dixon Boy and Bondalin in the car with Geo. Lowrey's horses which will leave Sacramento on April 25. All these horses will be raced in the Michigan Short Ship Circuit and later on in the Great Western.

Joe Carson of Winnipeg, Man., probably the most widely known harness horseman of Canada, has decided to retire from the racing game and has offered all his horses for sale. Mr. Carson intends to devote his time in future to raising wheat on the Alberta prairies.

Major D. A. McKinnon, who has seen two years' service in France with the Canadian troops, says that the brigade which he is now commanding has a number of American and Canadian trotting-bred horses and in his opinion the trotting-bred horse is very much superior to the thoroughbred for war purposes, the latter being too nervous and excitable.

A special meeting of the Board of Review of the National Trotting Association will be held at the Murray Hill Hotel, New York City, at 10 o'clock a. m. on Tuesday, May 7. All communications intended for consideration by the board at this meeting must be sent to Secretary Gocher at Hartford, Conn., not later than April 23.

Geo. Lowery of San Francisco has been wintering his Genl. Watts colts, Kiola Watts, Viola Watts and General Bond, at the State Fair Grounds in Sacramento. The stable is under the care of Thomas Hill, who has his charges looking fine and in the best of condition; he has been going along slowly with them, but has already worked miles in 2:22 with finishing quarters in thirty-three seconds.

S. L. Goldstein has just purchased through Baldwin & Howell a fifty-foot lot on the northerly line of Fulton street between Fifth and Sixth avenues. This lot, together with the other holdings of Goldstein in this block, gives him a frontage of 158 feet on Fulton street by a depth of about 135 feet, on which he intends to erect immediately a modern riding stable, plans for which are already completed and ground will be broken at once.

There will be no polo games in the East this year and the ponies of all the players will not even receive preliminary training. The last of the lot to be absolutely put out of training were those of Henry Payne Whitney, which have gone to pasture with no chance of being used this summer. Most of the polo players have enlisted and there would be no one to play even practice games.

Mr. G. L. Blosser of Santa Maria, died recently. Mr. Blosser was widely known amongst the owners and trainers of harness horses. He was formerly the owner of Rapello, the fast half-brother to San Francisco 2:07¾, which was campaigned on the Eastern race tracks; of late years Mr. Blosser was associated with W. H. Finley in the firm of Blosser & Finley, owners of Mono Ansel 2:09¼, Pope Hartford 2:09¼, Ben Corbett Jr. 2:06¾, and other noted performers.

Joseph Marzen died recently at his home in Sacramento. For the past eight years he had lived in Sacramento, and would have been 90 years old on May 5th, this year.

The deceased was a native of Germany and has been one of the most prominent exhibitors of cattle at the State Fair for many years. He was an old pioneer of California, having come to this state in 1849. He was a prominent cattleman and land owner in the early days of the West. In 1853 he joined the Masons in Tehama county. Later he joined the Knights Templar and the Elks Lodge at Reno, Nevada. In the 50's he conducted butcher shops in Sacramento.

Deceased is survived by his widow, Mrs. Catherine Marzen, Joseph Marzen Jr., a son, of Truckee, Cal.; Mrs. John Soule and Mrs. Edward Cozzen, daughters, living in British Columbia, and Mrs. Edward Joseph Hill, a daughter, living in Reno.

Will Rosemire, who has just returned from Russia, reports that racing in that country is in a demoralized state. The Bolsheviki have confiscated many racing stables and in many cases horses have been turned loose. The famous grandstand at Moscow is practically ruined and the famous hotel in that city, The Metropole, has been smashed by shells. Sam and Will Caton, sons of Frank Caton, were in Russia when he left, but as both were then preparing to leave for their native country, they may be on their way now.

The new "daylight law," established by the government, which went into effect March 31, will, without question, meet with the approval of horsemen and race track crowds. It involves moving up the clock one hour, thus starting the day earlier and having an extra hour of daylight in the afternoon. The thousands of our citizens who have war gardens will be benefited, as it will enable them to get home early and work their truck patches before sundown. October 27 is the date when the daylight law goes out of force.

Hanford, March 28.—Kings county's fair grounds will be enlarged and a one-mile standard race track will replace the present half-mile track if the provisions of a judgment just rendered by Judge M. L. Short are not set aside through the application for a re-opening of the case made by the defendant. Judgment has just been awarded the county condemning a strip of land off the J. V. Rodrigues and Nancy McJunkin ranches, embracing eleven acres, and awarding $4467 damages to the ranchers. The defendants claim that sufficient hearing was not had in the matter and they have applied for a new trial.

The most appropriately named trotter that appeared on the turf last season was the good colt Bumper Crop, by The Harvester. City Girl, out of Town Lady, was another with a most appropriate name, as were Symphony and Harmony, both out of Melody; Bond Issue and Security, both by The Bondsman; The Eskimo and The Norseman, both by The Northern Man; Dusty Girl, by The Tramp; On the Rhine, by Bingen, and Day Spring, out of Morning Bells. Breeders of trotters have not given their horses the pleasing and appropriate names bestowed upon the thoroughbreds, but they seem to be improving in this respect.

F. T. Stiles, of North Haven, Conn., bought recently of Clarence J. Berry, the California horseman, the trotting mare, Virginia Barnette, 2:08¼, by Moko, and the five-year-old pacing mare, Miss Rico (4), 2:03¾. Mr. Stiles will have them raced the coming season. Virginia Barnette is a very fast mare, but has not made good her early promise, for at two years of age she trotted a half in the sensational time of 1:00¾. She is by the great sire Moko and out of the high-class stake winner, Zephyr, 2:07¼, by Zombro, 2:11. Mr. Berry paid E. T. Barnette, breeder of Manrico, $10,000 for her after her two-year-old performance. Miss Rico took her record the past season against time and as she is now a five-year-old should be at her best and a hard mare to beat. She is by Manrico and out of Subito, the dam of white Sox, 2:03¼, and grandam of Rico (4), 2:05¾.

Over 800 trainers and drivers of harness horses have been licensed by the Victoria Trotting Association of Australia. The sport has made a surprising growth there and is being well supported.

That the new $300,000 building which is being erected at the State Agricultural Grounds will be ready for use, even though it may not be completed as to its minutest details, for the State Fair is quite certain, according to information gleaned in the office of the state architect recently.

The concrete work was begun a week ago and already the work of fabricating the steel is under way, so that it will be delivered at the grounds at least by June 1. From the time the steel is received the work of construction will continue rapidly until it reaches completion.

The Toledo Driving Club Company has adopted a rule that all youngsters entered in the events for two and three-year-olds must be registered, and has announced the same as one of the conditions for their races. While at the present time it would not be practicable to make this condition apply to the events for aged horses, it is a move in the right direction to encourage registration for race horses of all ages. Registration at the early age of two years is a comparatively simple matter, and as the years pass on all performers would in time be registered. It is to be hoped that other associations will follow the example set by the Toledo Driving Club.

Racing in Colorado, both harness and running, has been practically dead for the past two years. There is really no good reason, only possibly from the fact that there has been no one to take the lead and start it. Practically all of the fairs in the State have been using wild west and auto racing as their line of amusement, and find that it really does not draw the crowds or furnish the entertainment that holds the crowds like the Sports of Kings. This year through the efforts of the Colorado State Racing Commission, composed of such well known horsemen and fair men, as W. H. Gates, J. A. Simonson, Dr. M. J. Dunleavy, J. L. Beaman and D. W. Thomas, a racing circuit composed of six good Colorado towns was organized, which insures six weeks of a good harness and running program. If the efforts of these gentlemen are appreciated and the horsemen furnish a good list of entries for this year, we have the assurance that next year will find Colorado back in the list with several other good meetings.

An inspection of horses for the United States Cavalry was held in San Benito recently by Lieutenant Catlett, assisted by a civilian clerk from the Camp Fremont auxiliary remount depot. About 125 horses were brought in during the morning by ranchers from all over the northern part of the county, and a small percentage accepted as meeting the government specifications. Out of the entire lot only about 20 were accepted.

Most of those accepted were horses that had been placed under contract to one W. J. Greer, and who received ten per cent of the purchase price paid for the animals. Some of the owners of horses had traveled many miles with the expectation of making a sale, and never even had a look in. After the geldings had been passed (some 16 in number) the mares were then lined up, and after a cursory examination, four or five were accepted, and no attention paid to the other owners, who were not even told that the inspection was over. One prominent horse owner informed us that he was dismissed with the uncalled for remark: "Get to hell out of here." It will probably be a long time before any more horses will be brought in for government inspection.—San Benito Advance.

Bob Sebastian has been quite busy at San Bernardino during the winter training quite a large stable. Mr. Sebastian has an own sister of Peggy C., p. 2.09¼, a five-year-old, that has shown him quite a little with a limited amount of training. It will be recalled that Peggy C. was brought out last year by Bob, winning every race for him, and sold during the early Omaha meeting to a patron of Lawrence Shuler. A green trotter by Direct Hair, p. 2:12¼, dam by Zolock, p. 2:05¼, though strictly pacing-bred, is very likely to develop into a high-class race mare, having done everything asked of her so far.

A recent addition to the stable, purchased from W. G. Durfee, of Los Angeles, is a green trotter by Carlokin 2:07¼, dam by Strathway. Flash H., p. 2:13¼, with nine winning races to her credit in 1917, her first year's racing, has wintered well, and will be a strong factor in the 2:14 classes the coming season, as she worked in 2:07¼ after reaching California last fall. When Sebastian shipped over the mountains after racing through the Platte River Valley Circuit, he had in his car the pacing mare Dooney R., by Peter the Great, dam by Todd, owned at Midway Stock Farm, Kearney, Neb. This green mare has improved in a most satisfactory manner, and not only her owner, who watched the mare in a work-out early in February, but her trainer, thinks well of Dooney R., as a candidate for the slow pacing classes of 1918. Unless shipping conditions are such as to prevent, this stable will be at the opening meeting of the Nebraska Circuit.

THE CHICAGO SALE

The Chicago Sale held March 6, was a very successful affair; although the number of offerings was small, the buyers were numerous, and many of them went away unsupplied, as there were not enough horses to fill the orders. Anything that looked as if it would race was immediately snapped up and many of the purchasers changed hands after the auction, at a substantial profit. The Chicago Horse Sale Company's next sale will be held the first week in May. The following, shipped from California, are in the list which brought over $200:

Astro Harvest, b. m. (8), by The Harvester—Grace Rysdyk, by Judge Rysdyk; Paul Kuhn, Terre Haute, Ind. $350

Zombrino S., b. m. (7), by Zombrino—Katherine S., 2:19, by Diablo (4), 2:09¼; E. J. Moriarity, Chicago, Ill. 500

Mildred T. Watts, b. f. (2), by Mahomet Watts—Mildred Togo (3), 2:11¼, by Togo; Magnus Flaws, Chicago, Ill. 210

Lady Verna Hawthorne, b. f. (1), by Vernon McKinney—Hawthorne Haw, by McKinney; A. W. Longley, Chicago, Ill. 210

Johanna, bl. h. (8), by Carlokin—Johanna Treat, by Thomas Rysdyk; Charles Dean, Palatine, Ill. 400

Star Dillon, b. g. (6), by Star Pointer—Miss Harris, by Sidney Dillon; Magnus Flaws, Chicago, Ill. 325

Silver Rico, b. c. (2), by Manrico B.—Helen Stiles, 2:06¼, by Sidney Dillon; Sol Ritts, Newport, Nebr. 210

TROTTING GOSSIP

[By W. H. Gocher]

Walter Cox says that the San Franciscos are the toughest family of trotters that has ever been seen on the turf. Mary Putney was in a class by herself in her three-year-old form, and last year she worked the Dover track faster than any of the horses in his stable before being shipped to Cleveland, where she died. Northspur was certainly a busy horse after he won on the last day of the the Cleveland August meeting. Between that date and the opening day of the September meeting at Columbus, he was started in six races, of which he won two at Philadelphia, a first and a second at Poughkeepsie, where he trotted in 2:09¼; another first at Syracuse, where he defeated Peter Chenault, Koroni and M. L. J., and a third at Columbus, where he finished second in one heat to Straight Sail in 2:04¼. Northspur will be a very useful horse for Cox this year. His faith in the San Francisco family, however, is founded on the stubborn battles which St. Frisco put up during the past two years with Mabel Trask and what Lu Princeton did for him last season. Cox purchased Lu Princeton early in 1916. He was eligible to the 2:18 class and had nothing to show for a turf career but a good pedigree and a victory in a seven-heat race at Rockport, Ohio, where he won a third heat in 2:17¼, a sixth heat in 2:20¼, and the seventh in 2:20½. Lu Princeton's first trip through the Grand Circuit was almost a blank. Out of ten starts between Kalamazoo and Atlanta, he only finished second once and had one heat in 2:09¾ to his credit. That heat was won over Lakewood Park at Atlanta in his race with Azora Axworthy. Cox also says that he would not have won it if the colored boys on the bluff near the three-quarter pole had not frightened him with their imitation rebel yells. This was the same yell that scared The Real Lady and caused her to lose a race to Mary Coburn. In other words, what was poison for the Moko filly proved the making of Lu Princeton, as when Barton Pardee wanted to send him to the auctions Cox persuaded him to give the white-faced horse another chance. The returns for 1917 also show that he made good. In his first start at Cleveland in July he was unplaced to Royal Mac, but from that date he was either out in front or tapping at the door. After finishing second to Early Dreams at Detroit and Royal Mac at Kalamazoo, he won six races off the reel at Columbus, Cleveland, Philadelphia, Poughkeepsie and Syracuse. At the Columbus fall meeting Lu Princeton forced Early Dreams out in 2:04¼ in both of the races which he won, while he also won two races at Lexington and was again second to Early Dreams at Atlanta, where he won two heats in 2:04¼, but McDonald was fortunate enough to get the fifth and deciding one in 2:05¾. Before next fall Lu Princeton will be battling for championship honors with St. Frisco.

Alonzo McDonald is starting off the season of 1918 with nineteen horses in the big stone-barn at the Indiana Fair Grounds in Indianapolis. He has four two-year-olds, one of them being a brother to Eulabel; six three-year-olds, three of which are by The Harvester; as well as the trotters Early Dreams, 2:04¼, Zomrect, 2:03¾, Hallmark, 2:11¼, Axson M., 2:16¼, Apple Blossom, with a trial in 2:11¼, and Kentucky Lass, as well as the pacers Baymar, 2:05½, and Lady Faustina, trial 2:08¾. Early Dreams' splendid showing last year placed him in the free-for-all division, while Zomrect, under the time allowance rule, is now eligible to the 2:07 class.

Everybody connected with light harness racing has heard of "Doc" Tanner. His parents named him Charles, but someone substituted "Doc" and it stuck. While a comparatively young man, Tanner dates back to the early eighties as a race-track follower. He also had a varied experience before he became second trainer for Splan in 1893. Being too high-keyed for a race driver, Tanner found his opportunity in the matinee field, while his skill in conditioning trotters and matching teams for the amateurs made him in demand and led to his employment by C. K. G. Billings, for whom he marked Uhlan in 1:58 to harness, Uhlan and Lewis Forrest in 2:03¼ to pole, and Uhlan with running mate in 1:54½, all of which are the best to date. Before casting anchor at Cleveland, Tanner fluttered about considerable, and while on one of his rambles dropped off at St. Joseph, Mo. After locating the race track, it did not take him long to get a job with Col. W. W. Abbott. That breezy Westerner had a very fair stable of horses at that time, one of them being the savage brute Westmont by Colonel West, that had been raced with fair success for several years. Abbott told Tanner to take care of him and walked off without saying anything about him, taking it for granted that everyone west of the Mississippi river knew that Westmont was the worst tempered horse ever turned loose in a box stall. Unconscious of what was coming to him, Tanner walked into Westmont's stall, and when he did the horse made for him like an enraged lion. Fortunately there was a heavy bale stick handy, or Uhlan would have had another driver when he performed in 1912, and the free use of it soon made Westmont retreat. While he was belaboring the big brute, Tanner also decided that he would give Abbott a free sample as soon as he returned. The Colonel, however, failed to put in an appearance until near sundown, and when he did he was accompanied by a tall, slim man with a full beard and eyes that seemed to snap when turned towards you. Abbott showed his guest all of the horses except Westmont, and after a little visit they walked away in the falling darkness. Tanner asked the boy in the next stall the name of the stranger. When he learned it was Jesse James, for whom the government was offering a reward of $50,000, dead or alive, and who was at that time living at St. Joseph with his family under the name of Howard, Doc decided that Abbott was too well fortified for him to attack and quietly bid good-bye to Westmont and St. Joe.

Ed Geers has twenty-four horses in his stable at Memphis, Tenn. Of those who have been to the races, the public will recall St. Frisco, 2:01¾, Peter June, 2:07¼, now a three-year-old, Gentry C., 2:07¼, Sadie S., 2:07¼, June Red, 2:08, Judge Jones, 2:09¼, Harvest Hope, 2:12¾, and the pacer Robert Gatewood, 2:05¼. He also has a splendid lot of youngsters, one of them being a two-year-old trotter called Wicki Wicki by Anvil out of the good race mare Dudie Archdale and another the same age called Tombigbee by Etawah out of Miss Previous by Ponce de Leon. After his success with The Harvester, Etawah and Peter June, it looks as though "Pop" was going to devote more time to training baby trotters that are eligible to the big futurities.

Royal McKinney is now the champion sprinter on the ice in Maine, his last victory being in a match with Stingy Dick at Caribou. For three-quarter mile heats, the pair raced neck and neck, Royal McKinney winning all of them, the fastest being paced in 28¼ seconds.

Charley Valentine has eleven horses in his stable at Columbus, Ohio. The marked ones are Little Frank D., 2:02¼, Baxter Lou, 2:03¼, Mary Rosalind Parr, 2:05¼, Un, 2:09¼, Homer S., 2:11¼, Flora A., 2:13¼, and Prince Vincent, 2:15¼. He also has a three-year-old pacer by Cochato out of the dam of Judge Ormonde for the stakes.

CARLOKIN 2:07½

During the New York sale last month, the Frankfort horseman, James Hazelton, purchased from Will Durfee the fast trotting stallion, Carlokin 2:07½, and the son of McKinney 2:11¼ will make the season of 1918 at Frankfort. Carlokin was shipped at once and arrived in Indiana March 1.

Carlokin was bred by Henry Pierce of Santa Rosa, Cal., being the result of mating Carlotta Wilkes (dam of Inferlotta 2:04¾) with the great sire, McKinney 2:11¼, then standing for service on the coast. The brown stallion was brought East by Will Durfee in 1908, and the campaign made by the son of McKinney showed that he was none less than a high-class trotter. He first appeared at the Peoria meeting and won the 2:14 trot on July 4, the time being slow. Then, on the last day of the meeting, he came back and in the $2,000 stake for 2:14 trotters again won, taking a record of 2:08¼ in the second heat. He followed this up with a win at the Terre Haute meeting, where he defeated the 2:13 trotters, the second heat in 2:09¾. At Detroit he got second money in the $3,000 stake for 2:11 trotters, winning the fifth heat in 2:10.

It was during the progress of this race that a prominent Grand Circuit driver endeavored to deal out some advice to Durfee with disastrous results. The California trainer checked Carlokin very high, as he does with all the trotters and pacers that he trains. The adviser told Durfee that he thought that Carlokin would race better with his head a bit lower.

"Well, this horse is for sale," said Durfee, "and anyone that buys him will have my permission to check him as he pleases."

That ended the conversation, and Carlokin, only a couple of weeks later, pulled down the big part of the purse in the $10,000 stake for 2:11 trotters at Fort Erie, winning in straight heats in 2:08¼, 2:09¼ and 2.:09.

Carlokin was right in the thickest of the fight all along the line, being second in the $2,000 2:16 trot at Kalamazoo; third to Hamburg Belle 2:01¼ at Poughkeepsie; second in the $9,000 2:14 trot at Readville; second to Spanish Queen 2:04¼ in the $10,000 Hoster stake at Columbus; third to the same mare in the $5,000 Transylvania at Lexington; first in the 2:09 trot at Phoenix, where he won in 2:08¼, 2:08¼ and 2:09¾, the second heat going to Brace Girdle 2:04¾ in 2:09¼, and in his last start of the season forced the sensational Sonoma Girl 2:04¼ to trot in 2:07¾, 2:06¾ and 2:06 to head him. He also raced well in 1909, but the following season he made but one start in a race, winning at Phoenix, where he trotted to his record of 2:08¼ in the second heat. Later in the week Durfee started him to beat this and lowered his record to 2:07½.

As a sire, Carlokin is also making good. Although he has not had the opportunity that he deserved on the coast, the son of McKinney has produced several high-class performers, including Esperanza, that Will Durfee marked in 2:04 at Phoenix last fall.

Esperanza also set a new world's record for three heats by a trotter over a half-mile track last summer, reeling off three trips in 2:07½, 2:08 and 2:08, and is to be raced down the Big Ring this year by Dick McMahon, who now has her in charge at Memphis.

The Lark 2:08¼ is another trotter by Carlokin that was somewhat of a sensation. She was taken East in 1916 by Durfee and trotted a couple of extra good races, but went wrong and was retired to the brood-mare ranks. Had she had no bad luck there is little doubt but that she would have taken a record around 2:05, for she was sensationally fast.

GRAND CIRCUIT NOTES

The announcements made by the members of the Grand Circuit show that practically all of the big events in 1918 will be raced on the three-heat plan. North Randall will open in July with three $3000 events, the classes selected being for 2:08 and 2:18 trotters and 2:10 pacers. These, with the two $5000 events for two and three-year-old trotters, which closed in January, complete the fixtures for that meeting.

Kalamazoo, for the second meeting of the Grand Circuit, will give all of its mile-track purses on the three-heat plan, its principal event being a $10,000 purse for 2:08 trotters. The association also offers $2000 purses for 2:13 trotters, 2:09 and 2:06 pacers. For its inaugural meeting the Toledo Driving Club will give six early closing events worth $16,200. They will be known as the Fort Miami Purse for 2:08 trotters, $5000; the Dudley Purse, $3000, for 2:12 trotters; the Maumee Purse, $3000, for 2:06 pacers; the Fort Meigs Purse, $3000, for 2:10 pacers; the Sherwood cup for three-year-olds and the Win Kinnan for two-year-old trotters.

Philadelphia has declared itself for the three-heat plan of racing at Belmont Park, where its second Grand Circuit meeting will be held in August, while Hartford, the senior member of the Circuit, came "over the top" with a dash by announcing that its entire programme, with the exception of the free for all trot and two and three-year-old races, will be on the three-heat plan, the exceptions being mile heats, two in three. The Connecticut Fair Association has also gone a step further by restoring the Charter Oak purse to its original value of $10,000 and giving it for 2:12 trotters. This is also the class that has been selected by the New York State Fair for the Empire State $10,000 Purse, which will be trotted at Syracuse the following week. To the new Charter Oak Purse the Connecticut Fair Association has also added a $5000 Battle Royal Purse for 2:06 trotters, a $3000 purse for 2:06 pacers, as well as two $2000 purses for two and three-year-old trotters, the latter being required to be eligible to the 2:20 class. Also among the late closers there will be a $2500 purse for a free-for-all trot, in which Mabel Trask, St. Frisco, Miss Bertha Dillon, Early Dreams, Lu Princeton and The Real Lady can meet.

For its inaugural meeting at Readville, the newly organized Boston Fair has announced that the $5000 Massachusetts Purse for trotters, which resulted in so many brilliant contests, will be revived and become one of the leading features at its Grand Circuit meeting.

DEATH OF H. N. BAIN

Horsemen throughout the country will be pained to hear of the death of Horatio Nelson Bain, which occurred suddenly last Sunday morning at his hotel, The Nelson House, in Poughkeepsie, N. Y. Few connected with the racing and breeding industry were better known than Mr. Bain, as he had maintained a breeding farm near Poughkeepsie for the past thirty years and had been associated with various governing bodies connected with the sport.

For many years Mr. Bain was a member of the Board of Review of the National Trotting Association, resigning two years ago because of his objection to the boss-like methods employed by those who were in power, and for the past ten years had held the office of vice-president of the American Trotting Register Association. He had conducted many race meetings at Poughkeepsie and was influential in reviving the Grand Circuit races there two years ago.

Mr. Bain never produced a champion trotter, his fancy turning to beauty rather than extreme speed, the result being that trotting-bred horses from his farm were generally blue-ribbon winners at the National Horse Show in Madison Square Garden, where for years he was an annual exhibitor. Sir Robbins 2:22¼, a son of Stamboul 2:11½, out of an Electioneer mare, was the sire of the majority of the trotters which came from his farm. He also owned The Beau Ideal 2:15½, a champion show stallion.

The name of H. N. Bain always held a prominent position in light-harness circles, and his presence in the judges' stand at race meetings or as a horse-show official was a guarantee that every decision would be in good faith and in strict accordance with the rules. He was sixty-three years old, and leaves a legion of friends to mourn his loss.

While the United States government reports show a total number of horses in this country amounting to 22,000,000, the opinion of men in position to properly judge of such matters is that not more than 12,000,000 to 15,000,000 are actually accessible for war work or pleasure. The men quoted are secretaries of such associations as the Percheron, Shire, Clydesdale, Suffolk Punch, French Draft, and organizations of a kindred nature. These men should be in position to form a very satisfactory estimate, and in case they are correct in their views, then the shortage is much more acute than had been dreamed of by the most ardent pessimist.

Ten thousand persons assembled in an indignation meeting at the stock yards at Covington, Ky., on March 17, to voice their opinion of the alleged pro-German poisoning of 500 horses, shipped from Rockford, Ill., for an Eastern port, for government service in Europe. The horses lay dead in the Covington yard when the meeting was held.

GOLDLAND SPEED

(By W. H. Gocher)

When gold was discovered in the Sacramento Valley the men who were afterwards known as "forty-niners" started for the Pacific Coast by way of Cape Horn, the isthmus, or over the plains. Of the thousands who made the dusty march, either in the wake of a prairie schooner or on horseback, many of them owned horses, that were either thoroughbred or had one or two crosses of that blood; while a few had descendants of Justin Morgan. The horses that survived the trip became in time the foundation stock on the Pacific Coast while at a later date their descendants were mated with the trotters which were brought to California after the railroad was completed.

Princess, to whom Peter the Great and all of his descendants trace, made two trips across the plains and while in California raced with what was considered the best trotters of her day, a few of them having been bred there while others, like herself, were foaled east of the Mississippi River. In time Occident, a product of the Golden State, equaled the world's record of Goldsmith Maid when it stood at 2:16¾, but he was only a speed flash and had very little racing merit. His showing, however, prompted Leland Stanford to found Palo Alto, the world's greatest nursery of trotters and whose representatives at different times reduced all of the world's records at the trotting gait.

Electioneer brought the speed spark to Palo Alto, and while he was there Santa Claus, Steinway, Guy Wilkes, Director, and The Moor laid the foundation of light harness racing speed in California. Both Santa Claus and Steinway were sons of Strathmore, and while the former was returned to the east and died in Philadelphia, he left a colt named Sidney that in time got a record breaking batch of pacers as well as the sire of the first two minute trotter. Steinway put a number in the king row, while Guy Wilkes for a time led his family in the matter of record and racing speed of Grand Circuit caliber. Director was the best race horse of the group, and while he sired but few foals, he left two sons that became champions and made reputations in the stud. The Moor was located near Los Angeles and died young, his name being perpetuated by Sultan and Beautiful Bells. From the latter Palo Alto secured Hinda Rose, a yearling and three-year-old champion, Bell Bird, another yearling champion, St. Bel, Bell Boy, Belleflower and Chimes, sire of The Abbott, a champion, while Sultan sired a few record breaking youngsters as well as the magnificent trotter Stamboul.

In the matter of extreme speed, California leads all other states. Lou Dillon, the first trotter to cross the divide, was foaled there, while every other trotter from The Harvester, who retired with a record of 2:01, to the champion Uhlan has California strains in their pedigrees. Uhlan is a son of Bingen, whose sire, May King, was foaled at Palo Alto. Bingen also sired the dam of Lee Axworthy 1:58¼, whose sire, Guy Axworthy, is a son of the California bred mare, Lillian Wilkes. Delmar, the sire of Major Delmar 1:59¼, came from Palo Alto, and Conductor, the grandsire of The Harvester, was bred at the same establishment.

Of the eleven two minute pacers California can claim two in the matter of inheritance, as both Directum I 1:56¾ and Napoleon Direct 1:59½, trace to Director through the little "black rascal" Direct.

While the limit of racing speed always has a fascination for people, who are seeking off-hand information about light harness horses, the flicker of fame which goes with the mark, rarely carries with it the acid test that keeps a race horse in the spot light week after week when the racing season is in full blast. In that respect California has also been very fortunate as in Palo Alto, Azote, Directum, Hulda, Direct, Muta Wilkes, Sweet Marie, Little Albert, Flying Jib, Anaconda, Klatawah, Cricket and Sonoma Girl, it has given the turf a group that it would be a very difficult matter to duplicate from any other state. Each of them were tried when the heats were split and the speed near the limit and won in all kinds of company. Each of them were leaders in their day and may be remembered when such speed marvels as Arion, Sunol, Stamboul, Wildflower, Sweetheart, Freedom, Gold Leaf, Fausta and Frou Frou, all world record makers, are fotgotten.

"Veterinary Post-Morten Technic" is the title of a book by Prof. Walter I. Crocker, published by J. P. Lippincott Company, Philadelphia. In his preface Prof. Crocker says that this book is written in an endeavor to fill a gap in the American veterinary literature which he has long felt in teaching post-morten pathology. A perusal of the work would seem to indicate that Prof. Crocker is right in his contention, as the book is both entertaining and instructive, and contains directions for the performance of post-mortem examinations in every detail. While evidently not intended for those who have no technical knowledge of veterinary surgery, nevertheless it is not hard to understand, and the instructions are so explicit and the photographic examples are so complete that after a study of them almost anyone could perform the operation with success. It is a book that should be in the library of all veterinary surgeons and livestock breeders.

UNIVERSITY FARM PICNIC FEATURES

A two-day-old Shire colt will be one of the interesting individuals to be seen by visitors to the University Farm at Davis who inspect the horse barn on Picnic Day, April 20, 1918. Salvador Headlight, the dam, is a daughter of Neuadd Hillside, grand champion stallion at the State Fair, 1916. Neuadd Hillside was owned by the late Jack London. The sire of the colt is Desford Banker, an imported Shire stallion owned by Henry Wheatley of Napa.

To the students of the University Farm or of the University of California who can shear a sheep most rapidly and most skilfully, the California Wool Growers' Association has offered twenty dollars in prizes. A sheep shearing contest has been arranged as one of the entertainment features of the University Farm picnic on April 20, 1918, and the association is anxious to encourage the students to learn the art of shearing sheep. Inasmuch as previous experienced is not a requirement for entrance in the contest and the time element counts just as much as the skill shown, it is expected to be an interesting contest for every one, with the exception of the sheep themselves.

"Interested Jap's Santa," owned by the University Farm at Davis and holder of the State Jersey record for butterfat production, is being fitted for another year test. The lactation period in which she made her record last year was marred by a spell of sickness, so that it is possible to conclude that if everything is normal this year, the cow should exceed the mark she set last year. This cow will be on exhibition at the University Farm picnic at Davis, April 20, 1918.

An experiment to determine the best way to feed growing dairy calves is now in progress at the University Farm at Davis. Ten calves are being fed in this test. They are purebreds and grades of the different breeds are divided into two lots of five each. Each calf receives an average of 16 pounds of skim milk and one pound of grain per day, along with all the hay it will eat. The only difference in the ration the two groups receive is that one lot is fed oat hay and the other lot gets alfalfa hay. The two lots of calves can be seen at the dairy barn by all who attend the University Farm picnic on April 20, 1918.

The herd of purebred Toggenburg milch goats at the University Farm at Davis is expected to prove most interesting to the many visitors who will attend the annual picnic day on April 20, especially to those who have never seen the little animals under farm conditions. Some authorities have welcomed the milch goat as a means of solving the family milk supply problem, and it is undisputed that there are many conditions under which a goat would be more useful than a cow. A goat produces about the amount of milk needed for an average family, and can often be supported by the feed available on small places which would not be sufficient for a cow. Goat's milk, besides being valuable for the family supply, is well suited to the feeding of infants and invalids, and so far the goat has been found free from tuberculosis. Without doubt, the most interesting individual in the University Farm herd is California Gretel, a young doe only three years of age, who recently broke the world's record for milk production for goats. This animal produced 2941.5 pounds of milk in one year, an excess of nearly 300 pounds over the old record, and an amount equal to 24 times her body weight. Gretel and several others of the herd will also be seen in the livestock parade, which will be one of the feature events of the afternoon of the University Farm picnic day, April 20. The best stock of all classes owned by the University will be led in the line of march, and the students at the Farm are now engaged in the construction of the many floats that will represent the different divisions of instruction. The remainder of the day will be filled with demonstrations by the various departments, athletic events, contests and entertainment numbers, and dancing.

One and one-third fare rates have been offered by the railroads, good for April 15 to 21, which will include the three days of the tractor demonstration and the University Farm picnic day, April 20th.

THE WASHINGTON STATE FAIR ANNOUNCES RACE PROGRAM FOR 1918

The race program for the Washington State Fair, September 16 to 21, has been prepared by Secretary Frank Meredith. On Monday, the first day of the fair, automobile races will be held, and every day thereafter during the week a full horse-race program will be given. In addition to the harness races at least two runs a day will be pulled off, which will be over-night events. On Friday, which is "Elks' Day," an Elks' Derby will be run—entrants to be members of Yakima Lodge No. 318, and the riders must be members of the order. A liberal purse will also be hung up for a relay race—one heat to be run each day during the week, commencing Tuesday; entrants to be Indians residing on United States Indian reservations. Detailed program for the running races will be announced later. Entries in all harness races close July 15. Five per cent is required to enter, and five per cent deducted from money winners. All harness races are to be on the three-heat plan, except the 2:08 pace, free-for-all pace, 2:11 trot, and free-for-all trot, which will be three in five.

EQUIPMENT FUND

A matter of replacing breakages on the race tracks has long been the subject of conversation by those keenly interested in the training and racing of trotting horses. Every meeting adds to the quota of partially destroyed or wholly destroyed sulkies, gear and other equipment destroyed through no fault of the driver, owner or the horse, but brought about by the doings of some other horse or horseman. The unfortunate is generally some individual who is enjoying one of the inglorious spins of bad luck which falls to the lot of every one connected with the sport. The loss, therefore, is more difficult to bear than by those who are annexing a few races.

During the past year one leading trainer has, through the misdeeds of other peoples' horses, lost three forty-pound sulkies, two partially and one totally. As in accordance with events he is among those who are having a bad spin, and whether winning or losing the destruction of sulkies and expensive gear is too much for any trainer to sustain. In order to overcome the difficulty and lighten the burden of those so unfortunate, we suggest an equipment fund be inaugurated, the funds of which could be raised by an annual contribution of, say, 1s per horse. The innovation would be a good one for the Canterbury Owners' and Breeders' Association to take up. Failing them the New Zealand Trotting Association might control the fund. It would be necessary for a valuation of all damages done to be made and reported before any financial assistance was made. It would be necessary for a subcommittee to be appointed to see that some responsible person was present at every gathering to value and report any damage sustained to racing equipment. It would be necessary for such persons to be present in order to prevent those with inferior gear making use of a race in order to obtain per medium of the fund, gear of modern and safer type. There is no reason why the stipendiary stewards should not act as the fund's representative at all gatherings, with power to obtain an expert's opinion on the damage caused through some mishap in a race.

We consider the time opportune for the establishment of such a fund. The contribution would never be missed by the multitude of sportsmen in the game, but would be helpful to the horsemen whose losses are often more than they can afford through the deeds of some horse over which they have no control.—New Zealand Trotting Journal.

PAYMENTS HAVE BEEN made on fifty-two three-year-old foals eligible for the Stanford Occident, Stake No. 4, which will be held during the State Fair meeting, August 31 to September 8. There will be divisions for both trotters and pacers and the foals will be named before the date of the race. The owners and breeding of foals eligible are announced as follows:

J. L. Bullock, Cora Wickersham—Best Policy; J. C. Clark, Little Lucile—Jim Logan, Ruby C.—Jim Logan; S. H. Cowell, Dione II—Sacramento Boy, Hulda C.—Panama; Mrs. D. W. Cunningham, Bell Bond—Royal McKinney; M. C. Delano, Eloise Dell—Ben Watts; C. L. De Ryder, Gracie Pointer—Vernon McKinney; J. F. Dunne, Salva—General Bond; W. G. Durfee, Subito—Hammelite, Honey Healey—Carlokin; Wm. M. Ferguson, Helen Kelley—Alton; E. A. Gammon, Sweet Adona—Ben Watts; Alex. Grant, Sema—Dannlete; H. H. Helman, Hallie D.—Warren Dillon; W. B. Hunfreville, Lady Bon—Royal McKinney; A. T. Jackson, California—Royal McKinney; J. R. Lambert, Mable Von—Wilbur Lou; Roy D. Mayes, Leota—Jim Logan, Madeline Marshall—The Anvil; J. E. Montgomery, Maxine—Bondalin, Winnie Bond—Ben Watts, Beautiful Bird—Jim Logan, Margaret M.—Jim Logan, Athrene—Carlokin; H. T. Owen, Irene Ayers—Expressive Mac; Chris G. Owen, Sister Mary—Arlie Demonio; W. L. Selman, Miss Delta—Wilbur Lou; C. W. Short, Helmonia—Meno Ansel, Honda Girl—Meno Ansel; Chas. F. Silva, Camille—Teddy Bear, Hormona—Teddy Bear, Perle—Jim Logan, unnamed—Teddy Bear, Grace Zolock—Jim Logan, Francis—Jim Logan; G. E. Stickle, Princess Dazel—Royal McKinney, Dandelion Filly—Royal McKinney; L. H. Todhunter, Leavinettie—Peter McKlyo, Janet Bondsman—Peter McKlyo; D. W. Wallis, Mary N.—The Angelus; E. M. Ward, Emily W—Wilbur Lou, El Bell Maden—Wilbur Lou, Hemet Girl—Wilbur Lou, Radiate—Wilbur Lou, Lady Zombro—Kinney de Lopez; Jay Wheeler, Carita—Ben Watts; M. L. Woy, Loma B.—Ben Watts, Florence B.—Stanford McKinney; Strathalie—Peter McKlyo, Martha McEwen—Stanford McKinney.

\- - -

Charles James, formerly resident in San Francisco and well known to all California horsemen, is still located at Christ Church, New Zealand. He has two wonderful colt trotters—a two-year-old by El Carbine-Myall, and a three-year-old by Petereta from an Irvington mare. These colts have had but little work, but are taking kindly to their surroundings and showing remarkable speed for short distances, with no inclination to leave their feet when going a fast clip.

\- - -

At the suggestion of Food Administrator Ralph P. Merritt the California Fish and Game Commission has ordered that the season for sunfish, crappy, and black bass be opened April 15th instead of May 1st, this year.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

FIXTURES

The Interstate Trapshooting Association's Nineteenth Grand American Handicap Tournament, under the auspices of the South Shore Country Club, Chicago, Illinois, August 5, 6, 7, 8 and 9, 1918; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

California has passed a law which allows a hunter to hunt deer with one dog during the open season.

The Los Angeles Gun Club announces its first Pacific Coast Handicap for May 27, 28 and 29. The Wilmington Trapshooting Association is going to stage an Eastern handicap in May, too.

O. N. Ford of San Jose, Cal., traveled 12,000 miles during 1917 to participate in trap tourneys. He shot at 6025 targets and averaged better than 95 per cent.

Pennsylvania leads all States of this country in selling licenses for sportsmen. Last year the State received $314,479 at $1 each. California was second with $275,000, and New York third.

The Southern California Kennel Club will give a bench show of dogs at Los Angeles, April 19 to 22. The club is now preparing its premium list, which will be made up of specials kindly donated for the purpose.

The first shipment of clay targets to the American soldiers in France was 20,000 barrels, each barrel containing 5000 targets. The Government is furnishing the traps and targets for recreative purposes.

"Hi" Everding, king of trapshooting boosters, traveled 15,000 miles to engage in his favorite sport in 1917. Everding shot at 5715 targets in registered shoots and 10,000 more in club events—possibly more than any other shooter in the country.

A. Schell of Woodland won the Mayor Rolph trophy for the best dog of all classes entered at the amateur dog show at Eureka. Aside from the big trophy, Shadeland Laddie was awarded the grand blue ribbon and two special prizes.

The fishing season opened at Pescadero creek, with the water in perfect condition and the fish running fine for early in the year. Deputy Jack Burke checked up 42 anglers whose baskets totaled the limit.

On May 5th the Big Time Gun Club of Sacramento will give a merchandise shoot with plenty of prizes and conditions that permit the shooter to drop a few pigeons and have a chance at winning prizes.

Thousands of women have taken to shooting, both in the field and at the traps, of late years, and they have proven welcome additions to the sport. Women's eyes seem to possess a keenness for quickly developing skill at the sport which they are finding so attractive.

That loaded powder grows better with age—like some other things we know of—was proven recently at Los Angeles, Cal., when H. L. Haskins, of South Bend, Ind., and Fred Teeple, of Los Angeles, shot 50 shells that had been purchased in 1895. Teeple broke 25 straight and Haskins 21x25.

The Chinese ring-necked pheasants, liberated a few years ago by public-spirited Coloradans, are becoming plentiful in the agricultural district around Denver, north to the Wyoming State line and extending eastward from the foothills to a distance of fifty miles.

Excellent fishing is to be found also in Gazos stream in San Mateo county and also in Wardell creek in Santa Cruz county.

Austin creek, which is tributary to the Russian river, is just right for fly fishing, and limit baskets of trout are common.

The Fish and Game Commission expects that this will be one of the most successful fishing seasons we have had for years. Some streams which have not been good for a long time are now full of trout and the reports that come in from deputies show that they are busy checking up limit baskets.

George Mackie of Lawrence, Kansas, is serving for the third year in succession as member of the handicapping committee for the Grand American Trapshooting Tournament. Three years in succession is the best evidence of his popularity and ability.

Recently at Pendleton, Ore., there was a trapshooting tournament in which 100 turkeys, 100 geese, 12 pigs and a grizzly bear were offered as prizes. It must have been the intention of the promoters to aid the Food Conservation Department in the saving of meat. Pete Holahan won the grizzly bear and four turkeys.

At the blue rock trap contest between the team of the Mount Diablo Park Club and the Golden Gate Gun Club which took place on March 31st, the Mount Diablo won by a score of 226 against 224 made by the Golden Gate Gun Club. Frederick Burnham was high gun for the shoot, with a score of 48. The program called for fifty birds from the sixteen-yard line for each man. The shoot was for silver trophy.

State Veterinarian Charles Keane and the State Board of Health have instituted an investigation of what is believed to be an outbreak of rabies among a band of foxes in San Luis Obispo county. Two foxes recently killed showed that they were afflicted with that disease upon scientific analysis, and a man bitten by a fox is now under the doctor's care. A calf also bitten by a fox has died, and the isolation of all cattle in that section suspected with the disease is contemplated.

George W. Peck, the original of "Peck's Bad Boy," in an article on clay pigeon shooting, says that "about the time that the wild pigeon became extinct and the glass ball became a nuisance, the first clay pigeon was hatched, and has proved to be the most profile breeder of modern times—a statement verified by the fact that though there are about 50,000,000 shot every year, their numbers never seem to decrease, and the enthusiastic trapshot, with no limit set, can shoot to his heart's content and always go home with a clear conscience."

O. N. Ford, Hall McLachlan and A. M. Barker finished one, two, three at the big shoot held at San Jose March 24th. Ford and McLachlan broke 98 out of 100. McLachlan and Dr. Barker tied on 48 out of 50 for the Los Angeles trophy, which was won in the shoot off by McLachlan with 25 straight. McLachlan finished his 100 bird program with 53 straight, and went on shooting 200 shots for a run of 153 straight.

A new gun club is being started at Porterville, Mr. S. J. Rogers taking a prominent part in its organization. One of the chief purposes of the gun club will be to purchase and improve a large tract of land as a shooting preserve. This property, which is situated in the duck country southwest of there, will cost about $20,000. An option has been secured on the tract, and the exact location will not be made public until the deal is completed.

The Interstate Trapshooting Association continues its policy of giving trophies to clubs that have been rebuilt, reorganized, or newly erected, so as to give encouragement by offering something to shoot for. More than one hundred trophies were distributed last year. Among those that have taken advantage of the offer for this year is the Lemon Cove, Cal., Gun Club. There are several others from different parts of the United States. The scheme will be continued of giving trophies to encourage team competition. These trophies can be secured from the Interstate Association for the asking and must be won three times by one of the teams before becoming club property, when it goes to individual competitions among the shooters who helped win it.

PETERS WINNINGS

At Seattle, Wash., March 24th, Mr. R. S. Searles tied for High Amateur Average, breaking 97 x 100 and Mr. Deskin Reid with Mr. J. F. Coutts tied for Third Amateur with 95. Mr. L. H. Reid was Third Professional, scoring 96 x 100.

At Bingham, Utah, March 17, Mr. H. S. Mills was Third Amateur, breaking 139 x 150 and Mr. C. A. Anderson was Second Professional, with 128 x 150.

At San Jose, Cal., Mr. Geo. H. Anderson was Second Amateur, scoring 95 x 100. Mr. L. S. Hawxhurst won High Professional Average (tie), breaking 97 x 100, and Mr. H. E. Poston was third with 95. Each of the shooters mentioned used Peters Loaded Shells.

PERMITS FOR CAMP FIRES REQUIRED

Owing to the carelessness of campers with their camp fires, the Secretary of Agriculture has authorized the Forest Service to require permits for building camp fires in portions of the Cleveland and Santa Barbara National Forests. This requirement has in the past been confined to the Angeles Forest, but because of the large per cent of fires resulting from this cause in 1917, it was found necessary to extend this requirement. The record for 1918 may determine, very largely, whether or not the camp fire permit will be extended to the Sierras and Northern California regions.

Forest fires burned over 962,000 acres of National Forest lands in 1917 and caused a loss of $1,358,600 to the Government in timber, forage and young growth. While the loss was larger than for several years past, officials say that, considering the unusually dangerous conditions, it was remarkably light. Protracted drought and periods of high winds made the conditions, they declare, virtually the same as in 1910, when many persons were burned to death and twenty-five million dollars' worth of timber on the National Forests was destroyed.

In addition to the actual loss in timber and forage, the fires of last year entailed extra expenditures by the Government of $1,121,451. This, it is pointed out, means that to hold the fires down, large numbers of men have to be withdrawn from productive work and much money spent for supplies.

Of the 7814 fires which were fought on the National Forests, all but 2132 set by lightning were caused by human agencies and could have been prevented. There were 952 incendiary fires, which occurred for the most part in Oregon, California and Arkansas. Careless campers were responsible for 1288. Railroads, partly through failure to comply with the law and use proper spark arresters, set 1003. The remainder were caused by various forms of carelessness on the part of settlers and other users of the National Forests.

Effort is being made by the Forest Service to impress upon the public the necessity of keeping fire out of the woods, especially now that the country needs its man power so badly for other purposes than fighting unnecessary fires. The campaign of education against carelessness and indifference which has been waged for years, through fire-warnings, posters, talks and lectures, "movies" and in other ways, it is asserted, will therefore be pressed with renewed energy the coming season.

WHAT THE BIRDS DO FOR US

Saving the birds from gunners and cats and other agents of destruction is not a matter of sentiment. It is an important economic duty. Birds are an invaluable asset to agriculture, and at last we seem to be fully awake to their vital role in relation to man. Their protection has been a matter of legislation in many of the States, and their welfare was made the subject of a treaty between Canada and the United States, in which it was provided that no bird important to agriculture because it is an insect destroyer shall be shot at any time; also that no open season for a game bird shall extend for a longer period than three months and a half, and that both parties to the treaty shall so restrict open seasons on game birds as to prevent their being taken during the breeding season. Furthermore, the officers of the Biological Survey in the Department of Agriculture instituted a bird census, which shows how seriously the question of their conservation is being taken by the government.

Even the number of harmful birds has been greatly reduced in the public mind through investigations conducted by the government which demonstrated that out of forty or fifty species, exclusive of hawks and owls, only the English sparrow was condemned; and of the seventy-five species of hawks and owls found in America, only six were sentenced as injurious. That conclusion leaves hundreds of species of birds as beneficent in their work for mankind.

As enemies to insects the birds are without rival and perform stupendous labors in that direction, probably saving billions of dollars a year to farmers, forest owners, and fruit growers. To give some idea of what they do to the deadly insects, we will cite a few concrete instances. Study of the little chickadee reveals that one of them will eat daily from 200 to 500 insects, or up to 4000 eggs of worm and insect. The cuckoo consumes from 50 to 400 caterpillars a day. It is a conservative estimate to say that each insectivorous bird in the country can get away with 100 insects in its daily menu. Chester A. Reed, the well-known ornithologist, estimated that the bird population of Massachusetts was, conservatively speaking, some 25,000,000, requiring a daily bill of fare of some 2,500,000,000 insects. Appreciation of the enormous quantity consumed may be gotten from the fact that 120,000 insects about fill a bushel measure, which means that the birds in that one State eat 21,000 bushels of insects daily. Multiply that by five months—May to September, inclusive—and you obtain a grand total, certainly, of insect death. For the whole country the figures are like the miles to the nearest fixed star—fairly incomprehensible.

It ought to be a pleasure, as well as a duty, to help save the birds from unnecessary and wanton destruction. They are surely among our best friends.

FIRED OVER 200,000 SHOTS FROM ONE GUN

In John W. Garrett, Colorado Springs, Colo., boasts of one of the ablest of Uncle Sam's great trapgun army.

Garrett not only can shoot just about as well as anyone in the United States, or the world, but, incidentally, he can shoot quicker.

There are many who believe Mrs. Adolph Topperwein, the only woman professional trapshot, can load, shoot and unshell quicker than any other shooter, but it is doubtful if the fair Mrs. Topp can work any quicker than Garrett.

The recent publication of trapshooting records brought out many meritorious performances that were not listed, and several of these were to the credit of the Colorado Springs trapshot.

The one that he points to with credit took place at Colorado City, Colo., on Christmas day, 1902. On this occasion he broke 200 targets straight in 30 minutes and 13 seconds. Garrett has broken 99 x 100 targets in the last event of the Pastime Gun Club program, and was requested by other shooters to see how many he could break against time, consistent with a good score.

Shooting alone, in strings of 25, five from each peg, the same as if he was in a squad, handling his own gun and shells, and loading the same as if he was in competition, Garrett broke the first 100 straight in 16 minutes and 46 seconds, and the second 100 in 13 minutes and 27 seconds. There was no time taken out, the time being taken from the firing of the first shot until the last target was broken.

The first 1000 clay target match event had Garrett as a contestant, and he won. This match took place at Colorado Springs, on August 6, 1904. Garrett broke 965 targets, and J. H. Rohrer broke 940. The actual shooting time was two hours and four minutes, and the elapsed time was four hours and 13 minutes. Each broke 100 straight in practice before the event, and Garrett broke 96 x 100 in an open event following.

The men each shot at 975 targets with one gun, deciding after each had shot 24 targets to use one gun while the other cooled. Quite naturally, this took a little more time.

One June 8, 1901, Garrett shot a 100-target match with Walter Shemmell, at Colorado Springs, and broke 100 straight, which, he thinks, is a world's record for an individual match.

In the Grand American Handicap, at Chicago, Ill., on June 21, 1910, Garrett broke 80 singles and 10 pairs—100 straight—in a field of 56 professionals and 173 amateurs. This is a world's record.

Garrett attributes his success during his 20 years of competition to sticking to one gun, one shell and one powder. He has fired more than 200,000 shots from his solid-frame shotgun, and hopes to fire that many more.

BEST SHOTS ARE VETERANS

Some of the best shots are way past the Osler age limit and their names still figure in the lists of winners with both rifle and shotgun.

Many a man has experienced the keenest kind of regret on becoming aware of the fact that he would soon have to give up his favorite sport because he had reached the age limit in his particular line. One of the strongest appeals that shooting makes is the fact that old age cannot take it from you.

Proof there is in plenty to substantiate this fact.

Take, for instance, the All-American Trapshooting Team. This group of men, six in number, made a trip abroad in 1901 and in a series of matches with the best teams that the other countries could produce, they never met defeat. Seventeen years have lapsed and every one of the six is still rated as a top-notcher!

The gray-haired baseball player is the exception, but you often see the gray-haired man at the traps competing with his son and frequently his grandson.

THE WILD CAT IN CALIFORNIA INDIAN LEGENDS

That Indian traditions in the southern part of California are woven largely around the wild cat as the "property" and the "god" of numerous clans in this region, is the striking fact brought out by Edward Winslow Gifford, associate curator of the Anthropological Museum in the University of California, in a recently issued publication, "Clans and Moieties in Southern California."

Mr. Gifford states in his article that informants from various tribes told him that their people "claimed the wild cat as their 'property' and their 'god.' They believed that the wild cat 'raised' them and they never killed it." The author continues in part, "In connection with the wild cat as a culture hero, the Southern Diegueno tribe employs a color symbolism. They say that in the east there was a red wild cat, in the west a blue one. The eastern wild cat is called nimikumwal (weak wild cat) and the western wild cat nimikuspil (strong wild cat).

"The wild cats were made by the creator Maiyoha and his brother, who came from the ocean. The red wild cat went to the east slope of the mountains, which he claimed as his; the blue wild cat went to the west slope, which he claimed. The Imperial Valley people are the people of the red wild cat, the Kamiyahi of the blue wild cat.

"The two wild cats are the ones who first told the months of the year. The month in which they began counting was Ilyakwel (cold month). Then followed five more—Hexanimsup (snow month), Xatai (cold month), Hexapsn (rain month), Hatyanatinya (rain month), and Ixyanidja (growing month)."

Another interesting custom of the Indian tribes of Southern California, and more particularly of the Dieugueno clans, lies in the significance attached to dreams. If a man dreams of a rattlesnake he must give a dance afterwards. The killing of a wild cat is the occasion for a large propitiatory dance given by the man who was responsible for the unfortunate event.

Copies of the publication may be secured from the University of California Press, Berkeley.

TRAPS IN MUNICIPAL PARKS

Park commissioners of many cities who have taken the time and trouble to investigate trap-shooting have set apart in the parks certain tracts dedicated to trapshooting, thus doing their mite toward the organization of an efficient standing army that is not under pay or in any way objectionable.

Smokeless power has been so perfected that smoke and noise have been almost entirely eliminated. There is small danger from the shot, as they carry a limited distance. The care in handling guns is such that an accident never occurs on a shooting grounds.

Park commissioners of Chicago, New York, Milwaukee, Kansas City, Seattle, Jacksonville, Ill., and Omaha have arranged for trap-shooting in their parks. Why not in San Francisco?

THE INTERSTATE BOOK OF AVERAGES FOR 1917

The booklet containing the annual review and trap-shooting averages for 1917, issued by the Interstate Trapshooting Association, will not be ready to put in the mails before April 25th. Elmer E. Shaner, manager of the association, states that the data has been in the hands of the printers for a long time and it was fully expected that the booklet would be ready by March 1st. However, due to unusual conditions incident to the war, it has been delayed. The printers declare that they have been doing their very best and that the work has been rushed with all reasonable speed under the circumstances. This pamphlet can be obtained by writing to E. Reed Shaner, Secretary Interstate Trapshooting Association, 219 Coltart avenue, Pittsburg, Pa.

MIGRATORY BIRD TREATY

The favorable action of the House Committee on Foreign Affairs on the bill enabling the migratory bird treaty with Great Britain to be put into effect is welcome.

Favorable action in the House, indicated by the committee's report, will submit for executive approval this final phase of one of the most important, possibly the most important, undertakings for wild life conservation put forward on this continent.

Once the measure is law the migratory birds of North America will be protected on their annual flights through Canada and the United States.

Shooting seasons will be regulated by the Federal authorities, the State authorities co-operating, according to general conditions, rather than the local desire or whim of the various States.

It has been a long and hard fight, this one which is now nearing completion. The idea originated with the American Game Protective Association, which worked for and had passed the original migratory bird law. This was extended to apply to Canada under Britain and the United States, so that the protection for bird life will be continent-wide. The project has been supported by the National Association of Audubon Societies and the more liberal State officials and sportsmen of the nation, who have recognized that conflict of State authority and local privileges or jealousies were fast destroying one of the continent's greatest assets.

THE STEELHEAD IS A TROUT

Deputy Fish and Game Commissioner Henry Lencioni calls attention to the fact that the steelhead is a trout and cannot be considered a salmon. He states that fishermen wish to make this gamy fish a trout in the spring time but now prefer to call it salmon. The law reads: "Every person who at any time takes, catches or kills any trout except with a hook or line and in the manner commonly known as angling, is guilty of a misdemeanor."

The district attorney agrees with this reading of the law, and states that there is considerable misunderstanding of the law, for steelhead cannot be considered as anything else except trout. There is no section of the law which allows taking anything except salmon with a spear or gaff-hook. There is no interpretation of the law which can transform the steelhead into a salmon, even the common acceptation does effect the change. The method generally known as angling can only be used for catching the delicious steelhead and the law must be enforced.

DU PONT PHOTOGRAPH CONTEST

Offer Fifty Prizes for the Best Photographs

To increase the interest in Du Pont Products and to secure suitable photographs to illustrate the advertising and publicity of their various companies the Du Pont American Industries offer $500 in prizes for the fifty best photographs. The prizes are as follows:

First prize, $100; second prize, $50; 2 third prizes, $25 each; 14 fourth prizes, $10 each; 32 fifth prizes, $5 each.

The photographs have to illustrate the following subjects, and be submitted before September 1, 1918:

Agricultural Uses of Explosives, Fabrikoid (Artificial Leather), Industrial Uses of Explosives, Painting, Trapshooting and Hunting, Miscellaneous.

Any subjects illustrating the use of any Du Pont Products, will be given equal consideration.

Some of the conditions of the contest are:

No employes of the Du Pont American Industries are eligible in this contest.

Each photograph to be eligible for a prize, must be accompanied by the negative (film or plate).

On the back of each photograph submitted must be plaintly written the name and address of the contestant, the subject illustrated, the place where the photograph was taken and any other helpful data.

The number of photographs that can be submitted by any one contestant is unlimited nor is there any limit upon the number of prizes that can be won by any contestant.

All photographs submitted, whether or not awarded prizes, are to become the property of the Du Pont American Industries.

All photographs submitted will be judged by a committee to be appointed by the Director of Advertising of the Du Pont American Industries. Prizes will be awarded not later than September 15, 1918.

The Du Pont Photograph Contest will close on September 1, 1918. No photographs postmarked at Wilmington, Del., later than September 1, 1918, will be accepted in this contest.

Each contestant must fill out and mail an entry blank to the Advertising Division, Du Pont Company, Wilmington, Delaware, with the first photographs submitted or the photographs will not be accepted in the contest.

All photographs entered in this contest must be plainly marked "Photograph Contest" and mailed to the Advertising Division, Du Pont Company, Wilmington, Delaware, full postage prepaid.

Should Be Easy to Win a Prize

Du Pont products are used or sold in almost every business house and home in this country. Probably in your own home, in the neighborhood or at least where you work there is a good chance to get a prize winning photograph.

A word to the amateur, be sure your photograph has good contrast, is clear and sharp in focus. If possible, have it at least 3 x 5 inches, in size.

Experience prompts us to say when you have taken your photograph, make a black and white, glossy finish print.

Send the print, with the negative, and your entry blank to the Advertising Division, Du Pont Company, Wilmington, Delaware. Be sure and mark it "Photograph Contest."

Don't try too hard to get an "unusual effect." This is not an art contest. These photographs are to be used for advertising purposes and if they show clearly and effectively what they are supposed to represent and will reproduce well they will have a good chance of winning a prize.

Any one desiring to enter should notify the Du Pont Company and an entry blank will be furnished.

Address: Advertising Division, E. I. du Pont de Nemours & Co., Wilmington, Delaware.

KIPPERED JAPANESE SAMMA

Intelligent commercial development of a little-known fish for other markets is shown in a new Japanese product, kippered samma. This fish is described by the Pacific Fisherman as a mackerel-pike and is peculiar to the waters of Japan. A Japanese packing company conceived the idea of putting it up in cans, in kippered or smoked form, and the quality is pronounced so good by experts that it is believed a considerable market can be created in this country at a reasonable price.

HOW TO GET THE FARMER'S GOOD WILL

Title to the wild life is vested in the state or the nation, but whether or not you will be permitted to hunt or fish on most of the land in the state rests with the landowners. Your license does not give you the right to go on any man's land against his wish. It is, therefore, squarely up to you to decide whether your actions will encourage the land owners to refrain from posting, or whether by reason of acts of vandalism and thoughtlessness, to say nothing of negligence, the landowner in self-protection will be compelled to keep you off.

Take up shooting in some form, for it is a sport that you can stick to with the assurance that you will always enjoy it and that your skill will stay with you until the age when nothing remains of life but a host of pleasant recollections.

FISHING IN PEND D'OREILLE

The "land of the Pend d'Oreille," in Idaho's panhandle, is the hunter's and fisherman's paradise. With the majestic Pend d'Oreille lake (one of the largest fresh water bodies in the United States), with Priest lake a comfortable day's automobile ride away, with mountain streams in every direction abounding in trout, the fishermen can have variety, space and scenery from Sandpoint, accessible to the eastern tourist by means of three railroads all the way to Spokane and Portland.

Pend d'Oreille Lake's fishing, like that of Priest Lake, is of summer and winter variety. The cutthroat trout is summer sport, and in winter a lake herring, known to the natives as "white fish," is caught from boat or through the ice. The latter has become more than a sport, and a commercial industry has grown up with their catching for food purposes. We have no need of Hoover's advice in regard to fish eating, for the morning breakfast in Sandpoint, and in Spokane for that matter, is not complete without a luscious "white fish" fresh from the depths of Pend d'Oreille.

Deer hunting is good, especially in the Priest Lake country. Deer in this section were formerly numerous but wtih the settling of the valley they are back further in the hills than formerly. Birds are numerous in the bird season. The larger animals, like mountain sheep and bear, are not found in great abundance.

It would be impossible to dismiss the subject without reference to the fishing for sturgeon in the Kootenai River at Bonners Ferry. For some reason, probably the impossible falls and canyons in the lower Pend d'Oreille, the sturgeon does not come up from the Columbia into the Pend d'Oreille, but does come into the Kootenai. In the early summer the monster fish are caught, weighing from 150 to 350 pounds, by means of a "taut" line extending across the current and with hooks suspended baited with fresh beef. The season sees the landing of a dozen or more of these mammoth fresh water fish. It is related that one fisher of them ties his "taut" line to a tree, fastens a cowbell in the tree and when the cowbell rings, starts forth in his launch for a fight with the "big fellow" who has turned in the alarm.

If an easterner wants to see some real western scenery and have a real western sportsman's time, he should not overlook the Idaho panhandle. Its virgin forests are fast disappearing under the woodmen's axe, but it still has charm of the solitude not far away from the best transportation facilities in the northwest. It is worth coming to see next summer when you pick out your "seeing America first" trip.

THE OLDEST HUNTSMAN

William H. Surbar of Seattle, Wash., is believed to be one of the oldest, if not the oldest, huntsmen in the country. The veteran sportsman recently took out his season hunting license, as has been his habit ever since the license bureau was instituted. The veteran sportsman hunted in the northwest long before there were any laws governing the killing of game.

With hair and beard snow white, a fine physique and a tread as high as that of any middle-aged man, Surbar says he can score almost as many hits today as he could when a younger man. He weighs 175 pounds and stands as straight as the proverbial arrow, and is 83 years old.

"A steady nerve and clean living," summarize in six words the qualifications necessary for the man who aspires to be a good shot, according to Surbar. The grizzled huntsman believes that every American boy should be taught the handling and use of firearms and that hunting should be a part of every youngster's education.

Surbar is one of the pioneers of the Northwest, having crossed the continent behind oxen in 1857.

A. A. T. A. PLANS FOR 1918

The American Amateur Trapshooters' Association, of which Lieutenant John Philip Sousa is president, was organized in December, 1915.

It is composed of amateur trapshooters, pledged to the policy of advancing the interest of individual amateur trapshooters, and of local trapshooting clubs. In the two years of its existence the association has made remarkable progres.

The plans of the A. A. T. A. for 1918 are broader in scope and will accomplish more than ever before the purpose of the association—to encourage regular club shooting and to stimulate increased proficiency on the part of individual shooters.

The medal plan has been revised so as to allow more members to take an active part in this competition, and a 98 per cent solid gold medal is offered for the first time. One of the chief arguments in favor of the A. A. T. A. is that the contest for association medals add interest to club shoots.

The A. A. T. A. is to club shoots what the Interstate Association is to registered shoots. As the Interstate Association regulates the registered shoots, contributes money and trophies to them, and compiles the averages of the shooters who participated, so the A. A. T. A. confines its attention to the club shoot features. It now has a membership of 1500 clubs, in which there are 100,000 individuals and have organizations in 40 States. The A. A. T. A. is one of the biggest things that ever happened in trapdom.

EAT VENISON AND SAVE OTHER MEATS

The Biological Survey of the Department of Agriculture has requested game commissioners, conservation societies and sportsmen's associations to secure accurate statistics on the number of deer killed in each State this year.

This information is desired by the Food Conservation Department.

The shooting of deer is permitted in 33 States, and the Biological Survey estimates that 80,000 are killed legally every year. These produce nearly 10,000,000 pounds of venison. Every pound of venison should be made to save a pound of pork, beef or mutton. Every pound saved will aid the United States in feeding hundreds of thousands in the devastated cities on the other side of the Atlantic. These people are dependent upon America for food.

The Biological Survey heads are of the opinion that with the best possible protection the total number of deer in each State can be increased 25 per cent. All sportsmen are urged to co-operate in securing this protection so as to get the maximum amount of venison as a source of meat.

It is estimated that 50,000 deer were killed in the Adirondacks this season; in fact, so many were killed that the New York Conservation Commission became suspicious and sent game protectors from the southern section of the State to the mountain regions in the guise of sportsmen to unearth evidence of wholesale deer law violations.

They did.

The dragnet landed hotel and boarding house proprietors, guides, hunters and residents, who were detected killing does, running deer with dogs, shooting more than the bag limit and committing practically every possible infraction of the law. The game protectors were unable to "get the goods" on the hunters, etc., because they—the game protectors—were too well known and their movements were heralded in advance.

Eleven hundred bucks were bagged in the one-week season in thickly populated Massachusetts, and 981 bucks were killed in the nine-day season in Vermont. Thousands of deer were killed in Maine, but just how many we are not in a position to say, because figures are not available; but the fact that 2082 were shipped out of Bangor gives one an idea of the number brought down. There has been too much snow in New Hampshire for the hunting of bucks.

Deer have multiplied so fast, especially does, in some sections of Pennsylvania, that they have become a nuisance and a menace, and a great many sportsmen favor an open season of one year on does. Numerous complaints have been made to the Game Commission by farmers, who allege that does have ruined their fruit trees.

After New York had a 12-year closed season on does it was necessary to have a two-year open season. Deer became so plentiful that it was deemed wise to reduce their numbers. Deer have multiplied just as fast in Pennsylvania. It would be fine if some arrangement could be made whereby deer could be taken from States where they are too plentiful and placed in the States where they are scarce. This would help the food situation a whole lot, also aid in solving the problem that confronts many game commissions now.

A REGULAR DOG

Chum, an Airedale belonging to Ben Overturff, fire warden, Monrovia, Cal., has demonstrated that a dog can lick his weight in wildcats. Chum attacked and in five minutes killed a wildcat that stood as tall as the dog, though not as heavy. The Airedale following his master on a trapping expedition near Deer Park, "flushed" a bobcat and chased it into a pile of brush. He went in at a disadvantage and killed the animal. Chum's owner believes he would attack a mountain lion.

THE ROOK

The rook is about the size of a crow, a little smaller, and it very much resembles a crow in many ways. It has the same brilliant jet black color. It is bright, keen, cunning, and possesses all the characteristics of the crow with its full share of mischievousness. This bird is very easily alarmed and especially does it fear a gun, and it seems to know when approached by humans whether the person comes armed or not. It feeds in flocks and also posts a few sentinels on guard perched in adjoining trees, and if danger is suspected, these sentinels immediately warn the others by a harsh crow which in the rook language spreads alarm and the whole flock takes flight, expostulating loudly on being disturbed.

Many English farmers condemn this bird not only on account of its habits of rooting up your grass, young corn, and ruining the prospective growth of potatoes and turnips, but claim that they rob other birds' nests. They should be given credit for the vast quantity of destructive insects they consume. One of the peculiarities of rooks is that they retain the same nest year by year instead of building new ones. They are gregarious and ordinarily go in flocks. They afford much sport to the small boy who enjoys potting them with a 22 caliber rook rifle, and the young ones are said to make good pot-pie.

HIGH AVERAGES

Baseball players are not judged by their performances in any one season—it's the average over a term of years that counts.

Year after year Ty Cobb tops the batsmen in the American League—the very best evidence in the world that Tyrus is the best hitter in the junior circuit, if not its greatest player.

It's just the same in trapshooting.

Shooters have their real good years—just the same as ball players—but it is the fellow who is close to the top year in and year out who is rated as the best performer with the shotgun.

Lester German is the Ty Cobb of trapshooters.

German is a professional trapshot. Breaking clay targets is a business with him. He knows his business. Yearly for 20 years German has been pulverizing many thousands of clay "birds." Not until 10 years ago, however, did the Interstate Trapshooting Association begin to keep records. There are no official records of what trapshooters did previous to 1908.

German, with W. R. Crosby and Fred Gilbert, are the only three trapshooters who figure in the interstate averages for 10 consecutive years, and in this time German has a combined average of .9652 on more than 50,000 targets. Only twice in the 10 years did German fall below 96 per cent. Three times has he bettered a .97 average; in fact, his last three years have been his best.

Crosby's average for 10 years is .9632, and Gidbert for the same period has averaged .9489. Crosby once averaged better than .97 and seven times bettered .96.

Charley Spencer really has a slightly better average than German, but he is listed only for nine years. He didn't figure in the 1908 averages. In the nine years he compiled an average of .9677. Spencer has over .96 every one of the nine years, and twice he passed the 97 per cent mark.

John R. Taylor has bettered a .96 average for seven years; Homer Clark for six years, and H. D. Gibbs for five years. Clark is the only professional who ever touched a .98 average for one year. George Maxwell, the one-armed shot, has averaged better than 95 per cent for the past six years.

Charley Newcomb, of Philadelphia, has the best average for five years among the amateur trapshots with .9564, but the real classy average of the amateurs is the one compiled by Woolfolk Henderson, of Lexington, Ky. For the three years preceding 1914 Henderson was a professional. Rejoining the amateurs in 1914, he topped the simon purses and was again high man in 1915, and has been second the past two years. Three years in succession he has averaged better than 97 per cent, and has an average of .9714 for four years, which is far and away ahead of any amateur, and a whole lot better than the majority of professionals.

It is necessary to shoot at 2000 targets in registered tournaments to break into the interstate averages, and of the hundreds of thousands of trapshooters few keep in the averages every year.

GOLDEN PLOVER INCREASING?

A solid mass of golden plover, estimated to be five miles long, was seen by a Federal game warden in Texas during the last northern migration. It is unfortunate that he did not make an estimate as to width. There will be many who will think that the Federal Migratory Bird Law is at least partly responsible for such a showing.

In this connection, it may be stated that Mr. George Lawyer, in charge of the enforcement of the Federal Migratory Bird Law, states that Hudsonian curlew are increasing.

CONTROL OF NOXIOUS RODENTS

It is conservatively estimated that a loss of $150,000,000 annually, largely in cereals, is suffered from the depredations of native rodents, chiefly prairie-dogs, ground squirrels, pocket gophers, jack-rabbits, meadow and pine mice.

TRAPS IN MUNICIPAL PARKS

Park commissioners of many cities who have taken the time and trouble to investigate trapshooting have set apart in the parks certain tracts dedicated to trapshooting, thus doing their mite toward the organization of an efficient standing army that is not under pay or in any way objectionable.

Smokeless powder has been so perfected that smoke and noise have been almost entirely eliminated. There is small danger from the shot, as they carry a limited distance. The care in handling guns is such that an accident never occurs on a shooting grounds.

Park commissioners of Chicago, New York, Milwaukee, Kansas City, Seattle, Jacksonville, Ill., and Omaha have arranged for trapshooting in their parks.

There are many places in Golden Gate Park that would make good trapshooting grounds, and no doubt the Park Commissioners could make provisions that would permit trapshooting which would be an added attraction to entertain visitors to the park and promote the efficiency of the general public in handling arms and help in training them should they be called upon to defend their country.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for
FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENY,
BONY TUMORS,
LAMENESS FROM SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES
BUNCHES or BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANY ONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard VETERINARY REMEDY

Always Reliable. Sure in Results.

None genuine without the signature of The Lawrence-Williams Co.
Sole Importers & Proprietors for the U.S. & CANADAS. } CLEVELAND, O

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CHAMER, Training Stables, 990 Jennings Street, New York City.

Sole Agents for the United States and Canada.

SAVE-The-HORSE *Will Cure It!*

Bring Your Horse Problems to Headquarters

THE SUN'S RAYS are the most potent of all antiseptics, and are the greatest destroyers of germs known, yet hidden behind a cloud their influence is nil.

It is far more difficult in using remedies. The skin, flesh, muscle, tissue and bone are more dense and restraining than any cloud, between the application of a remedy and the disease. Therefore, it is plain to be seen, WHY, without the essential and strong penetrants, so many fall short in clearing up a cure, and why so many cases appear to be doggone hopeless and baffling.

In these incontestable principles are found just WHY Save-The-Horse is so different and so adequately effective on the most serious diseases and injuries causing lameness and blemishes. Every active, irresistible, potent property of Save-The-Horse is carried by an unusual penetrant through and through both bone and tissue, to the very depth of the affected parts, where unitedly and effectively they act on the impaired circulation, diseased tissue, fibre, ligament, tendon, synovia, membrane and bone. They aid and compel nature in correcting disease of the most deep-seated kind.

As the greatest ultimate satisfaction is in a cure that is permanent, don't chance a symptomatic relief or temporary correction. While you are at it, aim to produce a complete and permanent cure. There may be a powerful temptation to save a little money, but in the long run, regardless of price, you will find that Save-The-Horse is the cheapest and best remedy which you can possibly use.

SAVE-THE-HORSE Is the Only Remedy Your Horse Requires

And, right now, is a most excellent time to go right at it. Save-The-Horse can be applied in any season or weather.

The King of Remedies

There is no blistering.
There is no loss of hair.
There is no bad effect.
It saves time and worry.
Humane and all-powerful.
Horse may work as usual.

BOOK FREE Our Save-The-Horse BOOK is a Mind Settler; Tells How to Test for Bone Spavin—Where and What TO DO for a Lame Horse. It is our 23 years' Experience and Discoveries. It Covers 56 Forms of Lameness—with Illustrations.

But write. BOOK, Sample Contract and ADVICE—ALL FREE.

TROY CHEMICAL COMPANY
BINGHAMTON, N. Y.

Always In Sight

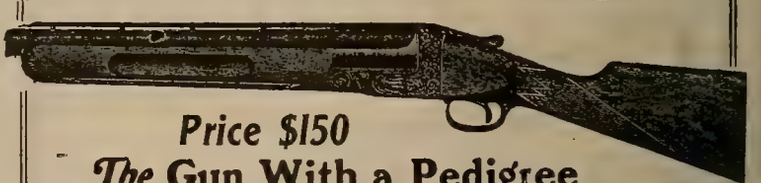
Peters — HIGH GUN, IDEAL, PREMIER, TARGET
Remington UMC — ARROW, NITRO CLUB
SELBY LOADS — CHALLENGE, SUPERIOR
U.S. BLACK SHELLS — AJAX, CLIMAX
Western — FIELD, RECORD
WINCHESTER — REPEATER, LEADER

When you want shells loaded with either of the Hercules Smokeless Shotgun Powders, Infallible or "E.C.", you should have no difficulty in getting them. Each of the 14 standard makes of shells, loaded with smokless powders, named in the list to the left, may be obtained containing

HERCULES
Smokeless Shotgun
POWDERS
INFALLIBLE "E.C."

When you find the shell so loaded you can easily identify it. The name Infallible or "E. C." is always in sight on the top wad. It is also on the box in which the shells are sold.

These powders always run absolutely uniform in quality. The load of Infallible or "E. C." shot today will give the same high velocity, the same light recoil, the same even pattern, will burn just as clean as the load shot a year or two years ago.



And this matter of uniformity in powder is important. You know the difference that a strange gun will make in shooting, a strange club in golf, a strange racket in tennis. A strange powder, or a powder that *varies in quality*, has the same effect.

Shoot either Infallible or "E. C." in any one of the 14 shells named in the list on this page.

HERCULES Smokeless Shotgun POWDERS "E.C." — IN ANY ONE OF 14 SHELLS

HERCULES POWDER CO.

The Greatest Scores Ever Recorded Were Made With

Parker Guns

The Highest Official Yearly Average for 1917 was made by Mr. Les. S. German Scoring 6137 x 6285 Targets, 97.64%. This being the Greatest Yearly Average ever made considering number of targets shot at.

The Grand American Handicap has been won nine times with Parkers

Another World's Record

Mr. Fred. Plum shooting at Atlantic City, broke 149x150 Targets, using a 20 gauge Parker.

Parker Bros. are the pioneer makers of small bore guns in America, and were the first ones to bring them into prominence. *For further particulars address*

DU PONT AMERICAN INDUSTRIES

TROPHIES FOR "OLD-TIMERS' SHOOTS"

Get Ready for "Old-Timers' Shoots"

Trapshooting has its "old-timers"---veterans of the game for fifteen or more years. By attending shoots, serving as officials, increasing the membership, instructing new members, promoting club events and otherwise serving the club, they've been the "old reliables" whose loyalty rightly deserves recognition by fellow-members and sportsmen everywhere.

Show these "old-timers" you are appreciative of their work to make trapshooting the "sport alluring."

At the Gun Clubs

members and officials will give you a royal welcome. You can take part in "Old-Timers' Shoots" and be eligible for the trophies provided for participants in this national event in honor of trapshooting's worthy veterans.

Club officials should make arrangements now to conduct an "Old-Timers' Shoot" in May or June. Write to Sporting Powder Division for complete information. Use the coupon.

100-SHOT GALLERY CHAMPIONSHIP

WON BY ARTHUR HUBALEK, SCORE 2476 OUT OF A POSSIBLE 2500

Peters .22 SHORT SEMI-SMOKELESS CARTRIDGES

Second place in the Championship event was won by Mr. L. C. Buss, 2464, Mr. Hubalek tied for first honors in the CONTINUOUS MATCH, and Mr. E. Kogler won the Bull's Eye Match, all using PETERS.

This tournament was held under the auspices of the Zettler Rifle Club, New York City, March 13-16, and attracted the best off-hand shots in the country. Range 75 feet, standing position.

All but two of the expert amateurs selected PETERS Semi-Smokeless Cartridges as the most dependable for such an important contest.

The 100-Shot Gallery Championship has been won with the (P) brand ammunition 13 out of the past 20 years.

THE PETERS CARTRIDGE COMPANY, Cincinnati, Ohio

Pacific Coast Branch: 585-587 HOWARD ST., SAN FRANCISCO.

The Choice of Champions

The difference between "Dead" and "Lost" with the elusive clays lies in the selection of your gun and shells but little less than in your own skill.

Let this selection do full justice to that skill. Champion shooters—jealous of their records—take no chances.

Thousands of enthusiastic sportsmen use the famous Remington UMC Pump Gun and the Autoloading Shotgun—guns that stand up under the most exacting conditions.

The WETPROOF Steel Lined Speed Shells, ARROW and NITRO CLUB, are used by a majority of the shooters who each year write their names high on the honor roll of "The Sport Alluring".

14. Free-for-All Trot 1,000

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

Entrance and payments on these stakes will be due and payable as follows: 3 per cent June 1st, 1 per cent July 1st, and 1 per cent on or before five o'clock the night before the race.

GENERAL CONDITIONS

ALL RACES THREE HEATS. Money divided 30 per cent to the first heat, 30 per cent to the second heat, 30 per cent to the third heat, and 10 per cent to the race according to the rank in the summary. Money in each division 50, 25, 15, and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

All purse races 5 per cent to enter and 5 per cent from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and four starters.

Money must be sent with nomination.

The Society reserves the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry; also, for any unforeseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one o'clock P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Unless otherwise specified, rules of National Trotting Association to govern.

Entries close June 1st, when all entries must be named and eligible.

Make all checks payable to the State Agricultural Society.

Address all communications to the Secretary.

GEO. C. ROEDING, President.

CHAS. W. PAINE, Secretary, Sacramento, Cal.

Statement of the Ownership, Management, Circulation, Etc., Required by the Act of Congress of August 24, 1912.

Of Breeder and Sportsman, published monthly at San Francisco, Cal., for April 1st, 1918.

State of California,)
County of Marin.)ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared F. W. Kelley, who, having been duly sworn according to law, deposes and says that he is the proprietor of the Breeder and Sportsman, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:

Name of— Post Office address

Publisher, F. W. Kelley, 239 Pacific Bldg., San Francisco.

Editor, F. W. Kelley, 239 Pacific Bldg., San Francisco.

Managing Editor, F. W. Kelley, 239 Pacific Bldg., San Francisco.

Business Manager, F. W. Kelley, 239 Pacific Bldg., San Francisco.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock.)

F. W. Kelley, 239 Pacific Bldg., San Francisco.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.)

None.

(Signed) F. W. KELLEY.

Sworn to and subscribed before me this 20th day of March, 1918.

(Signed) J. H. KELLEY,
Notary Public in and for Marin Co., Cal.
(My commission expires Feb. 7, 1922).

There will be a special day of racing and other entertainments at the Spokane Interstate Fair Grounds on July 4. There will be one race for 2:30 pacers, half mile heats, for a purse of $325; also a 2:20 class trotting race under same conditions, and four running races for $175 purses. No entrance fee will be charged, but five per cent of money won will be deducted and donated to the Red Star Animal Relief Society. The track at Spokane is in much better shape now than it has been for years and horsemen who are now training on it say that it is as nearly perfect as it is possible to get a half mile track.

SPRING JUBILEE

The popularity of the horse among people of fashion was never before more emphatically demonstrated than at the horse show held on May 7 at the San Francisco Riding School. While there are those who still doubt that the horse will ever regain his prestige, those who are members of the "inner circle" are more than enthusiastic over the outlook for the future and realize that all indications point to the return of the best of man's four-footed friends to his former proud position in the world of fashion. The horse is now the "hall mark" of aristocracy, whose ownership takes his master out of the merely wealthy class and places him in the position of the man of estate. The possession of a high-class carriage pair, gig horse, saddler or roadster is today a mark of fashion, position and prosperity, an indication that the owner has money, leisure time and social position.

So much for the social side of the question. There is, however, a much more effective and positive energy making for the restoration of the horse to favor—the substantial and extensive interest that is being displayed in him by the women of today. With them the horse is not a fad, but a most serious proposition, in behalf of which they are commencing to devote not only a generous portion of their time, but of their money as well. Stronger and stronger is becoming the hold of the horse upon the affection of members of the feminine portion of exclusive circles; horse shows have been more numerous and more popular of late years than ever before among metropolitan social circles of the Atlantic seaboard and California's daughters are more than keeping pace with their Eastern sisters as horse owners and breeders.

This was most strikingly illustrated by the participation of the pupils and patrons of the San Francisco Riding School in the attractive programme arranged by Mr. Gordon L. Smith for the Spring Jubilee. Mr. S. J. Valentine performed the arduous duties of Equestrian Director in a most satisfactory manner and the long and interesting programme was run off without hitch or delay. The Grand Entree by pupils and patrons was a most attractive affair and many handsome and artistic costumes were shown; the prizes for the most artistically dressed lady and gentleman were awarded to Miss M. Merengo, representing Columbia, and Mr. R. Fitzgerald, attired as a Crusader; little Miss Jane Kerrigan was also awarded a prize. Mr. D. O. Lively acted as judge in this event.

The second event on the programme was the Jende-Bar and some very skillful riding was shown by Mr. Geo. Bush, Mr. Dan Sullivan and Mr. George Pearson. Mr. Geo. Bush was declared the winner.

The horse show brought out a field of eleven high-class saddle horses. Among the entries were Mavis, owned by Mr. Henry Ahlers, the champion saddle horse of California; and Mr. Sanford Goldstein's Hazel Dale, blue ribbon winner at the State Fair. The entries were as follows: Mavis, Mr. Henry Ahlers; Hazel Dazle, Mr. Sanford Goldstein; Chief Eagle, Mr. Sanford Goldstein; Melba, Miss Edith Goldstein; Nellie, M. A. G. Fry; General, Mr. Louis Cebrian; Arab, Miss Genevieve Leonard; Lady McDonald, Mrs. T. L. Johnson; Black Diamond, Dr. Geo. Boskowitz; Johnny Brown, Mrs. Philip Wand; Fleet Foot, Mr. J. Spring; Betsy Lou, Mr. A. S. Holmes.

The Aerial Polo game, of which Mr. Dan Sullivan was judge, was won by the red team, composed of Mr. Edgar Goldstein, Mr. Victor Matria, Mr. Edgar Swasey and Mr. J. Johnson. The blues, Miss Kentucky Leonard, Miss Edith Goldstein, Mrs. Edgar Swasey and Miss May Cummings, were beaten by two goals.

The Equestrian Quadrille, the Riding Tandem and the Hurdling were all very interesting to the numerous spectators, who filled the large amphitheatre to overflowing. The entire show from first to last was an unqualified success and an eloquent testimonial to the resourceful energy of Mr. Gordon L. Smith, manager, and to the generous response made by the pupils and patrons, and to the high place occupied by the horse in public esteem.

THERE SHOULD BE no hesitancy on the part of owners in entering their horses liberally in the guaranteed stakes to be given for trotting and pacing races at the State Fair, Sacramento, this year. If there ever was a time when the State Agricultural Society needs the support of every owner of a good horse, it is now. The program of races as advertised is the result of much thoughtful study and was made to meet the demands of horse owners. Entries will close on June 1st and a liberal response to this call is urged, for at no time in the history of California has there been so many large stakes offered for light harness horses. The conditions are just as liberal as the stakes, and include innovations that no other associations on the Grand or Great Western Circuits have given. The track will be in perfect order; no money will be spared to keep it in this condition throughout the meeting. Everyone who has ever attended the State Fairs knows how generously the directors and employees treat them, and this will be a banner year for this association. Another thing we would like to see, and that is, every standard bred stallion and famous brood mare entered for competition; the prizes for these are liberal, while the honor of winning is something that every owner can refer to with pleasure in the future.

AT A MEETING OF the Board of Directors of the Pacific Coast Trotting Horse Breeders Association held last month, the situation regarding the prospect of the association being able to give a meeting this year was discussed, and the concensus of opinion of the members present was that under the circumstances due to unsettled conditions caused by the war and affairs generally, the association would not be warranted at the present time in declaring its intention of giving a race meeting in 1918, especially as the association has no track of its own and has always been dependent for its meetings on tracks at the various fair grounds in California.

Since 1889 the Pacific Coast Trotting Horse Breeders Association has given from one to four race meetings each year—of late years, only one meeting—and it is greatly to be regretted that it will not be able to give a meeting this year.

Last year, relying on the Bakersfield fair being as successful as it was the year before, it gave a meeting in connection with the Bakersfield fair on the basis of thirty-three and one-third per cent of the gate receipts. It gave big purses, with extremely liberal conditions and filled them with few entries, and the result was a deficit, seventy-five per cent of which has been made up through an assessment on the members, many of whom have not paid their assessment and probably never intend to. There is considerable money outstanding which is owed the association by the horsemen for entrance who stand suspended with the horses for the amount.

As the association decided not to offer a meeting in 1918, the Board of Directors declared off the futurity stakes and the Secretary was instructed to return the entrance payments in accordance with the rules, which has been done. The stakes declared off were Nos. 15, 16 and 17. The Breeders Association has always kept the entrance money it received for futurity stakes as trust fund, and after returning this money to the nominators as ordered by the board, the association is left with its treasury exhausted.

IN THIS ISSUE will be found in our business columns an advertisement for the Fresno County Agricultural Association, announcing a program of races to be held over their far-famed Fresno race track, October 1 to 5, inclusive. There is always a splendid fair connected with the race meeting there, and this year the association is determined to surpass all others. Six one thousand dollar purses are offered during the week, and as the meeting comes a month after the State Fair, owners who do not care to go north have an opportunity of entering at Fresno and competing for the purses offered there. The conditions of entry are liberal, and as entries close June 1st, a liberal response should be made to the announcement. Fresno has always been noted for having one of the best and safest race tracks in California, and the cordial welcome which awaits horsemen has made it the Mecca of many owners and trainers in years past; hence to all who have never visited the "Raisin City" a rare and enjoyable treat is in store.

THE PREAKNESS STAKE

PIMLICO, Md., May 15.—The palm for the best three-year-old of the turf lies between War Cloud, the strapping bay son of Polymelus, owned by A. G. McComber, and Colonel W. E. Applegate's Jack Hare, Jr.

These two fine specimens of horse flesh, respectively, won the first and second of the Preakness, the blue ribbon event of the turf, today, and divided a purse of $30,000.

The first section was the most spectacular and furnished the thrills to the thirty thousand spectators who crowded the historic Pimlico course.

An especial thrill was given by the close finishing of Sunny Slope, who was second, three-quarters of a length behind the winner.

George D. Widener's Lanius, the favorite, was a poor third, ten lengths behind.

Jack Hare, Jr., was the favorite in the second section, and led the field from the start, finishing two lengths in the lead. The Porter came in second and Kate Bright third.

The time was: First division, 1:53 3-5; second division, 1:53 2-5.

There will be liberal purses offered for the thoroughbreds at both the State Fair and at Fresno this year. There will be at least two races for the runners each day at both fairs. And if the class of horses in training warrants it, additional handicaps will be offered for valuable purses.

The first of the great English classics, the Two Thousand Guineas, was run over the Rowley mile at Newmarket Wednesday afternoon, with thirteen going to the post. At the finish Lady James Douglas' bay colt Gainsborough, by Bayardo—Rosedrop, was first, with C. T. Garland's chestnut colt Somme Kiss, by Sunstar—Stolen Kiss, second, and Major W. Astor's brown colt Blink, by Sunstar—Winkipop, third.

Thoroughbred Matters

EASTERN RACING DATES

Bowie, Md. (13 days)	April 1-15
Havre de Grace, Md. (13 days)	April 16-30
Pimlico, Md. (15 days)	May 1-17
Jamaica, L. I. (9 days)	May 16-25
Belmont Park, L. I. (17 days)	May 27-June 15
Jamaica, L. I. (6 days)	June 17-22
Aqueduct, L. I. (17 days)	June 24-July 12
Yonkers, N. Y. (16 days)	July 13-31
Saratoga, N. Y. (27 days)	August 1-31
Belmont Park, L. I. (12 days)	Sept. 2-14

RACING DATES FOR KENTUCKY

Lexington, April 23 to May 9 (fifteen days).
Churchill Downs, May 11 to May 25 (13 days).
Douglas Park, May 27 to June 11 (14 days).
Latonia, June 15 to July 13 (26 days).

EXTERMINATOR WINS KENTUCKY DERBY

LOUISVILLE, Ky., May 11.—One of the greatest crowds that ever witnessed the Kentucky Derby today saw W. S. Kilmer's recent acquisition, Exterminator, ridden by Jockey W. Knapp, win the forty-fourth renewal of that classic handily by one length from K. D. Alexander's Escoba. Eight lengths back came Viva America, who had set the early pace, while the public choice, A. K. Macomber's War Cloud, was fourth.

The race was run over a sloppy track and under the circumstances the time, 2:10 4-5, was good.

Exterminator's victory was a great surprise to most of the spectators, as few had conceded the gelding a chance.

The start was good, Exterminator getting off in fifth place, which he still held by a length at the quarter. At the half the gelding had moved up to fourth place, which he held by half a length, and at the three-quarter he was first by a head. At the mile he had dropped back a little and was second by four lengths. Coming into the stretch he moved up on Escoba and in the final drive he moved away, finishing with a generous length to spare.

Escoba was second at the start and ran a good race throughout, never dropping farther back than third place. The colt made a determined effort in the last furlong but tired rapidly in the last sixteenth and was going back at the wire.

War Cloud went to the post a heavy favorite at odds of $1.45 to $1, and his showing proved a great disappointment.

The gross value of the race was $18,475, of which $14,700 went to the winner. Of the remainder, $2,500 went to Escoba, $1,000 to Viva America, while War Cloud saved his entry and starting fees.

The two-dollar mutuels paid Exterminator $61.20, $23.10, $12.40; Escoba, $4.90, $4.60; Viva America, $13.20. War Cloud, Lucky B., James T. Clark, Sewell Combes and American Eagle finished as named. The value to the winner was $14,700.

Exterminator is a boy colt, bred by J. C. Milam; he was sired by imp. McGee, a son of White Knight and Remorse, by Hermit, a high class race horse and a first class sire. Exterminator's dam was Fair Empress, by Jim Gore, out of Merry Thought, by Pirate of Penzance, next dam Raybelle, by imp. Rayon d'Or, out of Blue Grass Belle, by War Dance, next dam Ballet, dam of Modesty, winner of the first American Derby.

This is one of the greatest of racing families, and strictly up-to-date. It is the only family that has furnished three winners of the Kentucky Derby and three winners of the Realization Stakes, Ben Brush, Azra and Riley winning the former and Prince of Melbourne, Bright Phoebus and Daily America the latter classic event.

A TOUGH NEW ZEALAND HORSE

Coropett's success in the Raumai Handicap followed upon a most extraordinary experience the Coropett gelding had undergone on his way to the meeting. He completed at the Opunake meeting on the Monday, finishing third to Madam Ristori and Royal Chief in the St. Patrick's Handicap, and on the Tuesday morning was walked some thirty miles to the railway at Hawera, and put in a horse-box for Greatford, the station nearest to the Bulls race course. While waiting to be picked up by a passing train, the box was struck by a cyclone, which passed over the district with such disastrous effect that by some means Coropett got loose and was not recovered till several hours later. Then it was too late for him to reach Bulls in time to keep his engagement on the first day, but he put in an appearance on the second day of the meeting, and after running unsuccessfully in the Greatford Handicap, fought out a tremendous finish with Ohiwia in the Raumai Handicap, and won by half a head. That is the story, shorn of some picturesque details, told me by Mr. J. L. Henrys, who had it at first hand from the gelding's owner, whose veracity, I am assured, is as unimpeachable as that of every other good sportsman.—The Referee.

THE PASSING OF CELLA

Owing to these times in which we are living, the recent "passing" of Louis Cella, of St. Louis, has passed comparatively unnoticed. It is possible, too, that in the passage of time comparatively few of the readers of the Review are today familiar even with his name. Yet he was, in his own day and way, one of the largest influences in American racing, and the effects of his influence are still operative.

That this last satement is true is because of the truth of the statement of the Bard that "the evil that men do lives after them." For no one man, in all probability, ever did so much evil in this world, to and through racing (or racing so-called), as did Louis Cella. He and his partners, Tilles and Adler (it was a queer racial combination), were principal among the men who ruined the good name of "the sport of kings" throughout the length and breadth of this country, and were the chief instrumentalities in converting it into a graft-gambling "game," which set a new standard in the evolution of sporting chicanery. In some ways they were not originators. The "merry-go-round" thoroughbred race (?) track had existed before their debut upon the scene. There were "the Gut," as Guttenburg, N. J., was familiarly known, and its neighbor, Clifton, with other similar tracks thereabout operated by the defunct Gottfried Walbaum et al., that gave the original impetus to the movement in the east which ultimately resulted in the Hughes anti-racing crusade, that storm of popular and administrative wrath in which the tempest smote the just and the unjust alike and left them level with the earth.

But such men as Walbaum were tyros and pikers in comparison with Cella, who was the "brains" of his "crowd," and whose operations had a history resembling those of Jack and his beanstalk. Beginning locally and realizing from his initial experiences in St. Louis the immense possibilities of the "merry-go-round," he aspired to extend his operations from the Atlantic to the Pacific and from Texas to Minnesota—and did so. He organized the "game" on a scale nation-wide. Wherever the ground was favorable he tilled it, and the crops that he harvested were, literally, "beyond the dreams of avarice." As promoter and organizer, the compliment must be paid him of an energy and ability such as no other man identified with "the game" had ever displayed. When he finally overplayed himself, drunk with the incredible success that he had attained, he was, without doubt, in receipt of an income reaching into the millions, which was gathered from coast to coast. With the exception of a comparative few, he (or his "crowd"), had either the domination of or an interest in every race track where "the game" was going on. But his great source of revenue was not so much the tracks themselves as their "feeders," the pool-rooms and hand-books, where the bulk of the money was bet upon the results of the alleged races pulled off by the "ponies"—which steeds (more familiarly known, in many cases, as "lizards"), he also controlled and which ran to his orders.

The tribute thus paid daily into his coffers was something staggering in amount, and it is no wonder that eventually he became infected with the idea that there was nothing not either corruptible or buyable, or that the increasing boldness and audacity with which his operations were conducted reached a height that even the most indulgent of publics and legislators could no longer ignore. A situation was precipitated which resulted in the passing of the "game" as he had played it. If the goose that laid the golden eggs was not incontinently killed, her productiveness was decreased to about one-tenth of one per cent of what it had been.

Cella, however, while ruining the good name of the sport, and, incidentally, thousands of men connected with it, retired from it with the riches of a plutocrat. It is, however, hardly correct to say that he retired. He never ceased to be a promoter of "merry-go-rounds"; but they were no longer his real field of operation. He turned his attention to politics, theaters, and real estate in St. Louis, and, using the same methods which he had employed upon the turf, he attained in his new field a similar success; becoming, before his death, the so-called "boss of the underworld" of the city, one of its chief political powers, and its biggest real estate operator, in this way adding immensely to his "pile." The amount which he died possessed of will probably never be publicly known, but it is without doubt larger than any other estate that was ever built up in just the same way. It is not so much 'tainted" as putrid money, for every dollar of it represents either ill-gotten gains, or wealth founded upon them. The plain, unvarnished tale of his career, with all its episodes laid bare, would be an unique document in the chronicles of chicane, but, of course, it will never be written.

The havoc that Cella wrought with thoroughbred racing, as we all know, exercised a strong, indirect effect upon the light harness turf. That was something with which he never meddled. It proffered him no "get-rich-quick" opportunities, nor other facilities to his liking. But the public disgrace which he was the means of bringing upon running racing and the severe anti-race track legislation passed in most of the States of the Union due thereto, have not failed to react upon the harness speed horse, as well, and in this way, wrought inestimable damage. Trotting horsemen, therefore, have reason to remember Louis Cella. His name, in fact, will remain synonymous with all that is reprehensible in turf affairs. Nor is there any "moral to the tale." He died triumphant and "unwhipt of justice"—a circumstance which we will leave the professional demonstrators of ethics to explain, feeling our own inability to do so. The Horse Review.

CUDGEL DEFEATS OMAR KHAYYAM

Baltimore, Md., May 8.—J. K. L. Ross's grand Broomstick colt Cudgel, for which he paid over $30,000 last fall, met and defeated the mighty Omar Khayyan today at Pimlico before a crowd that nearly equalled the record-breaking attendance of last Saturday.

The Pimlico Spring Handicap of $5,000 added served to bring together these two wonderful racers, which, since the retirement of Hourless, are acknowledged as the best of the older horses on the American turf today. Their appearance on the track gave the big crowd a chance to display their pent-up enthusiasm, and the cheering did not stop until all the horses reached the post. Priscilla Mullens was the first to show in front, closely followed by her stablemate, Cudgel. After rounding the far turn, Cudgel moved into the lead, and, after racing Borrow into defeat, held on gamely and withstood strong opposition from Bondage, which ran a splendid race to finish a close second. Omar Khayyam, in the meanwhile, closed up strongly after a rough race for the first half and finished third.

The race was run in fast time, the half being traveled in 47 3-5, and the mile in 1:39 3-5. The stake was worth $4,155 to the winner.

NOTABLY BRED YEARLINGS FROM EUROPE

Forty thoroughbred yearlings reared in France and England arrived on the third instant at an Atlantic port on board the steamship Irishman, consigned to the Fasig-Tipton Company, which will sell thirty-four of them by auction at Saratoga Springs during the August races. They are owned by Mrs. Herman B. Duryea, Messrs. Clarence H. Mackay, H. P. Whitney and Philip A. Clark.

Five of the young racers in Mrs. Duryea's lot are sons and daughters of Durbar, the horse that won the last race for the Derby stakes at Epsom, England, a few weeks before war was declared. Durbar was bred by Mr. Duryea at the Haras du Gazon, in Normandy, France, where fifteen of the yearlings in this importation were foaled. One of these, a bay colt called Armenus, is by the noted American bred race horse and sire, Irish Lad, out of Armenia, the dam of Durbar, by imported Meddler.

Mr. Mackay is the owner of nineteen yearlings in the shipment, and thirteen of these are by Fitz Herbert, winner of $55,000 in purses and stakes and one of the best race horses of his day on the American turf. The others are by Sundridge, Rabelais, Macdonald, Flint Rock, Ramrod and Aven. The dams of nearly all are winners or producers of winners and they are daughters of such horses as St. Frusquin, Meddler, Isinglass, Uncle, St. Florian and Hastings. Among the colts from which much is expected is Proscenium, a chestnut, by Fitz Herbert out of La Claque, by Meddler, out of Audience, dam of Whisk Broom. They came from his Haras de Fresnay, in Normandy.

Mr. Whitney's importation includes five of his own breeding from mares that were in France when the war broke out and that could not then be removed on account of a government order. They will be taken to Mr. Whitney's Brookdale Farm, at Red Bank, N. J.

Mrs. Duryea's yearlings are to be taken to Silver Brook, not far from Red Bank.

Mr. Mackay's colts and fillies go to a nearby farm.

Mr. Clark's youngsters will go to Belmont Park.

The Mackay and Duryea yearlings left France more than a month ago, first crossing the Channel to England, where they were kept for a week or more.

Entries for the twenty stake races closed for the August meeting at Saratoga Springs number 2,254, an average of 112 to a race. In nineteen races last year the total was 1,988, or about 104 to a race.

In the all aged races some of these events show a falling off by comparison with last season, when there were 708 entries in seven races for three-year-olds and upward. The number this year is 638. In five races for three-year-olds the total this year is 488, as against 425 in 1917; while the number of two-year-olds in eight races is 1,128, as against 855 in seven races last season. The Flash Stakes drew the largest list, 195 juvenile thoroughbreds having been entered. In the new Schuylerville Stakes for two-year-olds, 135 are eligible to start.

As was the case last year, every stake run at the Kentucky Association meeting this spring will carry with it a valuable trophy in the form of a loving cup or piece of silver plate. These trophies are eagerly sought by the horsemen, and in many homes of prominent turfmen they are among the most highly prized possessions.

DEATH COMES TO W. F. SCHULTE

Louisville, Ky., April 25.—William Fred Schulte, a prominent turfman, died at his home, 1483 Saint James Court, this morning at 2:40 o'clock after a long illness from dropsy. Mr. Schulte was 60 years old and had been most all his life connected with the thoroughbred horse industry. The funeral will be held at 2 o'clock Saturday from the residence, with burial in Cave Hill cemetery. He was a native of Louisville and at one time conducted a haberdashery store in this city. He is survived by one brother, John C. Schulte, who lives at Iona, N. J.

Several years ago Mr. Schulte was one of the most prominent figures in racing circles in the West. He was president of the American Turf Congress, a body which controlled racing affairs in the South and West. When the New Louisville Jockey Club absorbed the stock of the old Louisville Jockey Club, which was founded by the late M. Lewis Clark, Mr. Schulte was elected president of the new organization.

It was then that the new grandstand (the present one) and other extensive improvements were made at Churchill Downs. After retiring from an official capacity in the New Louisville Jockey Club, Mr. Schulte acted as steward at several race tracks during the last ten or fifteen years. Last winter he was acting in an official capacity at Havana, when sickness forced him to return to Louisville on February 17, where he has been dangerously ill until his death this morning.

In addition to acting in an official capacity at many race courses, Mr. Schulte has been an extensive owner and breeder of thoroughbreds for the past quarter of a century. Many notable steeds have worn his colors. Among these were Flora Pomona, a Kentucky Oaks winner; Zienap, a stake winner; Batts, winner of the Clark Handicap at Churchill Downs; Gliding By and Gliding Bell, two good race mares. There were many other good horses bred and raced by Mr. Schulte, who conducted a breeding establishment near Louisville.

One of the greatest racers owned by Mr. Schulte during his long career on the turf was the mare Alleviate. This mare, in addition to being one of the queens of the turf, produced some great race horses.

—o—

Bowie track this spring has been the finishing place of several promising jockeys, Jose Rodriguez, a sixteen-year-old lad from Estramadura, in old Spain, the birthplace of Hernando Cortez and many other gallant Spaniards of the age when Spain was great, looks about the best just now. The veteran James Arthur has Rodriguez in tow, and he declares that he has never handled a more promising youngster. Nor is Arthur the only admirer of Master Joe. The racing regulars to a man pronounce him a comer. He is alert enough at the starting gate, and there is no rider anywhere more patient. He waits as Redfern and Odom used to wait, and his notion of pace is first rate. Arthur will take this youngster to New York after the finish of the Maryland racing season, and, if Rodriguez keeps his nose clean, his rise is sure to be rapid.

Maryland is missing little Walls, one of the youngsters who made such a favorable impression hereabouts last fall. This daring youth is paying the penalty for his unthinking daring. He is nursing injuries sustained in a fall he received trying to sneak through too small a gap on the rail in a race run at one of the winter tracks.

But "Sandy" McNaughton's urbane youngster, Kummer, is back and going well. Kummer's best asset is his quickness at the starting gate. He seems to be always ready. Moreover, he is as courageous as they make them. He never takes the outside if there is anything resembling a hole by the rail through which he can slip. He is not as patient as is Rodriguez, but, being an intelligent lad, he gives heed to advice and he will learn. McNaughton has had several bids for Kummer, but he prefers to keep the boy for himself. McNaughton has horses—two-year-olds and three-year-olds—of which he expects something this year.

Little Mergler, who belongs to Edward Heffner, seems to have profited by his winter's experience. He has acquired confidence at the starting gate; he handles his horses well in turns, and he rides as energetic a finish as any boy. Sterling, also, is showing to better advantage than he did last fall, but he is as wild and as undisciplined as a broncho. Never afraid to risk his own neck to get a mount ahead, he never seems to care when he puts other boys in jeopardy. Two or three suspensions, probably, would teach him better track manners, and the sooner he is taken in hand by the Stewards the better it will be for him and for the boys with whom he rides.

—o—

John E. Madden is naturally very much elated over the victory of Gainsborough, bay horse, 3, by Bayardo out of Rosedrop by St. Frusquin, in the Two Thousand Guineas, as it greatly enhances the value of Collar of Roses, purchased by him at the dispersal sale of the Wickliffe Stud. Collar of Roses is a bay mare, 8, by Collar (son of St. Simon and Ornament, dam of Sceptre) out of Trent Rose, own sister to Rosaline, dam of Rosedrop, winner of the Oaks and dam of the Guineas winner, Gainsborough. Collar of Roses was mated this year with Friar Rock.

JOCKEY ARCHIE McINTYRE HOME

Fleeing from Bucharest to escape capture by the Germans, only to arrive in Odessa and leave there one day before the Huns captured the city, was the harrowing experience of Archie McIntyre and his wife, who arrived in San Francisco recently. McIntyre, the jockey who rode for "Lucky" Baldwin in America more than twenty years ago, has been training a string of twenty horses for Count Brazier in Rumania.

Horse racing, according to McIntyre, is on the boom in Russia, France and England, as the governments of these nations promote the "sport of kings" and no price is too high to pay for a good race horse. At all of the race courses of the foreign nations, diplomats assemble to watch the races and discuss state affairs. Many American financiers and horse fanciers are in France—Frank J. Gould, Wm. K. Vanderbilt, Clarence Mackay, and dozens of others who kept American racing alive for many years.

The system worked by the Russian government in purchasing horses is to buy a famous stallion and charge a nominal price to farmers and peasants who desire to breed their horses, thus keeping even the poorest peasant supplied with the best horses. Last year the Russians purchased a stallion from England, paying $140,000 for him, with the purpose of breeding Russian horses. A certain per cent of the gate receipts at the race tracks is turned over to the government and a tax is put on all betting. This money forms a fund with which foreign horses and stallions are purchased.

McIntyre left America twenty years ago for France. With him were Tod Sloan, Eddie Dugan, Wingfield and Frankie O'Neil. After racing on the French courses for many years, Dugan and Wingfield went to Russia, while McIntyre took a contract to train a number of horses for Count Brazier in Rumania. The stable was composed of twenty thoroughbreds and, when the war broke out, Archie went to Bucharest. This was in the latter part of 1914. The Huns swooped down on the city and McIntyre and his wife barely escaped with their lives. He was in the city while the Zeppelin air raids were on and witnessed many bombing expeditions. After fleeing from Bucharest he went to Moscow and from there to Odessa. Here he established a stable with Dugan and Wingfield riding for him. The Germans captured the city and the three again narrowly escaped, leaving the city a day before it was sacked.

Archie relates a thrilling incident of getting caught between enemy fires in the Crimea. He went down to get a loaf of bread and while returning the Bolshevik troops started a small war of their own on the Crimeans. Archie was forced to lie flat on the ground until the firing was over and then make a run for it. The hotel in which he was living was under fire and destroyed by the time he arrived there.

Wingfield went back to Odessa and was captured by the Germans. Dugan is still in Vladivostok, where McIntyre left him. Samaria, McIntyre says, is full of German prisoners. He went to the National Hotel in that city to put up for the night and found it crowded with Germans. They are allowed all privileges and are well treated. All of them have new uniforms and are allowed to wear shoulder straps while interned.

Upon leaving Odessa, McIntyre came over the trans-Siberian railroad to Vladivostok, where he left Dugan and Wingfield. Mme. Leontivna Botchkarova, founder of the Russian Battalion of Death, came over on the same boat with McIntyre and his wife.

—o—

George Strate, general manager of J. H. Rosseter's breeding and racing establishment, was in Lexington this week looking over the brood mares owned by Mr. Rosseter in Kentucky. Mr. Strate arrived at Churchill Downs last week with five horses belonging to his employer, the shipment having come direct from Mr. Rosseter's Wickiup Ranch in California. The horses arrived in splendid condition and will be placed in training for the spring season in Kentucky.

Mr. Strate also brought three horses belonging to C. W. Clark, which were consigned to Mr. Clark's trainer, John Lowe, at Douglas Park. Two other horses, the property of L. A. Blasingame, wealthy Californian, were also included in the shipment, and these will be transferred to Trainer H. T. Batcheler upon his arrival here. These latter ones were Robert E. Lee, a three-year-old colt by General Roberts—Princess, and Gold Flush, a two-year-old, also by General Roberts. Robert E. Lee was campaigned at the last Tijuana meeting, where he won four races. Owing to his having raced last year prior to April 1, the colt had to be turned out for the remainder of the year.

Following are horses that will be raced in the interest of Mr. Rosseter:

Emin Pasha, blk c, 4, by Orsini—Tenebrae.
Serenest, br f, 4, by Trap Rock—Souveraine.
Dona Winifreda, b f, 3, by Dr. Leggo—Roman Lady.
Osiris, ch c, 2, by Reformation—Sea Air.
Berrill's Image, bay mare, 4, by Berrill—Proud Beauty, will be bred to Rock View.

BOOTS DURNELL HERE

Charles E. "Boots" Durnell, the well-known turfman, who campaigned a stable on local and Eastern tracks for many years, is a visitor in the city, having arrived from Russia via Victoria Friday.

It is ten years since Durnell left San Francisco, and during the greater part of the time he has been racing in France, Rumania and Russia. He brought back much interesting information regarding conditions abroad and the doings of American turf people who are still in foreign lands.

Durnell, who will be remembered as the owner of Nealon, winner of the Suburban Handicap, met with much success across the Atlantic, especially since he was engaged to train for Alexander Margil, prime minister of Rumania. During the seven years he spent in that country, Durnell won every big race where the value was over $1,000, these including the Derby and St. Leger. Many of the events were won for members of the royal family of Rumania, and they always donated the money to charity.

Durnell left Rumania after the German invasion, and since that time has raced at Petrograd and Moscow. Conditions in Russia are not favorable since the revolutions, horses being on food cards, like the people. The limit was one quart of oats a day for each animal, this being fixed by the jockey club.

Jess Durnell, a brother, remained in charge of the breeding establishment conducted by the prime minister of Rumania. The visiting turfman says that the Russian, Rumanian, French and German governments are doing all they can to maintain the high quality of horses by encouraging the breeding and racing of them. The race meetings are held in the mornings; and the public is not admitted, there being no waggering in some of the countries and the purses being made up by subscriptions among the owners.

The Rumanian government maintains establishments throughout the country for the care of stallions originally bought at weanlings in England and France. They desire to keep up the quality of army horses. Durnell bought many of these horses for the government.

Eddie Dugan, one of the greatest of American jockeys and well known in California, rode last season in Russia for Madame Lazaroff, for whose husband Jack Keene trained when he was in Russia some years ago. This year Dugan is under engagement to an English owner, but Durnell says there may be no racing there.

Eddie Ross, who rode at Emeryville, is foreman of the stable Durnell had in Rumania. He joined the Belgian army early in the great war, was captured by the Germans and later made his escape to France. From there he went to Rumania before the United States entered the great conflict.

Winnie O'Connor was an officer in the French army the last time Durnell heard from him. He was in charge of ambulances. O'Connor rode over the jumps on the French tracks after he grew too heavy for flat racing.

Durnell met with many interesting experiences, especially in Moscow, where he and his wife were confined to their apartments for eight days during the revolutionary fighting. Mrs. Durnell is an opera singer, who recently closed an engagement in Moscow. The Durnells will go to New York shortly.

—o—

Word comes from England that Richard Croker's famous Epsom Derby winner, Orby, died at Croker's stud farm in Ireland last week. It is a heavy loss to his owner, Orby being a young horse so far as stud life goes and but fourteen years old. In Kentucky he has always been vested with a tinge of home interest in that his dam, Rhoda B., was bred by Stanhope Brothers near Lexington. Orby was by Orme (a son of Ormonde and Angelica by Galopin) out of Rhoda B., by Hanover; 2d dam Margerine, by Algerine (a son of Abdel-Kader and Nina by Boston).

Orby's racing career was brief. As a two-year-old he started twice in Irish stake races without winning, but finished third in his second race. As a three-year-old, in 1907, he started five times and won four races—the Earl of Sefton's Plate at the Liverpool spring meeting; the Baldoyle Plate at Baldoyle, Ireland; the Epsom Derby at Epsom, England, and the Irish Derby at The Curragh, Ireland. His defeat was in the Atlantic Stakes at the Liverpool summer meeting, in which he fell lame.

There was a disposition for some time in England to rate Orby among the poorer winners of the Derby, but opinions on that point have changed and it is now generally conceded that he was a great three-year-old. In Diadumenos, Eos and Diadem he sent fine racers to the turf in England.

—o—

Word reached Lexington this week of the death in New York of Col. William Finnell. He was a resident of New York for about thirty-five years. A native of Georgetown, Ky., where his brother "Dick" Finnell resides, he left home when a boy, drifted West and finally settled in New York. His knowledge of pedigrees and performances of the thoroughbred was extraordinary. This interest came to him naturally, as he was a nephew of Price McGrath, the famous Kentucky horseman.

HOURLESS RETIRED TO THE STUD

New York, May 7.—Hourless, Major August Belmont's great thoroughbred son of Negofol and Hourglass II, will race no more. No longer has Wilfrid Viau's wonderful Omar Khayyam to fear his rival, which defeated him in the $10,000 special race at Laurel last October, and many a friendly wager made on horse against horse, as between these two, will have to be declared off. They will not meet again.

Last Saturday, while Major Belmont was watching Hourless work a mile for Trainer Sam C. Hildreth, this star of the stable met with some accident. Just what happened Trainer Hildreth was unable to say. Nor could the boy who rode the horse tell what it was that made him pull up and come out of his work with a slightly injured tendon of the off fore leg. It was reported about Belmont Park later that Hourless had bowed a tendon, but this was denied, both by Major Belmont and by Trainer Hildreth.

Although the injury was so slight that yesterday Hourless was walking about the Belmont barn without showing any sign of lameness, Major Belmont made a quick decision as soon as there was a slight chance that there might be the least necessity for letting up in training. He announced his belief that Hourless would be of more real use to the turf if placed in the stud, and so today or not later than tomorrow he will be on his way to Major Belmont's Nursery Stud, near Lexington, Ky.

Because the breeding season already is getting on, orders were given that Hourless be rushed to the Nursery Stud to be mated with Fairy Gold, dam of the great Friar Rock, the one which won the Brooklyn and Suburban Handicaps of 1916 and the Belmont Stakes of the same year, and which was sold as a three-year-old to John E. Madden to be taken to Hamburg Place.

Trainer Hildreth was inclined to believe that the injury might prove only temporary, but the colt's owner decided that he did not care to take the chances of trying to patch up so good a colt and then retire him after the glory of his great achievements had been dimmed by performances which did not represent his highest form.

Besides this Major Belmont recognized the fact that, although the breeding season already is somewhat advanced, there is left enough of it to make the services of such a great horse as Hourless extremely valuable, and in view of this it was felt that there was no time to be lost in reaching a decision one way or the other.

Without the stamp of accomplished success in the stud, no horse could have presumptively greater value for service on a stock farm than Hourless. Some of the most accomplished and experienced judges of thoroughbreds have unhesitatingly pronounced him the handsomest and best looking race horse ever saddled in this country, while brilliant performances on the turf and his super-royal breeding entitle him to the highest place among the untried stallions.

His sire, Negofol, one of the most successful of the younger generation of French sires, was a son of the richly bred Childwick, which in turn was a son of the great St. Simon, and that world-famous race mare, Plaisanterie, while his dam, Nebrouze, was a daughter of Hoche and Nebuleuse.

On the side of his dam, Hour Glass II, Hourless also had a priceless racing heritage, for she was a daughter of Rock Sand (son of Sainfoin and Roquebrune) and Hautesse (daughter of Archiduc and Hauteur).

Hourless began his career as a two-year-old by winning the Juvenile at Belmont Park, five furlongs in 0:59 1-5, from Ivory Black, Julialeon and six others. Then he ran unplaced in the Great American, with Campfire, Ivory Black, Ticket and Bonnie Witch ahead of him. Next he lost the Tremont to Ticket and Star Gazer, and then the Saratoga Special to Campfire and Tom McTaggart

Then he began to do better and won the Grand Union Hotel Stakes, beating Rickety and Tom McTaggart. In the Nursery he finished first, but was disqualified, with Straight Forward, Vivid and Koh-i-Noor finishing behind him in the order named. His next race was the Eastern Shore Handicap, in which he beat a large field handily; and then he wound up the season by winning the Annapolis Stakes easily from a field of eight.

In his three-year-old form he began the season by winning the Withers Stakes from Rickety, Skeptic, Campfire and Ballad. Then he won the Belmont with ridiculous ease from a very moderate field, and then the Southampton Handicap, beating such good ones as Corn Tassel, Bella Desmond, Lucius and Brooklyn. When he next went to the post it was for the Brooklyn Handicap, in which he made a miserable showing, having no speed at all and utterly unable to do himself anything like justice in the muddy going. After this he was laid up with a skin disease which kept him off the track during the Saratoga meeting, and then he came back to Belmont Park and won the Amityville Handicap very easily, after which came the memorable race for the Lawrence Realization, in which Omar Khayyam beat him by a nod.

Then came his final race, which was a $10,000 special for him and Omar Khayyam, and the result was a decisive victory for Hourless.

Hourless will be accompanied on his journey to Kentucky by the big bay filly, Belvale, by the fast and game Watervale out of that wonderful race mare, Beldame, by Octagon, the famous son of Rayon d'Or.

—o—

Accompanied by a number of friends, John H. Rosseter, holding the position of vice-president, manager or other official position in numerous local and national enterprises, left for the East last Saturday, and will not return for several weeks. Despite his numerous business cares, Rosseter has his hobbies, the principal ones being dogs and horses. One of the chief purposes of the journey will be to attend the annual Kentucky Derby.

A string of the finest of the Rosseter horses have been sent to the Blue Grass State from the Wickiup Stock Farm of Sonoma, and the burnt orange and white will appear at several of the racing events. These thoroughbreds will be piloted by Albert Johnson, one of the crack jockeys of the country, who is under contract to the Rosseter stable.

As a member of the shipping board, Rosseter will go to Washington and there participate in the meeting of maritime men from all ports, and assist in solving the problems of speeding up the loading and discharging of the cargoes of the numerous vessels of the rapidly growing American merchant marine.

— — —

Caper Sauce, one of the most popular and best known of Canadian bred race horses, ended his career a few days ago at Hamilton. Caper Sauce was bred by Mr. Seagrave and was a son of Morpheus and New Dance. He was sixteen years old when he died and was a pretty steady winner for thirteen seasons. A remarkable feature of his racing was his winning of the same race, the Whitby Plate, at Woodbine, for eight successive years an accomplishment without parallel in the history of the turf anywhere.

— — —

The veteran jockey, Eddie Ames of Berkeley, who formerly rode for Johnny Campbell, when that horseman was training a string of the Santa Anita horses way back in the halcyon days of the Tanforan track, is now riding for the King of Spain, and is meeting with a good measure of success. Jockey Ames was the boy who rode Don Gara to victory at odds of three hundred to one at the old Bay District Track. Ames has been riding of late years in India and left that country to go to Germany with Geo. Archibald, but was refused admission by the German Government and went from there to Spain.

— — —

Barney Schreiber's good old stallion Bannockburn died this week at Mrs. Sullivan's farm on the Liberty Pike. Bannockburn was foaled in 1895 and was therefore twenty-three years old. He was a brown horse, 16½ hands, by Hayden Edwards out of Bettie Blaise by St. Blaise, and was a winner at two, three, four and five over some of the best horses in America. Bannockburn ran second to the great race mare Imp in the Suburban. He was the sire of Dr. Gardner, Horace E., Joe Carey, Sagar, L. H. Adair, etc.

— — —

Emil Herz's California-bred colt, High Cost, did not make a favorable impression in his Preakness trial, which was in the Harford Handicap. The failure of this good-looking son of Vontromp and Mitten to defeat a bunch of such sprinters as Tea Caddy, Philippie and Harbeck at five and a half furlongs, when his people thought him right, was not encouraging, especially after he showed the way into the home-stretch. But when all is told, High Cost does not look like a distance runner. He has the sharply sloping neck of the sprinting type. It is difficult to find an excuse for a horse that has been in training many months and should be fit.

— — —

The following foals are reported from A. B. Spreckels' stock farm at Napa, California:

Jan. 24—Bay or brown colt by Runnymede—Zafra.
Feb. 1—Chestnut colt by Runnymede—Handsome Florrie.
Feb. 12—Bay or brown colt by Runnymede—Embla.
Feb. 16—Bay colt by Voorhees—Egeria.
Feb. 17—Chestnut filly by Runnymede—Salvatrix.
Feb. 18—Chestnut filly by Runnymede—Napa Girl.
Feb. 20—Bay filly by Dr. Leggo—Georgia VI.
Feb. 24—Bay colt by Runnymede—Georgia Girl.
Feb. 25—Bay colt by Runnymede—Dorothy S.
Feb. 26—Chestnut filly by Runnymede—Hymir.
Feb. 25—Bay filly by Dr. Leggo—Othale.
Mar. 2—Bay colt by Dr. Leggo—Oratossa.
Mar. 2—Bay filly by Runnymede—Lily Golding.
Mar. 2—Bay filly by Runnymede—Bremerhafen.
Mar. 4—Bay colt by Voorhees—Norinne.
Mar. 5—Brown filly by Dr. Leggo—Abbas.
Mar. 8—Chestnut colt by Dr. Leggo—Flush of Gold.
Mar. 20—Bay colt by Dr. Leggo—Priceless Jewel.
Mar. 21—Brown colt by Voorhees—Formella.
Mar. 29—Chestnut colt by Runnymede—Pourquio.
Apr. 1—Bay colt by Voorhees—Emir.
Apr. 2—Chestnut colt by Runnymede—Mice.
Apr. 13—Chestnut colt by Runnymede—Ventura.

Col. Milton Young, famous as a breeder and owner wherever the thoroughbred horse is known, died at his home in Lexington early Sunday morning, the 5th inst., of uremic poisoning. Col. Young was a native of Kentucky and sixty-seven years of age. His establishment at McGrathiana was one of the greatest in the world. Space does not permit mention of the many good horses bred by Col. Young, but there is no question about Hanover having been the best of them all.

In the passing of Col. Young the thoroughbred world has lost one of its truly great men. He was a most democratic man, being equally at home with all classes of men, and any man, whether rich or poor, who sought his advice, was assured of an honest and fearless opinion. He was held in highest esteem by turfmen everywhere. His knowledge of every angle of racing was perhaps as great as that of any man ever connected with it, and proved invaluable in the forming of laws for guidance of the sport, when the State of Kentucky created a racing commission, on which he served for several years.

— — —

Reno, Nev., May 15.—The Business Men's Association of Reno announces two running race meetings for the season, the first to start June 15 and continue to July 6, inclusive; the second to run from August 17 to September 7. Following the fall meeting, the state fair races at Fallon, from September 9 to September 14, will furnish occupation for the horses and horsemen.

Purses ranging in value from $150 to $300 will be given with a handicap each Saturday. The Nevada-California Futurity, with a value of $2500, will be run July 4.

More than 150 horses are quartered at the track and 85 of them are in active training. More than 300 are expected to be on hand for the opening next month. Carloads are expected from Boise, Idaho; Escalante, Utah; Bakersfield; Claremont, Okla.; Limon, Colo.; Hot Springs; Pimlico and Lexington.

— — —

Niagara Falls, April 10.—Niagara Falls, N. Y., may have a modern racing plant. John F. Berger, general manager of Thorncliffe Park, Toronto, has options on land for a track in Buffalo and LaSalle, and will this week decide which place will get racing. Berger favors LaSalle because of the drawing card that Niagara Falls is. He will advertise the track as being at the Falls if he decides to establish the plant at LaSalle. The track, if established at LaSalle, will be ready for operation in July. Little is known here regarding the project. Berger is said to be backed by a Canadian syndicate composed of men prominent in racing on the Canadian tracks.

— — —

That all who are interested in racing may know specifically what the Kentucky State Racing Commission is expecting and has planned with regard to the raising of the $300,000 that has been pledged by the thoroughbred horse interests to the American Red Cross War Fund, the following is taken from the minutes of the meeting of the commission here on April 6:

"Upon motion duly made, seconded and carried, the racing associations licensed by the Kentucky State Racing Commission are requested to raise $160,000 during the year of 1918 for the American Red Cross Fund, and the managers of the several licensed associations being present agreed to do so.

"Upon motion duly made and seconded, the following resolution was carried:

"Resolved by the Kentucky State Racing Commission, That the respective racing associations operating under licenses of this commission be and are requested to retain from all purses, stakes and money won by the various horses racing on the several tracks the sum of ten per cent of all said purses, stakes and moneys so won or sufficient thereof to produce the gross sum of $75,000 during the year 1918 and remit the sums collected to this commission within ten days after the conclusion of their respective race meetings.

"Resolved, That the said associations condition all of their purses and stakes in keeping with the foregoing resolution.

"Upon motion duly made, seconded and carried, the following resolution was adopted:

"Resolved by the Kentucky State Racing Commission, That the several racing associations operating under licenses of this commission retain ten per cent or sufficient thereof to produce the aggregate sum of $25,000 during the year 1918 from the salaries and pay of all employes and jockeys of said several racing associations, and remit the sum so collected to this commission within ten days after the conclusion of their respective meetings. This resolution shall apply to all persons drawing salaries of $5 or more per day. For all employes receiving less than $5 per day during race meetings, the several associations shall pay ten per cent of the wages so paid.

"Upon motion duly made, seconded and carried, the following resolution was adopted:

"Resolved by the Kentucky State Racing Commission, That the breeders of thoroughbred horses be and are requested to raise for the Red Cross War Fund the sum of $40,000 and remit the same to this commission."

Notes and News

Owing to the serious illness of Wm. Hogoboom of Walla Walla, his son Elmer is training his stable of harness horses, consisting of Joe Buckley 2:09½, Kid Riley 2:09¼, Allen Dam 2:09½.

G. A. Kelly of Auzilla fame is breeding a few mares to Barnie McK. and developing a couple of green trotters sired by him. They are trotting miles around 2:35. His brood mare, Lady Lynmont, the dam of Joe Buckley and Baby Jolly, has just foaled a brother to them.

C. A. Harrison of Seattle, Wash., well-known horseman of the Pacific Coast, has been engaged as superintendent of hotels and camps at Rainier National Park, Tacoma, Wash.

Horsemen throughout the country will be gratified to learn of the recovery of John Splan from a long siege of illness. At one time he was in a precarious condition, but now is so much improved that he is able to be out of doors.

Peter McKlyo 2:06, the trotting stallion reserved by his owner, L. N. Todhunter, at the Chicago sale, will be raced over the Central West tracks this summer and possibly shipped to Columbus and Lexington in the fall. Jim Thompson, who has charge of Mr. Todhunter's horses, will also campaign Charlotte McKlyo (2) 2:25¼, and a green trotter by General Watts (3) 2:06¾.

Ben Earl 2:00½ is being prepared for the season's campaign at Readville by Bob Proctor. His present trainer came very near riding a mile in two minutes behind Uhlan as he finished on the outside of Hamburg Belle at North Randall when she made the world's race record of 2:01¼ for trotters. Possibly Ben Earl may carry him one in even time if his owner decides to give him a few races on the mile tracks.

The Matron Stake, one of the two events given annually by the American Association of Trotting Horse Breeders, will be decided at the Philadelphia Grand Circuit meeting. Northern breeders would be pleased to see A. B. Cox win it with Nella Dillon, the handsome filly that finished second to Peter June in one heat at Belmont Park last year and afterwards defeated the big colt at Lexington in the two-year-old division of the Kentucky Futurity in 2:06¼.

There is not much doubt but that in the near future an army of at least three million men will be raised to carry on our part in the great war. The cavalry branch of this immense army will probably reach fully half a million. It has been esimated that it will take about two million head of horses to equip our cavalry and artillery, haul or ammunitions, supplies, etc. The number of horses in the country is estimated at something less than twenty million, so that one in ten will have to go to war. When we consider the number that are not good enough to pass the army inspectors on account of age, weight, unsoundness, etc., it will readily be seen that we do not have so large a supply to draw from as would seem at first glance.

A man who has a faculty for calculating details has figured out that as served at public tables there are forty-eight slices in a pound of a particular brand of bacon or three slices for sixty cents is the price as served in clubs, restaurants and dining cars; that is twenty cents a slice. Forty-eight slices multiplied by twenty cents makes just nine dollars and sixty cents the pound the consumer is paying for that bacon. Now who will divulge whether it is the packer, the retailer or the caterer who is charging nine dollars and fifteen cents a pound over wholesale cost for bacon served to the consumer?

The well-known performers, William, Single G., Miss Harris M., Hal Boy and Russell Boy, are named in the free-for-all pace events on the Grand Circuit, while Early Dreams, St. Frisco, Mabel Trask, Royal Mac, Lu Princeton and Bacilli are engaged in the free for all trots.

The manner in which horses are wintered by Walter Cox and T. W. Murphy is a revelation to those who are of the opinion that high-class trotters and pacers are kept in a bandbox and done up in tissue paper. During the coldest winter days, the stall doors are kept open, and in Murphy's establishment the windows are never closed except in stormy weather.

Land for permanent fair grounds has been purchased by the Glenn County Live Stock and Agricultural Association, which annually holds fairs at Orland. The dates of the 1918 fair are September 16-21, and extensive improvements are being made on the new grounds in preparation for the show. Plans for a much larger exhibit this year are going forward. The officers of the association are: President, John J. Flaherty; secretary, E. A. Kirk; treasurer, H. M. Kingwill.

White Sox 2:03½ and Thomas Earl 2:05¾ will meet in the Canadian free for all this season. The former is now owned at Bathurst, New Brunswick, and the latter at Sidney, Nova Scotia.

On Sunday, May 26, a racing event will be held at the Woodland track for the benefit of the Red Cross. Charles F. Silva, proprietor of the course, announces that there will be four races, all fast events, and some of the best horses of the vicinity will be entered. A free for all race, a 2:15 trot and a 2:20 pace are on the program.

For the first Grand Circuit meeting in 1918, the association at Columbus, Ohio, received twenty-three nominations for the 2:12 trot, twenty for the 2:07 trot, seventeen for the 2:10 pace, and fourteen for the 2:05 pace.

The race meet at Spokane this fall during the Interstate Fair will consist of six full days of racing, including two special harness races each day, also one special run, and not less than two overnight entries. Purses offered for the week aggregate over $14,000. Work on the half-mile track at the Spokane Interstate Fair grounds was started about a month ago, and at the present time the track is in better shape for so early in the season than it has been for many years. It is to be used exclusively this year for horse racing, as no automobiles will be permitted on it. It is expected that by the time of the meet during the fair that this track will be the fastest in the Northwest.

The Boston Work-Horse Relief Association sends out the following:

"Mange is so prevalent among horses in Boston and elsewhere in New England, affecting not only horses, but cattle, that it is fast becoming a scourge. A good and cheap remedy is vinegar. This should be sopped on thoroughly every day, covering not only the mangy spots, but the whole horse—legs and all.

"The horse should then be rubbed vigorously, including his legs; walked about inside the stable to prevent his catching cold, and blanketed with blankets that have not been used on a mangy horse. The harness, halter, brushes, currycomb, etc., should be dipped in vinegar, or in gasoline, which is cheaper. A blanket or surcingle that has been used on a mangy horse should not be used again until it has been well soaked in gasoline, vinegar, a strong solution of ammonia and water, or in boiling water."

Betting is to be permissable in the State of Maryland, under supervision of a State racing commission. The legislation was recently enacted, after a long and bitter fight.

Miss Nutonia, dam of Mabel Trask 2:02¼, now owned by R. D. Mayes of Dixon, has been mated with Peter the Great, who, all reports say is in splendid physical condition this spring.

M. C. Keefer has returned from Chicago, where he was attending the auction sale of the Chicago Sale Company. The Proof 2:05¼ was sold at auction for $3,000, and will be campaigned this season in the stable of Alonzo McDonald. Peter McKlyo 2:06 was not sold, as the bidding did not reach the limit placed upon him by his owner.

A correspondent of the Scientific American is authority for the statement that flies may be kept out of restaurants, stables, etc., by placing afour-bladed wooden ceiling fan just outside the door, or in the entrance, driving the current of air toward the floor. The flies, it is stated, will not pass through the current of air. The door may always be left open and screen doors may be dispensed with.

To avoid loafing, especially in the fast pacing events, Al Saunders, secretary of the Philadelphia Grand Circuit meeting, has hit on this idea for his free for all: The race will be three heats for a purse of $1,200, $400 each heat and $100 at each quarter pole, divided in the regular way. This will give a good horse a chance to win as much as ever, but he has to step all the way to do it.

The veteran driver, Andy McDowell, is training a stable of horses at the Byberry track, near Philadelphia.

James Stewart arrived at Calgary with eleven horses, among them Guy Boy 2:08, who is in good condition and will be some trotter to beat. Mr. Stewart's other horses look ready for the show ring.

A prominent Cleveland sportsman who has recently returned from Russia states that horse racing in that country is in a state of collapse, and the famous grandstand and hostelry at Moscow has been entirely ruined by bursting shells.

J. B. Stetson is shipping his stable to Yakima, Wash., to train and prepare for the North Pacific Circuit. Among his horses are May Day Hal, pacer, full sister to Hal Boy 2:01 and Brook Nook Hero, four-year-old trotter, full brother to King Brook 2:07¼, both owned by C. A. Harrison of Seattle, Wash.

McMAHON'S STABLE

Word comes from Memphis that Dick McMahon will ship his big string to the Indianapolis track on May 4. The Libertyville, Ill., reinsman looks to have an extra good stable this year, and the local railbirds will have the opportunity of sizing them up before they go for the money, now that Dick has to put on the finishing touches over the State Fair Grounds track. McMahon expects to remain here until shortly before the opening of the Grand Circuit at North Randall in July.

The pride of the McMahon string is the five-year-old pacer, Peter Look (3) 2:03, owned by Stoughton A. Fletcher of this city. Peter Look is being pointed for those big pacing stakes along the Grand Circuit this year and the boys who saw him in his last race of the 1917 season at Atlanta, Ga., predict that the Peter the Great pacer will come close to getting the big share of the kale in the early closers along the "Raging Grand." Peter Look won all of his starts but one when an accident caused him to be flagged at Pittsburg in 1916 and during the Lexington, Ky., meeting tramped a mile in 2:03—the world's record for pacing colts of his age. Being a Peter the Great and showing that he had the kind of stuff that wins stake races, made Stoughton Fletcher think pretty well of Peter Look, then owned by Joseph Kleckner, of Philadelphia, and shortly after the colt acquired the world's record he became the property of the local banker. The price was reported as $8,000.

Peter Look was named in most of the early closing events on the Grand Circuit last season, but shortly before the season opened at North Randall the brown colt took sick, and while he started at the Cleveland suburb track, he was in no condition, and although he did win a heat in 2:05¼, failed to head the summary. Another siege at Columbus about a month later nearly put Peter out for good, but he finally rounded to and before the season came to a close he was a real pacer. At Atlanta he showed ability to pace around 2:02, and McMahon was going rather easy with him at that. Barring accidents, Peter Look should prove one of the best of the sidewheelers in the coming campaign.

McMahon expects to have a good trotter for the big ring in the former California mare, Esperanza 2:04, which he purchased during the winter for a Chicago patron. Will Durfee raced Esperanza on the Grand Circuit in 1916, but while she raced fairly well she was far from a sensation. But last year she was in top form and trotted many sparkling races on the tracks out at the coast. Over the Woodland, Cal., half-mile track the daughter of Carlokin 2:07½ stepped the three fastest heats ever negotiated over a two-lap course by a trotter when she showed the field that opposed her the way in 2:07½, and 2:08 and 2:08. Later on, at Phoenix, Ariz., Durfee set her down for a fast mark, and she responded with a mile in 2:04. Esperanza is being named in several of the Grand Circuit stakes and Dick hopes to have a good winner in this mare.

McMahon also will have the good trotting mare, Miss Perfection 2:06¼, to race through the Big Ring. The daughter of General Watts (3) 2:06¾ trotted some extra good races for Dick last year, one of her best exhibitions being over the Des Moines, Iowa, half-mile track, where she won a three-heat race, getting the first two heats in 2:07½ and 2:08½. Miss Perfection is right in her prime, being but seven years old, and ought to help McMahon gather in some of the money next summer. Dick has a good futurity prospect in the fast colt, Arrow Rock (2) 2:13¼, by Azoff (2) 2:14¼. This colt took a yearling record of 2:2[illegible], and until he got off last season looked to be about as good as any of the futurity trotters. After winning at North Randall he had to be laid away for the remainder of the season.

Little Hal Boy 2:01 will again be raced in the free for all paces by Dick and has a good chance to get a slice of the money any time that he turns around.

FRESNO FAIR A CERTAINTY

At a meeting of the directors of the Fresno Fair Association held in the office of C. G. Eberhart, it was unanimously decided to hold a Fresno County Agricultural Fair this year. Details of the fair program have not yet been worked out, but it is definitely decided that food production and premiums for such exhibition will be the big feature. Larger premiums will be offered this year for all kinds of food exhibits, agricultural and horticultural and live stock. The fair committee will co-operate with the Boys' Agricultural Clubs again this year, offering even larger and more attractive premiums for their work. The California State University has already offered assistance and will co-operate on a greater scale this year, aiding the plan for boosting food production in Fresno county.

Six thousand dollars is to be offered for harness races, entries for which will close June 1. In event there is not sufficient entries, another program will be substituted. Military features will be added to the program and an attempt will be made to include army maneuvers.

Elmer Hogoboom has his old pacer Allendaw 2:09¼ in training again. Allendaw is now eligible to the 2:18 class and Mr. Hogoboom says that he acts as though he could be a real "come back."

THE SEALSKIN BRIGADE

(By W. H. Gocher)

On October 14, 1887, while on a return trip from Fleetwood Park, New York, I took a chair on the porch at Barry's. The sun was beginning to drop behind the bluff back of the present polo grounds which were used at that time as a cinder dump by the elevated railroad. The road drivers who had crossed the bridge were returning while the blast of a horn floating over the Harlem told that the four-in-hands were rolling down the avenue from Jerome Park, where Lucky Baldwin won a race that afternoon with the Emperor of Norfolk. Inside the hotel I could hear the voices of a few of the members of the sealskin brigade, while the grooms were taking care of their horses under the sheds.

The rumbling of the coaches on the wooden floor of McComb's Dam bridge gave notice of their approach but before they made the turn into 155th Street a thick set man with a full beard, wearing a top hat and driving a chestnut mare hitched to a one-man wagon jogged down the slight incline and turned into Seventh Avenue. It was Robert Bonner with Maud S., the queen of the turf. Also in a brief interval Barry's guests drove away and quiet reigned on the Harlem.

When the New York road drivers of Dutchman, Katy Darling and Ripton's day shifted their speeding ground from Third Avenue to Harlem Lane and the Bloomingdale Road, a few of the proprietors of the road houses, including "Toppy" McGuire, followed them. Later on when the tide ebbed to Seventh Avenue where Colonel Mooney kept the road in as good condition as a race track, Commodore Vanderbilt and his associates changed their stopping place from the Cayuga Hotel to the Romantic, later known as Barry's. After this change Robert Bonner, who stopped occasionally at the Cayuga to talk horse with the Commodore joined the group that did not stop on the road except at Fleetwood; the others including John D. Rockefeller, his brother William, Josiah M. Fisk and A. B. Darling. All of them had splendid outfits: Peerless, Pocahontas and Dexter in the Bonner stable being succeeded by Pickard, Uncle Dave, Maud S. and Alfred S., while John D. Rockefeller usually drove his cross matched pair, Midnight and Kate McCall. His brother, William, owned Independence and Cleora, that trotted in 2:16¼ to pole cart, while A. B. Darling started with Daisy and continued with her descendants until he bred Axworthy, the sire of Hamburg Belle.

Commodore Vanderbilt died in 1876, after having many a brush behind Mountain Boy and Mountain Maid. He would not pay the high dollar for a trotter like his son William H., who was soon the leader in the sealskin brigade and who also had the honor of making four reductions in the trotting time of teams. In 1877 his pair, Small Hopes and Lady Mac, placed the mark at 2:23, and when John Sheppard of Boston cut it to 2:22 with Mill Boy and Blondine, he brought back the honors to Gotham with a mile in 2:20 by William H. and Lysander Boy.

A local rival appeared in 1882, when Frank Work's geldings, Edward and Dick Swiveller, trotted in 2:16¾. Their performance prompted W. H. Vanderbilt to purchase Aldine, and when hitched with Early Rose, the pair trotted Charter Oak Park in 2:16¼. His limit, however, was reached in 1883, when on June 15 he drove Maud S. and Aldine to road wagon in 2:15½, the first half down the hill being trotted in 1:05½. Frank Work could not duplicate this, although in 1884 Murphy drove his geldings in 2:16¼, but the rivalry was kept up until W. H. Vanderbilt died in December, 1885.

While W. H. Vanderbilt and Frank Work were the leaders in the matter of teams, there were other fast pairs that brushed not only with them, as they never declined a challenge, but with the single hitches. Sheppard F. Knapp was always in the thick of the racing with Charley Hogan and Sam Hill, until he sold the pair to Charles Schwartz of Chicago for $15,000, after driving them in 2:21¾. John Harbeck and his son also had several fast teams which they never favored with names, while I. Cohnfeld never missed an opportunity to parade Maxey Cobb and Neta Medium that trotted in 2:15¾ to pole. David Hammond also had a fondness for pairs and was frequently seen behind Frederica and Nellie S. as well as the white-faced mares Corona and Roberta. Major S. N. Dickinson was the last leader in team driving. He began with Alice Oats and Sally Brass. They were succeeded by Flora Huff and Cora Belle, which he sold to the Governor of Minnesota for $10,000. His next pair were Aubine and Lady Wellington, the first named costing him $75,000, while at the same time he offered $50,000 for Nelson. The Major's last pair were the race record makers, Roseleaf and Sally Simmons, the dam of Hamburg Belle 2:01¼. Of single horses he also owned Jane R., Lady Winship, Zembia, Marie Jansen, Sir Walter Jr., sire of the dam of Uhlan 1:58, and Cacoon, the dam of Robert C. 2:09¼.

Of the single hitches owned by members of the sealskin brigade, the spectators who lined the curbs on Seventh Avenue saw Frederick Vanderbilt behind Arthur Boy and Captain Jake Vanderbilt with Boston, trial 2:20; William Trumbull with Mansfield, trial 2:25¾; T. C. Eastman with Richard 2:21, and at a later date Maud C. 2:10¼; George Alley, who selected Dexter in the rough with the Middletown Horse; and William Knapp with Nettie Thorne 2:25½. Of the Bonner family, aside from Robert, his brother David drove Addie and Cora Belmont 2:24½, while Alley used Volmer 2:24¼, and King Rene Jr. 2:17. William M. Beach depended on Lady Emma, and David Scott thought so well of Jennie that he refused an offer of $10,000 from a man who wanted to race her. Sammy Weeks drove Major Root 2:27, and Jerry Coster used the Young Jim gelding Garnet 2:19, while Henry Hughes had Fides 2:23 and Skylight Pilot 2:19.

Colonel Lawrence Kipp, whose road rigs set the fashion for appointments and style not only at the National Horse Show but all over the country, frequently drove a pair, but for fast work depended on Bonita 2:18½ and Emoleta 2:24½. The Captain, trial 2:21, was the favorite road horse of A. Newbold Morris, who at a later date owned Lena Holly 2:18¾. Charles Kerner owned Philosee 2:22¼, and frequently reminded his friends that he at one time drove Fleetwing, the dam of Stamboul 2:07½, on the road.

For a number of years J. B. Houston kept a splendid stable of trotters, the list including Suisun 2:18½, Spofford 2:18¾, Compeer 2:24½, Hades, 2:27¾, and Clara 2:21 which he sold to Cortland D. Moss. Rose Medium 2:26½ was Willie Taylor's favorite while E. H. Harriman drove Rowena 2:24½, and Henry T. Mali owned Lassie, trial 2:23. When not being raced Kenilworth 2:18¼ was driven on the road by Hugh J. Grant. Nathan Straus, who is still with us, enjoyed many a brush behind Joe Ripley 2:25, and also owned Majolica 2:15. George Sistair had a lot of pleasure with Black Jack 2:22¼, and C. W. Griswold drove Palma 2:22¾. Albert C. Hall, now a resident of Stamford, Conn., had many a brush with Wolford Z. 2:22, and John Clarke and C. H. Chatfield sold Ellard for $5,000 after he led a few fields down the road. Knoxie, trial 2:23, was a favorite with Alex Taylor, and John Alexander depended on Peralto 2:26½, when the clip was fast and the going good.

The above are only a few of the sealskin brigade members who made road driving popular and who by their liberal purchases encouraged breeders and trainers to develop trotters that had not only extreme speed, but also good manners and desirable road qualities. In their day some of them could be seen every pleasant afternoon at Barry's or over the bridge at Gabe Cases, Fleetwood Park, Judge Smith's, Sibbons or Jerome Park until it was taken by the city for a reservoir in 1894. In winter, when sleighing was good, they were all out, in sealskin coats, riding in spider-web cutters to the music of the bells, while during the balance of the year their white melton coats with large pearl buttons, black derby hats and road wagons with black bodies and red running gear distinguished them from all others.

Nearly all of those who made life merry on the New York roads have passed away and the glorious days when America's most famous trotters in beautifully appointed road rigs were seen almost every afternoon in spirited brushes on the speeding grounds faded with them. The descendants of the road horses of the last century are the race horses of today.

MAY DAY RACES AT DIXON

This annual event is anticipated with pleasure by every man, woman and child in the four counties, Solano, Sacramento, Yolo and Napa, and great preparations are made for it. The celebration this year was in line with previous ones. From early morn, all the roads leading to the "Dairy City," as Dixon is called, were dotted with automobiles, carriages, surries and buggies, carrying happy people to the city. Everything passed off according to program and was thoroughly enjoyed. At least 3000 persons passed through the gates to the half-mile track to view the races which were held in connection with the celebration. The summaries are as follows:

2:20 Class Pace

Security	3, 3, 1, 1, 1
Carolyn M.	2, 1, 2, 2, 2
Lady Silverthorn	1, 2, 3, 4, 3
Vinnie S.	4, 4, 4, 3, 4

2:15 Class Trot

Youcalla	1,	1,	1
Miss Frisco	2,	2,	2
Elbridge	3,	3,	3
	1:12,	1:09,	1:08

Free for All Pace

Directress Mac	1,	1,	1
Teddy Bear	2,	2,	3
O. U. C.	3,	3,	2
	1:05,	1:04¼,	1:03¾

DEATH OF WILLIAM MARCH

William March, known among race track men throughout the United States as "Baldy" March, and who was found dead in his bunk at the fair grounds at Woodland, came to his death by natural causes. He was 68 years old.

That was the verdict of the coroner's jury impanneled to inquire into the cause of March's death.

March had been an intermittent resident of Woodland for thirty years. He has visited practically every race track in the United States in the capacity of trainer or attendant. It is believed he has a brother living at Santa Rosa or Healdsburg.

A VOICE FROM NEW ZEALAND

The following letter, which was published in the New Zealand Trotting Journal, should be of interest to American horsemen, as it goes to show the difference in opinions and racing methods between this country and the Antipodes. At first glance, it hardly seems possible that the writer could have been in earnest in his criticisms of the "unhoppled trotter," but a further examination of his letter shows that he is not only sincere, but very positive, in his opinions, which appear like a joke to an American horseman:

"Sir: I crave space to answer the epistle of Mr. Fox, in which he appears to confine his efforts more to an attack upon myself and to palm greasing of Mr. Selig, rather than to the interests of trotting. Mr. Fox at one stage makes reference to the trotter and cites the old cry, that of the unhoppled trotter being the best for utility purposes. Trotting 'cranks' have for a number of years past harped on the lines of trotters being the best for commercial uses. This is a misnomer, as the utility horse does not now exist, his place having been taken by motor vehicles of every description. Trotting has become one gigantic business, a business of a magnitude that is in vogue for gambling purposes, and the sooner the people of the Dominion come to recognize it as such the earlier will we be operating along bed-rock lines. The trotting industry has become popular, as it is a pleasing sight to see horses going good and true and fighting out an issue. These contests are only provided by pacers. We might find one unhoppled trotters' race a year, where perhaps three horses are together four furlongs from home, but at the finish one and then the other leaves its feet and the most fortunate to land first on all fours gets up in time to get the money.

"Mr. Fox instances the names of the best trotters, and inquires if I have ever seen them. They number seventeen, to which might be added another three, making the total twenty. Now, notwithstanding that the unhoppled trotter has been encouraged by a number of cranks, and that big sums of money have been spent in fostering the so-called free legged horse, the best Mr. Fox can do is to enumerate, say, twenty trotters of any consequence, being the maximum number that all this work has produced. During the same period, over a thousand pacers of great importance, and all better than 2:25 to the mile, have been bred. Only a few months ago one of the turf writers and a trotting crank had to admit that while the pacer had made great strides by way of numbers and had increased in speed, the trotter had not developed as high a rate of speed as such horses as Revenue, Fritz, etc. It is apparent that the fosterers of the unhoppled trotter have to admit the defeat of the object, and its serious drawback to the business, as in the case of all utility horse it is a thing of the past; as a gambling machine, most ruinous; and as a race horse, a fiasco. The people of the Dominion want something to gamble on, and it is the duty of the clubs to provide races which will eliminate as far as possible the risk of the horse breaking and thus providing races which will be contested by the ablest and truest horses in commission. To do this the unhoppled trotter must be left in the stable, as pacers are the only animals on which the public may to any certainty gamble or support, and with any degree of assurance that they will finish at least within a few lengths of the winner and not a furlong away, as is the case with the unhoppled trotter. Time and time again I have seen trotters lose races on the post by breaking. Even the great Muricata, when having a race at her mercy, has left all fours and indulged in a series of sky-scraping acts until all money is lost and her admirers are left lamenting. Mr. Fox's sense of humor goes astray, as he is an example of what happens to those who persevere with the unhoppled trotter. His success as a trainer is such as follows the lot of trotting cranks, and it is a pity that others of his 'creed' have not a pubbery to pay the expenses and losses sustained, caused by the pursuing of such 'hobbies.' Had he put the same energy into pacers he would have been among those who secure at least one win a year. I repeat again that the unhoppled trotter is, as a race horse, a dismal failure, and one whose early extermination would be a boon to the industry.

"Yours faithfully, J. A. SULLIVAN."

TWO TROTTING BODIES MAY NOT AMALGAMATE

New York, May 8.—Doubt as to whether the National and American Trotting Associations will amalgamate at their joint meeting at Terre Haute, Ind., on May 18, was expressed by J. C. Welty, president of the former organization, at the close of a meeting of its board of review here today. The National could not be expected to surrender its charter, he said, and he questioned whether the American would care to resume its former position as a subordinate to the National.

Welty declared that while the board at its meeting did not discuss this season's trotting, there was a possibility that the National would not hold meetings because of opposition by the auditor of Ohio. He explained that the auditor was of the opinion that the money which Ohio pays to counties to encourage holding fairs ought to be conserved for war purposes.

RAISING UP HORSES AS ITEM OF FOOD

Breathe it not in Gath, but a brand-new industry has been born of these war-times for the farmer of America, Canada—eventually, perhaps, the better part of the rest of the civilized world.

Time immemorial, farmers have bred horses—either directly, as mainstay of their professions, as on the notable horse farms of Kentucky, or just incidentally, where each year a farmer will send to stud a mare or two; but in such cases it has been, ever, always, with a view of producing steeds for draught or sport service, for bearing the farm produce, for riding or driving, or, in very, very late years, for services at war.

Now, though, with the high price of meat continuing its soarings, a wily butcher, at the heart of the American mid-west, has opened a shop where horse meat is sold exclusively, and such the demand now that the fad will be spread to other cities shortly. The taste so acquired will remain, and horse meat be used to intersperse with veal and beef, pork, lamb and mutton, fowls of the usual description, until, lo, we may expect very shortly to find the farmers called upon by their clients to sell horses for slaughter—find horses raised to just this purpose—and that not a farm but will have its colts being raised, as lambs and calves are, directly and squarely for conversion to stew.

In Cincinnati, in fact, the desire for the horse meat has grown so steadily that of Saturday evenings especially, which means pay-day and the buying for Sunday, crowds surge over the walks in front of the clean, white-painted store of the People's Provision Company, and to make one's way under the iron rails that support the awnings in the summer, and beneath the signs announcing horse meat handled exclusively within here, is about all that even the strongest can do.

Within, it is all that the two very deft men can do to cut the dark meat—very, very heavy it appears—and serve out as fast as the demands of the clients here. Slaughtering is done near by, daily, except Sunday, and already six horses are killed per diem. The horses are blindfolded to this end, then killed as any more usual cattle would be.

As with the ordinary bull, too, every part of the animal is used in cutting up for horse meat. Two men are set to "work" a horse, and perhaps three-quarters of an hour is required in all.

Meat, properly dressed, is sent to the new emporium and there speedy and profitable sales occur. Round steak, or rump, or porterhouse will bring its ten cents the pound here. Loin, or rib roast, is only eight cents the pound. Chuck roast brings its six cents; boiling beef, best cuts, are six cents; shanks and stew beef, six cents; while Hamburger, or sausage meat, is seven and a half cents the pound.

Just how much meat a given horse will yield depends of course upon its size, but as a general thing horses brought in for the slaughter will vary from five hundred to eight hundred pounds when dressed.

When cooking, a little soda is advised to the meat, when it becomes considerably softer than a very large amount of the beef on the market today. That it is popular is evidenced from the fact that within a week of the time of opening the store it came to average three hundred customers a day, and that since then an additional booth has had to be opened on a nearby market place.

Listening to the chat of these customers, who surge the sawdust strewings of the floor, awaiting their turn at the glass-front booths to the white counters themselves, one hears them draw comparison between prices of the meat here, that on the skewers all about, and the other staples of this part of the land. Pork, they state, is 35 cents the pound, veal 38 cents; beef ranges 25 to 30. The horse meat is not only quite as good, but in many and many a case, were it served without mention of the fact, consumers would enjoy, never suspecting it other than beef.

Come the time when the farmer will raise colts definitely to this end, even as he does turkeys, geese and more usual fowl, and it will be well for him to keep in mind the way the meat is then to be prepared.

As we have some of these recipes from leading chefs of the Middle-West, they range, very much, now as follows:

"Take shank, or brisket, and put in cold water. Cover well and put on fire. When near boiling point, take off skin carefully. When boiling, add carrots, turnips, leeks, one onion, with a few cloves, an let cook until meat is tender. Salt and pepper to taste. Cut vegetables into small pieces and serve with soup. Also serve horseradish sauce with meat.

"For sour stew of horse meat, cut the meat in small pieces, like for goulash; place in bowl, with sliced onion; two or three bay leaves; one cup of vinegar, salt and pepper. Let it marinate until next day. Put on fire, with cold water, to cover onions, vinegar and so on. Let cook until meat is tender. Add tablespoonful of flour, diluted in a little cold water. Let boil few minutes more; season to taste, and serve either with boiled potatoes, noodles, macaroni or boiled rice. If paprika is liked, add teaspoonful to stew."

The sirloin, or tenderloin, of horse should be chosen for steaks and be treated like beef. As matter of fact, all recipes for beef can be adapted to preparing horse meat for steaks.

"Meat of young horse," the chefs add, "is about the same as that of young steer."

All of which adds, of course, to the growing popularity of the dish.

War times and high prices may just now force the unwilling to adopt; but once tried, the palate accustomed to the same, and we may well expect the day to come when farmers will deliberately breed the steeds, to be sold to the butchers for eventual pot roast and stew.

FELIX J. KOCH.

1000 YEARS BREEDING HORSES OF BELGIUM

William Crownover of Cedar Falls, Iowa, sold a Belgian stallion to C. G. Good, Ogden, Utah, for the sum of $47,000. This is said to be the highest price ever paid for a horse of Belgian class. The Belgian breed of horses is the result of 1000 years of careful breeding.

When the Germans invaded Belgium in 1914, they took possession of every good Belgian horse or mare to be found and sent them all to Germany. The editor of the Capital, while visiting the German lines in Belgium in 1915, being chaperoned by Capt. Schroeder, saw 700 brood mares which had been brought back from the firing line, where they had been drawing and swinging artillery.

The Editor asked the Captain what we, in America, were to do for our Belgian breed horses. He replied with a smile, "You will have to get them from us, up in Germany."

These Belgian brood mares were with foal and the hair had been worn off their necks and sides by rough application of the harness. They were being stabled in an immense railroad shop. Stalls had been created by the use of two by fours and the mares were being given plenty of hay and oats to revive them. The editor heard of one Belgian colt which the Germans did not succeed in getting.

Belgium is a small country and no man has more than two or three horses. Seldom one family has more than one brood mare. The family in question had a dapple gray male colt aged eighteen months. When the Germans came into Belgium at Liege the family didn't know what to do with the colt. In America the animal would have been worth four thousand dollars.

The family united in digging a deep sub-cellar under the house. They also dug a sloping pathway leading from the surface to the cellar. Then then restored the earth and gave it the appearance of never having been touched. The Germans had not succeeded in finding the colt up to last accounts, but doubtless they captured him in the end.

However, the Belgian breed of horses will not run out. There are enough pure Belgians in the United States to keep up the breed. At the last Iowa State Fair there were many samples of the Belgian breed which could not be surpassed even in Belgium.—Des Moines Capital.

SAN FRANCISCO-CALIFORNIA DRIVING CLUB

At a meeting of the members of the San Francisco-California Driving Club held on the 7th inst., it was decided to open the matinee racing season on Sunday, June 2. The program for the first day of racing will not be settled for a couple of weeks, as it is desired to have some entries from the Sacramento Driving Club in addition to the local horses. It is well within the possibilities that racing will be held every two weeks instead of weekly, as was the custom last year. Election of officers of the local club was postponed until after the first Sunday of racing.

LUCKY McKINNEY

There are many people who contend that there is no such thing as luck. If there is not, however, what is the term that can be applied to the career of McKinney as related one afternoon in San Francisco by Charles Durfee. In 1888 a few California gentlemen sent Durfee to Kentucky to purchase a few mares and colts. After investing the money assigned him, he met W. H. Wilson, who interested him in a yearling colt by Alcyone, out of Rose Sprague. Durfee bought him. When he arrived in California the syndicate accepted all of his selections except this colt, which was named McKinney. Durfee had to keep him. It made the road rather rough for old Charley for the next two years, but the wrinkles were all ironed out in 1891, when as a four-year-old McKinney was started in six races, winning all of them and closed the season with a record of 2:12¼. This made a few folks take notice, but as McKinney had a spavin, they thought that he would fail. Durfee kept on with him, however, using him in the stud at every opportunity, and in 1893 gave him a record of 2:11¼ in an eight-heat race, which he won. Also in due time the success of the McKinney colts on the turf attracted so much attention that the Indiana showman, H. B. Gentry, gave Budd Doble an order to buy him. Durfee got his price. Later on, when Sweet Marie won the Transylvania, William Simpson purchased McKinney for the Empire City Stud and the rejected colt became the keystone in the arch of success.

KENTUCKY FUTURITY NOMINATIONS.

In the face of present conditions, the Kentucky Trotting Horse Breeders' Association has received the exceptional list of 899 nominations of mares to its Kentucky Futurity for foals of 1918, and President Ed A. Tipton rightfully regards this as an indication that breeders have full confidence in the future of the light harness horse. It may well be taken as an indication of the general tone of the trotting industry, which is most assuredly in a much healthier state than some of its critics a short while ago believed.

The 899 nominations were made by 223 breeders, of whom W. E. D. Stokes owner of Pachen, Wilkes Farm, is first with 98 mares in foal to Peter Volo, Peter O'Donna and Peter III. Walnut Hall Farm is next on the list with 85 mares in foal to San Francisco, Manrico, Moko and Guy Axworthy. With 50 mares, all except two in foal to J. Malcolm Forbes 2:08, James R. Magowan of Mt. Sterling, Ky., is third on the list. Next comes Stoughton A. Fletcher's great Indiana establishment, Laurel Hall, with 34 mares, all, save one, bred to the marvelous sire, Peter the Great.

Others who have named five or more mares each are: H. J. Schlesinger, 29; Forest Park Farm, 24; Hart Bros., 22; Midway Stock Farm, 21; David M. Look, 20; John L. Snyder, 19; Dromore Farm, 13; George W. Leavitt, 13; Coldstream Farms, 12; A. B. Coxe, 12; Hillanddale Farm, 11; J. W. Bailey, 10; L. E. Brown, 10; E. L. Featherston, 10; Saugerties Farm, 10; Buttonwood Stock Farm, 9; C. W. Lasell, 9; J. E. Madden, 8; W. F. Garth, 7; U. G. Saunders, 7; Allendale Farm, 6; Beau Ideal Farm, 6; Harry Burgoyne, 6; Ross F. Stout & Bros., 6; Paul C. Wilson, 6; C. C. Watts, 6; C. W. Baker, 5; Comsewogue Farm, 5; David Cahill, 5; Cruickston Farm, 5; and R. L. Nash, 5.

The number of stallions represented as sires in the list of nominations is 110, the principals being: San Francisco 2:07¾, 64; Peter Volo 2:02, 64; J. Malcolm Forbes 2:08, 56; Peter the Great 2:07¼, 45; Guy Axworthy 2:08½, 42; The Harvester 2:01, 40; Belwin 2:06¼, 38; Lee Axworthy 1:58¼, 32; U. Forbes 2:12¼, 28; Peter O'Donna 2:08, 26; Manrico 2:07¼, 25; General Watts 2:05¾, 25; Etawah 2:03, 20; Moko, 16; Native King 2:11¾, 16; Ortolan Axworthy 2:07½, 16; Lord Dewey 2:03¾, 15; The Northern Man 2:06½, 14; Peter III, 2:16, 14; Peter Scott 2:05, 13; Dillon Axworthy 2:10¼, 13; Great Kanawha, 13; Binjolla 2:17¾, 13; Bingen Silk 2:07¼, 12; Judge Maxey 2:24½, 11; Atlantic Express 2:07¾, 10; Justice Brooke 2:08½, 10; Todd Mac 2:07¾, 10.

Kentucky, as usual, is at the top of the list of States in the point of location of the mares nominated, her quota being 398, and then comes New York with 76; Ohio, 73; Indiana, 72; Pennsylvania, 47; Massachusetts, 37; Wisconsin, 37; Illinois, 27; Nebraska, 23; Michigan, 15; West Virginia, 13; Alabama, 11; Texas, 10; New Jersey, 7; Tennessee, 6; Iowa, 6; Maryland, 5; Connecticut, 5; Missouri, 5; Canada, 5; Georgia, 4; Arkansas, 3; New Hampshire, 3; California, 3; Kansas, 2; Minnesota, Oklahoma, North Dakota, North Carolina, South Carolina and Colorado 1 each.

Among the most prominent of the mares are Fruity Worthy (dam of The Real Lady 2:03 and Donella, dam of Nella Dillon 2:06¼); Gaiety Lee (dam of the champion stallion, Lee Axworthy 1:58¼); Nervolo Belle (dam of Peter Volo 2:02 and Volga 2:04½); Lou Dillon 1:58½, who is mated with The Harvester 2:01. Secretary Williams announced that the book containing a complete list of the nominations will be published soon, and that it may be had upon application.

Hal Boy 2:01, the leading money winning pacer, with right at $55,000 to his credit, is eligible this year to the 2:04 classes, and we regard him as certain to prove a very dangerous factor in the events he is now privileged to participate in. This crack side-wheeler first appeared in 1912, taking part in one race, and the following season he landed one first, three seconds, and a third, displaying ability of such a degree as to warrant the belief that he was in line for signal triumphs. His campaign the next year—1914—was one of rare brilliancy, as in his eighteen starts he topped the summary on sixteen occasions and connected with third money the other two times out. The year 1915 found him in the Grand Circuit, and at the close of same he returned to the coast and greatly increased his earnings by winning the $20,000 classic at the P. P. I. Exposition. In 1916 he performed in a very unsatisfactory manner, considering his great flight of speed, and on six occasions was back of the money, so it was then thought that a set of hopples would be a valuable adjunct—in fact, very essential—if any genuine results were to be obtained. Hence the past season, when he appeared, he was adorned with the equalizers. That the under-gear proved beneficial is now history, as he not only reduced his record one-half a second, but raced far better and earned twice as much as in 1916. Now eligible to the 2:04 classes, perfectly at ease in the hopples, possessed of right at two-minute speed and certain to be raced along different lines than on many occasions in 1917, this handsome gelding looks like an outstanding candidate in his engagements for this year.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

FIXTURES

The Interstate Trapshooting Association's Nineteenth Grand American Handicap Tournament, under the auspices of the South Shore Country Club, Chicago, Illinois, August 5, 6, 7, 8 and 9, 1918; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

At the Fresno Blue Rock shoot last month, O. N. Ford of San Jose was high gun, with a score of 390. H. Lorenson of Newman was next, with a score of 385 out of 400.

The Big Time Gun Club of Sacramento held a big merchandise shoot at the club grounds on the 5th. Four thousand clay pigeons furnished the sport for the day. Sixty-five prizes were distributed.

W. W. Stettheimer's Tallac Talisman was judged the best dog in the Golden Gate Kennel Club show, and Mrs. Victoria Connelly's Moneta Antoinette was given the prize for the best dog of the opposite sex on exhibition. The show was a success in all particulars.

Reports from many points in California indicate that the fishing season this year will be extremely good. Water in many streams is still too high for fly fishing, but as the water gets lower, fly fishing will improve and the fish caught be larger.

Thirteen million salmon eggs were received at the Mount Shasta Hatchery this spring, and the resulting fry are now being reared for distribution in the upper reaches of the Sacramento and Klamath rivers. A portion of these fry will be distributed during the coming spring and the balance held over summer in the three large rearing ponds and planted during the fall of 1918.

Robert Duke, attorney for the California Fish and Game Commission, will bring charges against the Union Oil Company on May 14th at Milpitas and against the Milliff Refining Company on June 4th for poluting San Pablo bay with oil. The fish caught in San Pablo bay off the shores where the works of the defendants in these suits are located are so saturated with oil that they are unfit for food. During the season of the year when the ducks are in the bay, thousands of them have been destroyed where they have alighted on the oil-covered waters, their wings and feathers becoming so saturated with the oil that they are unable to fly or feed. The heavier portions of this oil, after floating awhile, sink to the bottom, where it covers the rocks and sand and destroys the crustaceons and marine growth that fish feed upon. If the action of the Fish and Game Commission results in keeping the waters of San Pablo and San Francisco bays free from oil, it will be the means of saving millions of dollars in food fishes to the people in this State.

The American Amateur Trapshooters' Association has been in existence two years, now entering upon its third year, and in that time it has done a wonderful good for trapshooters and trapshooting. The Interstate Trapshooting Association really is the national organization of trapshooters, for it conducts and keeps track of trapshooting tournaments and promotes shooting championships in the same manner as the Amateur Athletic Union promotes track and field athletics.

The report of Joseph Kalbfus, secretary of the Pennsylvania Game Commission, shows that 1725 deer, 368 bear, 3,500,000 rabbits, 187,000 squirrels, 139,959 racoons, 2950 wild turkeys, 112,287 ruffed grouse, 1412 ringneck pheasants, 26,823 quail, 29,320 woodcock, 36,107 wild waterfowl and 17,645 shore birds of various kinds were killed during the 1917 hunting season. This represents 3950 tons of meat.

For the benefit of gun clubs holding registered tournaments, and other interested parties, the Interstate Trapshooting Association booklet, containing the annual review and 1917 trapshooting averages, is now ready. Booklets can be secured by writing the Interstate Association, Pittsburg, Pa.

Lester German, high average professional trapshooter for 1917, is directing the police of Wilmington, Del., in the use of riot guns.

Unless her offer to the Government is accepted, Annie Oakley will conduct a trapshooting school at Portsmouth, N. H., during the summer season.

The popular veteran gun expert, Bill Price, won the monthly shoot of the Golden Gate Gun Club held at the gun traps in Alameda, Sunday, the 12th, by smashing 49 out of 50 clay pigeons, with Fred Willett and Frank Webster running a close finish with 48 out of a possible 50. In the handicap event Dr. Ed Topham, Ed Garrat, Howard Swales and Barney Worthen tied for first place, with 23 out of a possible 25. Worthen won in the shoot-off by equalling his score of 23, and Frank Webster won a leg on the Thorning long run trophy, with a run of 45. There was a good turn-out of over sixty shotgun enthusiasts at the monthly shoot.

Sixty-two blue rock shooters took part in the tournament held by the Taft Gun Club in Taft on April 20, and was attended by all the crack clay pigeon shooters in that part of the State. Grant Adams of Fresno and Heine Pfirrman and Frank Mellus of Los Angeles tied for first place.

At the Golden Gate Gun Club shoot on April 20th, Dr. Edward Topham and Barney Worthen tied for high honors, each breaking 49 out of 50. H. A. Ray, Tony Prior and Henry Stelling tied for second place, with 48 out of 50. Worthen won a leg on the President Thorning long run trophy with a non-miss score of 33.

O. N. Ford of San Jose, Dereskin Reed of Seattle, and Dick Reed of San Francisco, were the winners of first places in the Old Timers' shoot on the grounds of the San Jose Blue Rock Club on the first Sunday of the month. Ford won the fifty bird shoot with 49 hits and captured the gold trophy of the day. Dick Reed, shooting for the first time since the amputation of his leg, and standing on one foot, led the professionals with 48 out of 50. Dereskin Reed also got 97 in the 100 bird shoot against Dick Reed's 96 and O. N. Ford's 95, the latter being tied with Fred Willett and E. B. Worthern.

Trap-shooting enthusiasts are coming to San Jose to look over the grounds and traps where the California-Nevada and Interstate Champion shoots will be held from the 19th to the 22nd of this month. This will be the big event in trapshooting circles of the Pacific Coast for 1918. There will be fully fifty trophies, ranging from a $10 cup to a $3000 diamond medal. Already Secretary Ford has twenty-five reservations from Salt Lake, Ogden, Seattle, New York City and other points. John W. Considine, who was a prominent horse breeder and owner of the Woodland Stock Farm, and is now in New York, has wired that he will be here with H. E. Dickerman of Chicago to take part in the shoot.

Deputy Warden J. S. White of the Shasta County District States, in a communication to the Fish and Game Commission that hundreds of wild geese are loitering about back yards in that neighborhood, being unable to make further progress. They have been reeding on the great abundance of goose grass in that section until they are so weighted down with fat that they are unable to continue their flight. He says these geese are getting as tame as house cats.

The many friends of S. A. Tucker, not only in California, but all over the United States wherever shotguns are used or sold, will regret to learn that he passed away on April 25th. He was in his seventy-second year, and died after a long illness from kidney trouble. Mr. Tucker has been a popular representative of the Parker Gun Company for the past forty-two years as traveling salesman, covering all sections of the United States. His confidence that he was selling the best gun on the market and his geniality and good fellowship made him many friends and brought him success in his business.

Four thousand seven hundred and twenty-seven licenses were sold in Sacramento county in 1917. The black bass season is now open on the Sacramento river and its tributaries, and fishing with a live minnow, frog, artificial minnow or spinner is very killing.

* * *

It is estimated that more than 100,000 trapshooters are now in the service of the country. Many clubs have been almost put out of business, but the Learn to Shoot program is bringing in many new devotees of the sport.

The duPont Company has worked out an average chart for trapshooters on the same principle as the baseball percentage table. This chart is invaluable to gun clubs. The chart can be had upon request.

A. M. Poindexter, of Denver, Colo., is the new president of the United States Revolver Association.

F. M. Newbert, E. L. Bosqui, E. W. Hunt, C. W. Westerfeld, and E. M. Short of the California Fish and Game Commission, spent several days in the Yosemite Valley looking for possible sites for the new fish hatchery, making their headquarters at Camp Curry. They finally selected a location for the hatchery between Camp Curry and Happy Isles, near the present power station. A stone building will be erected and in operation by fall. This hatchery wil supply the lakes and streams in the Yosemite Valley direct, and it is promised that in another year there will be as good fishing in the valley as is to be found in the state. There are many lakes and streams that will be stocked. On the trip Dr. Hunt took 300,000 eggs to the Wawona hatchery.

WORK OF THE COMMISSION

George Neal, of the Fish and Game Commission, writes the following regarding California and fishing:

A State the size of California, which is only second in area to the State of Texas, with more miles of beautiful brooks and streams, larger and more beautiful lakes than any other State, with conditions, both climatic and geographic, combining as they do the vast extremes, it would naturally be supposed that nature had been as lavish in its distribution of fresh water fishes in its waters as it has been in its quantity and varieties of game birds and mammals in its valleys and mountains. Such is not the case, however. Many Californians and not a few Easterners are of the opinion that the large and varied specimens of food and game fishes in our fresh waters, especially the streams of the Sacramento Valley, are indigenous to or native of our waters. Such is not the case. As a matter of fact, the only native fish running to fresh water of any importance is that king of all fish, the quinnat or king salmon, the white sturgeon (now nearly extinct) and the Sacramento perch, known to science by this name for the reason that his only habitat, unless transplanted, is the Sacramento and San Joaquin waters. There are a number of native fishes that are of very little use commercially or otherwise. Some of them are used by the Chinese, notably the Sacramento pike and the hard head, but very little thought of by white people.

If the Fish and Game Commission had done nothing else than introduce the many edible game and food fishes, it would have justified the commendation of the people of the State of California. United States authorities "say results obtained from the introduction of the fishes into California is one of the greatest feats of acclimatization of fish in the history of fish culture and introduction in the world." The introduced species are as follows:

Striped bass came from New Jersey; shad from the Hudson river; Atlantic salmon from Maine; catfish from Missouri; black bass from Vermont and Michigan; warmouth bass from Illinois; sun fish and crappie from Illinois; mackinaw trout from the Great Lakes; Scotch or Loch Leven trout from Michigan; yellow perch from Illinois; white fish, brown trout from United States Bureau of Fisheries; Eastern brook trout from New Hampshire.

Our most important importations are the striped bass and shad.

Contrary to general belief, the first carp came from Japan, a second importation came from Germany, however, and while these fish are not yet fully appreciated, still, when properly prepared, they are excellent.

The non-migratory fishes, such as black bass, all the sun fiishes, crappie, and perch are not considered sufficiently numerous to permit their being taken with nets or to be sold. Consequently no statistics are obtainable of the numbers taken, as they are naturally a hook and line or sporting fish, as are our trout. The fishery products for the year 1917 are as follows, and applies only to fish marketed and not those caught and not sold:

	Lbs.
Salmon	13,158,080
*Shad	5,416,017
Striped bass	1,131,556
Catfish	230,084
Carp	194,796
Sturgeon	10,103

* During the spring of 1915, 100,000 pounds of shad roe were shipped or sold in the San Francisco markets; 606,048 pounds of shad roe were canned in one-half pound cans; 5400 cases of shad were canned and 2,400,000 pounds of round fish were dry salted.

FARMERS DIG WOODCHUCKS WITH DYNAMITE

In those sections of New York and Pennsylvania where the farmers have experienced a great deal of annoyance from woodchucks, a cheap and simple method for their extermination has been adopted. A stick of dynamite, ready capped and fitted with a four-foot fuse, is attached to the end of a ten-foot stick. The fuse is lighted and the charge is pushed into the woodchuck's burrow. As it takes about two minutes for the fuse to burn down, there is plenty of time to push down the charge and close up the mouth of the hole, before the explosion occurs. When the dynamite lets to, the den is destroyed and the animal, even if it escapes annihilation from the explosion, is asphyxiated by the gas. This method is far quicker than digging the animals out and has the added advantage of choking up the holes.

SOME FACTS ABOUT GULLS

There are in the United States about twenty species or sub-species of gulls. The prevalent idea that the gull family is small and that the bird confines himself to the sea and coast is a big mistake. Most gulls really do prefer the sea, but even these go far inland at times in search of food; and some species may properly be termed inland birds. Many of the gulls that spend the daytime on inland farms eating grasshoppers, crickets, field-mice, etc., fly back to the sea at night to bathe and sleep.

Speaking generally, a gull will go anywhere for food. He is a glutton by nature, though his food consists of such articles as man is more than willing to lose. Thus gulls are of great service. They are expert scavengers, following vessels at sea and cleaning up all refuse food. Their most dependable food is, of course, fish and miscellaneous offal of sea life. Their great power of flight and athletic ability in the air enable them to successfully rob slower birds. The pelican is their especial victim; he dives for fish, and the instant he reaches the surface, before he can get his bearings, a gull will grab his prize and escape. Another trick of the gull, proving his sagacity, is to carry a clam high into the air and drop it on rocks to break the shell. His bill is not equal to crushing it, but by patient effort he succeeds in his purpose. Finly watched a gull repeat this dropping process fifteen times before it succeeded.

Along the coasts these birds sometimes grow very tame. The "summer gull" of Washington and Oregon is frequently found with pet pigeons. In California, along the San Francisco water front, they are particularly gentle. During the big fair, visitors from inland cities were greatly interested in the white-winged fleet. When the Exposition closed, the birds missed the kind attention they had enjoyed on the Marina and at the Palace of Fine Arts, and ventured into the city streets searching for their esrtwhile friends. They were welcomed by the citizens, fed and treated kindly, and are growing more and more a part of the city's beauty. Promptly at eight o'clock every morning the gulls gather like bees at the long dock of the navy training station. When the garbage is dumped they fall on it, darting hither and thither, screaming with eagerness and satisfaction. It has been truly said that as scavengers three gulls are equal to a buzzard, ten to a pig.

Until very recent years, domestication of gulls, even to the present extent, would have been utterly impossible, because there were no laws protecting them. The gull is a beautiful plumage bird and plume hunters would soon exterminate him if they were not restrained. But now practically all the States have enacted protective laws, and to still further lessen the incentive to kill, use of gull's feathers, however procured, is forbidden in many States. In Utah, the gull is sacred; in Salt Lake City the people have erected a monument surmounted by a bronze figure of two gulls—this in appreciation of the birds' help in saving the crops of 1848-1850, when the State was overrun with black crickets. At that time the lives of the settlers were directly dependent on what they raised in the field.

WHITE MICE AND THE ARMY

Major W. A. Shields, chief medical offices at the Central Department Supply Depot in Chicago, says that the army needs large numbers of white mice to be used in the army hospitals, and that the lives or many American soldiers and sailors depend on these tiny rodents. It has been discovered that pneumonia is of several kinds, each being distinct from the others and requiring a different treatment, which can only be determined through the inoculation of white mice.

White mice were quoted the last of March at $1.22 each, with the prospect that the price had not yet reached the top. They are bred in "mouseries" and multiply rapidly. The expense for caring for them and feeding them is practically nothing. They are fed lettuce, oats and greens, and are very hardy. They can be shipped to chicago from the Pacific Coast with practically no loss, where they are kept in the departmental depot until called for by the various hospitals. Major Shields explained that the supply is so limited that the department has been obliged to use every facility at its disposal in order to find enough mice to supply the present needs of the hospitals.

Pneumonia is generally recognized as one of the most deadly diseases to which soldiers are subject. The average death rate is 8.3 per cent. In consequence of this fact it presents itself as a deadly menace to the men at cantonments both here and abroad, but if a sufficient supply of white mice can be obtained the death rate can be appreciably lowered. In the diagnosis of pneumonia with white mice, secretions from the nose or throat of the patient are injected into the animal and then by a series of experiments, which are executed quickly, the exact nature of the disease is ascertained and the proper treatment can be administered. No other animal can be used for this work, the major said.

Major Shields said that he is now securing white mice from several mouseries in the United States and a small supply from Canada.

TOO MANY ELK FOR ONE GRIZZLY

"While camped at 8,500 feet altitude near the head of Fawn Creek in the Gallatin Range in the northwestern part of the Yellowstone National Park," writes Vernon Bailey, chief field naturalist of the U. S. Biological Survey, in a book soon to be issued by the National Park Service, "I could make out with a field glass elk herds on the high ridges south, west and north of camp. By climbing cautiously, so as not to disturb the elk, up to 10,000 feet on Quadrant Mountain south of camp, I was soon in the midst of one of their choice summer ranges.

"Small herds and scattered individuals were seen over the big, open slopes above timber-line; bunches of old bulls with full-grown, velvety horns lying on top of the ridges where the wind was strongest and insects least troublesome; calves and yearlings playing over great snow banks on the cold slopes; and cows peacefully lying in meadows of rich, short grass and clover. Little streams and pools of ice-cold water were everywhere and the elk were a picture of contentment and satisfaction with their ideal summer home.

"After watching them for about an hour, a large grizzly bear that had been digging mice on a neighboring slope was seen walking across toward the elk. As he came in view their heads went up and the herds near me gathered into one dense mass of about 500, old and young, while the bear walked past close in front of them and on over the ridge, scarcely turning his head to notice them. The herd was a beautiful sight—25 to 30 old bulls with sets of large horns towering above the numerous small sets, while the front ranks were mainly filled with anxious cows ready to give battle for the protection of their young. When the bear had disappeared they quietly dispersed to their grazing and seemed very little concerned."

WHY THE BARREL OF A GUN BECOMES RUSTY

If you shoot a firearm and then put it away without cleaning the inside of the barrel, it will become so rusty in a short time that it will lose its accuracy entirely.

Have you ever stopped to think that it is rather odd that the inside of a barrel should be so subject to rust? Other kinds of tools don't require half the amount of attention to keep them in perfect shape.

Take a razor, for instance; when you finish shaving you give it a careless wipe on the towel and forget about it until the next morning. You would not think of putting oil or gun grease on it to keep it from rusting because you have found by practical experience that it isn't necessary.

It is rather interesting to know why one rusts and the other doesn't.

The problem is really one of chemistry, and rather a complicated one at that. To begin with, rust itself is a combination of the iron of the barrel with oxygen. This combination takes place whenever conditions are favorable. The presence of acid in even the smallest quantities is very favorable to the formation of rust, and substances of an alkaline nature tend to prevent rust.

Having figured out this much, it is easy to see why the inside of a rifle or shotgun barrel should be more subject to rust than a razor. The residue of both black and smokeless powder is acid to a more or less extent, and the formation of rust is proof that you have not really cleaned the barrel thoroughly.

Most gun barrels that end prematurely on the scrap heap are there not because their owners wilfully neglect them, but because they were uninformed as to the amount of care necessary to keep a barrel in good condition. One or two rags pushed through the bore will not remove all the fouling by any means—a good scrubbing with nitro solvent oil is really necessary to make sure that no rust will form.

The alkali in soap has a great deal to do with the way in which a razor stays bright without oil to keep it from rusting. Every time you use it, a soapy lather comes in contact with it and tends to kill any acid that may be present from contact with sweaty hands or from any other source. Of course, the razor is not subject to the effects of gunpowder.

If you keep in mind that the least little bit of powder residue in the bore is sufficient to cause a bad case of rust, and always clean on the principle that too much is better than not enough, you will have no trouble with rusty barrels.

Frank C. Pellett in his new book, "Our Back Door Neighbors," a most interesting collection of stories of wild life, among other things says that successful imitation of the calls of crows have convinced him that they have a highly developed system of communication by means of vocal notes which more nearly approach spoken language than any other native bird. He thinks that intensive study of the crowd language would produce interesting results, and remarks that strangely enough a pet crow seems to have no understanding of the calls of his brethren of the wilds.

COMPARISON OF PRESENT AND PAST SALES METHODS

It is not so very many years ago that sporting powder was a commodity as staple almost as salt and sugar. Hand loading of shotgun shells was a general practice and powder and shot could be obtained at most any hardware or general merchandise store. The retail dealers bought their stocks from the jobbers. who in turn were supplied by the makers. In those days the manufacturers of powder and ammunition also employed a number of demonstrators whose chief asset was ability to make a good score at clay targets or live birds. Frequently such scores were used for advertising purposes on the theory that they would prove conclusively the superiority of the advertised product and sportsmen would be induced to buy accordingly.

The perfection of smokeless powders and of machine-loaded shot shells, and the restrictions placed by insurance companies and law-making bodies on the storage of bulk sporting powders, all tended to discourage hand loading. As factory-loaded shells now sell at about the same price as the hand-loaded article, and are almost without exception more uniform, the latter are a very small factor in the business.

The Du Pont Powder Company, the oldest and largest powder makers in America, have long led all others in improved methods of manufacture, and were the first to establish new standards of sporting powder salesmanship by inaugurating its gun club organization campaign, which has been carried on with increasing vigor ever since. A booklet, giving enthusiastic description of trapshooting was issued and distributed broadcast. For the guidance of those interested in organizing a gun club, another booklet was gotten out which described in detail how to go about it. Plans for club houses and the installation of traps were drawn up and sent free to every prospective gun club.

Other booklets issued were: "Trap-shooting Leagues and How to Organize Them," "Trapshooting Rules," "Trapshooting at Schools and Colleges," "Diana of the Traps" (for women), "Trapshooting at Summer and Winter Resorts," "The Lure of the Flying Target," and numerous other ones.

As prespects for gun clubs or leagues developed, Du Pont salesmen were instructed to co-operate and advise with the organizers, and assist them in getting the club or league going. They also assisted in conducting tournaments, club shoots, etc., and in drawing up programs of tournaments. In many cases they helped to install the traps and stayed on the job until the first shoot was held.

As every new gun club and league means new business for jobbers and dealers in ammunition and shooting accessories, as well as for the manufacturers of shells and powder, it is not hard to picture to what extent this constructive salesmanship and promotion work by Du Pont salesmen have benefited. The Du Pont Company has cut from its repertoire all outward appearances of commercialism at gun club shoots, an important steu which has benefited the trapshooting game materially and helped raise it to a higher plane.

With theintroduction of the Du Pont Hand Trap and also the Try Gun, Du Pont salesmen have been able to add materially to the work they are doing to make business for the dealers and jobbers. All of this promotion work done by the Du Pont Company and its representatives is largely of an altruistic nature, as the Company has nothing to sell direct, and can only hope to profit through the increased specifications by appreciative and reciprocative dealers and jobbers for shells loaded with Du Pont powders.

INDOORS OUTDOORS SHOOTING

The cry has been heard on Broadway, too, and shooting is the newest pastime on the Goodtime Boulevard. Broadway needed a new thrill. It wanted something different. What Broadway wants it gets. The thrill is there. It is different. It is Outdoors Shooting Indoors.

The Bounding Buck Animated target range at Forty-seventh street and Broadway is the place in mind. There isn't another such place in the world. It is not to be thought of in the same light as the shooting galleries of other days. As we mentioned before, it is different. The place gives all the appearance of the high-class hotel, and it has every comfort of the modern hostelry, and the target range besides. The surroundings are high class and the attendants are all trained military veterans.

The place is thronged from noon till midnight with men and women who go individually, in pairs and in parties as they would to the theater, and in the same dress. Here one can shoot at game bear, lions, moose, ducks, etc., with all the pleasure that goes with outdoor hunting and none of the disagreeable features. And besides, you can take a shot at an airplane or a U-boat.

The animal subjects are moving pictures. All are cinematographed in their native haunts. When the hunter shoots a small light appears in the screen where the bullet strikes and holds up the picture for three seconds.

George Cohan tried this indoor shooting, and said it was great stuff, and it is, because it is a sport with a purpose.

ELK IN KERN COUNTY

More than 300 head of elk roam the sun-kissed hills and plains of the Button-willow-Emplor country, thirty miles west of Bakersfield. According to reports received at the headquarters ranch of Miller & Lux and the Irwin-Berr ranch, four miles west of headquarters, the elk are doing considerable feeding on the pasture fields, but particularly in the grain, where they are doing damage estimated to be quite a monetary item in this world of turmoil and conservation of food. J. S. Hunter of the State Fish and Game Commission paid a visit to the ranches and interviewed the superintendents. Superintendent Spear at the headquarters ranch said that the elk were down in the pasture lands nightly, and he piloted Mr. Hunter's party over several miles in the back country where they saw a herd of about forty elk. They did not seem much alarmed at the appearance of the automobile in the field, but as the cars drew nearer the elk trotted over to a herd of cattle, where they watched the party come up to within 100 yards, when the leader gave a snort and trotted off, the whole herd following closely at his heels. The elk were fine specimens, but the new horns had not yet put in an appearance. At the ranch of Senator J. L. C. Irwin, where Superintendent Wiggins is in charge, he reported that the elk were coming down from the hills and working into the grain fields, which they were tramping down. The green grain is a delicate morsel for the elk.

The elk in the vicinity of headquarters owe their existence to the foresight of Henry Miller, who gave them feed and protection. There are several herds of them there, and Wiggins said he had frequently seen as high as 80 head in one lot.

Elk are protected by a strict state law, and there is no permission to molest them. If the elk are damaging the crops they can only be driven off.

In the party were James Egan, Frank Batty and G. D. Williams, who saw their first California elk running wild. They looked for elk horns and elk teeth, but found no specimens.

SOUSA AGAIN SELECTED TO HEAD AMERICAN AMATEUR TRAPSHOOTERS' ASSOCIATION

Lieut. John Philip Sousa, U. S. A., for the third time has been chosen as president of the American Amateur Trapshooters' Association. Lieut. Sousa was the first president of the Association.

Other officers selected to aid the famous bandmaster in his effort to make the A. A. T. A. the national body for trapshooters are Dr. Horace Betts, of Wilmington, Del., first vice-president; Ralph L. Spotts, of New York City, second vice-president; Edward H. Morse, of Hartford, Conn., third vice-president; Harold A. Knight, of Syracuse, N. Y., secretary, and L. W. Hutchins, of New York, general manager.

Dr. Betts is the only officer besides Lieut. Sausa who has been connected with the organization since its inception.

Ralph Spotts is the former American champion at 200 targets and one of the best shots in the country, and E. H. Morse is treasurer of the Hartford Gun Club, and a high type of sportsman. Mr. Hutchins is the former editor of Outdoor Life.

GOOD HUNTING

The Editor of the Lake County Examiner, Lakeview, Oregon, says:

"Probably no other section in the United States provides better shooting and under better conditions than Lake County, Oregon. Myriads of waterfowl, including ducks, geese, brant, swan, snipe, etc., are found in abundance in many sections, while the shooting is free to all. The mule deer is also found in many localities, and the average hunter has no trouble in bagging the limit. Bear are also quite numerous in certain sections in the fall of the year, while cougars, wildcats and other 'varmints' are frequently met with. There are also many antelope, but the season is closed at all times. It is not unusual to see as many as 500 in one band during the late fall when they are bunching up preparatory to leaving for their winter feeding grounds in Nevada.

Aside from sage hens, which could no doubt be counted by the million if it were possible, there are few upland birds, although quail are quite plentiful in a few sections. There are also some grouse, but they are generally encountered when one is hunting deer, and are seldom found in coveys."

TROUT FOR COLORADO

Between 100,000 and 150,000 trout will probably be placed in the streams of the Pike National Forest in the North and South Pikes Peak Districts during the coming summer. Last year 50,000 were placed in the creeks of the south district, being about equally distributed between North and South Cheyenne, Gould, Rock, Nast, Middle and West Beaver and Little Fountain Creeks. Approximately the same number were placed in the streams in the district north of the Peak.

MARKET HUNTERS MAKE CAPITAL OF THE PRESENT EMERGENCY

On the plea of letting down the bars on fish and game will help furnish additional food supply, a dangerous attempt has been made to destroy the protection which has taken years to build. The conservationists in almost every State have had to fight these attempts to break down protective laws. Many persons even, from lack of appreciation of the consequences, have espoused the attacks on protective laws. As one editor points out, "To suspend the fish and game laws would be like deciding to kill all of the hogs and cattle at once to avert starvation before feeling the pangs of hunger, and thus insuring shortage at a later period when hunger might be felt."

Typical of those who would make capital of the present emergency is a spokesman of the fish industry in Texas who exclaimed, "Damn posterity; let's get the fish." Unfortunately, this is the attitude of some commercial interests. A great pretense of being interested in conserving the supply in order to insure their own interests is made, but under this veneer is avarice and selfishness.

This is what the commercial interests in Texas demanded:

1. Suspension of the closed season for the period of the war.
2. Removal of restrictions on weight, size, the use of seines and the dredging of oysters.
3. The drafting of new fish and game laws.
4. Removal of protection from fish-eating birds.

To the credit of Governor Hobby of Texas, no change in the laws has been made, but so plausible was the plea made by the commercial fishermen that the removal of restrictions was narrowly averted.

Every conservation unit should be mobilized and held ready to withstand a similar attack in this State. Already slight skirmishes with the enemies of wild life have been recorded.

SHOOTING FOR ONE HUNDRED YEARS

The "old-timers" shoots which are now being conducted by the gun clubs of the United States and Canada have taken hold as well, if not better, than any trapshooting event of recent years.

An "old-timer" from a trapshooting standpoint means fifteen years as a devotee of the greatest of outdoor recreations.

Fifteen years is about as long as one participates in baseball, boxing, tennis, track athletics or kindred sports, and then the baseball togs, the gloves, racquet or spiked shoes are put away for the moths to hide in.

With shooting it is different. One never grows too old to enjoy the pleasure of shooting—in the field or over the traps.

Fifteen years may class a trapshooter among the "old-timers" and may make him feel as if he were a veteran of the sport; but if the fifteen-year "old-timer" could glance over the names of the real veterans and the number of years they have been shooting, he would consider himself very much of a youngster.

Clubs who have "old-times" shooters among their membership—and there are few clubs that haven't—were requested to turn in the names of the veterans and along with the name the number of years said veteran had been shooting.

Five thousand names came to hand during the last week in March and the first three in April of men who had been shooting for fifteen years or more.

It doesn't seem possible that such could be the case, yet there are listed two men who claim to have taken up shooting one hundred years ago and another who has been shooting for seventy-five years.

Of the remaining number 10 have been shooting for 50 years or more; 12 for 45 years, 24 for 40 years, 126 for 35 years, 204 for 30 years, and 338 for 25 years.

Truly, shooters live to a ripe old age.

The two who profess to be shooters of 100 years' standing are Mose Moore of Montgomery, Ala., and Samuel Hutchings of Louisville, Ky. The 75-year shooter is Patrick Kearney, Sr., of Saratoga Springs, New York. Just how old they are we have no idea, but they must be pretty well along in years.

INCREASED SHEEPING ENDANGERS WILD LIFE

Great pressure is being brought to bear to so change the regulations regarding grazing in the national forests as to allow sheeping in national parks and increased sheeping in national forests. This may sound favorable so far as increased meat supply is concerned, but anyone who has seen the deep traces left in sections where sheep have grazed will shudder to think what results are to be expected. Many are the wornout meadows, deeply gullied, which now testify to the past inroads of herds of sheep, and many the depleted game covers where the trampling of nests and the destruction of food has reduced upland game birds to the minimum. These are dangerous times and every conservation must help form the army of defense needed to save wild life in this emergency when special opportunity to devastate wild life resources is given the enemy.

TELEGRAPH TRAPSHOOTING LEAGUES

Three telegraph trapshooting leagues were conducted on the West Coast last year, and were so successful that it wasn't a difficult matter to get them going again this year.

These trapshooting leagues are promoted by the leading newspapers of Spokane, Wash., and Portland, Ore., and the interest taken in the promotion of the trapshooting leagues by these newspapers has placed the "patriotic sport" on the same plane as baseball with regard to local interest.

In the Northwest League these cities are represented: Boise and Lewiston, Idaho; Pomeroy, Spokane, Colfax, Palhouse, Seattle, Bellingham and Tacoma, Wash.; Portland and Kalispel, Ore.

The Inland Empire League is made up of Spokane, Yakima, Palhouse, Colfax, Sunnyside, Groville, Wennatchee, Wash.; Wallace and Kellog, Idaho, and Pendleton and Heppner, Ore.

The Columbia-Williamette League is comprised of Pendleton, Heppner, Astoria, Woodburn, Albany, McCoy, Ore.; Aberdeen and Vancouver, Wash.

Trapshooting leagues are being supported more and more by the newspapers every year, and when one delves into the number of participants in trapshooting events, this is readily understood.

The season of these telegraph leagues lasts about eight weeks, and each week about 500 trapshooters face the traps. The recording of their scores is the means of getting publicity for their cities that they could not procure in any other way. Trapshooting is a great town booster. League competition interests every one in the city. There are thirty-five active trapshooting leagues in the United States.

BIG GAME SHOOTING IN WASHINGTON

There are few places left in the United States where big game hunting is as good as in the Wynooche and Satsop valleys, the rivers of which join the Chehalis at Montesano, and along the wooded ridges that are really the lower foot hills of the Olympic range of mountains. Deer, bear, cougars, wild cats are all to be found within only a few miles of Montesano, especially in the winter time. Even herds of elk (though there is a perpetual closed season for them) are plentiful—so plentiful that ranchers in the valley lands complain that they do great damage to hay and straw stacks.

Grouse and native pheasants are good hunting in season. Chinese pheasants are beginning to get plentiful and so are quail. The duck hunting in and around Montesano is not as good as closer to the coast where they feed and nest, to some extent, in the marshes. Wild geese are really only visitors, though quite plentiful at some seasons. They stop here only on their way from the nesting grounds of Alaska to California and southern Oregon.

If it is a true man's sport that the hunter wants, however, it is the cougar, or mountain lion, and the black bear that will interest him. And especially so far as the cougar is concerned, the hunter will always find woodsmen, yes, and even the Game Warden, Jack Winslow, ready to help them as guides and as instructors, for every true lover of the mountains knows that the cougar does more than all the hunters to keep down the herds of elk, deer and other game animals. They follow the does and go after the young soon after the latter are born. Indeed they do not hesitate to go after the old animals at times when food is scare. Many an old bull elk, than which there is no braver animal, has, after he has been turned out from the herd, been pulled down to an ignoble death by the mountain lion.

While many of the stories of the cougar's ferocity have been overdrawn, he is a dangerous animal when cornered and at times has even attacked a man in the open. In the early days it is told that children were sometimes attacked by the brutes, though of late years even when food was scarce, he seems to shun the neighborhood of man. At night in the deep woods, however, he will often trail a man, sometimes for miles, and, as told, sometimes has been known to make an attack without provocation.

The black bears of this country are generally small. Warden Winslow, who has killed hundreds of them, says that only rarely will one be found that will weigh 400 pounds. His largest did not weigh much more than that, though it measured 7 feet 4 inches from tip to tip.

Dogs are not allowed for hunting deer, but dogs are really essential in hunting either the cougar, bear or wild cat. When Mr. Cougar has been treed by the dogs it behooves the hunter to have a sure aim and a steady hand if he wishes to save himself and dogs from the savage claws and teeth.

The deer season is October 1 to November 1 inclusive, but no one hunter may kill more than two deer.

Once you become a trapshooter you become part of a sport so fascinating that it has captured the fancy of over 500,000 Americans. Trapshooting improves the participant's accuracy and quickness, also his judgment, so that when it is his fortune to go on the field in a game country his bag limit is assured.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once." *Get It. Relief.* Gombault's Caustic Balsam will give you immediate remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

TRADE MARK REG'T.

SPEEDING UP

If every effort and expenditure is made to count this season your choice will be Save-The-Horse for any lameness,—especially if it is serious or if you want permanent results. It is the horse owner's steadfast friend as the following statements prove. All are recent, unsolicited and bonafide.

PROOFS

D. E. Smith, Netherhills, Sask., Can., cures ringbone "as hard as a bone."

Conrad Shurter, Jr., Tremont, Ill., cures an obstinate case of low ring ringbone.

John V. Eppert, Hancock. Md., cures ringbone with Save-The-Horse. Our remedy recommended to him by his veterinarian.

R. T. Ellis, Highland, Cal., cures ringbone.

Fred Hug, 9147 S. Claremont Ave., Chicago, cures raw and swollen fistula. A bad case, but Mr. Hug confirms that it is thoroughly cured.

H. T. Smith, Nescopeck, Pa., advises that a case of bog spavin and thoropin which he treated a short time ago and claimed without results, for which we refunded his money in full, writes us that the horse improves and is now perfectly sound. This is due to the wonderful action of Save-The-Horse on such obstinate cases. Mr. Smith returned to us his check.

W. T. Morgan, Greenville, Ky., cured obstinate large splint.

L. Rudolph, Courtenay, N. D., cures splint with five applications on an old horse.

W. H. Groff, Welty, Okla., treats a case requiring two bottles on a valuable race horse and WINS many races thereafter. He also states that on many different cases he has used about fifteen bottles and obtained "good results" from every one.

Carl Shumaker, Lowry City, Mo., treated most satisfactorily a case of ruptured tendon which had been given up.

Chas. Ball, Longhurst, Alta., Can., used three bottles of another well known brand on spavin and obtained no results. Learns of Save-The-Horse and after following out methods of treatment, "made the horse absolutely sound."

Arthur Kass, Perkinstown, Wis., treated successfully a most obstinate case of bone spavin, and says, "your Save-The-Horse is all right."

Amos A. Fry, Hughenden, Alta., Can., cures ringbone "seven years standing", he also "recommended Save-The-Horse to others and there has not been a single complaint."

M. B. Seitz, Glen Rock, Pa., cures low ringbone which had been pronounced incurable by a veterinary.

NO BLISTERING. HORSE WORKS AS USUAL

Save-The-Horse is a prompt-acting, sure-cure remedy for Ringbone—Thoroughpin—**SPAVIN** or **ANY** Shoulder, Knee, Ankle, Hoof, or Tendon Disease, no matter how old, serious or complicated.

$5 Save-the-Horse is sold with Signed Contract-Bond to return money if remedy fails. Write for copy of this contract and unquestioned proof!

Don't run the risk of having horse laid up when you most need him. Keep a bottle of Save-The-Horse on hand, and be prepared for any emergency. Write today for copy of Contract, BOOK and Advice—all **FREE.** Be prepared!

TROY CHEMICAL CO., Binghamton, N. Y.

HAVE you ever lain in No Man's Land, with a shattered thigh and a throat that burned with thirst?

Has your wife ever begged food for her children and herself at the mess-kitchen of a soldiers' camp?

Has your little son ever torn his mother's heart with a plaintive cry, day after day, for food she couldn't give him?

Has your little daughter, clad in a ragged dress, her **only** dress, ever shivered night after night in the ruined cellar of what was once her home?

Has your city ever been destroyed—nay, powdered, bricks, stone, timbers and all so ground into the dust that one scarce knew where street ended and building began?

It is exactly such suffering that the Red Cross is organized, here and in Europe, to relieve.

The Red Cross asks for One Hundred Million Dollars as the least it needs to carry on this work.

Can you—**dare** you—refuse to give to this work—and give till the heart says stop?

Send your contributions to your Red Cross Chapter today.

EVERY CENT OF EVERY DOLLAR RECEIVED FOR THE RED CROSS WAR FUND GOES FOR WAR RELIEF.

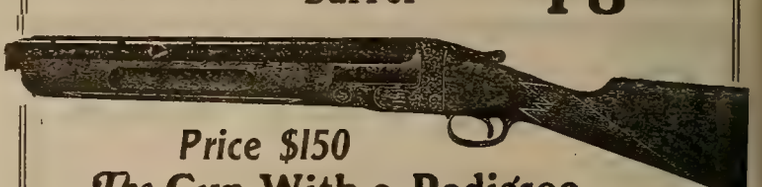
For your convenience the makers of smokeless shotgun shells print on the end of each shell box the name of the powder with which the shells are loaded. When you buy shells look at the end of the box.

HERCULES
Smokeless Shotgun
POWDERS
INFALLIBLE "E.C."

may be obtained in the 14 standard makes of shells in the list at the left. When you buy your favorite shell—it is surely one of these 14—ask that it be loaded with either Infallible or "E. C." Smokeless Shotgun Powder. The end of the box will tell you at a glance what powder is in the shells.



Hercules Smokeless Shotgun Powders are used exclusively at the traps and in the field by many experienced sportsmen. The preference of these men is based on the fact that they can depend absolutely on the uniform qualities of the powders—unusually high velocity, even patterns, and very light recoil.

Shoot either Infallible or "E.C." in your favorite make of shell.

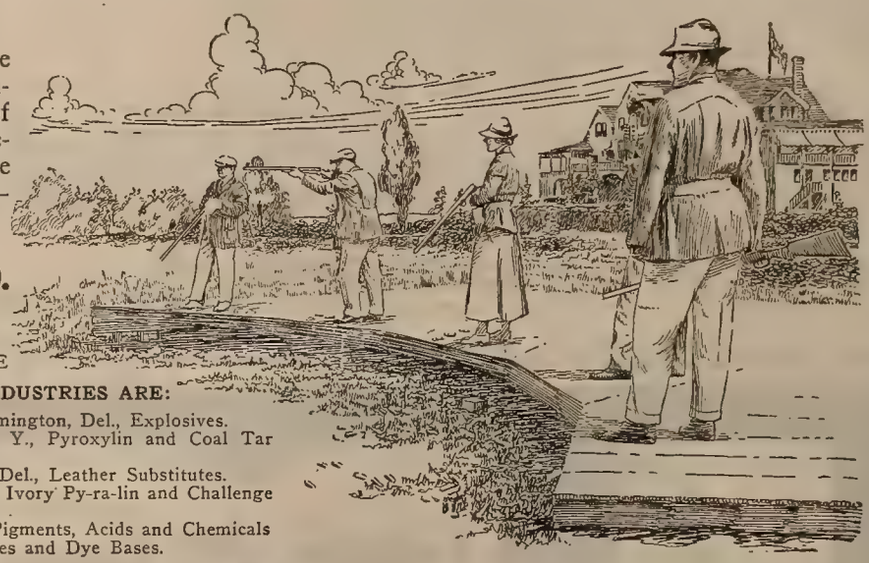
DU PONT AMERICAN INDUSTRIES

Clay Pigeons Know No Game Laws

There's no limit of season, law nor time—no long-distance time-taking trip to the shooting grounds—never any disappointment because game is scarce when there is



Trapshooting

on the sporting calendar of the club. The targets' speedy flight and elusive turns give more thrills than you usually get with your gun in the woods and hills.

Everybody,—men and women,—should learn to shoot and to hit what they shoot at. The gun club is the place to learn trapshooting,—the patriotic, distinctly American sport,—a recreation which provides instruction and also protection.

Find Out How---Now!

Our free booklet describes the lure of the flying clay pigeons and contains illustrations and descriptions of famous trapshooting events and celebrities of the sport. Ask for name of nearest gun club and booklet,—The Sport Alluring.

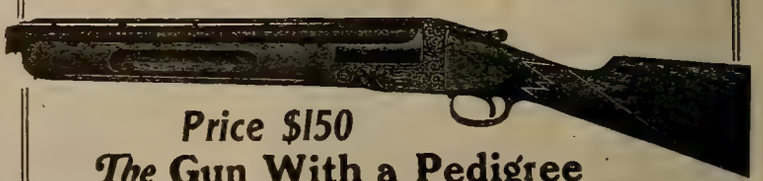
Into your favorite gun goes your favorite shell. Make sure that into your favorite shell has gone a Hercules Smokeless Shotgun Powder—either Infallible or "E.C."

These powders are the choice of many an old hand at the traps and in the field. They have won the confidence of these men on account of their unusually light recoil, high velocity, and even patterns, and uniformity in quality.

HERCULES
Smokeless Shotgun
POWDERS
INFALLIBLE "E.C."



may be obtained in the fourteen different shells illustrated in the column to the left. Your favorite shell is certainly among these fourteen.

You can readily tell whether or not it contains Infallible or "E. C." On the outside of the box in which the shells are sold and on the top wad of the shell itself appears the name of the powder it contains.

Look for the name of a Hercules Powder. If you don't see it, ask for it. You can get it in the shell you shoot.

THE
Parker Single Barrel Trapgun

Price $150
The Gun With a Pedigree

The Greatest Scores Ever Recorded Were Made With

Parker Guns

Mr. L. S. German made the highest official yearly average ever recorded with his Parker Gun, scoring 6137x6285=97.64%.

At San Jose, Cal., May 19th, Mr. Orval Overall won THE CHAMPIONSHIP OF CALIFORNIA-NEVADA, scoring 44x50 targets with his double Parker Gun.

At same place, May 22d, Mr. Harry Ogilvie won the INTERSTATE CALIFORNIA-NEVADA HANDICAP, scoring 97x100 at 20 yards with his single barrel Parker, and Mr. Len. Hawxhurst won the Professional Championship, scoring 94x100 with same kind of gun.

At Los Angeles, Cal., May 28th and 29th, Mr. Ed. Garrett made the highest aggregate score on the Preliminary and Pacific Coast Handicaps, scoring 187x200 at 18 and 19 yards, with his single barrel Parker, and Mr. Len. Hawxhurst at same place won Second Professional Average, scoring 381x400 targets with same make and kind of gun.

The Grand American Handicap has been won nine times with Parkers.

ANOTHER WORLD'S RECORD

Mr. Fred. Plum shooting at Atlantic City, broke 149x150 Targets, using a 20 gauge Parker.

Parker Bros. are the pioneer makers of small bore guns in America, and were the first ones to bring them into prominence.

THE NUMBER OF ENTRIES received for the races filled at the State Fair and Fresno indicate that there is a sufficient number of horses in training to fill racing programmes for quite a good circuit in California this summer. It is greatly to be regretted that such limited opportunities are given to owners and trainers who have been to the expense of preparing their charges for the different classes. In the past it has been the custom to raise a stated sum in the different towns with which to pay the purses, and with a definite amount on hand, there is no excuse for any loss to be met with, except on the grounds of incompetence or extravagance on the part of the management. The way to run a meeting of this kind is in the plan of making sweepstakes with added money; a plan that has been often advocated for small meetings in this State by the writer and one that will enable the managers of meetings to guarantee themselves against loss, and will prevent that great bugaboo of harness racing—a long list of suspensions. If an association has as much as $1800 to give to racing and three days to race in, it can afford to hang up $600 per day. This will allow three races in which the added money is $200 each. Now if the conditions require $25 for each starter, an average of six starters to the race would give each stake a value of $350 which could be divided in the regular way with no extra money taken from the winners. This would give the winners as much money as racing for $500 purses with five per cent to enter and five per cent additional from money winners, there would be no suspensions and an entrant would be out nothing unless he started. Entrance money that must be paid whether a horse starts or not is the bane of harness racing. If there is any plan by which racing can be held in any of the towns which are supposed to be on the California Circuit it should be tried, and this is a good year to try it. The gate receipts and privileges should pay all the expenses of giving a meeting in any town where harness racing is popular and if the bonus given by the business men is given to the horsemen as added money there need be no fear of a deficit, and if horse owners know they will not be suspended, but only required to pay a stated sum to start they will enter liberally.

THE UNITED STATES ARMY wants more horses for cavalry and artillery purposes than it can secure and there are several schemes being proposed to the Government by which the more general breeding of the army type of horse can be encouraged. Many of the officers are suggesting that the farmers who own grade draft mares weighing from 1200 to 1350 pounds, should breed them to thoroughbred stallions, as the produce will be of the type desired for army use. Unless the thoroughbred stallions are of the type that can take two hundred pounds on their backs and do a day's travel we think the farmers who use them will be disappointed, as the produce of grade draft mares and small inferior thoroughbreds (with which the country is overstocked) will be too small and weedy for army use. If the farmers of California who own grade draft mares, want to experiment at raising army horses, they will do better to select well bred, good sized and good looking trotting stallions to mate them with, as they will be much more likely to get salable horses. But we believe that farmers owning grade draft mares would do much better by mating them with pure bred, large draft stallions. They would then be breeding up instead of down, and if the filly foals from such matings were in turn bred to pure bred draft stallions, they would soon have a type of horse that could be readily sold on the farm, as the buyers are always looking for horses that weigh 1500 pounds and upward.

ENTRIES OF STATE FAIR RACES

The entries of the harness races at the California State Fair were closed by the board of drectors at a meeting held Thursday. The 2:16 trot, 2:08 pace and the F. F. A. pace did not receive sufficient entries and other races will be substituted in their place.

The board decided in place of the 2:16 trot to offer $700 for a 2:15 trot and also $700 for a 2:07 pace in place of the 2:08 pace. Also, to offer a special race and purse for F. F. A. pacers.

The entries follow:

2:14 pace—Mrs. Phil Kohn enters Bradmont, D. W. Wallis enters Eureka, Wm. Malaugh enters Emma M., M. L. Woy enters J. C. L., La Panza stable enters Garland C., James Leggett enters Harry Mac., Leggett & Senter enter Lottie Express, C. F. Silva enters Dixon Boy, S. S. Bailey enters Jim De Ora, J. J. Ryan enters Surety, Chas. F. Winter enters Alhambra Duke, J. R. Lamber enters Ora Belle, C. W. Short enters Silver Tip.

2:09 trot—Geo. J. Giannini enters Ella M. R., Simas & Broillier enter great Policy, I. L. Borden enters Pegasus, La Panza stable enters Zetta Lucile, La Panza stable enters Albaloma, C. F. Silva enters San Felipe, S. S. Bailey enters Gratton Boy, J. J. Ryan enters Miss Frisco.

2:20 trot—Wm. Howell enters Pfeister's Linwood, C. N. Clark enters The Raisin Express, M. L. Woy enters Miss Macklie, I. L. Borden enters Skyrocket, W. H. Williams enters White Stocking, C. F. Silva enters By Pass, J. J. Ryan enters Yoncalla, F. J. Ruhstaller enters Louise de Lopez, C. W. Short enters Trigione.

2:20 pace—D. W. Wallis enters Eureka, Wm. Malough enters Emma M., Frank Malcolm enters Roma De, M. L. Woy enters J. C. L., La Panza stable enters Garland C., Legget & Senter enters Lottie Express, C. F. Silva enters Lady Silverthorne, J. J. Ryan enters Surety, Chas. W. Winters enters Alhambra Duke, J. R. Lamber enters Ora Belle.

2:12 trot—William Howell enters Pfeister's Linwood, C. N. Clark enters The Raisin Express, George J. Giannini enters Ella M. R., B. F. Townsend enters Nellie Mack, I. L. Borden enters Majors By Guy, La Panza stable enters Zetta Lucille and Albaloma, Charles F. Silva enters Little Jack, S. S. Bailey enters Gratton Boy.

2:11 pace—Mrs. Phil Kohn enters Bradmont, D. W. Wallis enters Julia M., William Malough enters Emma M., Frank Malcom enters Roma De, W. J. Kenney enters W. J. K., M. L. Woy enters J C. L., La Panza stable enters Garland C., James Leggett enters Harry Mac., C. F. Silva enters Dixon Boy, S. S. Bailey enters Jim De Ora, J. J. Ryan enters Surety, C. W. Short enters Silver Tip.

Free for all trot—George J. Giannini enters Ella M. R., Simas & Brollier enters Great Policy, I. L. Borden enters Pegasus, La Panza stable enters John Mack and Albaloma, S. S. Bailey enters Gratton Boy, Hemet Stock Farm enters Allie Lou, C. F. Silva enters San Felipe.

DEATH OF J. N. JONES

Joseph Newton Jones, a leading farmer and prominent horseman of San Joaquin county, died suddenly on May 16. Mr. Jones was working some colts at the Stockton Race Track on the morning of that day and becoming ill returned to his home where he died in a few minutes. Mr. Jones was generally known throughout the State because of the remarkable showing made by his mare Leata J., who was almost unbeatable in the free-for-all classes, both in California and on the Grand Circuit. Mr. Jones's loss will be deeply felt in the breeding and racing game for he was at all times willing to contribute time and money for its betterment.

FRESNO DISTRICT FAIR

The following list of entries is of the races declared filled by the Fresno District Fair. The accompanying letter from Secretary Eberhart to the horsemen is self explanatory:

2:16 Class Trot—Purse $1000

Little Jack, C. F. Silva, Sacramento; Skyrocket, I. L. Borden, San Francisco; Sequoia, La Panza Stables, Sacramento; Miss Macklie, M. L. Woy, Fresno; Trigione, C. W. Short, Santa Maria, Cal.; The Raisin Express, C. N. Clark, Fresno.

2:14 Class Pace—Purse, $1000

Dixon Boy, C. F. Silva, Sacramento; Shamrock, C. W. J. Landergen, Ferndale, Cal.; W. J. K., W. J. Kenney, San Francisco; Garland C., La Panza Stables, Sacramento; J. C. L., M. L. Woy, Fresno; Harry Mac., James Leggett, Hanford, Cal.; Roma De, Frank Malcolm, Fresno; Eurelia, D. W. Wallis, Los Banos, Cal.; Silver Tip, C. W. Short, Santa Maria, Cal.

Fresno, Cal., June 8, 1918.

Drivers and Owners: This is to advise that in our race program only the 2:16 trot and 2:14 pace filled. The other races receiving only two to four entries.

We understand the reason for few entries in these events is that we required ten entries to fill a race. This, however, was an error and an oversight. We copied a few conditions from the State Fair rules, and this one was copied, which was most certainly an oversight.

Now we are re-opening all other races except the 2:16 trot and the 2:14 pace, which two filled satisfactorily.

You will note by the enclosed entry blank that all classes will remain the same except the 2:08 pace has been changed to a 2:20 pace, and of course there will be one day between the 2:14 and the 2:20 paces.

Also you will note that there are no requirements as to number of entries, but we do require four or more starters.

Entries for the re-opened classes to close July 1.

We have consulted with a number of owners and trainers and believe we are taking the right steps and offering the right inducements in re-opening these classes.

With best wishes for a successful racing season, we are,

Yours very truly,
FRESNO DISTRICT FAIR,
C. G. Eberhart, Secretary.

SAN FRANCISCO DRIVING CLUB

Bill Malough's pacer Emma M, featured the opening meet of the San Francisco-California Driving Club season on the Golden Gate Park stadium course by winning the free-for-all pace. However, Emma M. did not have the easy time she has had in previous meets. For, with two other fast pacers, Bold Harry Aerolite and Teddy Bear, in the running Emma M. was forced to do some very fast pacing. Bradmont, Mrs. S. Cohn's champion pacer, was withdrawn at the last moment.

The first heat of the free-for-all pace went to Bold Harry Aerolite, with "Shorty" Roberts in the sulky. Emma M. took second place and Teddy Bear ran third. This heat was one of the best of the day, all three horses being bunched together at the finish. Emma M.'s bad break at the quarter cost her the first heat. The second heat Malough's mare paced in excellent shape without a break on the entire course and was an easy winner. In the third heat Charles Silva's Teddy Bear touched the wire and Emma M. took second place. The fourth and deciding heat went to Emma M. by less than a foot. Roberts, driving Bold Harry, trailed Teddy Bear and Emma M. in the fourth heat. The horses got away to a perfect start and from the "word" Teddy Bear and Emma M. were neck and neck. Down the stretch, however, Emma M. hit a faster pace and captured the heat by less than twelve inches.

The first and two second places won the 2:25 mixed for Hello Girl against a field of five other horses. Five heats were necessary to decide the winner.

Charles Silva's Lady Silverton evidently has an engagement elsewhere for she ended festivities bright and early by winning three consecutive heats and carrying away Jack Welsh's trophy for the 2:15 pace.

Complete results:

2:25 mixed—

Hello Girl	1	2	1	2	1
Seventh Son	2	1	3	4	1
The Lemon	3	3	2	1	1
Lassie M.	4	5	5	4	1
404	5	4	4	4	1

Times, 1:53½, 1:51, 1:54½, 1:51½, 1:55.

2:15 pace—

Lady Silverthorn	1	1	1
W. J. K.	2	2	2

Times, 1:47½, 1:50, 1:51½

Free-for-all pace—

Emma M.	2	1	2	1
Teddy Bear	3	2	1	2
Bold Harry Aerolite	1	3	3	3

Times, 1:35, 1:36½, 1:40, 1:40½.

Thoroughbred Matters

EASTERN RACING DATES

Bowie, Md. (13 days)	April 1-15
Havre de Grace, Md. (13 days)	April 16-30
Pimlico, Md. (15 days)	May 1-17
Jamaica, L. I. (9 days)	May 16-25
Belmont Park, L. I. (17 days)	May 27-June 15
Jamaica, L. I. (6 days)	June 17-22
Aqueduct, L. I. (17 days)	June 24-July 12
Yonkers, N. Y. (16 days)	July 13-31
Saratoga, N. Y. (27 days)	August 1-31
Belmont Park, L. I. (12 days)	Sept. 2-14

RACING DATES FOR KENTUCKY

Latonia, June 15 to July 13 (26 days).

RUBBATHEN ENLISTS

William Arthur Rubbathen, son of John A. Rubbathen, editor of the Thoroughbred Record, was one of the eight men accepted for service in the navy at the Lexington, Ky., office recently. Young Rubbathen is employed in the Thoroughbred Record office and lives at 318 Walnut street.

TANFORAN WILL BE SOLD UNDER HAMMER

Redwood City, June 7.—Tanforan Park is to be sold under the hammer to satisfy a judgment of $127,213.98 against the New California Jockey Club, Mrs. Beatrice Steele Williams, executrix of the estate of Thomas H. Williams; L. C. Toner and John Zaro. The judgment was rendered by Superior Judge George H. Buck in a suit brought by Charles H. Trolliet and Edgar Sinsheimer, who were named as trustees in a deed of trust executed April 22, 1912, by the Jockey Club and Williams in favor of the Anglo and London Paris National Bank of San Francisco. The deed of trust was subsequently assigned to Fred F. Ouer, who brought suit to foreclose.

New York, June 5.—Sol Lichtenstein, 65 years old, one of the most prominent race-course followers in the country, was found dead on the sidewalk under a window of his home here today. It is presumed that he fell from the window, whether by accident or design could not be determined.

Lichtenstein was reputed to have amassed a fortune at the racetracks. He was a collector of rare books and possessed a large and valuable library.

Gainsborough, the winner of the Two Thousand Guineas, is from Rosedrop by St. Frusquin, from Rosaline, by Trenton. Mr. J. B. Joel gave Rosaline as a filly to the Fresh Air Fund, and she was sold at a small price, 20 to 40 guineas, and afterwards purchased by Mr. Simons Harrison. Rosedrop won the Oaks, and in Gainsborough she has produced probably the best colt of the year.

George Morgan, former partner of Col. "Jack" Chinn, died recently in Cincinnati. A quarter of a century ago the colors of Chinn and Morgan were among the most famous on the continent. They were the owners of Leonatus, winner of the 1883 Kentucky Derby and the first Latonia Derby winner; the black colt Lissak and scores of other good horses. Not only were Chinn andMorgan partners, but they were related by marriage, Mrs. Chinn being a sister of the deceased. The immediate cause of death was nephritis. Mr. Morgan was 67 years old and was born in Harrodsburg, Ky., where the burial took place.

Leon Wing, San Francisco sport writer, who for the last year or more has been making his home in San Diego, has enlisted in the naval reserves and will be stationed at San Pedro within the next few days. Wing recently passed a "100 per cent perfect" physical examination.

Wing, since he went to San Diego, has been connected with the James W. Coffroth enterprises, and, had not the Tijuana race track been closed down, probably would have officiated as one of its judges and thus been the youngest judge of horse races in America.

Wing as a writer paid close attention to horse racing and to boxing, and it was through his writings on turf affairs that he became identified with the Coffroth track, his knowledge attained of racing in his work for the newspapers making him a particularly valuable man for Coffroth.

A few months ago, when Coffroth purchased a circus, Wing was engaged as its manager. His enlistment, however, necessitated the making of other arrangements, and now comes the word that Wing is going to San Pedro.

JOHREN WINS THE SUBURBAN

New York, June 8.—Shooting to the front in the first furlong of the race, Harry Payne Whitney's Johren led all the way to win the thirty-second running of the Suburban Handicap at Belmont Park this afternoon. Nearly two lengths behind the winner came A. King Macomber's Hollister. And making a great run through the final quarter of a mile of the race P. A. Clark's Battle was just a head in front of Commander J. K. L. Ross' Cudgel for third money. Frank D. Weir's Hendrie was fifth and James Butler's Spur was sixth and last in the field of a half dozen starters.

The race was run on a track decidedly cuppy in spots, and the time of 2:06 was just six seconds slower than the record made by Mr. Whitney's Whisk Broom II., when he won the 1913 Suburban from Lahore and Meridian in the fast time of 2:00 flat, a time that has been questioned.

Not since the heydey of racing at beautiful Sheepshead Bay, when the Suburban, probably the most popular of turf classics in New York, was run there, has there been such a large gathering to witness its running as that of today. With weather perfect for the enjoyment of outdoor sport, there was a crowd that even filled the largest and greatest race course in America as it has not been filled since racing came back into its own in this state.

"I've just come down to see Johren win the Suburban," was the cheerful remark of Mr. Whitney, who made one of his occasional visits to the course. His remarks was but lightly regarded for Johren, a three-year-old son of Spearmint and Mineola, a mare by Meddler, owned by the late William C. Whitney, father of today's fortunate owner of another Suburban winner, was one of the outsiders. In fact, Johren, next to Battle, a daughter of Hastings and Claudia, was the least considered of the small field, so far as the rank and file of the public went. And so it was that two rank outsiders finished first and third and brought a surprise to the great throng.

That veteran trainer, James Rowe, who is the guiding hand of the Whitney stable, also was present to see the victory of this imported three-year-old, but it was one of the infrequent visits that Mr. Rowe makes to the race course. He declared that as a trainer he probably was one of the greatest farmers in the country, and now is devoting his time to the Whitney farm down at Brookdale, N. J.

It was Albert Simons, to whom Trainer Rowe has turned over the Whitney horses, who had the honor of saddling and sending the winner to the post. He had made a good job of it, for Johren was fit and ready for the fray, as he proved by his running. But he had a mighty good horse when Rowe turned Johren over to him, and while running greenly in his early efforts in Maryland, this colt has learned to race, and proved his worth when he won no later than Thursday of this week, a race that amounted to a good workout for today's big event.

The horses were at the post but a fraction more than a minute, when Starter Mars Cassidy sent them away to a good break. Johnny Loftus on Hollister was first to show in front, but he was taking it easy as Cudgel and Spur raced alongside him. The pace for the first half mile was fairly fast, they going the quarter in 23 seconds and the half in 47 seconds, but as they were well straightened away down through the backstretch, there seemed no especial effort to do any feats of front running.

Johren had shot out into a lead of a length when they were over opposite the stand, with Cudgel and Hollister still keeping close to the pace. Over there they all looked to have a chance with the exception of Battle and Hendrie. Leaving the backstretch, Spur was running a winning race under a good ride by Andy Schuttinger, who saved plenty of ground as they went around the turn for home and moved up into second place ahead of Cudgel and Hollister.

As they came around the turn Johren was still leading handily and Hollister was moving up, but as they got into the straightaway the Macomber horse bore out and it took the best jockeyship of Loftus to get him straight again, the boy even having to bring his whip around to the horse's head to make him keep within bounds.

Down the stretch they thundered with the thousands of voices calling to first one and then another, while Johren still went on his winning way. Up there at the head of the stretch he was closest pressed by Cudgel, and it was the expectation that the great stretch runner would come on, but he faltered and first Hollister came to challenge the leader, and then from behind came Battle, and long before they had reached the finishing line, Johren was known to be an easy winner with Hollister the only one closest up, and he was an easy three lengths in front of Battle, which had fought her way up from rear ranks of the field to take third by the close decision of a head from the tiring Cudgel.

A dozen racers belonging to George Wingfield, head of the Nevada Stock Farm, have arrived in New York in charge of Trainer E. Wright.

Burgeia Brothers' chestnut mare Gazelle, by Elsin, foaled on May 11 a bay filly by Kenilworth. Mare was returned to Kenilworth.

A GREAT AUSTRALIAN MARE

Desert Gold, the best race mare seen of late years in New Zealand and Australia, finished her five-year-old racing career by winning the Awapuni Gold Cup in New Zealand, a race which she won in both her three and four-year-old form. Desert Gold was sired by All Black; a son of Gallinuile and Vortex, by St. Angelo; out of Auranius, by Malster, out of Aurus, by Wallace, a son of Carbine. This mare has had a remarkable career on the turf and a list of her performances follows. Her total winnings amount to $106,670, and she was never unplaced in any of her starts:

At 2 years old.
3rd Wellesley Stakes.
2nd Juvenile Handicap.
2nd Welcome Stakes.
2nd Irwell Handicap.
1st Pioneer Handicap.
1st Great Northern Foal Stakes.
1st Twentieth Royal Stakes.
2nd Great Northern Champagne Stakes.
1st North Island Challenge Stakes.
1st Manawatu Sires' Produce Stakes.
2nd Eleventh Manawatu Stakes.
1st Hawke's Bay Stakes.

At 3 years old.
1st Hawke's Bay Guineas.
1st Champion Plate.
1st New Zealand Derby.
1st New Zealand Oaks.
1st Stead Memorial Gold Cup.
1st Islington Plate.
1st Great Northern Derby.
1st Royal Stakes.
1st Wellington Stakes.
1st North Island Challenge Stakes.
1st Awapuni Gold Cup.
1st Twelfth Manawatu Stakes.
1st Great Northern Oaks Stakes.
1st Great Northern St. Leger.

At 4 years.
1st Champion Plate.
1st Islington Plate.
1st Waterloo Stakes.
1st Twenty-Fifth Challenge Stakes.
2nd North Island Challenge Stakes.
3rd Trentham Gold Cup.
1st Awapuni Gold Cup.

At 5 years.
In New Zealand.
1st Champion Plate.
1st Electric Plate.
1st Stead Memorial Stakes.
1st Islington Plate.
3rd Auckland Racing Club Handicap.
3rd Kelburn Plate.
1st Awapuni Gold Cup.

In Australia.
1st St. George Stakes.
2nd Caulfield's Futurity.
1st Governor's Plate.
2nd King's Plate.
1st Autumn Stakes.
1st All Aged Stakes.

Commenting on the death of Marco, a prominent English writer says: "Marco, in the opinion of those who attach importance to descent in tail-male, played an essential part in upholding the Matchem line. For some generations this branch of the thoroughbred family has been in danger of extinction. With the death of Barcaldine its fortunes in this country were in great jeopardy. Fortunately, two of his sons came to the rescue. One was Marco and the other Wolf's Crag. Apparently we lost the best of the latter's male offspring when Linacre was exported to Australia, where he excelled last season. Marco is well represented at the stud in this country by his classic winner Neil Gow (who, after a series of disappointing seasons, has come to the front with his two-year-olds, Violinist and Herself), Beppo (the sire of Gay Crusader's dam, and of the smart filly My Dear), and one or two others. Then there was Marcovil, who died prematurely at the commencement of the last stud season. He lived long enough to establish a name for himself as a sire, and left behind him in Hurry On a son who promises to cut a big figure at the stud. So superior was Hurry On to the horses of his own age, that it was impossible to ascertain how good he really was as a racehorse. Still faithful to the family that has been so lucky for him, Mr. Luscombe is among the breeders who have taken nominations to Mr. Buchanan's horse who begins his stud career next season. Australian breeders have two good sons of Marco at their service in Mr. Hordern's Bronzino (who all but won the St. Leger), and Varco. Both these horses are doing well as sires. Thanks, indeed, to Marco, the Matchem line appears at the moment to be in a surer position than it has enjoyed for many decades."

The One Thousand Guineas for three-year-old fillies over the Rowley Mile, was run at Newmarket, Friday, May 3, with a result totally unexpected, the star fillies Benevente, My Dear, Herself, Damask and others being easily beaten by Lord Derby's 50 to 1 outsider Ferry, a daughter of Swynford-Goudolette. The race was run over a heavy track in 1:46 1-5, and was of the net value of $20,500.

CUDGEL WINS KENTUCKY HANDICAP

Louisville, Ky., June 1.—Carrying top weight of 132 pounds, Commander J. K. L. Ross' four-year-old Broomstick-Eugenia Burch colt, Cudgel, saddled by Guy Bedwell and ridden by L. Lyke, won the rich Kentucky Handicap in a driving finish at Douglas Park this afternoon. He had to do his best to take the prize from R. L. Baker's Pif, Jr., by a length. A. K. Macomber's imported Hollister was beaten a head for second money, while the imported mare, Arriet, finished a good fourth. George Hendrie's Rancher, of which much had been expected, ran a most disappointing race and finished third to last.

Although he had to do his best to win, Cudgel was much the best of the eleven crack handicap horses that accepted the issue. He had been brought here from the East especially to run in the race, and his trainer, Guy Bedwell, was always supremely confident of the colt's ability to win.

Extremely fast time was made in the race, the one mile and a quarter being negotiated by the winner in 2:03, which is within one-fifth of a second of Luke McLuke's track record, 2:02 4-5, made by that horse when he won the Kentucky Handicap four years ago. In today's race the quarter was run in :23 3-5, the half in :47 3-5, three-quarters in 1:11 3-5, and the mile in 1:37 2-5. The pace was a dazzling one and altogether too fast for some of the contestants.

The owner of the winner drew down exactly $12,000, while the second horse received $1,500, the third horse $800 and the fourth $400. Cudgel's record was familiar to the speculators. They had heard of the excellent form he had been showing in the East this spring and they were not altogether unmindful of his sterling performances in Kentucky last year. Included in his excellent races here was his good second to King Gorin in last year's renewal of the Kentucky Handicap.

Having all this in mind the public went to Cudgel with a will and at post time had made him a three to two favorite. The others, however, also had their supporters, notably Pif, Jr., which received strong local support, and Rancher, which was played on the strength of his sparkling performance of a few days ago; Holliser, Arriet, Capt. Rees and Midway also same in for a good play. King Gorin had been withdrawn, Owner Baker electing to take a chance with Pif, Jr., the other half of his entry.

Just as the thoroughbreds lined up at the barrier to compete in the Kentucky Handicap, the weather man turned on the faucet and drenched the crowd and the track. In the scamper for shelter, hundreds of turf fans failed to see the race. Only the braver ones kept their points of vantage at the fence.

Starter Dade did not keep the horses at the post very long. After a few brief moments and just as the rain began falling he shouted "Come on," and instantaneously the eleven high-bred thoroughbreds were on tiptoes and had started on their journey. Midway, with Kederis in the saddle, was the first to show in front, closely followed by Hollister, Cudgel and Arriet. Pif, Jr., and Rancher were among the rear division. This order was maintained as the speeding horses swept by the grandstand. Rounding the first turn Midway dropped back, was replaced in the leadership by Hollister, which held a good advantage, with Cudgel laying in second position, and running under restraint. Lyke had a good hold of the Ross colt and it could be seen that he could have shot him in front any time he wanted to do so. There was no important change as they fled down the backstretch, except that Midway dropped back still farther, while Arriet moved into third position. Pif, Jr., was being held back by Garner, his rider being in no hurry to make him move.

As they rounded the far turn and came to the three-eighths pole, Cudgel could be seen to be gaining on Hollister and as they hit the turn into the home stretch the Ross colt was right on the leader's flanks. This was the signal for Buxton, on Hollister, to renew his efforts and although he rode with desperation, the Macomber horse could not cope with Cudgel's determined bid and after a brief struggle Cudgel, under sharp urging, shook off Hollister and running close to the rail, soon had an advantageous lead. In the meantime, Pif, Jr., had moved up and coming on the outside and running like a wild horse, he made a desperate effort to overhaul Cudgel, and although he put the latter horse to a hard drive, he could never get within more than a length of him. Hollister hung on well and got third money.

It was the general opinion that Cudgel had never before in any of his races in Kentucky kept so close to the pace. It was expected in today's race that he would come from behind. Anyway, the Ross colt ran a remarkable race and must be accorded full credit. After his latest performance he is entitled to be called champion of the all-aged division in America.

Friends of Rancher were much disappointed over their favorite's rather poor showing and they were at a loss to account for it. The Hendrie horse displayed some speed on the back stretch when he started to move up but in the pinch he failed miserably and was forced to drop back, disgracefully beaten.

SUGGESTS WAY TO IMPROVE BREEDING

The successes scored in recent years in the chief events of the American turf by geldings has frequently aroused comment among the rank and file of those who recognize racing as inseparable from horse breeding. When Old Rosebud, Borrow, Stromboli, Roamer, Boots and Sam Jackson were making turf history in 1916 and 1917 it was a subject of general regret that these splendid specimens of the thoroughbred had not been left entire and the recent victory of Exterminator, an emasculated son of McGee, in the Kentucky Derby has brought the subject to the fore once more. Mr. Frank R. Hitchcock, a steward of the Jockey Club, and a keen student of the turf who has for several years raced in France, where he maintains a breeding establishment at which so good a horse as Sandy Hook was born, said in discussing this phase of racing a few days ago at Belmont Park:

"I take it that we are all sincere in the protestation that we are racing for the purpose of improving the horse—not only the thoroughbred horse, but the other families which he controls through his wonderful potency. As long then as we allow geldings to meet our entire horses and mares in the classics of the turf, we leave the way open to criticism.

"There isn't a single event in this country in which geldings are ineligible, and England has only one—the Derby. In France the gelding has no place save in steeplechases and hurdle races. The events on the flat are contested by stallions and mares only.

"Who can estimate the value the horse product of this country would have derived from the sterling qualities of such great performers as Parole, Monitor, Freeland, Drake Carter, Barnum, Raceland, Banquet and other unsexed warriors of 20 years ago, to say nothing of the great geldings of today, if the knife had been spared.

"This country," resumed Mr. Hitchcock, "is face to face with a shortage of cavalry horses. We have an abundant supply of light-draught horses for transport and artillery, thanks to the cross of Percheron blood. In order to increase the supply of cavalry horses the government has decided recently to breed their half-bred mares, some 1,400 in number, to thoroughbred sires. The Jockey Club has donated to the Department of Agriculture four good thoroughbred stallions, while others are being acquired by purchase. These, with the aid of a system of artificial impregnation, may be enough for the present. Should the government decide to continue on its own part and to encourage the breeders of the country to lend their aid in the producing of half breds for the cavalry on a large scale—and the results of experiments in other countries would justify the policy—it will be necessary to have an abundant supply of good thoroughbred stallions from which to make a selection. If the government will then pay a fair price for the progeny it will not be many years before the supply of cavalry horses will greatly increase.

"In order to provide an abundant supply of stallions suitable for breeding half breds for the cavalry the Jockey Club should discourage the gelding of stallions as far as practicable. Geldings no longer have the three-pound allowance and should be further penalized by making them ineligible to start in any stake race except handicaps and selling stakes. Such a rule would tend to discourage the practice and would not call for too radical a change in the rules of racing. It is not necessary to have the best horse of the year to breed half breds. A good sound selling plater of the right type and one whose soundness had been tested on the race course is good enough for the purpose. If such horses had a ready sale at the end of their racing careers for, say, $1,000 to $2,000, to be used on cold-blooded mares, owners would be compensated for keeping their horses entire.

"The average trainer," said Mr. Hitchcock in conclusion, "finds it much easier to prepare a gelding for his engagements. The stallion has a heavier forehead, and it is for this reason that many of our horsemen make the change. Geldings accordingly become commercial appendages and serve no useful purpose after their careers on the turf are terminated."

RACING AT NEWMARKET ONLY

A special meeting of the Jockey Club was held at 15 Cavendish square yesterday to consider a report of a meeting between members of H. M.'s Government and the Stewards of the Jockey Club, at which was intimated a unanimous decision of the War Cabinet that owing to the increasing strain on the railways caused by the war there must be a considerable curtailment of racing during the present season, and that racing must be limited to Newmarket after May 31.

His Majesty's Government, therefore, requested the Jockey Club to co-operate with them in carrying into effect the limitation rendered necessary by the stress of the war.

It was unanimously agreed that in pursuance of the policy already laid down by the Jockey Club such a request coming direct from H. M.'s Government, should be loyally complied with and that the Stewards be requested at once to give orders for the necessary cancellation of meetings.—London Sportsman, May 24.

POLYMELIAN

(By Vincent Treanor)

"I thought you were going to offer me $40,000." This was the reply made last December by W. R. Coe to Harry Morrissey, the western trainer, when the latter came East to try to buy his Polymelian, the imported son of Polymelus, the great English sire. Since then Polymelian has won two races at Belmont Park in such sensational style that experts are beginning to believe him unbeatable. And Morrissey says now he would have given $40,000 for the colt at the time of his talk with Mr. Coe if he thought it would have bought him.

Forty thousand dollars for a horse which has reached his fourth year before winning any turf triumphs is some price. Polymelian started for the first time on May 28 at Belmont Park, although he had been in this county two years. He wasn't right as a two-year-old, and as a three-year-old his owner, Mr. Coe, decided to rest him up for another season. Whether or not this was a wise move will never be known. Polymelian might have broken everything as a three-year-old as easily as he is winning now. But it is in this, his fourth year, he promises to accomplish really great things.

In his two races at Belmont Polymelian has shown phenomenal bursts of speed, which have quickly sent him into the lead and which he seemed to retain without any trouble. On both occasions the finish found him at least ten lengths in front of his opponents, apparently only galloping. In his first race he beat a field of nineteen, and it was no contest as far as he was concerned. Without half trying and being pulled up strenuously by his pockey, he ran the six furlongs in 1:10 1-5. The track record for the distance is 1:08 3-5, made by the illustrious Jack Atkin in 1908. With urging Polymelian might have put these figures in the discard.

In his second start, on Tuesday last, all but nine scratched away from Polymelian. Some trainers can't see their horses chasing hopelessly after a champion, because, like fighters, they become discouraged by continual defeats. In this race Polymelian picked up 128 pounds and tow-roped his company just as he did in his previous start. The weight didn't bother him at all.

Polymelian has no stake engagements at Belmont Park, nor at the Jamaica meeting which follows it, but he is well engaged at Aqueduct. He is in all the principal handicaps, including the Brooklyn, where he will be put to a real test. He travels six furlongs without drawing a long breath, so there is no reason why he shouldn't go over the handicap route. If he does, all the Spurs, Cudgels and Omar Khayyams will have to be up and racing to stay with him.

While Mr. Coe is indeed fortunate in owning such an animal, the good luck was due him. He has been in racing only since Piping Rock's beginning. He went into the sport on a large and generous scale. He bought good horses and paid good prices for them, but the fruits of victory rarely fell his way. His experience would have discouraged any one else. He was an optimist, however, and never grumbled. Now it seems his patience has been fittingly rewarded by the possession of such a horse as Polymelian.

Billy Karrick is Mr. Coe's trainer this year. He has under his care some very promising material, but it is doubtful if any of it measures up to the standard set by Polymelian. However, Karrick is a painstaking handler of horses, with plenty of experience and a record of accomplishment in years past with other strings, so it is safe to say that barring hard luck the Coe colors will continue to be prominent throughout the season.

FRENCH BRED COLT WINS METROPOLITAN HANDICAP

New York, May 27.—Trompe La Morte, a French-bred three-year-old chestnut colt, by Verwood-Marsa, owned by J. E. Widener of Philadelphia, won the Metropolitan Handicap, at one mile, over the Belmont Park race track today in 1:38 2-5. Old Koenig ran second and Priscilla Mullens ran third. Omar Khayyam, the favorite, ran sixth.

The result was unlooked for, as it was believed that Omar Khayyam, valued at $200,000 by his owner a few days ago, with Roamer and Old Koenig, would divide the honors and money between them. The stake had a guaranteed value of $5,000.

Old Roamer held the lead until heading into the stretch for home, after Old Koenig ran him into submission. Old Koenig was closely followed by Trompe La Morte. Priscilla Mullens also passed Roamer and went flying after the leaders. In the run through the stretch to the wire the French colt, who carried only ninety pounds, caught and passed Old Koenig, winning in a drive by a length and a half.

Hendrie, Omar Khayyam, Walnut Hall and Hank O'Day finished in the order named.

J. H. Rosseter has bought Choir Master from A. K. Macomber and also the two two-year-old fillies Queen Maid and Christie Halter from J. C. Milam.

VIVA AMERICA WINS KENTUCKY OAKS

Louisville, May 25.—With the American flag flying in the center field and the track band and the military bands playing the "Star-Spangled Banner," Viva America won the forty-fourth running of the famous Kentucky Oaks. It was quite natural that the big crowd out for "getaway day" should break into great applause as the game little filly from the Worthington stable flashed under the wire with a good advantage to spare over Fern Handley, with Mistress Polly in third place.

Backers of Viva America, which was the favorite, spent an uneasy time, however, while the stewards were deliberating whether or not to disqualify the daughter of McGee because Jockey Warrington crossed his field quite sharply going to the first turn. They finally decided to let the result stand, which was quite a just decision, Viva America being much the best of her field.

Violet Bonnie, of which much was expected, finished outside of the money. Turning for home she loomed up as a dangerous contender, but unexpectedly began to bear out, and fourth was her portion at the end. It was the first defeat of Violet Bonnie this season.

Jockey Warrington, who rode Viva America, was called into the stand immediately after the race and was suspended for five days by the stewards for his action in cutting across the field with Viva America. This will keep him on the ground during a great portion of the first week at Douglas Park. Warrington escaped lightly.

Viva America ranked with the fleetest of two-year-olds last season, and at sprinting distances during most all of last year she was hard to beat. She won eight races in her two-year-old form. This is her first victory as a three-year-old, but she has been pitted against the highest class three-year-olds in the West since the beginning of the racing season at Lexington. In her last start she was defeated only by a nose by Violet Bonnie in a six furlong dash and that only four days after being third to Exterminator and Escoba in the Kentucky Derby.

SENNINGS PARK WINS SPRING TRIAL STAKES

Louisville, Ky., June 8.—An immense crowd witnessed the best racing of the Kentucky season at Douglas Park this afternoon. Three special attractions proved the magnet to draw the race patrons to the Beechmont course, and all left well satisfied. The Spring Trial Stakes for the juveniles was the chief event from a monetary standpoint, but the meeting between Escoba, Leochares and Bradley's Choice at one mile attracted the most attention.

This event was arranged in an effort to reduce the world's record for one mile, and while it failed to accomplish the purpose, it enabled race patrons to witness a great struggle between great thoroughbreds. The track record for the distance was broken when Escoba stepped the circuit in 1:36 4-5.

Another track mark was lowered during the afternoon. In the sixth race Rancher, the odds-on choice, showed the crowd that he did not run his race in the Kentucky Handicap last Saturday by the manner in which he stepped a mile and one-eighth in 1:50 4-5. The former mark was 1:51, made by Strong when that performer was a four-year-old.

Sennings Park, by Jim Gaffney, out of Irish Queen, and ridden by Jockey McCabe, a "comeback" jockey, won the rich Spring Trial Stakes at Douglas Park this afternoon. Col. Livingston was second and St. Bernard third. The latter two colts ran as the B. J. Brannon entry. The winner is owned by O. A. Bianchi, who owns the sire of the colt, Jim Gaffney. The favorite for the race, Billy Kelly, which had heretofore been undefeated in his four starts, ran a dull performance, but he was giving every colt in the race ten pounds. The race was worth $4,295 to the winner.

The fractious acting of Ticklish kept the field of eleven starters at the barrier for some time and gave the starter and his assistants considerable trouble. The start, however, found all the youngsters in good alignment, and Colonel Livingston at once rushed into the lead, closely followed by Billy Kelly, but the latter immediately dropped out of it and Colonel Taylor took up the running and chased Livingston until rounding into the stretch, where he gave way. Sennings Park meantime had worked his way steadily to the front ranks, and in the last sixteenth offered his final and ultimately successful challenge.

Rosedrop, the dam of Gainsborough, has this season dropped a brother to the Two Thousand Guineas winner, and has been mated with Spearmint. After the appearance of Gainsborough, Lady James Douglas put Rosedrop again to Bayardo, to whom she proved barren in 1916, and her ladyship sold the mare at the December sales that year, when Mr. J. W. A. Harris purchased her on behalf of Mr. J. Scott for 2300 guineas. Rosedrop had then been covered by Polymelus, to whom she was barren; but the mare's owner will no doubt be fully recompensed for his outlay in the possession of her latest produce, which was foaled on March 22nd. She has now been served by Spearmint.

WHY THE THOROUGHBRED IS BEST

Col. R. W. Briggs of 311th field artillery, U. S. A., who but recently returned from France, made a convincing plea in the interest of the thoroughbred before the senate committee of the Maryland legislature last week. Colonel Briggs said:

"I have just come back from France. I was chief of the remount service over there, which is a branch of the Government that supplies the service with horses and makes the animals fit for service. I am a horse lover and always have been, but it was not until twelve years ago that I owned my first thoroughbred, and I have not been without one since.

"I have learned his true value. Sometimes I have owned two, that is when I have found a convenient person to let me have a little money. But I was much impressed when I was in France with the real meaning of the thoroughbred horse. I visited the remount depots in England, most of the remount depots in France and a number of the other remount depots. Everywhere I saw a beautiful type of the animal. Especially was the thoroughbred present in the mounted branches of the service.

"The government of France does not require its officers to buy a mount, but furnishes each with one, and the mount is invariably a thoroughbred. Why does it do that? Because the thoroughbred has the best of animal flesh in him. He has courage, he has the willingness to do everything that is required of him if you but show him that requirement. He has a heart to give the best that is in him, and an officer, who is a leader of men, wants to have all about that feeling which will push him on, and when he has a thoroughbred under him he cannot but help feel it.

"But to come back to what I started to bring out—a supply of thoroughbred horses to the officers. The French government does supply the mounts to the officers. At one particular remount depot, just outside of Paris, I found the animals there, thoroughbreds, everyone of them being trained by civilians, gentlemen of Paris, who gave over to their government two or three hours every day—men who were interested in horses and horsemanship, and who were beyond the age limit, men who were fairly along in life, and who, to do their bit, were training these horses for general officers and stationed officers.

"This leads up to the desire for the continuation of the blood of the thoroughbred in our country. We read everywhere that the farmers are trying to get the best blood in their hogs, in their sheep, in their cattle. Why? Because they have found that it pays to get the best. The market demands it. They do not look so much perhaps to horses because we have not yet come to eating horse flesh, so the means of keeping the blood alive in this country to a large extent depends upon racing to a large measure.

"There must be some incentive to keep the blood alive. I am speaking for the thoroughbred. I do not know much about the gambling state of it. I would have liked to have seen the race between Hourless and Omar Khayyam last fall. I have often wished I could see some of the racing in this State. I hope yet I may be able to do so. In closing, therefore, I want to say that if I can be of any service toward the continuation of the blooded horse—the thoroughbred horse for the service—I want to do my bit, whatever it may be."

WANTS COMMISSION TO LOOK AFTER RACING

Those who are anxious to have racing, even if in limited form, revived in Canada in the coming summer, will have some strong arguments to present should they voice their wishes at Ottawa, as indications are that they will in the near future, writes Elmer Ferguson in the Montreal Herald.

A potent argument is this: Canada is the only country in the Empire where racing has been entirely suppressed, the edict which prohibits its organized betting amounting to suppression. Australia, and England itself, among others, have racing. In the British Isles the racing is in a modified form, which is all that Canadian track interests could and will ask.

Racing in Canada suffered in its later days from many ills and evils, but none that could not be pruned. What is needed, apparently, is the appointment of an absolutely independent and disinterested commission to govern with an iron hand. Neither horse owners, breeders nor those interested in race tracks should be members of such a commission, and the duties of the body might include:

The granting of license for race meetings, with the power to refuse a license to any one track.

Absolute control and supervision of the parimutuels.

Appointment of racing officials.

Such a commission, if its functions were well exercised, could place the sport on the high level where it deserves to be, and at once eliminate the numerous evils which have given the enemies of racing in Canada many weapons to wield against it. Racing is needed in Canada. The growing importance to this country of the breeding industry as an economic asset is too great to be cut off so suddenly and completely, but a revision of conditions is necessary before the sport can be resumed even on a war-time basis.

PIMLICO INCREASES PURSES

William P. Riggs, the leviathan representative and secretary of the Maryland Jockey Club, who is mainly responsible for the rehabilitation of thoroughbred racing in Maryland, announces that the directors of the Maryland Jockey Club are planning to make the coming fall meeting of that organization a banner one, surpassing even the now historic spring session, during which the turf world was astonished when the ancient fixture, the Preakness, was run in two sections, the association adding the grand total of $30,000, $15,000 being split among the placed horses in each division.

The Maryland Jockey Club's distribution this fall, proportionately, will be greater than the amount given away in stake and purse money last spring, since the fall meeting will be limited to 10 days of racing, while the spring meeting lasted 15 days. It is the plan of the management to distribute no less than $100,000 during the fall meeting.

At a meeting of the directors of the Maryland Jockey Club, held at the offices of the association recently, it was resolved that at the autumn meeting the added money in all over-night events will be $1,000. In addition to this, the directors also increased the valuation of some of the stake fixtures that are to be decided.

The following is a recapitulation of the stakes that will be decided at the fall meeting, the conditions governing and the valuation: Bowie Handicap, $10,000; for three-year-olds and upward; one mile and a half. Pimlico Autumn Handicap, $5,000 added; for three-year-olds; one and a quarter mile. The Walden, $5,000 added; for two-year-olds; one mile. The Manly Memorial Steeplechase, $10,000; two and a half miles; and the Elkridge Steeplechase, $5,000 added; for three-year-olds; two miles.

Thus, it is to be presumed that Maryland is destined to regain the position that was once hers in the turf world, when in yesteryears Maryland was the cynosure of all eyes in the turf world. And, while no statistics are available, it is fair to assume that the Maryland Jockey Club will, at the close of the coming fall meeting, have distributed among the horsemen more money than any racing association in America, as they will have given away no less than $207,000 in their allotted 25 days' racing at the Hill Top track.

BIG LIVE STOCK EXPOSITION IN SAN FRANCISCO

Headquarters for the California International Live Stock Corporation, which plans to hold a gigantic live stock exhibition in this city this fall, were established recently on the ground floor of the Merchants' Exchange Building. The officers are Edgar J. de Pue, president; Joseph E. Painter, manager; L. M. King, secretary, and an executive board of which W. T. Sesnon is chairman. A committee on classification has been appointed to prepare premium lists.

Besides the premiums to be offered by the California International Live Stock Corporation additional prizes are to be put up by the National Breeders' Associations, including the American Shorthorn Breeders' Association, American Shire Horse Breeders' Association and the Percheron Society of America.

The poultry exhibit is to be aided and fostered by the San Francisco Poultry Association. The Pacific Coast Rabbit and Cavy Breeders' Association also is lending its aid to the show.

Information concerning the plans of the California International Live Stock Corporation may be had from Joseph E. Painter, manager, Merchants' Exchange Building.

The death of Operetta 2:26¼, by Elyria, recalls the flashy little chestnut mare, with a rather light mane and tail, which was raced through Northern Ohio in the early nineties. She was bred by J. W. Opfer of Elyria, Ohio, developed by George Ely, the owner of her sire, and driven by Fred Keyes before he went to Russia. As a race mare Operetta was only fair, but in the stud to the cover of Bellini, she produced a filly named Soprano, that measured up with the best that ever took the word. John Dickerson started her on the primrose path of success by winning a three-year-old race with her at Boston, but failed in the Kentucky Futurity. She was then purchased by John E. Madden and after putting her through his winter school he turned her over to W. J. Andrews. An almost unbroken chain of victories followed and when she was exported to Austria a mark of 2:03¾ followed her name on the export certificate.

So far as the betting is concerned, racing cannot go on without it. Betting has come to be a part of racing, because of the necessity to localize one's interest in the horses which race. Without betting the tracks cannot hope to continue, and without tracks the breeding industry must fall into decline. But the betting can be minimized, as was, unfortunately, the case at a good many of the tracks hereabouts in the last few years.

Notes and News

Horace Ensign has been appointed secretary and manager of the Montana State Fair.

Joe McGuire will race Braden Direct 2:01½, in the Middle West this summer.

Mono Ansel 2:09¼ has been purchased by the U. S. Government and is now standing at San Luis Obispo.

Marvin Childs, who gave Ben Earl 2:00½, his record, but now in the service of Uncle Sam, has gone to France.

Wonder if Joe Patchen 2d 2:03¼, will be able to do a comeback stunt this year. They say the pacer is training to order.

Carrietta 2:18, famous as the only mare to produce four trotters with standard yearling records, has a foal at foot by Peter Scott 2:05. She will be bred back to the son of Peter the Great 2:07¼.

Judging from the official report of the recent meeting of the joint committee of the A. T. A. and N. T. A., nothing was done about compulsory registration. A special committee should have been appointed to look into the "legal phases" of this matter also.

Jas. J. Ryan, prominent member of the San Francisco Driving Club, has leased the McKinney Stables at Thirty-sixth Avenue near Fulton Street and has brought his racing stable from Woodland. Trainer Al Schwartz is in charge of the horses—Miss San Francisco, Yoncalla, Directress Mac and Surety.

The good trotting stallion St. Frisco 2:01¾, the sensational two year old colt of last year, is in fine form this year. Mr. Geers has stepped him a half in 1:03½ and a quarter in thirty seconds. Mable Trask 2:02¼ is also doing extra well this season and we will hear from these two worthies when the Grand Circuit opens.

Walter Gallup of Fresno has succeeded D. F. Herspring as superintendent of C. F. F. Silva's racing establishment. Gallup achieved considerable fame in turf circles when he owned the fleet Clara Mac 2:04½. He recently sold the green stepper Surety to Al Schwartz, and is now ready to devote his time exclusively to the management of Silva's string.

One of the unique features in connection with the meeting which the Southeastern Fair Association will put on at Lakewood Park, Atlanta, Ga., on July 4 is that every spectator will be required to purchase a Thrift stamp in addition to paying the price of admission when entering the grounds. As there were 25,000 spectators at the park last year the management expects to add a fair amount to the war chest from this source.

The theatrical manager, Henry B. Sire, who died recently in New York City, was at one time actively identified with light harness racing. As a member of the firm of Sire Bros., he raced the well known trotters Harry Wilkes and Rosalind Wilkes as well as the pacer Gossip, Jr. Frank Van Ness drove for them several seasons and was very successful in the fast classes. He also gave Harry Wilkes his record of 2::13½ over the old Bay District track at San Francisco, Cal.

Taking exception to the statement that the trotting bred horse can stand more hard work than any other type of equine, John E. Madden, the New York wizard, has issued a challenge to match a thoroughbred for not less than $1000 that will beat any trotter in six or nine heats on one afternoon during the Lexington meeting next fall. He will do this without taking the harness off between heats, each starter to carry 150 pounds. This, of course, means that the match will be in harness, yet the main point is rather ambiguous, for the reason that he says nothing about whether the thoroughbred will trot in harness or gallop.

Salinas, June 22.—The seventh annual California Rodeo and Salinas Big Week will open here July 17 and close July 21, it was announced here today by the rodeo committee.

Proceeds of the affair will this year be turned over to the American Red Cross Society for the alleviation of war sufferers. Every effort is being made to make this year's event the greatest rodeo ever held in California. It is planned to spend $50,000 on the rodeo, street carnival, stock shows and agricultural show. Monterey county has sent out its challenge to the world to compete in the events. The county also extends its hospitality to all who will attend the big festival.

The State's famous riders and horses have already been entered for the rodeo.

THE BEST LEG AND BODY WASH

If you have a horse that comes out sore and stiff after a race, just try one bottle of Tuttle's Elixir to two quarts of water on him in this way. Wash his shoulders, chest and legs with the lotion, scrape him out, put on an extra blanket, fold back and pin around his chest.

Bandage his legs. Rub a little of Tuttle's Elixir full strength with the hands on the coronets and put some swabs around them.

Dr. D. F. Herspring, who has been in the employ of Charles F. Silva as manager of the Woodland race track and trainer of Mr. Silva's horses, has resigned his position. Dr. Herspring suffered a physical breakdown on Sunday afternoon during the races at the local track, and it is because of this that he is forced to sever his connection as manager of the track and take a complete rest. W. Gallup, well-known local trainer, has been selected by Mr. Silva to succeed Dr. Herspring and he will immediately take up his duties.

A meeting of the local citizens and members of the Rodeo corporation was held Monday evening in the city hall, and it was decided to hold the next rodeo from July 15 to 21. These dates were selected because San Francisco plans to hold a rodeo shortly after the San Jose affair, and if Salinas postponed its rodeo to the end of the month the metropolis would take the date. Also the cattlemen say that the feed is going to be scarce this fall, and that the cattle and horses will be in the best of condition at this date. The rodeo will start on Thursday and continue until Sunday. On Monday, Tuesday and Wednesday a live stock show and racing meet will be held.—Salinas Journal.

The fast trotting stallion, Peter McKlyo 2:06, by Peter the Great 2:07¼, is the latest addition to the stable of Lon McDonald, and while the California stallion has had little work and is not ready to show anything much in the speed line just yet, he looks the part of a good horse. Peter has had no racing experience, but in 1916 he was the sensation on this Coast, and as he trotted in 2:06, he has at least shown that he has the sort of speed that is necessary in a stake trotter. He went through the recent sale at Chicago and was bid off by Charles Silva, the wealthy sportsman of Sacramento, who ordered him shipped to McDonald. The son of Peter the Great will be in no shape to start at any of the early meetings, but may be started a few times late this fall. His best mile to date is 2:40. The other California trotting stallion, The Proof 2:05¼, which was purchased at the Chicago sale by E. J. Morarity of Chicago, and placed in the McDonald stable, is working nicely, a mile in 2:17½ being his best effort up to date. The son of The Exponent 2:11¾ was one of the crack trotters at the Western meetings last year and took his record in the third heat of a race at Fresno, Cal., in September. He ran up against the sensational Esperanza 2:04 in several of his starts and forced the daughter of Carlokin 2:07½ to trot in 2:07½, 2:08 and 2:08 over a half-mile track, this being a world's record for three heats over a two-lap course.

Mr. C. A. Harrison of Seattle, Wash., writes as follows:

I am in receipt of a letter from James Conway, formerly of Seattle, Wash. Mr. Conway is now located at Palmerston, New Zealand. He writes very glowingly of Palmerston, and as he has been in New Zealand for about five years, and being a man of good judgment, I am sure New Zealand and its people are all and more than Mr. Conway declares them to be. The brown pacing horse, Van Coronado, a son of Del Coronado, and an exceptionally fast daughter of Montana Director, was taken to New Zealand by Mr. Conway. Van Coronado is an exact duplicate of his sire, and when I say this, I say a mouthful, as Del Coronado was one of the finest looking, strongest made, gamest, and fastest trotters I ever saw, and no son of McKinney ever sired a faster and gamer pacer than White Sox 2:02¼. I stood on the race track in San Francisco and watched her every moment in the great $20,000 race, and she won it, and won it on her gameness and speed, and it was a royal battle—it took all of Mr. Durfee's greatness as a race driver, and had he not had one of the greatest race mares ever hitched to a sulky, he never would have won that $20,000 race. Van Coronado will out-sire every horse ever exported from America to the Antipodes. He is a son of the great McKinney—his dam was a daughter of Montana Director, a fast son of the Mighty Director, the horse that gave us Direct, Directum and so many other great sires that are breeding on in both the male and female lines. Van Coronado has all that goes to make a sure sire, conformation speed and ultra fashionable breeding, and I certainly believe that if his foals are given proper attention, and are, of course, from mares of producing blood, that the sons and daughters of Van Coronado will race fast and game, and will reproduce themselves in vast numbers. Jim Conway's friends in America, one and all, wish Mr. and Mrs. Conway all the good luck that kind Providence can shower on them, and the writer goes on record as saying that Van Coronado will out-sire any standard bred horse ever in New Zealand.

A big cavvy of 31,000 absolutely wild Canadian horses have arrived in Europe. Most of the horses were captured in the wilds of the Peace river country, northwest of Edmonton and none of them had ever looked through a bridle. The English are coming to understand that our bronchos are the best kind of saddle mounts for war steeds and this is what we have been thinking all along.

The Kentucky Trotting Horse Breeders' Association will hold its forty-sixth annual meeting at Lexington, Ky., September 30 to October 12. It is offering seven early closing events for same; the list including The Transylvania, $5000, for 2:06 trotters; the Walnut Hall Cup, $3000, for 2:10 trotters, and The Ashland, $2000, for 2:15 trotters. The three year old division of the Kentucky Futurity this year will be worth $14,000, the two year old division $5000, and the pacing division $2000 and will with the late closing events make the total offering for the two weeks' racing amount to about $90,000. In the forty-five years that the Kentucky Trotting Horse Breeders' Association has been in existence it has paid $2,332,280 in premiums.

It now looks as if there will be no racing in Denver this summer because of antagonism on the part of the Government. It is the opinion of Mayor Mills and the city managers that for the period of the war racing should not be permitted in Denver. It is understood that the people back of the racing movement threaten if permission is not given to hold races at Overland a race course will be built at Lakeside, beyond the county line in Jefferson county and races may be held there this summer. The late Mayor Speer was strongly opposed to racing in Denver at the present time. It was largely through his efforts that racing was abandoned at Overland Park last year.

Lexington, Ky., May 18.—On the seeming road to recovery, free from the pain that harassed him so frequently during the last six months, cheerful and hopeful and planning for the summer ahead to be spent in the country, where he could avail himself of the benefit he believed an open-air life would be to him, John Splan, without a moment's warning, without a moment's pain, passed quietly into the great beyond on Saturday evening, the eleventh inst. During his long illness he had dreaded that death might come to him in one of his periods of suffering, and it was a consolation and comfort to his friends that he died lacking knowledge or apprehension that his end was so near at hand. Unique in his chosen career, outstanding in his natural ability in it, spontaneous in his love for man's best friend, he was, in the height of his career, a character known in all countries and his trite sayings were quoted everywhere. Royalty did not abash him. Plebians did not hesitate to approach him. He was just John Splan, everywhere and with everybody. In the sulky and out of it he was an "artist" in every branch of his profession. There was only one John Splan, and that was his own characterization of himself, as he expressed it to the writer in a night journey from Cleveland to Chicago in the days when the names, John Splan and Rarus, were on the lips of everyone who loved a good trotting race, a good trotter and a good driver.—The Horseman.

Dick McMahon smashed the season's record for trotters on Thursday morning when he piloted the bay mare, Esperanza 2:04, a mile in 2:07½. The Cleveland trotter, The Royal Knight 2:08, worked in 2:08½ at Lexington recently, but the mile by Esperanza gives her the distinction of having trotted the best mile to date at any of the big training camps. The daughter of Carlokin 2:07½, in company with the pacing mare, Belle Alcantara 2:10, trotted over to the quarter pole in 31¼ seconds, was then eased up, reaching the half in 1:04, and after passing the three-quarter station in 1:36½, was turned loose. She came through the stretch like a champion and finished very strong in 2:07½, the last quarter in 31 seconds. Later, in a mile in 2:15, she tramped home from the big pole on the upper turn in 30 seconds. That satisfied McMahon that she could step a two-minute shot this spring. She is now carrying a lot of flesh, although she is as hard as nails, and Dick is training her with her head dropped down. Esperanza was not so much of a "bear" when she raced along the big ring two years ago, but last season she trotted several sensational races over the mile and half-mile tracks out on the Coast, finally taking a record of 2:04 at the Phoenix meeting. She trotted in 2:07½, 2:08 and 2:08—a world's record for three heats by a trotter over a half-mile track, and trotted a number of other heats in better than 2:10 over the two-lap courses. She was purchased by McMahon for a patron during the winter, and is being named in the early closing events along the line. Dick's old standby, Miss Perfection 2:06¼, is as round as an apple, and while the daughter of General Watts (3) 2:06¾ has not been asked to beat 2:18, she has all of her old-time zip and McMahon is not worrying about her.

A LITTLE STORY ABOUT THE LATE JOHN McLINTOCK

The Editor of the Breeder and Sportsman, San Francisco, Cal.

About three years ago last winter, the writer received a pathetic letter from his friend, John McLintock. This letter was dated Victorville, Cal. Victorville is a tank station at the foot of the San Bernardino mountains in Southern California.

In sending this letter to the Breeder and Sportsman, I am doing so for several reasons; one is to show the horsemen, owners, fanciers and the many humble care-takers, who contributed their money so promptly and cheerfully to the aid of the late newspaper writer, John McLintock. My other reason is to show what the wife of John McLintock has proven herself to be—not only a devoted wife to her departed husband—but that she is more than worthy of the assistance that the horsemen so gladly and promptly gave, and that she is doing "her bit" as an American citizen.

While I am at it, I will take space enough to tell you how I became acquainted with my friend, John McLintock. During the Alaska-Yukon Exposition at Seattle, a frail-looking young man registered at my hotel and was assigned to a room. He looked across the counter at my private desk and saw some harness horse pictures, and he asked me to show him the man who was a lover of harness horses. I had to plead guilty. Mr. McLintock then introduced himself to me, and stated that he had been associated with the "Chicago Horseman" and other publications devoted to the light harness horse. From that moment we became fast friends and had many affiliations that were congenial to both of us, and besides that, we discovered that we were both born in Ireland within a few miles of each other, which added fuel to our friendship. After that he became editor of the "Pacific Horse Review," Portland, Ore. It was during his occupancy of the editorial chair, and during one of my visits to Portland, that he told me he had only a short time to live, and that he must sell his little Portland home and take his girl-wife to live in the mountains of Southern California. I saw him in his sick-bed in Portland afterwards, and on my next visit to Portland found that he was down in California. I did not hear from him for several months until I got a pathetic letter telling me of his predicament, and how he and his wife were holding down a homestead in California. He said he did not care for himself, but that his poor, little wife was virtually freezing and starving to death in their cold tent in the mountains. He asked me if I could get up a subscription list for him so that he might leave a little something for his wife and to provide for her while she nursed him in his last days in the cold tent at the edge of the mountains.

I sent out about twenty subscription lists to horsemen and horse journals. I sent a telegram to a man in California whom Mr. McLintock had in many ways benefited and boosted through the papers he was associated with. This "philanthropist" sent me back a "collect telegram" in which he said that the county charity associations were the ones to whom I should appeal in cases like Mr. McLintock's. I believe I made the response to this "charitable" man that a place other than heaven was full of such people like himself. I also sent a telegram to G. D. Armstead, Riverside, Cal., a man who was at that time in very frail health. My little, sickly friend Armstead did not send me back a collect telegram—but he got in his car, drove from Riverside to Victorville, found the McLintock tent was eighteen miles out of town—that the mountain roads were impassable with snow—but Mr. Armstead handed $50 in cash to the postmaster and had aid sent immediately to Mr. and Mrs. McLintock, and also telegrpahed me from Victorville of his action. Mr. W. G. Durfee, Mr. John B. Stetson, "The American Sportsman," the Vancouver (B. C.) Driving Club, the care-takers around Salem, Ore., and the care-takers around many other places, all sent in their subscriptions in cash—not in advice; "The Breeder and Sportsman," through its editor, big-hearted Will Neal—Sven Christiansen, big-fisted and big-hearted—John W. Considine, and scores of others that I will not name, as I presume I am taking up too much of your space, but I will mention one other individual who did not contribute, but sent me back a hard letter to the effect that there were enough charities in his town without bothering about such cases as McLintock's. And this same individual received from me many thousands of dollars and my connection with him was through the advice of John McLintock, that he was a great man in his line of business and a "square-shooter," as McLintock put it, and when I began to do business with him I wrote him it was on the advice of John McLintock that our business connection was arranged. If he reads this letter we will not need to put his name in print. I feel sorry for him.

Mr. McLintock died shortly after the money reached him, but before he died he arranged for a neighbor to put boards around the tent so that his wife and self would not freeze to death. He arranged for his burial at San Bernardino, and when he had his humble arangements made for his departure from this life, he died.

The only way his wife had of summoning aid was to put up a piece of cloth on a stick and signal to the nearest neighbor, two miles away—to fill the water barrel, but when the neighbor came that time, it was to carry the dead body of John McLintock in his wagon to San Bernardino. The young wife, who is about the size of a good-sized ear of corn, sat in the wagon and did her best to hold the body so it would not slide down the mountain side, and after miles of this journey, the young widow reached San Bernardino and buried her husband. His last wish was that I be notified, as well as his sister. He sent me a book entitled "The Fair Hills of Ireland," which I have since read many times. He also sent me his diamond stick-pin, which I returned to his widow, as I am not a wearer of diamonds.

After a little rest, to save herself from a nervous breakdown, the widow wrote me a letter for myself and the horsemen, on behalf of herself and husband, in which she thanked us all, and said she would like to get into the moving picture business, as she would like to make some money and prove up on the homestead. A good friend of mine in Los Angeles, Dean Worley, arranged this for her. After a trial at the moving picture game, Katherine McLintock wrote me she found this particular line of work was not in her line. She then did dressmaking for a while, then went back on her claim, and has been living there ever since, and has proved up on it. She has a patent on it from Uncle Sam. She has not only lived on her mountain claim, but has cut mosquite wood and sold it. Someone gave her an old horse. The horse hauled the wood and the water. A postoffice was established at Phelan, Cal. This is close to her homestead, and by good luck she was appointed postmistress, with a salary of $10 per month. A good-hearted man in Phelan loaned her his cabin where she established Uncle Sam's postoffice. The $10 per month was, as she stated in a letter to me a few months ago, a God-send to her, and that she had prayed for aid and the $10 per month semed to her like $1000 per month would seem to someone else.

About three months ago the owner of the cabin found he had to have it, and Katherine McLintock was about to lose the job as post-mistress, as she was without a building in which to care for Uncle Sam's business, and, necessity being the mother of invention, she was brave enough to again ask aid from the friends of her dead husband to the extent of $150 with which to buy lumber and build a cabin in order to hold the job with the $10 a month stipend. The money was telegraphed to her, and she now has the building, if we may call it such, and she sent her note to the persons who sent her the money, saying that she hoped to sell enough mosquite wood within the next six months to pay it back. She also sent expressions of gratitude that would do an angel honor to read.

My story is long, but in these times of warring nations and warring factions in the harness horse world, and so many people doing their best to accomplish something for the betterment of their fellow-men, I think that the horsemen who so generously contributed the money to aid Mrs. McLintock and her husband are entitled to read this letter. It may do many of us good—myself included. Therefore, I am going to ask you for space so that the men who gave the money, which amounted to $690, and I know they did not give it in a grudging way, because their response was prompt—and they are entitled to know that the widow of John McLintock thanks every one of them—even the poorly paid "swipe," who contributed his dollar or two dollars as the case might be.

I know this is a bungling letter. However, I lay no claim to being a literary expert, but I would like to have all the men who helped to read it, and not only accept the thanks of the dead man and his widow, but my thanks also, and my pleasure today in telling the true story of John and Katherine McLintock.

Yours very truly,
C. A. HARRISON.

Sacramento, May 17.—The plans for the holding of the 1918 California State Fair during the week, August 31-September 8 are thus early arousing general interest, indicating that the fair will have a large attendance.

One of the best indexes to what extent the fair will draw attention and atendance is found in the applications for concessions made by men who do business at the fair, and depend upon crowds to make their investments pay.

Already five applications for restaurant concessions have been received, and competition for space and for the best locations is manifest.

Many preliminary inquiries for space for exhibits are being made. A letter from Glenn county asks for reservations to show two carloads of Duroc Jersey swine.

Horse breeders, whose industry has been stimulated by the war's demand for animals, and by the expansion of farming interests are also asking for space. One of the recent applications is from a horseman who heretofore has not participated in the annual State Fair and who asks for room to show twelve head of imported Percherons.

SANTA ROSA COUNTY FAIR

The directors of the Sonoma County Farm Bureau decided to hold the first annual county fair at Santa Rosa. It is expected that three or four day sessions will be held. The locations proposed include the race track and the old College grounds.

The fair will be under the management of the Farm Bureau and numerous farm centers will furnish the exhibits. Prizes will consist of improved live stock, trees and plants.

The board of directors of the Sonoma County Farm Bureau held a busy session Saturday at the headquarters in the court house and President Sheridan W. Baker was in the chair. Those present included:

Rene Guillou, Windsor; J. R. Denman, J. L. Peters, E. O. Hussel, Petaluma; C. E. Humbert, Cloverdale; W. S. Rose, Bodega; Wm. F. Holmes, Jr., Kellogg; Mrs. I. W. Parsons, Windsor; Mrs. F. W. Hoffman, Guerneville; Mrs. F. J. McMannis, Sebastopol

Miss Cordelia Bedford, agent at large of the State Home Demonstration Department, made an address on the importance of organizing a farm home department in connection with the county farm bureau, outlining four aims and objects: First, the conservation of food, represented largely by wheat; second, the preservation of food by canning, smoking, salting, drying, pickling and other ways; third, increasing the poultry and egg supply, and fourth, making better and more war gardens, thus increasing the amount of perishable food to be used by the homes. The speaker dwelt on the advantage that would accrue to the farm homes of Sonoma county in gaining a home demonstration agent for Sonoma county to aid in this great work and the matter will be taken up before the supervisors at their next meeting. The salary of such agent will be paid by the Federal and State boards, but the maintenance or field expenses, amounting to $1500 a year, must be borne by the county.

Miss Bedford pointed out the connection between the war work and the necessity of having such an agent and declared that it means exactly the same to the women as the farm advisor means to the men. The food question is growing more stringent as time goes on and it is advisable to aid in a wise direction to utilize every material that can possibly be converted into food and to encourage additional production. The Government announces that 85 per cent of the canning pack of every kind—fish, meat, vegetables and fruits—will be required or military purposes and asks the women of the United States to put up sufficient perishable products to supply the families, leaving 15 per cent to go to the grocers as a means of subsistence for the people in the cities who can not put up food, and if they could, would not have means of storing it.

The farm adviser's report shows 175 miles traveled, 16 days spent in the field and 8 days in the office. Thirteen farm center meetings were held, with an attendance of 529, while Mr. Merrill spoke at two other meetings, with an attendance of 33. A center will be organized at Annapolis on June 24. The hog campaign resulted in pledges to keep 1500 hogs. The budget for the fiscal year calls for $6500 for the support of the office.

Directors Walter F. Price and John Rinner of the Santa Rosa Chamber of Commerce appeared before the directorate to urge that the county fair to be held three or four days in September, shall be located this year at Santa Rosa and presented several eligible sites, any of which will be secured for the county farm bureau without cost. The advantages of choosing the county seat, with central situation and convenient steam and electric lines, was pointed out, and Senator Price was eloquent in his advocacy of the "City of Roses."

STATE FAIR LIVESTOCK TRANSPORTATION

Transportation for livestock to and from the State Fair is likely to be satisfactory this year more than any year recently past. Director-General McAdoo of the railroads has written that railway arrangements in general are to be the same. Stock cars which were transporting horses last year will be free and plenty now. The California Traction Company has promised Secretary Chas. Paine of the State Fair to keep two motors on the job for prompt switching. Heretofore only one was provided and it was crippled. The difficulty due to having room for only a few stock cars on the Fair Grounds may be overcome by plans already made to run a switch track the full length of the hog pavilions directly back of them. It is proposed to use for this purpose the rails which are already on the grounds carrying materials for the new agricultural and horticultural building. Tentative arrangements are also being made to haul stock by motor truck from Homestead, which is near by, if the traction company fails again. Stockmen who wish to avoid the switching and delay of the traction company may unload at nearby stations and haul the animals to the Fair Grounds on their own responsibility. A number living as far away as Woodland expect to make the entire trip by motor truck this year.

THE NATIONAL TROTTING ASSOCIATION

Office of the Secretary.
Hartford, Conn., May 20, 1918.

To Members of the National Trotting Association.

The committees appointed by the National and American Trotting associations at their congresses in February, 1918, to consider the question of amalgamation of the two associations, met at the Deming hotel, Terre Haute, Ind., May 18. The National Trotting Association was represented by John C. Welty, president; DeForest Settle and E. W. Swisher. The American Trotting Association was represented by W. P. Ijams, president; T. H. Gill and C. E. Cameron. W. H. Gocher, secretary of the National Trotting Association, and W. H. Smollinger, secretary of the American Trotting Association, were also present.

The committees organized by electing W. P. Ijams president and W. H. Gocher and W. H. Smollinger secretaries for the meeting. On the matter of amalgamation the following was adopted:

As the rules of both associations are uniform, mandatory, and unchangeable except by joint agreement of both associations, there are no grounds for differences in conducting races on tracks in membership. It is further the sense of this committee that the rules shall be at all times uniform.

The matter of amalgamation on account of the legal questions involved is referred to a sub-committee, composed of T. H. Gill, John C. Welty, W. H. Smollinger and W. H. Gocher, to report back to this committee, and a complete report submitted to the next regular meeting of both associations.

W. H. Minton also appeared before the joint committee and presented a petition and a proposed set of rules for selling races. After he discussed the matter, the chairman advised him that the committee had not the authority to make or amend rules. It did, however, adopt the following ruling:

Members have the right to give selling races governed by published conditions which are not at variance with the rules.

W. H. GOCHER, Secretary.

THE PASSING OF COBWEBS

The celebrated trotter Cobwebs 2:12, for many years the champion of the New York speedway, died at Nathan Straus' stable May 12. He had attained the great age of thirty years, his prolonged life being largely due to the care which Trainer Tim Sullivan bestowed upon him.

Cobwebs was a Palo Alto product, being by the Electioneer horse Whips out of Mollie Benton by General Benton. He was brought out in 1894 by the old time trainer William Trimble, whose name was also connected with the careers of Judge Fullerton, Music, Instant and Garnet, all of which were raced successfully in Grand Circuit company.

A nomination was purchased for Cobwebs in the $10,000 M. & M. at Detroit that season and before going West Trimble sampled his pupil at Philadelphia where he won in 2:16¼. He was then shipped to Cleveland, where he laid up for a couple of weeks. The perfect manners, great speed and pure trotting gait of the Whips gelding soon made all of the rail-birds at the track think well of him and there was a plunge on Cobwebs in the betting ring before he took the word at Detroit, at the inaugural meeting over the Grosse Point track.

There were fifteen horses in the field, the list including J. M. D., Rex Americus, Sally Simmons, Cocoon as well as Cobwebs. In one of the scores Starter Loper appeared to give the word and then rang the bell. All of the starters were pulled up except Cobwebs and Sally Simmons, a mare afterwards became famous as the dam of Hamburg Belle 2:01¼. They trotted the heat in 2:14½ and after they finished were given five minutes to blow out before taking the word again. That killed Cobwebs' chances of winning while J. M. D. secured the honors in 2:16¼. Three days later Cobwebs was started again in a consolation feature which was attached to the M. & M. that year and won it in 2:14¼ with Sally Simmons second and Cocoon third.

During the balance of the season Cobwebs won his engagements at Cleveland, where he trotted in 2:13½; Buffalo, where he defeated J. M. D., the M. & M. winner, in 2:13¼, and at Providence. He also finished second to Dandy Jim at Rochester, where he won a heat making his record of 2:12, and saved his entrance in the races won by Aler at New York and Aunt Delilah at Poughkeepsie.

Out of ten starts Cobwebs won six, was second in one, fourth in two and was unplaced once. At the close of the season he became the property of Andrew J. Welch. He sold him to Nathan Straus, who retired Cobwebs to the road where in time he became the most noted speedway trotter that was ever hitched to a road wagon.

WHY MURPHY EXCELS

The following appreciative and comprehensive analysis of Thomas W. Murphy is printed in the Philadelphia Record:

"Thousands read about Thomas W. Murphy every day during the racing season. A large number know him by sight, and a lesser number to speak to. To many he seems distant, and an impression that he thinks himself slightly superior to those not so fortunate in life has been created by his intense interest in every detail of an immense business. It is an object lesson to any business man to watch his methods. At his training grounds on the Hudson River Driving Park, Poughkeepsie, N. Y., there are 80 well-bred trotters and pacers. Murphy knows every horse, mare or colt, their breeding, peculiarities, how they are feeling, what weight shoe they have on, and, if not right, what to put on; knows how to treat the men who work for him, in addition to paying liberal wages, and is more interested in his home than he is about Broadway. This may be explained by the fact that every morning after the training season opens finds him at the stables at half-past four, and, allowing a half hour for breakfast and the same time for lunch, the number of miles ridden each day by Murphy would soon kill an ordinary man.

"That he is not an ordinary man is shown in many ways, the most prominent being his ability to get everything out of a horse in a tight finish, rapid-fire thinking apparatus when it is most needed; ability to judge pace and take advantage of every mishap which happens to the other fellow, and his marvelous luck, fortune or whatever it is, that keeps him from serious injury in a profession as dangerous as a soldier's in the trenches. This part is known to the public, but the social side is never paraded, and until you visit the college city on the Hudson and hear the kids holler 'There goes Tommie Murphy,' and see him smile at them and treat them as friends, then you realize why owners of horses that he has trained or driven are willing to pay something extra for the pleasure of doing business and spending a few days with America's premier reinsman."

WAR TAX INFORMATION FOR RACING ASSOCIATIONS AND FAIRS

Every association collecting taxable admissions shall post conspicuously a sign bearing the price charged for admission, the tax due on each, and the total of the admission and tax. This applies to the gate and grand stand, if admission is charged to the latter.

The war tax is one cent for each ten cents or fraction thereof of the amount paid for admission by each person twelve years old or over. Where children under twelve years are charged, the tax is one cent for each admission regardless of the price of the ticket.

The war tax must be paid by the person paying for the admission and must be collected on each ticket.

Bona fide employes and municipal officers on official business are not subject to the tax. Employes include all persons necessary to conduct the meeting or fair, if the latter is subject to tax.

In general, if a person admitted free to a race track attends purely for business reasons, and does not occupy space that might otherwise be sold, no tax is paid. This applies to exhibitors, concessioners, horse owners, drivers, grooms, telegraphers, reporters, etc.

Tickets of stockholders and complimentary tickets of every description are subject to the war tax.

There is no tax on admission on Red Cross days or other war charities if the net proceeds go to same.

The admission of a lady on a gentleman's ticket is not taxable as the one ticket covers both, even though an unaccompanied lady must pay the same admission as a gentleman.

Admissions to all shows at fairs exempt from tax are subject to the war tax unless the shows are operated by the fair.

Agricultural fairs are not subject to tax if none of the profits are distributed to stockholders or members of the association conducting the fair. Fair associations claiming exemption shall prior to the fair file with the Internal Revenue Collector of the district an affidavit similar to the following:

Form 755 U. S. Internal Revenue

Affidavit Claiming Exemption from Collection of Tax on Admissions

State of .....County of.....City of .....ss.
I....., do hereby
(name of person making affidavit)
swear that all the proceeds of admission to the .....conducted on..... will
(name of association) (date)
insure exclusively to an organization exempt by law and regulation, such beneficiary being.....

MATINEE AT WOODLAND, CAL.

Woodland, Cal., May 19.—A Red Cross meeting with four events on the card was held here today. Half-mile heats were raced and the three-heat plan used. The summaries follow:

Woodland, Cal. (half-mile track; three-heat plan), May 19.—2:20 pace; half-mile heats:
Surety, b g by The Bondsman (Gallup)....3 1 1
Carolyn M., b m by Loch Logan (Montgomery) 1 2 3
Sunset, 2-3-2; Lady Silverthorn, 4-4-4.
Time—1:04, 1:03½, 1:03½.

Free-for-all pace; half-mile heats:
Directress Mac, bl m by Nearest McKinney (Schwartz) 1 1 1
Teddy Bear, 2-2-3; O. U. C., 4-3-2; Dixon Boy, 3-4-4.
Time—1:03, 1:02½, 1:02½.

2:15 trot; half-mile heats:
San Felipe, b g by Zombro (Tryon).....1 1 1
Miss Frisco, 2-2-2; Youcalla, 3-3-3; By Pass, 4-dr.
Time—1:05½, 1:06, 1:05¾.

Local trot and pace; two half-mile heats:
Nellie Sunshine (Hogoboom) 1 1
Beautiful Baby, 2-2; Ione, 3-3.
Time—1:13½, 1:15.

In the early eighties John E. Madden was a sprinter. While training for a match he was located at Homer, Ontario. A few Toronto scouts were watching him, while they had also sent to England for a Sheffield handicap winner to trim the big lad from Bethlehem, Pa. When this man arrived he was put to work in a grocery store. Madden's friends saw him occasionally and formed such a poor opinion of him that they conceded a yard when the match was made. The result was never in doubt after the snap of the pistol. That evening Madden tossed his spiked shoes in the Welland canal and went over to the horses. The next morning he purchased a carriage pair for the New York market. Before he shipped an old horse buyer told him to be on the lookout for the curb dealers, who made a practice of getting the price of a good horse or pair and make a sale for about double the amount without investing a cent. In due time Madden and his horses arrived in Twenty-fourth street. One of his first callers was Dexter B. Goff. While Madden only wanted $800 for the team, he asked Goff $2500. Goff then asked if they were fast trotters or high actors. When Madden said they were not, Dexter B. opened both of their mouths and looked long and earnestly down their throats. After he had taken two or three peeps of this kind, Madden finally asked him what he was looking for, and Goff replied: "Well, young man, you tell me that they are neither fast trotters nor high actors so I was just looking to see if they lined with gold."

The Pacific Coast Land and Industrial Exposition will be held in Oakland, California, at the Civic Auditorium, and the park surrounding, beginning September 9th and continuing until October 6th.

The aim of the exposition is to centralize the producing power of the West, where the farmer, manufacturer and consumer may meet for a discussion of means and methods.

Harmon Bell, Federal Food Administrator of Oakland, a capitalist and enthusiastic patriot, is president of the exposition and has as his co-workers on the board of directors George S. Meredith, a well-known banker, vice-president; John P. Maxwell, pioneer hardware merchant, treasurer; J. Cal Ewing, secretary. This body of representative men constitute the permanent board recently named by the board which was appointed temporarily for organization purposes.

"The Pacific Coast Land and Industrial Exposition," declares President Harmon Bell, "is the result of the earnest desires of a body of thoughtful and patriotic citizens to demonstrate the producing power of the Pacific Coast by showing the present production of our lands and the quantity of similar lands that could be brought under cultivation, and it is confidently expected that an enormous increase may be effected in the output of the products of the Pacific Coast. The demands made upon the United States for the successful prosecution of the war put to the test the methods employed by the farmer, the manufacturer, as well as the consumer."

The exposition is fostered by a group of 140 well-known business men and is non personal profit making undertaking.

More than 250,000 square feet will be devoted to the state's and counties' exhibit, 50,000 to manufactures and similar space to tractors and automobile exhibits. The livestock quarters have been planned to house 1500 head at one time, according to the plan; pigeons, rabbits and poultry are to be given the most modern accomodations.

A stadium will be built for sports and stock parades. The exposition is planned along educational and patriotic lines and strict censorship will prevail that the policy may be strictly adhered to.

The chairmen of the verious committees include: D. O. Lively, chairman of the livestock committee; J. B. Miller, chairman of the industrial board, and Arthur H. Breed, chairman of the participation committee.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

FIXTURES

The Interstate Trapshooting Association's Nineteenth Grand American Handicap Tournament, under the auspices of the South Shore Country Club, Chicago, Illinois, August 5, 6, 7, 8 and 9, 1918; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

The Grass Valley Sportsmen's Club will hold its annual dove stew on August 2d. This is in the midst of the dove season. It is a popular event and draws sportsmen from all over that section of the state. It will be marked this year by a patriotic flavor as an auction, the proceeds to go to the Red Cross, will be a feature of the occasion.

H. F. Stover, the well known business man and shotgun enthusiast, has been elected Secretary of the Big Time Gun Club of Sacramento, to succeed F. Edgerford, resigned. Stover has all the qualifications and will prove a popular official.

An idea of pheasant shooting in Yakima county, Washington, may be gotten from the fact that 50,000 Chinese pheasants were shot in that county in fourteen days' open season last October.

Liberty bonds and thrift stamps will be popular prizes in nearly all of the trapshooting tournaments this year.

F. V. Smith of Elverta, Sacramento county, was arrested by R. L. Sinke, Deputy Game Warden, and was fined $25 for catching striped bass without a license. He was fishing at the mouth of the Sacramento slough in Sutter county. Sinke reports that there is every evidence that this will be a good quail season in Sacramento county. He says that there are an unusual number of birds in every section.

Harry Lorenson afforded a sensation at the California-Nevada trapshoot and is now high amateur in the United States, having passed Ford with an average of 97.6 per cent out of 1800 targets in registered shoots up to that event. He is an enthusiastic duck hunter and believes in shooting the same gun in all classes of shooting and kills his ducks with the gun that he uses at the traps. As a trapshooter his progress has been constant and he gives the credit to using the same gun at all times. Lorenson won the Pacific Coast record for a straight run at the recent Vernon shoot with 345 without missing. He made a world's amateur record at the same shoot by breaking 594 out of 600, and is now high amateur for this season's shooting and his mark is only one-tenth of one per cent behind the best record ever made in the world by an amateur trapshooter.

The American Fisheries Society will offer three prizes of $100 each to be awarded at its annual meeting in New York City on Sept. 9th, 10th, and 11th. First prize for the best contribution on fish culture, new and improved practical fish cultural appliances, and descriptive methods employed in the advancement of fish culture work. Second, for the best contribution on biological investigations applying to fish culture problems. Third, for the best contribution dealing with the problem of the commercial fisheries. Any person who is a member of the society on Sept. 1st, 1918, may compete for the prizes. Competitors should apply to John W. Tipton, Recording Secretary, Albany, N. Y., before that date for further particulars, and notify Mr. Tipton which prize he intends to try for.

Jim Maynard, who is fishing on the Truckee near Boca, reports excellent fishing in that locality, and word comes down from Jim Dean and Bert Foster that the fishing is good on the Feather River near Blairsden.

W. D. Cullen, who was operated on recently for appendicitis, is now at the Hahnemann Hospital coming along nicely. Mr. Cullen is well known in local duck hunting circles.

Anglers who have been fishing along the Klamath recently report catching fish with round holes in their sides near the gills and are at a loss to understand what causes these perforations. Some claim that it is the work of eels and others hold that some kind of water insect has been making the holes. Trout have been found with sores on them as large as a quarter of a dollar.

Seventeen old-timers—chaps who have been shooting over the traps for fifteen years or more—took part in the Old-Timers' shoot staged by the Golden Gate Gun Club June 16, on the Alameda grounds. And in spite of adverse weather conditions they have no reason to feel ashamed of their scores.

Andy Flickinger, Len Hawxhurst and Jack Nelson were the old-timers, all three with a score of 48 out of 50. The high shot of the day was F. W. Blum, professional, who missed one out of his 50 bluerocks.

Tony Prior won a leg on the Thorning long run trophy, while J. B. Brady won the club trophy, which was a handicap event, wtih a score of 24 out of 25.

W. A. Joslyn, Clarence Haight and others of the Du Pont Company were absent, being in the East attending a conference of their sale forces.

Dr. J. Auburn Wiborn captured the only sea bass taken during the winter tournament season of the Tuna Club at Avalon, Catalina Islands. It weighed 37½ pounds. This is the second season Dr. Wiborn has won the honor.

The trout planted at Cuyamaca Lake, San Diego county, by the Fish and Game Commission in 1915 and which have been added to in the last two years, have produced a big crop. On the opening of the season in May two limits were taken. One bag contained a 6½ pound rainbow trout which was 22 inches long and 7 inches wide and took 25 minutes to land. Other trout taken have been steelhead, weighing from 1½ to 6 pounds, and good catches are the order of the day. Due to the effective work of the State hatcheries, backed up by the efforts of the anglers, every county in the State of California can now boast of trout fishing.

At the Old Timers' trapshooting tournament at Los Angeles the fact was brought out that Frank H. Teeple, Sr., and "Pop" A. W. Bruner tied for having been longest at the traps, each one having been at the game for forty-six years. M. E. Taber was the next oldest shooter with forty years to his credit.

For the benefit of gun clubs holding registered tournaments and other interested parties, the Interstate Trapshooting Association's booklet containing the annual review of 1917 averages will be sent to anyone sending his address to the Interstate Association, Pittsburgh, Pa.

It is estimated that over 100,000 trapshooters are now in the service of the country and many clubs have been almost put out of business through loss of its members going to the front, but the "learn to shoot" program is bringing in many new devotees of the sport that will fill the places of those who have gone away and add to the ranks when they come back.

The Interstate Trapshooting Association is each month compiling the averages of the trapshooters who engage in registered target competition. This is the first year these averages have been issued monthly. These figures show what the trapshooters are doing and how they are progressing from month to month, and will be sent by applying to the Interstate Trapshooting Association, Pittsburg, Pa.

More than five million men and women took out hunting licenses in 1917—real evidence that there are more people interested in shooting than in any other sport.

It is reported that the doves are thick in the San Joaquin Valley and that when the season opens on August 1st the dove shooting will be unusually good.

One hundred and thirty thousand rainbow, steelhead, and eastern brook trout fry were planted in the streams in San Benito County, and 100,000 rainbow in Monterey County waters.

It is reported that the Hercules Gun Club will hold its regular monthly trapshoot at Pinole, Contra Costa County, on July 7th.

O. N. Ford of San Jose has broken an average of 99 per cent of the targets shot at in three shoots, representing five state championships. In the California-Nevada he broke 99 out of 100, in the South Dakota State event at Sioux Falls he broke 100 straight, and in the Colorado-New Mexico State event he broke 98 out of 100, and has fired 500 shots since he left here, with an average of a fraction under 99 per cent, breaking 492 targets out of 500, and has regained his lead over the nation's amateurs by a wide margin, making straight runs of 96, 56, 62, and 187.

THE LIFE OF A GUN

A question that comes to us very frequently is: "How long will my shotgun last?" or "How many shots can I fire from my rifle or revolver before it wears out?"

The shotgun, rifle or revolver that is actually worn out from shooting is a very rare specimen. In fact, we don't remember ever having seen one that outlived its usefulness simply because of the number of shots that have been fired through it.

There are two factors, either or both of which are to blame, when a firearm begins to show signs of premature old age, and, figuratively speaking, shoots with a bad limp.

Some people say it is possible to wear a barrel out by cleaning it too much, and it is probably true under certain conditions. If you clean consistently from the muzzle with a rusty and dirty cleaning rod and you are not careful to keep your outfit free from grit, undoubtedly damage will sooner or later be done to the barrel.

It is impossible for anyone to say just how long a firearm will last because it is impossible to tell beforehand what kind of care it is going to get, and the care it receives makes all the difference between inaccuracy between a few hundred shots and a life-time of faithful service.

A hunter once told us that in his section of the country they did not use a high-power rifle for more than five hundred shots because, he said, you couldn't hit anything with one after that number of shots. We would be willing to bet that that hunter and his friends did not know even the first principle of barrel cleaning, for a high-power rifle is accurate enough for hunting purposes for several thousand shots if it is given proper care.

It is interesting to compare the length of life of the various types of firearms, assuming, of course, that they have cleaned carefully and consistently.

A good shotgun will show practically no falling off in pattern or penetration for probably well over a hundred thousand shots. A .22-calibre rifle and a revolver are both good for thirty or forty thousand shots. A high-power rifle is good for about three thousand to five thousand shots, usually the higher the velocity the shorter the life of the barrel.

Judging from the above facts, it would appear that the higher the pressure developed by the explosion the more wear on the barrel, for the shotgun develops the least pressure and the high-power rifle the most.

A rather interesting side light on this question of barrel life is a determination of the actual length of time to which a good shotgun barrel is subjected to the force and burning effect of the powder charge during its lifetime. If a hundred thousand shots are fired from a shotgun the inside of the barrel is actually exposed to the flame of the powder charge for about four minutes.

AN ARMY OF UNCEASING WORKERS

"There are no more industrious or more valuable laborers in the garden than the birds," says Prof. P. G. Holden, one of America's most experienced agriculturists.

"From daybreak until nightfall they work for the gardener, unceasing, quietly, persistently. They destroy millions of caterpillars, grubs, borers, beetles—insects that are destructive to field crops, fruit, foliage, vegetables and flowers.

"In many instances birds have saved entire crops of grain or of fruit from destruction. A single bird often eats more than 100 insects at a single meal, and sometimes consumes several thousand small insects a day. The unpopular blue jay is fond of hairy caterpillars, and the despised crow devours large numbers of June beetles and white grubs."

A bird in the garden is a valuable assistant. If you must have a cat prowling around the yard, put a bell on her so that no bird will be pounced upon and killed. Train the dog to let birds alone. Also train the little boy not to bother birds. A few crumbs left over at meals may be scattered upon the ground or on a shelf for the birds. Stand a pan of fresh water out for them every morning. The more birds you can coax to board with you during the summer the fewer insects you will have destroying your garden crops.

Encourage your little boy to build bird houses for the feathered garden helpers. That will keep them on your place.

FACTS ABOUT RABBIT MEAT

Suggestions by the Food Administration that hare and rabbit are suitable substitutes for the meats needed for export have added to the general interest in these little animals. Rabbits and hares vary considerably in the quality of meat, depending largely on breed and age.

Of those raised primarily for meat, such as the Belgian, New Zealand, Flemish and similar varieties, the young animals are most prized. The meat is of good flavor, practically all lean, and is prepared in much the same manner as chicken. In Europe rabbits and hares are staple foods and are raised in well developed rabbitries. Under conditions in the United States, production of this class of meat for food is believed to be most practical on a small scale, chiefly for home or local consumption.

DOWN THE LINE WITH THE OLD TIMERS

At hundreds of gun clubs all over the country "Old Timers' Day" is proving to be one of the most enjoyable occasions of the spring season. The stories and reminiscences of live bird shooting and glass ball shooting that these old timers bring with them are worth going miles to listen to. It's as good as attending a reunion of G. A. R. veterans.

Who is the oldest trapshooter in the country remains a disputed question. Several clubs reported that one of their members had been shooting for 100 years—but, of course, they were speaking figuratively. Probably they have been shooting longer than the younger members can remember.

M. D. Towne is past 87 years of age, but still attends the Los Angeles Gun Club every Saturday afternoon. He shoots a 16 gauge Parker. His long run last year was 37 straight, and he finished the string with a score of 46 x 50.

S. D. Fowler of Wolcott, N. Y., is 84 years old and during the past 40 years has been shooting over the traps at live birds, glass balls and clay pigeons. He shoots and reads without the aid of glasses.

A. A. Mayers, a prominent druggist of Madison, Wis., is past 70 years old and began trapshooting in 1884. That he can still set a pace too fast for most of the younger boys was demonstrated in the Old Timers' Shoot at the Madison Gun Club the other day when he broke 48 targets out of 50 and carried off the gold trophy. Shooting with absolute confidence and in steady time he simply pulverized the targets regardless of the fact that a strong southwest wind made them very erratic. Mr. Mayers says there is nothing drives away business cares and worries as quickly as trapshooting.

John T. Glover of Milwaukee started trapshooting in the eighties. Before blue rocks were known he and some other men in Chicago devised a trap for throwing glass balls and used that for one season. In 1888 they formed the Auburn Park Gun Club. Of the members of this club Mr. Glover thinks he and W. R. Morgan, now of Moline, Ill., are the only survivors. In 1890 the Auburn Park and Morgan Park Gun Clubs united to form the Eureka Gun Club, which was in existence for many years until it was consolidated with the present Chicago Gun Club. The roster of the old Eureka Gun Club included well known shooters like Tom Marshall, Charles Willard, F. P. Stannard, Rollo Heikes, A. J. Atwater and many others.

F. B. Garden of Wheeling, W. Va., recalls the time when they used to shoot glass balls filled with feathers thrown from a hand-made trap. Last fall he and Mr. McCullogh were quail shooting for a week and judging by the number of "hits" scored they were able to equal their record of twenty years ago. Nothing like shooting to keep a man young.

Dr. D. A. Allen, President of the West Toledo Gun Club, commenced 36 years ago to shoot glass balls from a trap. He has in his possession some glass balls that were picked up at a match between Capt. Bogardus and Mr. Hicks at Indianapolis in June, 1877. On these is stamped "Bogardus Glass Ball, Pat'd April 10, 1877". Dr. Allen attributes his excellent health today largely to his shooting and fishing habits. He has been shooting a long time but his registered average of over 91 per cent last year is evidence that he isn't shot out yet by any means.

James Montgomery of Syracuse says:

"I had in my coops in East Syracuse at one time 26,000 wild pigeons for trapshooting. That was in 1876, when 150 shooters from all over the country—Maine to California—gathered at the Nichols farm range to shoot at the wild pigeons—twenty-one yards' rise on single birds and eighteen yards on doubles, eighty yards boundary. There was a grandstand, lunch and everything that goes to make it pleasant for the shooters.

"In those days the man that had a breech-loading gun was a dandy. The loading tables were there to accommodate the men with the old-time muzzle loaders. Those were in the majority and they got there, just the same. It would take a long time to tell the changes that have taken place since."

These Old Timers are real, dyed-in-the-wool sportsmen and it is only fitting that every gun club should set aside one day for an Old Timers' Shoot. There is still time to make application for trophies if you write promptly to the Sporting Powder Division of the DuPont Company.

PROTECT THE BEAR

Isn't it about time that a movement was started to give adequate protection to the black bear?

The following States permit it to be killed 365 days in the year: Alabama, Arizona, Colorado, Florida, Georgia, Idaho, Maine, Nevada, New Mexico, New York, Oregon, Utah and Vermont.

Other States that have long open seasons include Washington, 242 days; Minnesota, 138 days; Mississippi and California, 120 days; Louisiana, 92 days.

Pennsylvania, with 62 days; Arkansas, with 61 days, and Wisconsin, with 21 days, seem to be the only States that think the black bear is worth preserving.

Bears have been added to the protected list in California, Minnesota, Montana, Washington and Wisconsin.

WORLD'S BEST SHOT JOINS THE ARMY

Captain Lee has been assigned to the Small Arms Firing School at Camp Perry, Ohio. At this school soldiers are to be instructed in the use of small firing arms. One of the instructors will be Captain Lee.

Lee differs from many champions, in the fact that he is a capable instructor. That he knows something about firearms is proven by his title, "the champion all-round shot of the world." This is no empty title. The world is a mighty big place—and there are many, many excellent shooters with every kind of a firearm—so when this young man of 30 years tacks on the championship title following his name it is proof positive that he has something on all the rest of us.

Wherever firearms are handled they know of "Tackhole" Lee. Maybe you would be interested in knowing how he came to be known as "Tackhole." Brush up your memory and go back to the days you went out in the fields to shoot and fastened the target to the barn, or to a tree, with a tack in the center of the bullseye. The fellow who could hit the head of the tack was regarded as "some shooter." The head of the tack was too big a mark for Lee. He could hit the hole the point of the tack made and therefore he became known as "Tackhole" Lee.

Lee would be a pretty good man to turn loose in quest of the Kaiser. He invariably bags what he goes after and if he could get within sight of the Kaiser it wouldn't take long to end this war and make the world free for all peoples and put an end to German domination. If we were commanding the United States army we would like to have a lot of fellows in our front line who could shoot with the same accuracy as Lee. Generals would be more or less excess baggage—the same as managers are to high-class baseball teams.

Lee is such a good shot with the rifle, revolver, pistol and shotgun that we do not feel like delving into his records for fear that you think we are trying to put something across that isn't just so. While he has been shooting since he was 12 years of age, Lee did not go into official competition until 1912 and the following year and every year since, excepting 1916, when he didn't compete, he has won the rifle championship of the United States. In 1914-15 and 18 he scored 2000 out of a possible 2000 and in 1913 and 1917 he scored 1999 out of 2000—for a total of 9998 out of a possible 10,000 in five years. This will just give you a faint idea of how closely he gets to the bullseye.

He won the Martin invitation rifle match in 1914—with three of the best small bore men in the world competing—with the score of 999 out of 1000 possible. This was with 100 shooters. In the International rifle match in 1914, with 50 picked men from England, Canada, Australia and the United States competing. Lee scored the possible 500. These and many other notable performances are credited to Lee with the rifle.

He is just as proficient a shot with other arms. He is the present revolver and pistol champion of the United States—with 482 out of a possible 500 with the pistol—a world's record, and 477 out of a possible 500 with the revolver.

A year ago some friends persuaded Lee to take up the shotgun and see what he could do at the traps. He did. He never handled a shotgun until the spring of 1917 and after shooting less than 800 shells Lee entered the Alabama State championship trapshooting tournament—for as we failed to tell you before, Lee lives in Birmingham—and was runner up. He won the Sweepstakes with 147 out of 150 and in the championship race on the same day broke 98 in 100, tieing for second and winning on the shootoff with 20 straight. In other words, he broke 265 targets out of 270 in his first competition—and in the rain at that.

Therefore, you will believe us when we tell you he is just about the slickest thing with firearms in all this world—and a creditable acquisition to the United States Army.

RECORDS FOR PARKER GUNS

Double and single barrel Parkers made an excellent showing at the tournament recently held in San Jose and Los Angeles, winning many of the most important double and handicap events. Although only a short time in use, the single barrel Parker is forging its way to the front and will soon be "neck and neck" with its world-renowned predecessor, the "Old Reliable" Parker double gun, proclaimed winner on so many hard fought fields.

TEACHING THE YOUNG IDEA HOW TO SHOOT

A keen-eyed mountaineer led his gawky, long-legged son into the country school-house and announced to the teacher:

"This here boy is arter larnin'. What's your bill o' fare?"

"Our curriculum, sir," corrected the schoolmaster, "embraces geography, arithmetic, trigonometry."

"That'll do," interrupted the father, "that'll do. Load him up well with trigger-nometry. He's the only poor shot in the family."

THE HUNTER A GOOD CITIZEN

The presence of game is an incentive to outdoor exercise that means better health, and, therefore, better citizenship for many. The man who hunts acquires a knowledge of the territory covered, of the flora, of the fauna, of the waters, of the minerals, of the general topography and of the people, that can be acquired to the same extent in no other way.

We further believe that the ability of the hunter to traverse the woods, the fields, or the waters either by day or by night, to camp and to shoot straight, make him with limited discipline and drill the equal of any regular on the face of the earth!

Furthermore, not only does the quantity of game taken constitute a very considerable portion of the meat supply in various homes, but the value of the lifework of birds protected continuously is an aid to the farmer and the fruit grower that makes the profitable growing of his crops possible.

In Pennsylvania every cent used for the protection of game and wild birds, for the payment of bounties, for the purchase and releasing of game for propagating purposes, for the creation of game sanctuaries, for the feeding of game during the winter-time, as well as for all other needs of the game commission, comes from sportsmen through the resident hunters' license.

Even the farmer, who derives the most benefit from the work of birds, does not contribute one cent to their benefit unless he goes hunting on lands other than the lands he resides upon and cultivates or lands adjacent, for our law permits a farmer and his family to hunt on these lands without a license.

We know what sportsmen are doing, and in turn we are striving to do all in our power to benefit these men through the increase of game to be killed. Just how we can best secure that increase is the question.

ANNIE OAKLEY SHOWING SOLDIERS HOW TO SHOOT

Our boys in khaki in the Eastern cantonments are being treated to exhibitions of shooting in its many forms by Annie Oakley (Mrs. Frank E. Butler), one of the greatest shots of all time.

Miss Oakley is touring the cantonments at her own expense, spending a day or two in each cantonment shooting the rifle, revolver and shotgun for the benefit of the soldiers, and then giving instruction to any or all who desire same.

The performance of the former star of the Buffalo Bill show at the Ambulance Camp, in Allentown, Pa., was witnessed by Governor Brumbaugh, of Pennsylvania. It is doubtful if there is a better shot living today than Miss Oakley, and her visit to the cantonments should do a world of good.

Miss Oakley has retired from active participation in shooting, spending the winter seasons at Pinehurst and the summer seasons at Portsmouth, N. H.

FOOD VALUE OF FISH

A scientist of the Bureau of Fisheries, H. F. Taylor, gives some simple facts about the food value of fish in the Butchers' Advocate. Pound for pound, he says, there is nearly, if not quite, as much protein in fish meat as in beefsteak, and fish could be substituted for all other kinds of meat every day in the year without ill effects. Oily fish, like shad, are especially nutritious, affording a large quantity of fat as well as protein. Fish roe contains more protein than beef, with some fat. Fish meat is quite as easily digested as other meat and is a suitable form of protein for sedentary workers. Practically every fish taken from pure water is fit to eat, the only objection to some varieties being toughness and coarse texture, which can be remedied by proper cooking. Sharks, for instance, furnish an abundance of wholesome meat of good flavor—and there is nothing against them except that they are sharks.

CRATER LAKE IN WINTER

Crater Lake in summer is a dream in soft, glowing, ever-changing colors, accented by a depth of foreground indigo, as one looks down from the bluff, which almost surpasses belief. Its keynote is romantic unreality.

Crater Lake in winter is no longer a dream in colors, but it is no less romantic, no less unreal. The winter snowfall is extremely heavy, as it is throughout the Cascade Range, for above the spot where Crater Lake now lies once reared perhaps the greatest volcano of the Cascades. The snow heaps high upon the volcanic rim, covers thickly the steep slopes, clinging even to precipitous bluffs, and turns every tree and shrub into a thick plume of feathery white. The only color is the blue of the sky above and its reflection in the mirror below. In its way it is quite as amazing and unbelievable a picture as Crater's dreamy summer aspect.

This superb winter spectacle is well worth the long trip by sleigh and ski from Medford, but so far few have made it for the joy of the making. Two of the officials of the Crater Lake National Park who were there in February needed ten days for the round trip.

BEAR MAY BECOME EXTINCT

Only eight States protect the bear, bruin being without benefit of the statutes in the other States where it makes its abode.

These eight States are Arkansas, California, Louisiana, Minnesota, Mississippi, Pennsylvania, Washington and Wisconsin. Only one Canadian province aids the bear with a closed season—Quebec. That closed season is fifty days in mid-summer.

Oklahoma has no open season for bear in the counties of Blaine, Caddo, Comanche, Kiowa and Major, but in the rest of the State the animal is unprotected.

Conservationists are bringing to the attention of game commissions, legislators and governors that the lack of protection given to the bear family means that unless protective measures are forthcoming the bear is doomed to follow the disappearing footsteps of the bison, moose and caribou.

Even the States that do protect the black bear, by having an open season and closed season, conservationists point out, really afford little protection to the animal because shooting is permitted for such a long time.

The open time in the eight States that afford protection follows: Arkansas, two months; California, four months; Louisiana, three months; Minnesota, four and one-half months; Mississippi, three and one-half months; Pennsylvania, two months; Washington, seven months, and Wisconsin, three-quarters of one month.

While the Federal Government has asked that deer hunters who take big game see to it that a pound of game flesh saves a pound of beef, the diversity of the black bear makes an estimate of the utilization of that most elusive animal impossible.

PROPER CARE SHOULD BE TAKEN OF THE IDLE GUN

Guns must have attention occasionally throughout the entire year. Of course, your gun gets a good cleaning every time it is used, but this won't do for gun preservation for all time.

Get some one of the gun oils or grease and with a soft wiper coat the inside of the barrel well, then dope the outside likewise with an oiled rag and put the barrels in the case without finger marks in the grease, if possible, for salt perspiration is a hungry eater of steel.

The stock may be examined for scratches and these repaired. The firing mechanism should be well oiled and the whole put away like the barrels, without finger marks.

But don't imagine this is going to be enough care for ten months or six months or one month even, or you are likely to find a sadly disfigured shooting iron when next you look at it. Heat will run the grease off from some part or other; dampness seems to have a way of penetrating the thickest oil, and if these things happen, rust is bound to make blots on a finely finished surface. Spend an evening every other week looking over the guns.

It will not come amiss to practice at quickly covering some spot in the wallpaper design, and to try doubles in a similar manner for the sake of your shooting muscles. You need not grin at this, for its is surely as profitable a bit of play as the boxer's toying with the punching bag or the oarsman's pulling at the gymnasium machine, and when the time comes for you to shoot you will not have to worry about the birds getting away.

PATRIOTIC PRIZES FOR THE BIG HANDICAP

Liberty bonds and War Savings stamps certificates will be generously given in lieu of cash prizes in all of the events that comprise the 19th Grand American Trapshooting Handicap Tournament, which will be conducted over the traps of the South Shore Country Club, Chicago, Ill., August 5, 6, 7, 8 and 9.

Just what division of the purse will be turned into Liberty bonds and War Savings stamps will not be known for a couple of weeks. The idea is being worked out by Elmer E. Shaner, manager of the Interstate Trapshooting Association, and as soon as he whips the figures into shape they will be given to the press and public.

In the neighborhood of $15,000 is awarded to the trapshooters in this, the greatest of all American sporting events. It is possible that two-thirds of that sum will be expended for the purchase of Liberty bonds and War Savings stamps.

This idea of Liberty bonds and War Savings stamps as prizes works for the benefit of the trapshooters and the Government. The shooter gets a bond and can cut coupons for a few years, while the Government gets the money in its time of need.

This feature should add greatly to the importance of the Grand American Trapshooting Tournament. No sporting fraternity has been more liberal in giving to the Government than trapshooters. They have donated ambulances to the Red Cross, and these ambulances are now doing service in France. More than 100,000 trapshooters are enrolled in Uncle Sam's All American Team; every gun club has thrown open its doors to foster the "learn to shoot" idea, and in every important trapshooting tournament this year, and in many of the smaller ones, too, Liberty bonds and War Savings stamps are the only prizes.

SOUSA'S 2000 ACRE PRESERVE

Lieutenant John Philip Sousa, U. S. N., the greatest of all bandmasters, and now the conductor of the Great Lakes Naval Station Band of more than 700 pieces, is an ardent field and trap shot.

Sousa is the happy possessor of a 2000-acre preserve in North Carolina and says: "I find the recreation I get afield most enjoyable and conducive to good health. When out with my gun I completely relax, mentally and physically. There is always sufficient excitement and anticipation connected with field shooting to cause me to forget all business cares and enjoy life. It gives me an opportunity to commune with Nature in its different phases. The study of game and habits of same is a most interesting feature of outdoor life.

"Last, but not least, comes the 'punter,' the darkey who knows the swamps, the trails and the most likely places to find game. He is the type that amuses and disgusts, entertains, then finally wins one's admiration for his simplicity if nothing more. He is agreeable at all times, never venturing an opinion that would in any way conflict with an idea you might advance.

"This is in every way descriptive of my punter 'Mose.' We were coming from a duck hunt, headed for my lodge. The water was high and we were in a big ditch with a ridge on either side. 'Mose' made a discovery. There was a marsh rabbit hiding under a small log on the bank. After some difficulty I located the rabbit and immediately started him for rabbit heaven, much to the gratification of 'Mose,' who knew he would fall heir to the rabbit. As a matter of fact, if there is anything a darkey loves on earth outside of 'possum,' it is marsh rabbit (cross between a jack rabbit and a cotton tail).

"Before reaching the lodge I killed several rabbits, and after each death 'Mose' had a paroxysm over my excellent shooting. Just before we arrived home, I saw a brace of blue-wing teel coming down wind. They certainly were making time. Just before reaching the boat they divided, one to the right and the other to the left. I shot first right, and then left, for as fine a double as I had ever made in my life. Freighted with satisfaction, I turned to 'Mose.' Finally I suggested that I had made a nice double. 'Yes, sah, but that shot you made on the rabbit was the greatest piece of shooting I ever saw.' 'Mose' never could be interested in anything but my rabbit work."

IMPORTANCE OF PROPER POSITION IN SHOOTING

Individual peculiarities have a lot to do with the position a man assumes preparatory to firing a shotgun, rifle or revolver.

Any one who has stood back of a line of men shooting at the traps must certainly have been impressed with the often ludicrous positions some shooters strive to get into before they call "pull."

Because individuals vary so much it is very hard to lay down hard and fast rules for the proper position with any particular type of firearm.

Yet one can always tell the beginner by the awkwardness of his position and also by the fact that he keeps changing from shot to shot.

Making due allowance for the build of the shooter, the position for trapshooting should be one that can be assumed quickly and with precision.

A heavy built man with considerable muscles about the shoulder usually places the butt of the gun directly against the shoulder. A thin man, however, will often find that he will suffer less punishment if he holds the butt of the gun farther in on the pad of muscles which become tense when the gun is held firmly.

The cheek should rest against the comb of the stock and the left arm should be extended comfortably well forward on the barrel.

The best trapshooters hold the position of the gun and head rigidly and make a swing by turning the whole body from the waist up.

In revolver shooting the shooter should stand with his weight resting evenly on both feet and the arm extended full length toward the target. Many shooters adopt a position with body sidewise toward the target, but it is a much more comfortable and easy position to stand partly facing the target.

TRAPSHOOTING BY-PRODUCTS

Many trapshooting clubs are deriving a steady income from the sale of waste metal. The brass from a barrel of empty shells should bring anywhere from two to five dollars, depending upon the local market. Inasmuch as it is just as easy to save the empties as it is to throw them away, this is an item worth taking into consideration.

Large clubs where much shooting is done are even "mining" their grounds for spent shot every few years, and in some cases a yield of over twenty tons has resulted. Figuring one and a quarter ounces to the load, this means a total of 512,000 shells emptied, or an annual record of 1,707 shots for each man of a club numbering 100 members shooting for a period of three years.

The recovery of the shot is not expensive and with scrap lead bringing 6½ cents a pound in today's market, it is distinctly worth while.

GET A LICENSE BEFORE YOU USE EXPLOSIVES

Uncle Sam has passed a law requiring all users of, and dealers in, explosives to take out a Government license. The object of the law is to keep dangerous explosives out of the hands of plotters and alien enemies of the country.

Before a dealer can sell any explosives, he must have a license, and before a customer can purchase any explosive either from a dealer or a manufacturer, he must have a license. Before a customer can secure delivery from a railroad company of any explosives shipped to him, he must show the railroad agent his license.

This license matter is, however, a very simple proposition. It need not deter any one from buying or using explosives if their motives are honest. The license costs only twenty-five cents and can readily be obtained from licensing agents located in every State and and every county. As a general thing, county clerks are the proper persons from whom licenses can be secured. In order to save time, it will be well for any person desiring to purchase explosives to obtain his license before going to the dealer to place an order. If he intends ordering direct from a manufacturer, he must necessarily have his license before ordering because a certified copy of the license which will be furnished by the licensing agent must accompany his order.

HEER WINS BIG MATCH

W. H. Heer, Guthrie, Okla., won the intersectional trapshooting championship and a purse of $4,000 in Liberty Bonds from Frank Troeh, Vancouver, Wash., at Seattle, finishing the three days' shoot June 24th with a score of 472 to 469 At the end of the second day the two shooters were even up, but the Oklahoma man took the lead on the last two hundred targets, breaking three more than his competitor.

BEASTS AND BIRDS THAT "WERE"

There are men still alive who have shot not dozens but hundreds of passenger pigeons in a single day. Sixty years ago this bird was far more common in the United States than wild ducks are today, says the New York Press.

When it migrated the flights darkened the sky. A single flight has been estimated to number over 2,000,000 of birds.

A few weeks ago the last passenger pigeon died in Cincinnati at the age of twenty-seven years. A passenger pigeon is quite a different looking bird from any other kind of pigeon. It has a long tail and is, in all nearly three-quarters of a yard long. It is so called because of its migratory habits, it being a bird of passage. For the past fifteen years there has been a standing reward of $1,000 for a mate for this last survival of her race. This was several times its weight in gold, yet the offer produced no response. The passenger pigeon is absolutely extinct, and one of the most beautiful and useful of birds have been wiped out, as it were, under our very eyes.

When we talk of extinct animals, we usually think of creatures like the mammoth or mastodon, which died out thousands upon thousands of years ago. We seldom realize that there are whole species which have vanished quite lately, and many which are at present just trembling in the balance. The last great auk, for instance, was killed no longer ago than 1844 by a seal hunter on Eldey, a skerry or rock island off the Icelandic coast, and it is little more than a century ago, namely, in 1812, that the last of the British great auks vanished from Papa Westray in the Hebrides.

Another inhabitant of the northern seas which disappeared quite recently was Stelier's sea cow. When Behring's expedition was caught in the ice near the straits which bear his name his crew lived mainly on the flesh of this huge and stupid Arctic animal. It was larger than an elephant, full-grown specimens being as much as twenty-five feet long, and weighing five or six tons apiece. It had no teeth at all, their place being taken by great horny plates.

The very last of these harmless monsters is said to have been killed by a Russian sealer in the summer of 1848.

"Extinct as the dodo," has become a saying. As most of us are aware, the dodo was a large wingless bird, which lived in great numbers in the Island of Mauritius. As it was good to eat and had no means of defense or flight, it was soon exterminated. Today even a perfect skeleton would be priceless.

The South African quagga is quite gone. As recently as 1839 vast herds roamed in Cape Colony. The last living specimen recorded was seen in Portuguese territory either twenty-seven or twenty-eight years ago. The animal seen in zoos which is usually called a quagga is really the Burchell zebra, a very different creature.

Quite lately there died in the National Zoological Collection at Washington an animal known as the zebra wolf, which was originally captured in Australia and had been in the collection since 1902. It was a marsupial or pouched animal and had curious zebra-like stripes across its back. Whether this was the first or last of its race no one seems to know. At any rate, it had no duplicate anywhere else.

ST. CLAIR, THE FORTY-NINER

By W. H. Gocher

In 1849, when the call of the gold turned the world's mind towards California and lured thousands from their Eastern homes across the isthmus or over the plains on horseback or under the canvas of a prairie schooner, St. Clair, the subject of this sketch, was six years old and eating his fodder in a stable near Springfield, Ill. He was a dark brown horse with the usual tan markings, about fifteen and a half hands high, and weighed a trifle over a thousand pounds in fair condition.

When the gold fever rolled along the banks of the Sangamon River, the breeder of St. Clair gave the horse to one of his sons, before he moved away toward the setting sun to seek his fortune in the Sacramento Valley. From that day all trace of the horse was lost, while even the name of his breeder as well as the name of the man who drove him in the lead of an ox-team into the town now known as Placerville, Cal., in the fall of 1849, is unknown. The only link connecting the gallant pacer that founded a little racing family in the gold country with the prairies of Illinois is an old man's repetition of a conversation on a street in Sacramento in 1853, when Peter Roberts, who at that time owned St. Clair and was working him in a dray, was stopped by a stranger, who said he brought the horse to California. Roberts made a memorandum of what the stranger said in regard to the history and the breeding of St. Clair, but it was burned before anyone interested in the light harness horse made an inquiry in regard to it. This made St. Clair an unknown quantity in his little world, which was limited to Sacramento and that vicinity until he was in 1864, like his pedigree, destroyed by fire.

The above is all that will ever be known of the early career of St. Clair, a name that was also tacked on to him late in life by a pedigree maker, who, after favoring him with an inheritance resplendent with Morgan and Canadian pacing blood, also fixed the place of his birth as St. Clair, Mich. His opportunities in the stud were also limited, as in his day the only horses in the Sacramento Valley were either native stock of Spanish descent or whatever the "forty-niners" brought with them. Still from that source, when the final roll call was made, St. Clair was credited in the matter of racing speed with the clever performer Lady St. Clair, a pacer that won at five miles to wagon in 12:54¼ in 1874 and retired with a record of 2:20; Ben Butler 2:19¼, Jim McCue 2:30, as well as the trotters Mayfly 2:30¼ and Mayflower 2:30½.

In the seventies, when Leland Stanford placed Electioneer at the head of Palo Alto, he also purchased the St. Clair mares Melinche, Mayfly and Mayflower. They were mated with Electioneer and each of them produced champion trotters. Fred Crocker was Electioneer's first 2:30 trotter. He was out of Melinche and in 1880 placed the world's record for two-year-olds at 2:25¼. The following year Mayflower contributed another two-year-old champion when Wildflower trotted in 2:21. In 1883 the Mayfly filly Bonita reduced the four-year-old record to 2:18¼, while three years later Manzanita, a sister to Wildflower, cut it to 2:16. These were the colt trotters that made Palo Alto famous, while they also paved the way for Sunol, Palo Alto, Arion and the other record breakers which made their birthplace the greatest nursery of trotters in the world.

Before he started breeding trotters, Governor Stanford also owned and developed California's first champion, the brown gelding Occident. He was by Doc, a son of St. Clair. In 1873 he equalled the world's trotting record of 2:16¾, which was then held by Goldsmith Maid. His record was also the fastest made by a descendant of St. Clair in the male line, while in the maternal line the pacer Yolo Maid carried the limit down to 2:12. She was a handsome brown mare with two-minute speed for a brush. Marcus Daley sent her East in 1891 to defeat Hal Pointer and failed.

Yolo Maid's dam was by Dietz's St. Clair, a horse that also sired the dams of Mabel H. 2:20 and General Logan 2:23¼. With them the St. Clair family passed into the shadow. Like a pocket, it gave all of its golden speed quickly, the finest nuggets being treasured at Palo Alto, where the descendants of the Sacramento dray horse found a place among the seats of the mighty.

ABDERHALDEN PREGNANCY TEST

The Breeder is in receipt of the following article by Prof. W. S. Anderson of the University of Kentucky, which will be found of especial interest to owners of broodmares:

There are frequent inquiries concerning the methods of determining the condition of broodmares during the fall and winter months with respect to whether they are in foal or not. It would be a great satisfaction to a breeder to know the true condition of his mare. Breeders who patronize futurities would be directly benefited were some method found by which an actual forecast could be made.

Girth and loin measurements at short intervals have been taken, but no accurate forecast can be made from the measurements. So-called experts on broodmares are often consulted. Their decisions, as a rule, are but little more than guesses.

Abderhalden announced some years ago a blood test for pregnancy for which he claimed infallibility. This test consists of taking a sample of blood from the mare to be tested, and giving the serum from this blood a complicated chemical treatment, the effect of the chemical operation resulting in a reaction which indicates pregnancy or sterility. Dr. L. R. Himmelberger and the writer undertook during the fall and winter of 1915 and 1916 to apply this test to a band of mares.

The Patchen Wilkes Farm placed its broodmares at the disposal of the investigators and co-operated freely with us in securing the samples of blood. The mares had to be kept off of feed for eighteen hours before the blood was drawn. As no more than six samples of blood could be tested by us at one time, many trips were necessary to secure the material. Blood from over fifty mares was obtained, but by reason of accidents in the work not all the samples could be carried through the entire process.

The result of our analysis of the blood serum were accurate in 82.5 per cent, and wrong in 17.5 per cent of the cases. This was a disappointment to us, as an error of 17.5 per cent renders a test worthless. Could we have had the mares under our control and been able to control all food given them, and, in addition, made control tests, I believe a greater degree of accuracy could have been secured.

The Abderhalden test for pregnancy can not be used to forecast the condition of mares for two reasons:

1. The test is not accurate. Other investigators have got as little as five per cent of error where they were in control of the food conditions of the animals; but that error throws an element of doubt on the results.

2. The second reason is that it is too expensive to make the test. It is a very complicated chemical process. It requires an expert chemist to make it.

Since the Abderhalden test can not be applied to mares as a practical method, it leaves the breeder without any sure method of forecasting the condition of his mares. The writer was disappointed at the result of the investigation, as I had hoped the test would be accurate and the technique so simplified that it could be of practical use.

W. S. ANDERSON.

Lexington, Ky.—American Horse Breeder.

BULL CLUBS FOR THE RED CROSS

Many ingenious methods of raising money for various war causes have sprung from the inventive American mind, but none is more unique or has a greater element of usefulness than the plan which is being put into operation at Birmingham, Ala.

Fifty registered Shorthorn bulls have been donated by various patriotic breeders throughout the United States; among the number is the premium, or champion Shorthorn bull, which brought in a recent sale under the hammer no less a sum than $17,500.

These bulls will be sold at auction in Birmingham on July 2nd and the entire proceeds of the sale will go to the Red Cross. The proceeds from the champion bull will go to the Birmingham Red Cross and the proceeds from the sale of the other bulls will go to the local Red Cross Chapters in the counties in which the purchasers of these bulls reside. The result of this auction sale, therefore, will be to raise a substantial sum for the Red Cross and at the same time improve one of the South's best assets, live stock.

This auction has been approved by President Wilson, who bought the champion bull for $1 and turned it over to the Birmingham Chapter of the Red Cross. A feature of the auction will be the sale of the "President's Bull" and of the autographed dollar bill that bought it. A prominent patriotic citizen of Alabama has already bid $10,000 for the autographed bill. This auction also has the approval of the executive officers of the American Red Cross War Council.

Who will buy the bulls? It is expected that Red Cross Chapters in every county in Alabama, and in practically every county in the Southern States, will organize "Bull Clubs" at $1,000 or more. Sixty-five such clubs have already been organized in Alabama and new ones are being formed every day. The interest, too, of breeders in this sale is evidenced by the fact that the Shorthorn breeders of Colorado have wired that representatives will be on hand to bid. Such bulls as are bought by bull clubs organized by Red Cross Chapters may be resold if desired and a still further substantial sum added to the maintenance of their local chapter.

Officials in charge of the Bull Sale hope to break the world's record, which they are informed was made recently in Kentucky when sixty-two Herefords brought a total of $186,650, or an average of a little more than $3,000 a head. It is believed, and hoped, that the Red Cross Bull Sale will yield an amount far in excess of this sum. The goal desired, is to equal Alabama's quota in the recent Red Cross Campaign, which was a little more than $400,000.

"EARLY DAWN PEEP 2d"

Early Dawn Peep 2d, a purebred Holstein cow, afforded one of the sensations at the National Dairy Show at Columbus, Ohio, by making a typical Holstein record of 33.52 lbs. of butter in a week. While that is a good record, it is not an exceptional one for a Holstein cow. It is unusual, however, in view of the conditions under which it was made. The strain of traveling to the show, the strange barn, the crowds of the curious and the excitement incident to the show were all serious obstacles to the making of a record. It is a wonderful record in view of these trying conditions. Her record for seven days at the show was 634 lbs. of milk of 4.22 per cent fat, yielding 33.52 lbs. of butter.

Early Dawn Peep 2d last year made the semi-official record of 1287.72 lbs. of butter in a year. She is owned by Peter A. Small of Chesterland, Ohio.

THE QUEEN OF THE DAIRY WORLD IS DEAD

The great purebred Holstein, Duchess Skylark Ormsby, who made the world's record for all breeds of 1506 pounds of butter, 27,761.7 pounds of milk in one year, is no more.

Duchess Skylark Ormsby was calved Oct. 31, 1909. She was owned by R. B. Young, Buffalo Center, Ia. She freshened first at 2 years, 1 month and 3 days old. She was put on official test, making the creditable, though not noteworthy record of 17.50 pounds of butter, 380.2 pounds of milk in seven days. Continued for the year, she made the fine record of 731.1 pounds of butter, 18,966.5 pounds of milk as a junior two-year-old. She then passed into the hands of John B. Irwin, Minneapolis, Minn., and for him, at 5 years and 3 days old, she made 34.36 pounds butter, 558.1 pounds of milk in seven days. It was then decided to run her for the full year. Three hundred twenty-seven days after freshening she produced 23.75 pounds of butter, 469.2 pounds of milk. November 9, 1915, it was officially announced that she had established a world's record with the tremendous output of 1506 pounds of butter, 27,761.7 pounds of milk in 365 days. This exceeded the previous world's record of 1470.59 pounds of butter, held by the Holstein cow Finderne Pride Johanna Rue.

The champion was but eight years old at her death and her loss is a great one, not only to her owner but to dairymen and breeders generally.

Her only living son, Sir Ormsby Banostine Champion, is in active service and his sons and daughters have every indication of perpetuating the beauty, symmetry, constitution and persistent milking qualities of his great dam.

MEN WANTED

The army officers want men outside the draft age who are familiar with handling horses. Stablemen, horseshoers, ranch hands, veterinary students and a host of others are needed to fill out the number of men required in this branch of the service. The remount depots, one of which is established at every cantonment in this country, are in urgent need of good horsemen. This work is not classified under the veterinary corps, but is a separate branch of the service. No limit is placed on the number of men who may be taken for these two branches of war work, but in all instances they must know all about horses. The average American kid has gotten too far away from this knowledge to ever catch up.

EVERY MOMENT
IS DOING ITS BIT
MEETS EVERY CRISIS

Howard Farm, Colchester, Vt.
Troy Chemical Co., Binghamton, N. Y.

Gentlemen: Would you please send me your free book. I had one and took it to France. I was transport sergeant in the Canadian Army and had charge of a number of horses in France. I took half a dozen bottles of your Save-The-Horse with me and must say that it was sure of great help in keeping horses at work under most trying circumstances. I have used it on spavins and ring bone for years and never failed me yet.

Yours truly,
SERGT. TOM JONES.

Changing to SAVE-THE-HORSE at the last moment may forestall failure, but isn't it much more satisfactory to use SAVE-THE-HORSE now at the very start when actual and permanent results at the least expense should be secured?

SAVE-THE-HORSE is the only remedy your horse requires.

SAVE-THE-HORSE is a proven thoroughly reliable remedy.

..But write.. BOOK, Sample Contract and ADVICE—ALL FREE.

..Every bottle sold with a Signed Contract to return money if Remedy fails on Ringbone — Thoroughpin — SPAVIN — or ANY Shoulder, Knee, Ankle, Hoof or Tendon Disease.

$5 at druggists everywhere, WITH CONTRACT, or we send by Parcel Post Paid.

Troy Chemical Company
BINGHAMTON, N. Y.

THE FARM

ORIGIN OF MULES IN THE UNITED STATES

Upon Washington's first retirement, in 1783, he became convinced of the defective nature of the working animals employed in the agriculture of the Southern States, and set about remedying the evil by the introduction of mules instead of horses, the mule being found to live longer, be less liable to disease, require less food, and in every respect to be more serviceable and economical than the horse, in the agricultural labor of the Southern States. Up to the year 1773, scarcely any mules were to be found in the American confederation, a few had been imported from the West Indies, but they were of diminutive size and of little value. So soon as the views on this subject of the illustrious farmer of Mount Vernon were thrown abroad, he received a present from the King of Spain of a jack and two jennies, selected from the royal stud at Madrid. The jack, called the "Royal Gift," was sixteen hands, of a gray color, heavily made, of a sluggish disposition.

At the same time the Marquis de la Fayette sent out a jack and jennies from the island of Malta. The jack, called the "Knight of Malta," was a superb animal, black color, with the form of a stag and the ferocity of a tiger. Washington availed himself of the best qualities of the two jacks by crossing the breeds, and hence obtained a favorite jack, called "Compound," which animal united the size and strength of the "Gift" with the courage and activity of the "Knight." The jack arrived at Mount Vernon, if we mistake not, early in 1788. The general bred some very superior mules from his coachmares, sending them from Philadelphia for the purpose. In a few years the estate of Mount Vernon became stocked with mules of superior order, rising to the height of sixteen hands, and of great power and usefulness, one wagon-team of four mules selling at the sale of the general's effects for $800.

In no portion of Washington's various labors and improvements in agriculture was he so particularly entitled to be hailed as a public benefactor as in the introduction of mules in farming labor, those animals being at this time almost exclusively used for farming purposes in the Southern States.

USELESS BLINDERS

Horses are placing mankind daily under everlasting obligations to them, says Secretary Pershing, of the South Bend, Ind., Humane Society, but how cruelly and thoughtlessly are they repaid by those who are most indebted to them! A horse is a noble animal; patient, kind-hearted, self-sacrificing, willing to work till he dies in his tracks, uncomplaining; a lover of kind treatment, who is willing to work a whole lifetime with no other compensation that his bed and board.

Of the many things which make the daily life of a horse miserable, two are blinders and the tight check-rein, the worst parts of a horse's harness. Very many people believe that they are part and parcel of a horse and that he would not be a horse without both of these.

The majority of horses could readily dispense with blinders, and all could if they had never been invented. Blinders were first used by a nobleman in England to hide a defect on his horse's head, and later they were found excellent locations for the displaying of his coat-of-arms.

A horse's head was never intended for blinders, for his eyes are so set in his head that he can see behind him without turning his head, and, of course, the blinders deprive him of seeing the very best things he could see, for his own safety as well as his driver's. A horse's eye is a beautiful object and it is a shame to cover it.

Whenever I see a man driving a horse without blinders, I always feel like stopping him and shaking hands with him. A horse's head is the best part of him, and should have on it as little harness as possible.

Another instrument of torture to a horse is the tight checkrein. It is largely responsible for poll-evil, abscesses, sprung knees, paralysis, and disorders of the brain and muscles. It spoils his appearance and detracts from his free and graceful movements.

HARVESTING A MOST UNUSUAL CROP

One of the most peculiar harvests in the world takes place in the foothills of Nevada and Placer counties during February and March. At that time the State of California, through its Insectary Department, harvests from 60,000,000 to 75,000,000,000 lady bugs. These bugs are gathered in cases, each holding about a quart or 33,000, and sent to Sacramento, where they are stored until the summer season, when they are sent into the different sections of the State to feed on the aphis which attacks the cantaloupes, beans and various other vegetables. A representative of Pathe Weekly photographed the process of collecting insects in their winter quarters. Films will probably be made later in the season of the distribution of these bugs and finally the destruction of aphis on vegetation throughout Central and Southern California will be filmed.

PULLING POWER OF HORSES

An interesting experiment has been concluded in California to determine how much a horse pulls when he draws a ton.

A good draught team was used for this purpose. The horses weighed 1600 pounds each. They were hitched to an ordinary farm wagon, and pulled a load of 6000 pounds over different kinds of roads. The wagon was a standard farm wagon with steel axles of equal length, wheels 38 and 46 inches in diameter, and four-inch tires.

A recording dynamometer was used to register the tractive force of the team. This instrument makes a record of the resistance on a strip of paper under a recording pencil, and after the test, the total pull of the team can be read off in pounds. The record of the test is as follows:

On a concrete road with 3-8 inch surface of asphaltic oil and screenings, road in excellent condition, the total pull was 147.6 pounds or 49.2 pounds per ton.

On a concrete road, unsurfaced, in excellent condition. the total pull on the load was 83 pounds, or 27.6 pounds per ton.

On the ordinary macadam road in excellent condition, the total pull was 193 pounds, or 64.3 pounds per ton.

For a graveled road, compact, and in good condition, the total pull was 225 pounds, or 75 pounds per ton.

An earth road, firm, with 1½ inches of fine, loose dust, the total pull was 276 pounds, or 92 pounds per ton.

An earth road, with mud 4 to 6 inches deep, but soil firm underneath, the total pull was 654 pounds or 218 pounds per ton.

On graveled road, before the gravel had been compacted, but when it was in ordinary loose condition after it had been placed upon the road, the total pull was 789 pounds, or 263 pounds per ton.

The above shows very well what great advantages good roads have as far as the hauling properties of a team are concerned.—E. B. House Colorado Agricultural College.

FOR SALE

Black Mack, pacer, 8 years old gelding by Charley D., dam by Daby Ash, has worked mile in 2:15, half 1:03, and quarter in 30½ seconds.. Mimequa, trotter (registered), 5-year-old mare; has been a mile in 2:12 in a race and is a live trotter. Apply to MARTIN FORD, 1311 Steiner St., San Francisco.

KORNDYKE WINONA

Produced 683.4 lbs. of milk yielding 40.28 lbs. of butter in seven days

HOLSTEIN DAIRY RECORDS

Thirty purebred Holstein cows now have achieved the proud distinction of having produced more than forty pounds of butter in seven days.

The two latest matrons of the dairy world to achieve such fame are Korndyke Winona and Segis Hengerveld Fayne Johanna.

Korndyke Winona freshened at the age of eight years, twenty-three days, and produced in seven consecutive days 683.4 lbs. of milk, yielding 40.28 lbs. or butter. Her sire is Pontiac Korndyke and her dam is Miss Winona Mechthilde. She was bred by Charles H. Hyde, Watertown, New York.

Segis Hengerfeld Fayne Johanna, the thirtieth "Black-and-White" forty pounder, freshened at the age of 6 years, 1 month, 27 days. She completed her seven day test with 649.6 lbs. of milk, yielding 40.41 lbs. of butter.

Her sire is Woodcrest Nig De Kol, her dam is the great world's champion, Segis Fayne Johanna—the first and only cow of any breed to yield fifty pounds of butter in a week. She was bred by A. A. Cortelyou, Somerville, N. J.

Each of these great cows has yielded in seven days an amount of butter that it would take ten average cows to produce. Both are now owned by Pine Grove Farms, Elma Senter, New York.

BREEDER AND SPORTSMAN
Turf and Sporting Authority on the Pacific Coast.
(Established 1882.)
Published Monthly.
F. W. KELLEY, Proprietor.

OFFICE, 239 PACIFIC BUILDING
Cor. of Market and Fourth Sts., San Francisco.
P. O. DRAWER 447.
National Newspaper Bureau, Agent, 219 East 23rd St., New York City.

Terms—One year, $1; six months, 75 cents. Foreign postage 25 cents per year additional; Canadian postage 15 cents per year additional.

Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

Due to the greatly increased cost of paper, labor and other materials entering into the production of newspapers and magazines and the additional cost of postage under the zone system of mailing second class matter, coupled with the almost complete discontinuance of breeding of standard bred horses, lack of interest in racing and the unsettled condition of affairs generally the "Breeder and Sportsman" was discontinued during the past three months. It was the intention to resume the publication at the termination of the war or earlier if conditions warranted.

For 36 years this paper has been published regularly, and today has on its mailing lists subscribers whose subscriptions date from Volume I, No. 1.

A number of the leading breeders of thoroughbred horses and cattle believing that the discontinuance of the "Breeder and Sportsman" would be a loss to the interests it represented, have induced the management to resume the publication of the paper with this issue, making the publication a bigger and handsomer paper than before. To attain these ends it is deemed advisable for the present to issue the paper as a monthly, but as soon as conditions change for the better it is proposed to again issue the "Breeder and Sportsman" as an interesting illustrated weekly, reflecting the best in news, comment and story the events in the field it covers.

The "Breeder and Sportsman" during its long and useful career has built up a circulation which extends to practically every quarter of the globe and during the time it has occupied its present place in Pacific Coast journalism, has accumulated vast stores of information and statistical matter which it would now be hard to duplicate, these records and this information will always be available to its friends and subscribers and those interested in the horse and live stock breeding industries.

Trusting that the "Breeder and Sportsman" will meet with the same hearty reception and have as many friends in the future as it has in the past, the management will go ahead with that hope and expectation.

HORSES AT THE CALIFORNIA INTERNATIONAL LIVE STOCK SHOW

Stars of international magnitude will shine in the livestock firmanent at the California International Livestock Show which will be held in San Francisco from November 2nd to 10th by a group of prominent men and under the auspices of the San Francisco Chamber of Commerce. These men consider it a patriotic duty to stimulate the raising of livestock in this State, not only to aid the Food Administration during the war but to make California the livestock center in times of peace.

In America alone, according to Edgar J. De Pue, president of the California International Livestock Association, can the pure strains be found in all classes. California, according to this authority, with its natural resources, its thousands of acres of pasture lands and its ideal climate is the state of the Union best adapted to livestock.

Owners of many noted Eastern and California stables are making arrangements to enter their horses in the Horse Show, which will be one of the entertainment features of the Livestock Show. John Rosseter will exhibit his sixty thousand dollar Arabian horse Friar Rock and Tom Bass of the noted Missouri stables bearing his name will send the famous Belle Beach. Tandem driving, saddle and harness combinations and five-gaited exhibitions will be among the features.

One of the fastest two-year-olds in the world will be at the Exposition. This horse is one of four Arabian horses entered in the breeding class by S. C. Thomson of Concord, Cal. The four will be seen in the parades at the Horse Show. They boast the desert strain which marks the high bred Arabian. The two-year-old, as well as the other three horses are remarkable for their swiftness and endurance.

Thirty Thousand dollars in prizes are to be given by the Association for the best exhibits of livestock and ten thousand dollars will be awarded in the Horse Show.

Officers and advisory board of the show include Edgar J. De Pue, president; William H. Crocker, Milton H. Esberg, James J. Fagan, A. W. Foster, R. B. Hale, Maurice A. Hall, Frank Honeywell, Fred W. Kiesel, C. K. McIntosh, John D. McKee, L. A. Nares, William Mayo Newhall, Fred M. Pickering, Warren R. Porter, T. H. Ramsey, B. F. Schlessinger, William T. Sesnon, Vanderlynn Stow, Gordon H. True, F. L. Waschburn, Ralph P. Merritt, food administrator; Dean Thomas F. Hunt, University of California; Fred J. Koster, president of San Francisco Chamber of Commerce; C. C. Moore, chairman State Council of Defense and Dr. Ray Lyman Wilbur, president of Stanford University.

OBITUARY

George B. Kelley, well known to all the horsemen on this coast, having officiated as Clerk of the course at the State Fairs, The Pacific Trotting Horse Breeders' Association meeting, the Fairs at Fresno, Bakersfield, and other places, died on the 9th instant of heart failure.

He has been connected with the "Breeder and Sportsman," having edited the thoroughbred department for the past year and is well known on this coast as one of the best posted men on pedigrees and performances of both thoroughbred and standard bred horses.

In his official capacity he was always disposed to grant favors and accommodate the horsemen to the extent of his ability. As an official he was thoroughly familiar with the rules and was a valuable man in the Judge's stand. He had been a sufferer from heart disease for many years.

FAIRS BUILD UP COMMUNITY

Agricultural fairs and livestock shows are strong factors in the formation of agricultural ideals and rural community upbuilding. Farmers and stockmen recognize now more than ever before the importance of mingling with their friends and fellow breeders, exchanging ideas, making criticisms, and gathering new information.

Fairs afford great opportunities for entertainment and education. Fair-goers meet as exhibitors in competition and as spectators. Some win, others lose. What is won in money prizes, however, is of minor importance. Of course, the money offered is great inducement in the way of defraying expenses, but many exhibitors would have as much at the end of the week by leaving their exhibits at home. On the other hand, those who exhibit take home a new opinion of their own products, and revised standards which will guide them in selecting and breeding, and in preparing exhibits for the next year.

The livestock industry owes much to the many fairs held throughout the country. Much of the improvement in breeds has come as a result of public exhibitions and ratings. Many persons have been encouraged in the production of better stock simply through the incentive gathered at the livestock shows. The fair circuit is the school of the constructive breeder. Few men have attained outstanding success as breeders who have not been close students and critics of show ring standards and awards.

It takes people to make fairs. The public should realize that nothing can do more to encourage better breeding, feeding and management of livestock than successful fairs. The fair is just what the people make it.

THE AMERICAN MULE ON THE FIGHTING LINE

(Special Correspondence of the Italian American News Burau, Chicago)

Again America excells. The American mule has come into his own, and has proven right along with the American boys in khaki that whatever comes from America is the best that can be produced.

Thousands of Kentucky and Missouri mules are now "doing their bit" on the fighting line and behind the lines in Italy.

When Italy entered the war she needed mules. Formerly she had secured mules for domestic service from Hungary and Spain. The supply from Hungary was shut off the moment the Italians entered on the side of the Allies. The Italian government then turned to America and after exhaustive tests of endurance, strength and intelligence, found that the American mule was far superior to the European product, and now most of the mules used in Italian war work are from America.

Count Bolognesi, Royal Italian Consul, Chicago, in speaking of the purchase of mules in this country for his government, said that it was found that Kentucky and Missouri mules could carry an average of one-third greater load and make an average of more than ten miles a day more travel under load than the best mules from Spain or Hungary. Also he says it was found that the America mule was more intelligent and more docile. This is perhaps the first time tribute has been paid to the kindly disposition of the American mule since the days when "Josh Billings" said that the only good mule was a dead mule, and then it was only safe to mourn over the front end of him.

These mules from the States are used in carrying supplies and munitions where motor trucks or other means of conveyance cannot be used. They are sure-footed and patient; they carry immense loads up into the mountain fastnesses where no horse or truck could make way, and oftentimes where it tries the skill of man to find safe footing and carry small loads. They carry field guns, loads of cartridges and shells, steel roofing and bags of cement for the barricades and bomb proofs, they carry food and other supplies to the Italians who are fighting far above the snow line and holding the Austrians back from invasion of the fertile Italian plains. When the war is over much credit will be due the Great American Mule for his help in the war. Irving Cobb recently in the Saturday Evening Post tells of American mules being used to haul wounded soldiers on flat cars back from the fighting line. With shells falling all about them they go patiently and quietly about their work, and when wounded do not give the trouble in management that horses do.

THE HUNS OF THE TURF

Hartford, Conn., Oct. 19.—The following is from the issue of The Horse Review of October 9, 1918:

"Of equal importance was the action of the meeting in regard to the amalgamation of the two governing bodies of the turf, the American and National Trotting Associations. It was overwhelmingly apparent that those present, with few exceptions, were strongly in favor of this policy, and Mr. Smollinger made a most favorable impression by his public declaration that he was ready and willing to do everything in his power to attain the desired end. Secretary Gocher, of the N. T. A., was present, and there were several junctures at which the assemblage would have welcomed an expression of his sentiments. With his customary evasiveness upon occasions when he is unable to attune his opinions wtih those of the public, he refrained from committing himself—it is not, perhaps, difficult to imagine why! Evidently he considered it better to 'sit tight' than to risk assuming a still more awkward position."

The meeting referred to was held at Lexington, Ky., October 2, 1918. While it was in session, I was en route, and had been for ten hours, to Jacksonville, Fla., where my son, Willam, was dangerously ill in the base hospital at Camp Johnston and where I remained with him almost night and day until he died October 11. It is a heavy burden to feel that the flag for which he cheerfully gave his life and under the folds of which he now rests should wave over such Hun-like perveters of truth and assassins of character. In my hour of deepest sorrow I have still, however, fortitude enough to repeat the words of the Master: "Father, forgive them, as they know not what they do." It remains with them to make peace with their own consciences and the millions of fathers, mothers, sisters and brothers who have seen their loved ones go down into the valley of death.

This is not written for sympathy, but in the hope that a plain statement of fact will spare some other father an attack by a group to which there is no word in the English language to apply, as the blue star on his son's service flag fades to gold.

W. H. GOCHER.

The proposed special race at Laurel in which Billy Kelly and Eternal are to meet will, in all probability, be brought off Thursday, Oct. 24. Both youngsters to carry 125 pounds. May the best horse win!

Thoroughbred Matters

RACING THIS YEAR

The Record is in receipt of a telegraphic communication from Mr. R. Bennison, of the New Orleans Business Men's Racing Association, asking information as to the amount of racing being conducted this year in countries now engaged in war. Mr. Bennison's telegram also confirms report of racing interests being attacked in the State of Louisiana.

Racing is, of course, curtailed to an appreciable extent in England, but the Derby, Oaks, St. Leger, Newmarket Gold Cup and a number of other long established races have been and are being duly brought off. In Ireland racing is going very strong. Only last week The Record was privileged to announce that there would be a resumption of racing in France. In far away Australia The Sydney Referee tells us that interest in racing is unabated and all the big stakes are to be run off again this year. Even in Germany racing is carried on, and the sport flourishes splendidly in Spain, which country, though not an actual participant in warfare, lies adjacent to the scene of action. In the face of all this, why the persistent efforts of the regulators to have racing proscribed in the United States? The great mass of people demand and feel that they are justly entitled to some form of healthful relaxation during this critical period in the world's history.

The standard of the breed of the thoroughbred horse must be maintained and if possible improved, and racing is only a means to that end. The thoroughbred horse is, even now, one of the best assets to the country and is certain to become still more so upon the suspension of hostilities. The breeder of other countries will then seek to again build up their sadly diminished bloodstock interests, and it is to the United States that they must turn, hence the absolute necessity of maintaining the standard of the breed, and from henceforward it is everyone's bounden duty to foster and encourage the great national industry of horse breeding.—Thoroughbred Recorder.

SARATOGA WINNERS

J. W. McClelland, by virtue of Eternal's victory in the Hopeful Stakes on the closing day of the meeting, was the leading money-winning owner, of whom the following won $5,000 or more each:

Owner	1st.	2d.	3d.	Amt.
McClelland, J. W.	2	1	0	$30,904
Coe, W. R.	8	9	8	17,321
Wilson, R. T.	7	5	4	17,263
Polson, W. F.	4	1	1	15,148
Whitney, H. P.	8	5	2	13,150
Ross, J. K. L.	9	2	7	13,668
Kilmer, W. S.	3	3	3	11,575
Macomber, A. K.	4	6	4	9,529
Jeffords, W. M.	3	1	0	7,800
Miller, A.	3	1	1	7,612
Aste, A. L.	1	2	0	7,200
Loft, G. W.	4	3	1	7,158
Rosseter, J. H.	2	0	2	7,050
Schwartz, M. L.	3	3	1	5,725
Widener, J. E.	6	8	6	5,481

WINNING OWNERS AND HORSES AT AQUEDUCT

The autumn meeting of the Queens County Jockey Club began at Aqueduct Sept. 16 and came to an end Sept. 28, embracing twelve days, during which time seventy-two races were decided and $78.530 distributed in stakes and purses. The daily average distribution amounted to $6,544. Despite the opposition of Maryland racing, there was no scarcity of horses and the fields in most cases were extraordinarily large for this time of the year. The quality of the racing was of a high standard, while the attendance and interest in the sport was gratifying to the management of the Aqueduct course.

A. K. Macomber heads the list of winning owners, his horse accounting for $7,397. R. T. Wilson was second with $5,325.

SPUR BRINGS TOP PRICE

NEW YORK, Oct. 10.—Prices for thoroughbred race horses ranged from $8,100 down at Durland's Riding Academy tonight.

Spur, b h, 5, by King James—Auntie Muni; John Griffith $8,100

Ragazzo, b f by His Majesty—Henpeck; Edwin Arlington 800
Ardito, ch c, by His Majesty—Early Rose; R. W. McCully 4,000

STAR ATTRACTIONS AT THE HORSE SHOW

Liberty Loan, the famous thoroughbred stallion has been entered by A. K. Macomber for the forthcoming horse show to be held in San Francisco November 2 to 10, under the auspices of the San Francisco Chamber of Commerce. Liberty Loan was the winner at the Latone Derby, making the fastest world record for one and one-half miles at one hundred twenty-four pounds up. This thoroughbred cost $25,000 and has just recently arrived in California.

Hesperus, the property of Howard P. Renthaw of Hollister, another noted thoroughbred stallion has just been entered for the horse show. Hesperus' antecedents have been winners of many famous races and his sire won the recent English Derby; his mother, the English Oaks.

Friar Rock, the thoroughbred stallion of the John H. Rosseter stables completes a trio of the most noted running horses in the United States and it is the opinion of the authorities that nowhere in the world, not even in England could there be assembled at this time three animals of such quality and record as those of Liberty Loan, Hesperus and Friar Rock. Friar Rock was recently purchased by Mr. Rosseter at $60,000 and was originally imported from England.

In addition to these star attractions Thomas Mangan has made an entry of twenty head of horses in the gaited and jumping classes and will also enter several other classes. Polo, state riding and push ball teams are also among the attractions planned which are now being completed. Draft horses in harness as well as in parade in singles, pairs, fours and sixes are also among the attractive feature.

A bit of contemporaneous colors will be added to the horse show in the military classes now being arranged in which will be shown the most desirable horses for the officers and troupers remount so much needed just now in war activities. Several well known equestrians from the officers of the Presidio and other cantonments will be among the riders.

Gordon Smith of the San Francisco Riders' School has entered eight head of horses in the different classes and Mr. Smith has also authorized Manager James E. Painter to offer a $25.00 silver cup to the best girl rider under eighteen years of age.

BIG PRICES FOR YEARLINGS

The following excellent prices were obtained for yearlings at Newmarket, England, Sept. 13:

B. c. by Chas. O'Malley—Maggie B.; R. Colling ..... $ 3,000
B. c. (half brother to Lomond) by Chas. O'Malley—Lowland Aggie; British Bloodstock Agency 2,900
Br. c. by Tredennis—Mauretania; A. Saddler, Jr. 5,000
Gr. c. by The Tetrarch—Abbazia; H. S. Persse 8,000
Gr. c. by the Tetrarch—Fragonada; H. S. Persse 14,000
Lucan, b. f. by Chas. O'Malley—Bachelor's Cherry; Lord H. Van-Tempest 3,000
Br. f. by Tredennis—Grania; Major Hermon-Hodge 6,000
B. c. by Bridge of Earn—Bright Angel; Capt. Dewhurst 4,250
Ch. c. by Bridge of Earn—Ashboro; Capt. Dewhurst 3,250
Br. f. by Lomond—Sisterlike; Lord Lonsdale 18.500
Ch. f. by Roi Herode—Aliena; Mr. Beer.. 7,000
B. f. by Bridge of Earn—Guetaria; Lord Jersey 2,750
B. f. by Lomond—Columbina; Major Hermon-Hodge 2,500
Ch. f. by Lomond—Nora Toi; Maj. V. Beatty 3,500

THE $300,000 RED CROSS FUND

The fund of $300,000 which the racing interests of Kentucky pledged themselves to raise for the benefit of the Red Cross is now rapidly nearing completion. The Douglas Park meeting yielded its proportionate share of the amount that remained to be raised during the fall season of racing on the four tracks of this State and the meeting now in progress at Churchill Downs and the one soon to be opened at Latonia will complete the fund, so far as the contributions of the tracks, their employees, the jockeys and the owners of racing stables are concerned. This will account for $260.000 of the total of $300,000 pledged. The remaining $40,000 is to be raised by the breeders of thoroughbred horses.

At Santander, Spain, the great event of the meeting, the $20,000 Grand Prix de Saint Sebastian at a mile and a half, was run on Sunday, July 28, and was won by the Marquis de Villamejor's four-year-old colt Ukko, by Macdonald—Ushango, carrying 143 pounds and ridden by George Archibald. J. D. Cohn's Rabinito was second and W. K. Vanderbilt's Aiken third. Twenty-three horses ran; W. O'Connor rode Rabinito and Lucien Lyne was on Aiken, so American jockeys reaped all the honors of the occasion.

STALLIONS WHICH LIVED LONG

The age to which a thoroughbred stallion lives, unlike the case of the human being, seems to be merely a matter of constitution, remarks H. A. C. in the London Sportsman. The writer goes on to discourse interestingly on the subject, thus: "Some stud horses have greatly exceeded the average age, which according to statistics got out a few years back on the authority of the Stud Book, is no more than a fraction over 16 years. A century or more ago stallions seemingly were longer lived than nowadays, for according to the obituary list in Volume I. (fifth edition) of the Stud Book, the average age of the 79 stallions whose deaths are therein recorded was only a couple of months under 23 years. The record age was 33, attained by Matchem, by whose aid the line of the Goldolphin Barb was destined to be carried on. Through Melbourne and his son, West Australian, the latter of whom was the first winner of the 'Triple Crown,' the Matchem family achieved great distinction in the middle of last century. Others that lived to what nowadays would be regarded as an exceptionally ripe old age were Sampson (32), Bay Bolton (31), Ranthos (31), Ruler (30), Young Marske (29), Partner (29), and Jalap (29). Matchem's great stud rivals, Eclipse and King Herod (better known as Herod), were much younger when they ended their careers, Eclipse being quite worn out when he died at Cannon's, Middlesex, in February, 1789, at the age of 24, while Herod's death took place at Netherhall, Bury, when he was only 22. Marske, the sire of Eclipse, on the other hand, was 29 when he died in Oxfordshire in 1779. Until Eclipse commenced his spread-eagling career on the turf, Marske was considered a very indifferent stallion, and after the death in 1765 of the Duke of Cumberland, he was sold to a farmer for a very trifling sum. Mr. Wildman, the purchaser of Eclipse, subsequently bought Marske for the bagatelle of 20gs, and after Eclipse had made him famous he was sold to the Earl of Abingdon for 1000gs, and stood at his owner's seat at Rycot, Oxfordshire, at a fee of 100gs. (and 1gn. the groom). Seldom has there been a better example of nothing succeeding like success, for, prior to the advent of Eclipse, Marske had been covering country mares in Dorsetshire at the very modest fee of half a guinea.

"But for Marske there would have been no Eclipse line, the nowadays dominant line of which not only the Stockwells, Galopins and St. Simons, but also the Isonomys, Sterlings, Blair Athols, Rataplans and all the offshoots of Touchstone (inclusive of Orlando, Newminster, Lord Clifden, Hermit, etc.) are tail-male descendants. Coming to latter-day members of the Eclipse family were Galopin and his greatest son, St. Simon, each of whom reached the age of 27. Rather curiously several of the most famous sons of St. Simon were comparatively youthful when they went to the happy hunting grounds. Persimmon, perhaps the greatest of them all, was only 15 when he died following an accident in 1908; Desmond was 17, Florizel II. (elder own brother to Persimmon) was 18, and William the Third, who died last February, was 19, while St. Frusquin, the great race horse and stud rival of Persimmon, was 21. St. Frusquin, by the way, has left worthy successors behind him in England in St. Amant and Greenback, while in the Argentine his sons St. Wolf and Dusty Miller are going strong. St. Wolf is at present the leading winning sire of the season out there, his stock having won considerably more money this year than the get of the hitherto all-conquering Diamond Jubilee (own brother to Persimmon and Florizel II.), who has now turned 20. The longest lived of St. Simon's sons, apparently, was St. Serf, which had attained the nowadays rare age of 28 when his death took place a couple of years ago. Collar was 19 when he was destroyed in 1914.

"Turning to the Isonomy branch of Sterling (Birdcatcher), Mr. Fred Gretton's great race horse and stallion (sire of Isinglass, winner of the record sum of £57,455 in stakes), died at the comparatively early age of 16 years, whereas Isinglass was 21, and another of his famous sons, Gallinule, was 28 when the end came. Another long-lived descendant of Birdcatcher via Stockwell, was Bend Or, which reached the age of 26, and died only a year before his best son, Ormonde, which expired in the States in 1904 at the age of 21. The Bend Ors, as a rule, last out well, and Ormonde's son, Orme, in turn, lived until he was 26, but the latter's good son, Flying Fox, was only 15 when his death took place in France in 1911. Another Stockwell horse that lived to a good age was Springfield (sire of Sainfoin), which was 25. Sainfoin was 24, whereas his great son, Rock Sand (sire of Tracery, etc.), was only 14 when he died in 1914. Another of the Stockwells that was not only a great race horse, but lived to a good age, was Minting, whose defeat in the Two Thousand by Ormonde caused Mat Dawson to go home to bed. Foaled in 1883, Mr. Vyner's champion was chloroformed in 1909 owing to infirmity. He was by Lord Lyon, who was considered to be rather a failure at the stud till he sired Minting in his old age. The Musket line of Touchstone has produced ability some good stayers, not only as regards their racing ability, but also in the matter of longevity, for Carbine—winned of the Melbourne Cup under the record weight of 10st 5lbs, and sire of the Derby and Grand Prize of Paris winner, Spearmint—was 29, while Trenton was 24."—Exchange.

THOROUGHBRED NURSERY OF THE WORLD

That England is determined to maintain her pride of place as the thoroughbred nursery of the world, is shown by the manner in which she is maintaining her breeding interests despite the limited opportunity afforded to secure a return on the investment because of war conditions.

Reports indicate that the best horses in the stud in Great Britain have had satisfactory seasons. This is particularly true of Major August Belmont's great horse Tracery, whose book was full at 250 guineas. In commenting on the fact that the superb son of Rock Sand and Topiary was mated with forty mares, thirty-seven of them other than his own, Major Belmont said a few days ago:

"There is a lesson for the breeders of the United States in the manner in which English owners of thoroughbreds are maintaining this most useful strain of horses. Though their country has been at war for four years, and the strain has been constant, they have never lost sight of the importance of keeping up the quality of their bloodstock. The need of remounts brought about the establishment of a national stud, and I am gratified to find one of the best mares from it among those sent to Tracery this season. Another great mare mated with him was Tagalie. Still another with local interest attached to her is the Berrill matron Queenlet, the dam of W. R. Coe's good filly Terentia, which is showing such good form at Saratoga. Sir Mark Sykes, whose Sledmere Stud is renowned the world over, has sent Agacella and Startling as well as Queenlet. Mr. Coe was indeed fortunate to secure Terentia and other Sledmere youngsters last year, as it was the first time they were ever sold privately.

"It must be remembered," resumed Major Belmont, "that Tracery is only one of many high priced sires in England at the present time. His fee was formerly 400 guineas, but it was reduced to the present figure in order to encourage breeders to keep up the work of blood horse production, during the war. The subscriptions to Tracery this year are eloquent testimonial to the love the best type of British sportsman has for a good horse.

"There was a disposition," said Major Belmont in concluding, "to curtail racing to a point where the life of the breeding industry was threatened the first year of the war in England. The necessity for racing tests in connection with breeding, and the absolute need of fostering the industry because of what it meant to the nation, brought about a revulsion of feeling and this season has been materially lengthened. We in the United States are in the same predicament as the British when the future of our horse product is considered. Racing and horse breeding must be continued. It would be extremely unwise to abandon any policy which makes for advancement in either field."

A full list of the mares bred to Tracery, together with their breeding and ownership, is appended. It will be noticed that the matrons are the acme of English blood lines, while their owners are the bone and sinew of the British turf. List of mares bred to Tracery in England, season of 1918:

The National Stud's Tillywhim, by Minoru—Lily Rose.

Lord Dunraven's Lady Graveiars, by Martagon—Saint Nitouche.

Capt. Giles Loder's Knockfeerna, by Desmond—Adula.

Lord Durham's Mistrella, by Cyllene—Ark Royal.

Major W. Astor's Hamoaze, by Torpoint—Maid of The Mist.

Mr. Cazalet's Nevsky, by Cicero—Birdswing.

Mr. Hornung's Fluff, by Eider—Trenton Queen.

W. Raphael's Marthe, by Marajax—Tagale; Tagale, by Cyllene—Tagale.

Sir Mark Sykes' Agacella, by Cyllene—Merry Agnes; Startling, by Laveno—Astrology; Queenlet, by Berrill—Queen Charming.

Sir Ernest Cassel's Vivid, by St. Frusquin—Glare.

Mr. Gray's Glisten, by Gallinule—Diamantee.

Sir John Thursby's Merda, By Gallinule—Glare.

Sir John Robinson's Oenone, by St. Serf—Guisel.

Major Gayford's Isabeau, by Polymelus—Italian Beauty.

Frank Curzon's Lady Isabel, by Marcovil—Beautiful Star.

Lord Derby's Port Sunlight, by Sundridge—Wift of Bath.

Gilbert Robinson's Rainment, by William the Third—Caparison.

Lord Rosebery's Montem, by Ladas—Kermesse; Signorinetta, by Chaleureux—Signorina; Vaucluse, by Dark Ronald—Valve.

Sir Robert Jardine's Lady Quex, by Florizel II.—Gay Duchess.

Mr. Buchanan's Preference, by Pericles—Liku.

Lord d'Albernon's Eos, by Orby—Renaissance.

Captain Forester's Keep Smiling, by Marco—Queen's Holiday.

Lord Jersey's Lynette, by Tredennis—Cockyleeky.

Col. Michael Hughes' Queen Ena, by St. Frusquin—Queen's Wake.

Lord H. de Walden's Sauce Hollondaise, by William the Third—Gallymawfry.

M. Singer's Market Girl, by Martagon—Koster Girl.

Mr. Baird's Attic Salt, by Sir Visto—Montem.

Capt. A. D. Rothschild's Widgeon, by Gallinule—Gagoul; Lindoiya, by Gallinule—Venus; Fanfarona, by Marco—Florise; Snip, by Donovan—Isabel; Catgut, by Lacatantius—Catkin.

Major August Belmont's Royal Coinage, by Minting—Royal Marriage; Cattish, by Melton—Spiteful; Moneta, by Spearmint—Jubilee.

BIG PRICES FOR THOROUGHBREDS

Some idea of the value of thoroughbred breeding in France, where, by the way, it is not left entirely to private enterprise, is to be found in some interesting details which appeared in a recent issue of "Le Jockey." The writer states that during the ten years preceding the outbreak of the great war the following horses, among many others, were exported: Jardy (South America), £25,000; Biniou (Germany), and Val d'Or (South America), £24,000 each; Gouvernant (Austria), £20,000; Nauge (Germany), £16,000; and Adam (United States), and Caius (Germany), £12,000 each. On July 19th, 1914, or a little over a fortnight before Germany declared war, Dagor and Ossian were sold to the Austro-Hungarian Government for £12,000 and £25,000, respectively; and since then Verdun has been bought by an Argentine breeder for £20,000.

Apropos to the foregoing it may be useful to mention the high-priced transactions which have been recorded in England from time to time, which are as follows: Prince Palatine (to J. B. Joel), £40,000; Flying Fox (to E. Blanc), £39,375; Diamond Jubilee (Argentine), £31,500; Ormonde (California), £31,250; Craganour (Argentine), and Cyllene (Argentine), £30,000 each; Rock Sand (to Major August Belmont), who later sold the horse to a French syndicate for £28,000; Sceptre (to Sir William Bass), Cyllene (Argentine), and Dark Roland (Germany), £25,000 each; Duke of Westminster (to George Faber—now Lord Wittenham), and Your Majesty (Argentine), £22,050 each; and Galtee More (Russia), and Ard Patrick (Germany), £21,000 each. A. W. Cox once refused £56,000 for Bayardo and the late Major Loder declined an offer of £50,000 for Spearmint. Although The White Knight, when offered at auction in 1915, only realized 4100 guineas, his value in pre-war days was approximately much higher, for when the late Captain W. R. Wyndham became possessed of a half share in the horse when in training he paid for this £10,000, and later on bought the other half for the same amount. Captain Wyndham fixed the horse's value at £32,500 when Edmond Blanc tried to buy him some years ago.

In the United States the highest price is $140,000, paid in 1912 to Major Belmont by a syndicate of English, French and American breeders, for Rock Sand. Prior to that transaction, St. Blaise was the highest priced thoroughbred sold in this country. Charles Reed, of Gallatin, Tenn., paid $100,000 for him at public auction. Other instances of high prices paid for noted horses in this country are: Meddler, $72,500; Watercress, $71,000; Hamburg, $70,000; Hermis, $60,000; Sir Martin, $55,000; Nasturtium, $50,000, and Friar Rock, $50,000.

The greatest price ever given for a thoroughbred by an American purchaser was $150,000 by W. O'B Macdonough for Ormonde. In addition it cost Mr. Mcdonough quite a nice sum of money to land Ormonde in California from Buenos Aires via England. Major Belmont paid $125,000 for Rock Sand, the next record price.

GELDINGS TO BE BARRED

Unsexed sons of great sires will start in the Kentucky Derby no more. This great classic, which in the past few years has come to be regarded as the greatest of all events of the American turf, bringing thousands of devotees of racing to Louisville each season, will continue to offer a $15,000 purse, but geldings will be tabooed. The reason for taking this step is that the Government needs thoroughbred stallions in great numbers for the work of getting military horses, and that the only way to meet that need is to make the gelding of thoroughbred stallions by breeders and owners whose interest in thoroughbred production and in racing is purely commercial, unprofitable by limiting the number of races in which the geldings may take part on any terms whatever.

It is within the bounds of possibility that the unsexed horse may ultimately be excluded from all races not of the selling-plate variety. But if we do this we will not be doing as much as the countries of Continental Europe have been doing these sixty or seventy years. In France and Germany no thoroughbred stallion is gelded until a Government veterinary condemns him as useless.

The announcement that the Kentucky Derby hereafter is to be closed to the geldings synchronizes with the declaration of the Westchester Racing Association, of which Maj. August Belmont is president, that four of the most important specials annualy renewed at Belmont Park will, from this time on, be for entire colt and fillies only. The four races are the Withers and Belmont Stakes, the Lawrence Realization and the Suburban.

Dreamy, dam of War Cloud, has been purchased by Mr. E. R. Bradley, of the Idle Hour Farm, and is now on the Atlantic on her way to this country. Dreamy, by Persimmon, is a member of the Devotion by Stockwell branch of the Layton Barb family, from which came Rock Sand, and has a fine foal at foot by Sunstar. This season Dreamy has been mated with Black Jester, and is believed to be with foal to the St. Leger winner of 1914.

The turf world is all agog over the proposed special race in which the question of the two-year-old supremacy of 1918 will definitely be decided. The above mentioned special is to be put on for the express purpose of bringing together the gelding Billy Kelly, and the entire Eternal. The proposed race is to be for $10,000 a corner, the Laurel Association to add an additional $10,000 to be paid in Fourth Liberty Loan Bonds and the entire amount donated to the Red Cross. Such a race should draw forth a huge attendance, more especially so from the worthiness of its cause. Why not go the whole thing and donate the gate receipts as well?—Thoroughbred Record.

The price paid, 6,000 guineas for the filly by Orby out of Mesange at the Newmarket sales is the second highest in connection with the annual September sales, 1918, 6,100 guineas having been paid a few years back at Doncaster for a yearling bred by Sir John Robinson at Worksop Manor. Sceptre as a yearling made 10,000 guineas at the break-up of the late Duke of Westminster's stud.

E. R. Bradley, who spent the month of August at Saratoga reports that the splendid imported colt, North Star III., which he bought from A. K. Macomber after the high priced colt had broken down while in training for the Kentucky Derby, has grown into one of the handsomest horses in this country. At the time of his importation just after his brilliant career as a two-year-old had been completed, and when the Epsom Derby appeared to be at his mercy for the following year, he was pronounced by many to be the greatest looking two-year-old ever brought to this country. But Mr. Bradley says that he has grown and thickened since then into the most splendid looking thoroughbred he ever saw, and taking into account his rich breeding (by Sunstar out of Angelic), he should prove to be of inestimable value for the improvement of the thoroughbred strains of this country.

Willis Sharpe Kilmer's three-year-old colt Sun Briar, paced by two runners and carrying 105 pounds and ridden by Claver, a former Canadian jockey, on September 11, at the Saratoga race track, ran a mile in 1:34, bettering the record of Roamer of 1:34 4-5 during the Saratoga meeting. The track was in perfect condition and Superintendent William A. Myer declared it was fully two seconds faster than when Roamer made the record.

The fractional time was 0:11 2-5. 0:23, 0:33 4-5, 0:45, 0:57 3-5, 1:09 2-5, 1:21 1-5 and 1:34.

The stewards of the Jockey Club have adopted a resolution which requests that all associations every other day give a flat race at not less than a mile and a quarter. The stewards hope that the racing associations will follow the recommendation, because it is their desire to encourage the breeding of thoroughbreds that will improve the horse for army remount purposes.

A PERPETUAL STARTER

Every patron of light harness racing has seen or read of Harvey Ernest and his big trotter Ima Jay 2:04¼, with which he has been winning regularly for four years. She made her first appearance on the half-mile tracks of Ohio and Michigan in 1915 and after showing that she was above the average Harvey prepared her for a genuine series in 1916 over the two lap courses as well as a few of the mile tracks. When the season opened she bumped into Wilkes Brewer and these mares trotted a number of races that are still considered the best that were ever seen over the double ovals. Heats were not only trotted below 2:10 which is something out of the ordinary among the two lappers, but no one ever knew who was going to win the odd heat until it was finished. That year Ima Jay also appeared at Hartford in the Charter Oak Purse. She took the word in the memorable event that St. Frisco won after a six heat battle with Mable Trask. Ima Jay went lame in this race and was drawn. Harvey Ernest, at the time, however, advised the association that he would come back in 1917 and win it. When the entries for 1917 closed his name was one of the first received and Ima Jay was returned as the winner. At the same time Ernest also advised the association that a 2:06 class would suit him in 1918 and when the $5,000 Battle Royal Purse for 2:06 trotters was announced his entry was the first received. On September 4 Ima Jay scored up again at Hartford and was again returned as a winner. Also before the decision was announced Harvey Ernest asked W. H. Gocher, the Treasurer of the Connecticut Fair, for a 2:05 class in 1919 so that he could give the people of Connecticut an opportunity to see Ima Jay perform again before she joins the free for all brigade.

Notes and News

Fifty-nine million horse shoes have been shipped to France during the past three years for the horses and mules of the war.

Johanah Treat, dam of many futurity winners, is now at the Hemet Stock Farm, where she will be mated with Wilbur Lou, the great sire of early speed.

There is a three year old colt by Peter the Great named Andy Welch racing in Kansas. He will have to step some to make as much noise as the man he was named after.

The Real Lady 2:03, has been retired from racing. Murphy shipped her from Cleveland to Poughkeepsie. She has been turned out and will be bred to Peter Volo 2:02, next year.

F. W. Wadham of Nestor, San Diego county, has a promising four-year-old by Adansel, from which he expects great things. Mr. Wadham has been a very successful breeder and is the owner of the great brood mare Johanah Treat.

C. W. Leonard of Boston is getting together a very select stable of trotters. During the North Randall meeting he paid $10,000 for the four year old filly Selah Baird and last week at Kalamazoo he gave $25,000 for the three year old colt Chestnut Peter which will in all probability start favorite at all of the big futurities. Mr. Leonard also owns the good horse On the Rhine by Bingen, now in Cox's stables.

Raisin Express, winner of the $1,500—2:20 trot at the State Fair, was purchased by Jimmy Ryan, for a consideration said to be $2,500. Raisin Express is by the Expressive Mac out of Lady Oyhee, dam of Raisin Girl. He was entered in all of the green classes on the circuit and was timed separately in a race at Sacramento in 2:05¾.

The next annual meet of the Stockholders of the Breeders Association of America, will be held at the Congress Hotel, Chicago, Monday evening Dec. 2, 1918. Judging Percherons at the International Live Stock Exposition begins early the following morning.

Only one harness race was given at the Fresno Fair this year and that was for the 2:14 pace. Frank Malcolm's Roma De won the first and second heat and first money. Time 2:15¼ and 2:12. M. L. Woy's J. C. L. taking the third time in 2:13. The other races advertised for this meeting failed to fill, not enough entries having been received under the conditions, and they were declared off.

The following item shows that the high cost of living is beginning to lose some of its terrors for J. Hooker Wilson, who raced a stable of trotters and pacers through Pennsylvania a few years ago: "Mr. and Mrs. J. Hooker Wilson of North Rushville, Ind., boast of a hen which, every morning, scratches at the door for admission. Entering, she sits in a large chair in the living room, lays an egg and walks majestically back to the chicken yard after she has been fed for her courteous service."

A few breeds of live stock outside of light harness horses have been exported to Europe. It is, however, gratifying to note that there has been a recent sale and shipment of two Percheron fillies and a stallion to Great Britain which were bought by the Hon. Alexander Parker, who has been some time in America as purchasing officer in the British Remount Service. British officers testify to the endurance, docility and activity of graded Percherons from America. and a number of Percheron breeding establishments have been started in Great Britian during the last year.

The death of George Bowerman removed another of those fine old characters. George was the most lovable of men, and during his long life surrounded himself with hosts of true friends. He was good hearted to a fault, genial, kindly, and the soul of honor. In Kentucky he stood high with horsemen of all classes, and he will be sadly missed by the visitors to the Lexington trots. Until he sustained a paralytic stroke in 1915, he was one of the leading colt trainers of Lexington, and of him it was often said that few men were more capable in handling youngsters. George's death will fall hard upon Uncle Mike Bowerman, his brother and business associate for over half a century.

EXPERIENCE

'It is natural for men to indulge in the illusion of hope" but when your horse needs treatment do not "hope" but use TUTTLES ELIXIR according to directions and the result will convince you of its merits. This statement was made by one of the well known horse trainers who declares that TUTTLE'S ELIXIR is indispensable in his stable for curing colic, locating and curing lameness and as a leg and body wash.

IT WILL BE A BIG SHOW

The List of Entries and Elaborate Preparations Insure the Success of the California International Livestock Show

(E. A. Morphy)

With a list of entries approximating a thousand, and the ineradicable interest of the entire public in any show that principally comprises living things, the first annual exhibition of the California International Livestock Show Corporation is already an assured success.

The site at Twelfth and Market streets is central and easily accessible from all parts of the city and the bay cities; the men in control are eminently representative and understand their business. Wherefore this initial exhibition ought to draw record crowds to the metropolis of the Pacific.

The only thing that seems at all problematic in the premises is what the public will call the show. "The First Annual Exhibition of the California Livestock Show Corporation" is too much of a mouthful ever to become really popular with, or even to be used as a respectful term of endearment by the masses. It is therefore reasonable to assume that the bulk of its supporters will know it either as "the Cattle Show" or "the Horse Show"; because, though the bulk of the stock on exhibition is comprised of cattle rather than horses, nevertheless horses are nearer to the hearts of most men and women—especially city men and women—and the Special Horse Show which will be held each evening from the first Monday to the final Saturday of the exhibition will undoubtedly prove the most popular part of the whole affair from the point of view of the man in the street.

Meanwhile, the entries come from farther afield, and are higher in quality than those attracted to any previous show in this part of the world.

Every section of California is represented. So are the States of Illinois, Missouri, Colorado, Montana, Washington, Oregon and Montana.

Canada is represented by the famous Hereford herd of the Curtice Cattle Co., formerly of Eminence, Kentucky, which now owns large ranch interests at Calgary, Alberta.

In the same section will be seen representatives of the celebrated Hereford herd of John E. Painter & Sons of Roggen, Colorado, and of the Hereford Corporation of Wyoming, the latter of whom are exhibiting Wyoming Prince, Young Lad 4th, Bonnie Laddie, New Era 2nd, Perfect May Lady Fairfax and other blue ribboners, and are also sending a carload of registered heifers for the sale.

A. B. Cook of Townsend, Montana, will have another famous Hereford herd at the show. J. A. Bunting of Mission San Jose, H. M. Barngrover, San Jose, and other California breeders will also be well represented in the Herefords section. William Henn of Kansas City, Mo., is sending some choice Shorthorns as well as Herefords.

One of the most notable exhibits among the beef cattle will be the unbeaten herd of Aberdeen Angus entered by Congdon & Battles, of Yakima, Wash.

Particularly fine are the Shorthorn entries; and, judging from the class and standing of the exhibitors, it is unlikely that the management will feel justified in exercising the privilege reserved under Rule 8 of rejecting as deficient in merit any individual entered under the Shorthorn section.

Maxwell & Miller of Steamboat Springs, Colorado, are coming with their good stock, but will find themselves competing with local herds of merit as high as those found anywhere. The Hopland Stock Farm, the Pacheco Cattle Co. of Hollister, the Ormondale ranch, the W. H. Dibblee estate, T. T. Miller of Los Angeles, J. H. Rosseter of Wickiup—who is also showing some wonderful Arabs in the Horse Show—T. S. Glide of Davis, the Kern County Land Co., the Roselawn Stock Farm and others, will all send representatives into the judging ring that will give the Colorado herd a run for the blue and purple ribbons.

Rosseter and Miller have both been picking up some very fine stock during the past year, and Ormondale has been producing in the get of the famous Golden Goods Jr., out of Scotch cows some of the finest youngsters ever calved in California. Mayflower IV, who took first at Sacramento the other day, with a calf by Radium at foot, will also make a fine showing for the ranch which—in the good old racing days—produced some of the finest horses ever bred in America.

The dairy breeds have also filled well. Alexander and Kellogg of Suisun, the Jack London ranch and Tom Harrison of Glen Ellen are showing their herds of milking Shorthorns.

The Holstein-Friesians are represented by some large herds and very fine individuals from the Palo Alto Stock Farm, the Toyon Farm Association of San Jose, and other breeders of fine dairy stock.

A. J. Welch of Redwood, L. D. Smith of Berkeley, A. B. Humphrey of Escalon and W. B. Duke of Likely are among the exhibitors of Guernseys. Likely's herd includes Theodora of Hidden Valley, Elaine, Imp. Arcadia of Linwood, Bijou's Prince, Imp. Argie of Linwood, Chenes Princess and other blue ribboners.

E. B. McFarland's celebrated Ayrshires from San Mateo, including Steybrae Improver and Steybrae Captain are also entered, and also a herd from J. Henry Meyer of Watsonville.

Then there are J. W. Higdon, Guy H. Miller of Modesto, A. L. Smith, J. E. Thorp and other well known California breeders of dairy stock, who will all be represented in the various sections wherein they specialize.

The University of California is sending in large exhibits in the commercial classes of cattle, sheep, swine and draft horses, and also milch goats. It is the largest single exhibitor, and is coming out splendidly to assist in the educational work of the exhibition—which, after all, though the general public rarely recognizes it in such a light, is the chief purpose of all such functions.

Many of the most noted swine breeders on the Coast will be competing in the various classes under the swine section.

R. J. Fox of Lyons, Oregon, A. L. Bassett and M. Bassett of Hanford, Alex D. McCarty of San Francisco, A. Buckland & Sons of Fresno and others compete in the Poland-China class. A. B. Humphreys of Escalon and W. B. Carpenter of Red Bluff are among those with Berkshires entered; Fred M. Johnson of Napa, and H. P. Slocum & Son, Duroc-Jerseys, Lea Blakemore of Lakeport, Chester Whites, and so on.

The pick of the Oregon and California flocks will be represented in the sheep section.

Bishop Bros. of San Ramon will be represented by the famous San Ramon Shropshire flock which swept the boards at the Chicago International Exhibition. Other fine animals of the same breed are entered by R. J. Fox of Lyons, Oregon.

J. G. Hubbard of Monroe, Oregon, who is sending down no less than three splendid flocks, is a competitor in the Hampshires, Southdowns, and Lincolns classes. Ellenwood & Ramsay of Red Bluff are showing their famous Corriedales, and Bullard Bros. of Woodland, their equally noted Rambouillets.

The draft horses will form one of the finest features of the exhibition and one of the most popular. Some great stock will be on view.

Clydesdales from the Dibblee Estate, Percherons from L. A. Hall of San Jose and the University of California, Belgians and other breeds from Ruby & Bowers of Davis and others, and the All-Champion Shire horses from Easton & Ward's Blackhawk Ranch at Diablo, Contra Costa Co.

Anwick Arthur heads this famous string with nine successive championships in the get-of-sire class. He will be shown with Blackhawk Chessie—the champion pair at the state fairs of 1916 and 1917. He is the sire of many champions—Blackhawk Gay Lad, Blackhawk Beauty and the rest. Salvador Conqueror, who took his first as a foal at the Panama Pacific Exhibition and has never since been defeated, is another Blackhawk exhibit, so are Blackhawk Senator, Flawford Daisy III, Hawton Bounce and a lot of others, every one of which is a blue-ribboner.

Flawford Daisy won the sweepstakes over all draft breed mares at the Panama-Pacific Exhibition, where Hawton Bounce took the Junior Championship. The pair will be shown together at the forthcoming show in a two-wheeled Scotch dump cart.

The horse show at night will, of course, be the leading entertainment feature of the exhibition, and has attracted entries from the leading California and Eastern stables. The program will include jumping, exhibitions of the Haute Ecole and other items wholly new to San Francisco livestock exhibitions.

Among the thoroughbreds shown will be the famous stallion, Friar Rock, recently purchased and brought to California by John H. Rosseter of the Wickiup Ranch, who is also showing the thoroughbred Arabs, Disguise and Araby. A. K. Macomber is showing his new stallion, Liberty Loan, by Dick Fennell, out of Martha Palmer, winner of the Latonia Derby, for which he has just paid $20,000. Howard P. Renshaw has entered the brown five-year-old stallion Hesperous, by Sun Star (winner of the English Derby), out of the Oaks winner, Our Lassie, which is some class as breeding goes.

Tom Bass is sending his Haute Ecole horse, Mille May, all the way from Missouri, Houchin of Jefferson City is sending gaited and saddle horses. From Chicago are coming gaited and saddle horses and jumpers.

Taken altogether, the class of thoroughbreds and other show horses entered would be difficult to beat in America or Europe.

There will also be draft horse exhibitions at the night shows—draft horses of all breeds in single, double, four and six-horse teams.

Another new feature of the exhibition will be the commercial of single steers, carloads of fat steers, pens and carloads of fat swine and sheep, and dressed carcasses of beef and mutton.

Nearly six acres are now under canvas at the livestock grounds at Twelfth and Market streets, and in the big judging arena, where the mighty horse shows also will be held, there will be seating accommodations for five thousand spectators.

California is the only state in the Union where a midwinter livestock show under canvas is a physical possibility, and the indications are that this initial venture promises to be the forerunner of an annual institution that will be the greatest of its kind in Western America.

Artillery Horses on the Western Front in France
Battery going into action. The gun has just been unlimbered and swung into position while the ammunition limber has just been drawn into position beside the gun.

There are doubtless few of our readers who have not seen some of the pictures taken on the Western fighting front in Europe, in which unquestioned great dependency on the horse is portrayed. By those remarkable photographs that come back from the Allies' lines, we are constantly reminded that through shell-torn fields and miry waste of trampled ground and water it is not the motor power which conveys ammunition to the guns and the food to the soldiers. It is the horse—dependable in all emergencies—that makes the last dangerous lap with the shells which are necessary in repelling the advances of the barbarous hordes. The nature of the ground makes it impassable for motors, but horses can be safely relied on to avoid shell holes and work patiently through the deepest mud and do their essential part, a part which they perform so well.

It is well to remember this, when occasionally we hear talk of the disappearance of the horse from the world's useful occupations, and also to recall that more than minor operations in the great conflict have been carried out by the cavalry. In fact, it is the thought of the greatest military leaders that cavalry will in the crucial period of the war play a very important part.

It will be well, also, to bring these facts to the mind of those who, with narrow vision, have counselled the curtailment of racing during the war. If breeding is not to have the Government encouragement which is given by other nations, at least it should have the stimulating influence which the sport exerts. Military men have been counselling some active and effective means of keeping up the remount service of our Army. To cut off racing would be directly operating against the encouragement the breeding industry so sadly needs. It would have been in no way unpatriotic or unseemly to keep racing up to the fullest extent during the period of the war, both as a matter of amusement and as a measure of encouraging breeding. On the contrary, it will be serving the best interests of the country.

FRANK VAN NESS RETURNED

The old time driver, Frank Van Ness, who has been in France for the past ten or twelve years, and who has been in the battle zone as a veterinary dentist since the beginning of the war, returned to America August 5, in charge of eight race horses owned by John Sanford of Amsterdam, N. Y.

Van Ness is getting along in years, as he was born in Fairport, N. Y., in 1850, and began racing in Grand Circuit company in 1872, when he brought out the Gooding's Champion gelding, St. James, which he raced from coast to coast and sold to Lucky Baldwin for $13,000, after he had given him a record of 2:23¼ and won over $15,000 with him.

Albemarle was his next pupil. He was succeeded by Bonesetter, Little Brown Jug, Robert McGregor, Fred Douglas and France's Alexander, before Van Ness removed from Rochester, N. Y., to Lexington, Ky., and began developing the get of George Wilkes which was then attracting world-wide attention.

While in Kentucky Van Ness brought out The King, Alcyone, Albert France, Lumps, Isaac and Sister Wilkes, while he was also very fortunate in getting Harry Wilkes, the greatest trotter in the family. Frank made his first campaign with him in 1884, when he won sixteen out of nineteen starts, one of them being the $10,000 Charter Oak Purse at Hartford. At that time the horse was owned by W. C. France, but Van Ness continued to train him after he passed to James H. Temple and Sire Brothers, for whom he also raced Gossip Jr., and that splendid mare, Rosalind Wilkes, in the first flight of light harness performers.

After going over to the runners, Van Ness had a fair run of success, but his greatest triumph was scored in 1892, when he won the Futurity with the hundred-dollar colt Murello. Later on he located in the West and raced in Montana and California before going to France.

BIG DEMAND FOR HEAVY DRAFT HORSES ANTICIPATED

Editor, Breeder and Sportsman,
Dear Sir:

I have but recently returned from a business trip through the Canadian Northwest and down the Pacific Coast, and have just finished going over my correspondence with horsemen in the Corn Belt States. It occurs to me that you and your readers will be interested in knowing about the horse breeding situation in the districts mentioned.

Northwest Canada believes in draft horses, especially Percherons, as is shown by the fact that her farmers bought more than 1000 head during the 19 months ending July 1st, 1918. They want more good Percherons there, but have been hard hit this year by the drouth, and because of lack of feed, grain and money, will not be in as good a position to buy breeding stock this coming winter as in the past two years. I look for considerable trade, however, in spite of the partial failure mentioned.

On the Pacific Coast the demand for horses standing over 16.2 and weighing over 1700 pounds is in excess of the supply, but there is a surplus of smaller stuff. Fred H. Bixby of Long Beach, California, who has very large ranches at seven different points on the Coast, and who is one of the best informed horsemen, says:

"In regard to the horse conditions in the State of California, I am of the opinion that a great deal of the former horse breeding companies have gone out of business, but this last spring the horse business seems to have begun to look up, and a good many people are breeding again, and I think within a year or two the business will be in a flourishing condition.

"The mule market is improving in rapid strides. I am quite positive that within the next two or three years, regardless of the tractors and motor trucks, the horse and mule business will be back to its normal state.

"We find no trouble in disposing of our big horses and big mules, but the horses weighing from 1200 to 1400 pounds and the mules under 1000 pounds are poor sellers.

"I am of the opinion that the owners of Percheron, Shire, Belgian, or Clydesdale stallions could sell them now quite easily on the Pacific Coast, provided they put a reasonable price on their animals.

"I think the day of the $3,000 to $5,000 draft stallions for use on grade mares is over for at least the next 10 years. The stallion men will have to get down on earth if they want to do any business, and if they do, they can make a whole bunch of sales."

Miller and Lux who own 10,000 horses in California alone, believe that heavy draft horses will be in strong demand within a few years, and at high prices. Anticipating this they are breeding every available mare, 1800 to stallions and 700 to jacks—and intend to be prepared to reap the benefit of the probable demand.

In Utah and Colorado the best informed horsemen are of the same opinion. In every district visited there was a decided shortage of real drafters, and of foals, yearlings, or two year olds that promised to develop into draft proportions. Many men reported that they were even now in the market for more big farm teams and know not where to get them.

The inclination to swing all attention to grain and meat production has unquestionably cut the breeding of heavy work horses and mules to a dangerously low level. We must not permit our reserves to fall away so that agricultural production will be impaired. It is up to each farmer of the Corn Belt to raise the horses and mules he will need for replacement purposes three years from now, and to rear enough surplus to provide for at least two other farms that raise none; for there are thousands of farmers in the East, South, and West who do not produce their own work animals, and who must buy.

Please give publicity to these facts, and let us not fail to produce the horse power that is so urgently needed in this critical time. The war will be won by the side with the largest reserves.

Sincerely yours,
WAYNE DINSMORE,
Secretary.

THE HORSE OF THE HOUR

It is one of the truisms of the late John Splan that the greatest menace to the horse was the talk of motors at the breakfast table. As the day is begun so is the week and the month of the year apt to follow. Time was when the chief topic of conversation was upon the prospects of the favorite colt and his chances of winning at the County Fair, in the show ring or at the track. Now we discuss hourly the merits of certain autos, talk learnedly about ignition and transmission, or belate the stupidity of some chauffeur who consumes too much time in his journeys.

Those shady thoroughfares once frequented by men and maidens lost in admiration one of the other, while old Dolly jogged quietly along with the lines tied around the whip are now converted into rock-ribbed highways where speed demons reign supreme.

It is little wonder, in view of all these facts, that the value of horses in the United States has decreased, while the value of all other animals has increased in leaps and bounds.

During the past three years the number of pure-bred light stallions standing for public service in California has decreased 50 per cent.; in Iowa, 48 per cent.; Montana, 32 per cent.; South Dakota, 38 per cent.; Wisconsin, 20 per cent.; Illinois, 25 per cent.; Indiana, 25 per cent.; Kansas, 23 per cent.; North Dakota, 30 per cent.; Oregon, 25 per cent.; and Pennsylvania, 36 per cent. From preliminary reports received from many sections, it is indicated that there has been a further marked decrease in 1918, therefore, we are forced to admit that in a few years the breeding of light horses will have been suspended unless encouraged by Government activities.

It is apparent, however, that the light horse interests must soon reach the lowest ebb and that the future outlook must be more encouraging. Whatever effect the tractor may have will be felt more severely by the draft horse, as the work both can do on the farm is analogous and the horse that will be retained as best adapted to all varieties of service which the tractor cannot render is the general purpose horse, preferably the Standardbred with size and pleasing conformation.

The present activities of the Government along the line of encouraging military horse breeding is a step in the right direction. For many years old world nations have expended millions in perfecting this type of army animal. Amercia affords, through her racing breeds which have been tempered in the crucial fires of the race course, the foundation which has been laid broad and deep and enduring. In addition to these, the Morgan and the Saddle horse can be used to advantage in localities where the fancy of the breeders favor their production. The new plan should provide a classification and suitable prizes to be given by the State Fairs, with final adjudication at the National and International Shows and the successful stallions at those courts of last resort should bear the stamp of Government approval.

The subject of breeds is still a potent one and will continue so, as long as each family of horses has friends to expound its virtues. To those of us who recall our boyhood days on the farm and the multitudinous labors performed by the trotting bred horse, there can be but one answer. It was the descendants of the Morgans, the Blackhawks, the Bashaws and the Hamiltonians that turned the first furrows of those Western farms and whose sons and daughters have done more than all other breeds combined to transform a wilderness into a paradise of happy homes. The best cavalry horses of today still bear unmistakable signs of that blood and we can but believe that the chosen horse of the future must rely largely upon the Standardbred for the poise, serviceability and endurance which is absolutely essential.

—CAPT. WALTER B. PALMER, U. S. A.
—American Horse Breeder.

WINNERS AT THE STATE FAIR HORSE SHOW

Class 1—Best pair light harness horses, Mrs. C. B. Anderson of Pleasanton.

Class 2—Saddle horses shown at three gaits, L. B. Goldstein of San Francisco, first; Mrs. Winslow Anderson, second; Mrs. L. L. Johnson of San Francisco, third; Mrs. Winslow Anderson, fourth.

Class 4—Five-gaited stallions, Mrs. Frederick McCormick of Los Angeles, first; Bridgford Company of San Francisco, second.

Class 5—Best pair of saddle horses, Mrs. Winslow Anderson, first; Mrs. C. B. Anderson, second; Mrs. Arthur W. Pike of Redwood City, third.

Class 6—Green hunters, Mrs. Thomas Mangan, first.

MURPHY'S HOME

(By W. H. Gocher.)

There is an old saying that if a man has a fad you will find evidence of it in his home and thrice fortunate is he whose hobby is in the line of his profession. No better evidence of this fact can be found than what Thomas W. Murphy has gathered around him at Poughkeepsie, N. Y. One night last winter when the wind was making the snow and ice rasp against the glass enclosed porch, I made a round of the gallery of champions which decorates the walls of the living room and as I moved from one painting to another, Murphy's remarkable career in the sulky passed before me like pictures on a screen. In a corner near the door to the hall Hetty G., rather thin and angular but high headed as a hawk looking for someone to have a scrap with, peers from her frame at Susie N. She brought Murphy on to the mile track in 1904 and was followed in 1905 by the Moko filly. The name of the latter also recalls how Edward Thompson happened to purchase her.

One evening during the winter of 1905, he was going from New York to Brooklyn on the ferry. As the boat pounded its way through the ice in the slip he got a glimpse of Tommy Murphy among the passengers. When he joined him he saw that there was something wrong and in his blunt, good natured way, the big oysterman asked for an explanation. After considerable questioning he learned that James Butler, the owner of Hetty G., was so well pleased with the manner in which Murphy had raced his pacer that he told him if he could find a trotter he would buy it and place it in his stable. Murphy was then returning from an interview with Butler during which he had told him of a filly that could in his opinion win nearly all of the futurities. Mr. Butler, however, decided not to buy her as he had just purchased The Phantom by Boreal and shipped him to California to Monroe Salisbury to prepare him for his engagements. Before leaving Murphy told him that the Moko filly could distance The Phantom and when he repeated it to Edward Thompson, the latter said: "Do you really think she can?" and when Murphy assured him that he was positive of it, he drew a check book from his pocket, wrote his name on the bottom of a blank check and handed it to Murphy with the remark, "Well, Tommy, go and buy her for me." Murphy never got off the boat. He returned to New York and he was not seen again on Long Island until Edward Thompson owned Susie N.

The following summer the Moko filly made good. In her first race at Buffalo and in the first heat she ever won she distanced The Phantom. She also won her engagement at Poughkeepsie while at Cincinnati she landed the Horse Review Purse and at Columbus the Kentucky Stock Farm Purse, making her record of 2:09¼. At Lexington, Susie N. also finished second to Miss Adbell in the Kentucky Futurity and won the Lexington Stake in which she again distanced The Phantom.

After this trip Murphy went on and completed Edward Thompson's royal flush of winners. In 1906 he paraded Rudy Kipp and won nine out of ten races with him, giving him a record of 2:04¼ in a dash race at Columbus. For some reason a picture of this Tennessee pacer does not appear in the gallery but the balance of them are there, the others in the group being Native Belle, which startled the world when she cut the two year old record to 2:07¾ in a race in 1907, the "old plough horse" R. T. C. in his light chestnut almost buckskin coat, who mowed them all down in 1911, and Frank Bogash, Jr., the first gelding to race across the two minute line.

Of the other paintings the latest arrival is the big roan colt Trampfast as he looked when he defeated Dorothy Worthy, dam of Chestnut Peter, in the two year old division of the Kentucky Futurity in 1907, Peter Volo, the champion two, three and four year old, whose record of 2:02 was made in a race, the black coated Anna Bradford that came within three-quarters of a second of entering the two minute list in her three year old form, and Lassie McGregor, a winner of the M. & M. at Detroit, and which broke down while being warmed up for the Charter Oak Purse at Hartford in 1914. The 1915 campaign brought two champions to the gallery, one of the pair being Peter Scott, the largest money winning trotter in the history of light harness racing, and the other Directum I., the world's record pacer in the open.

At that time it looked as if there were no more worlds left for Murphy to conquer. Still during the last two years he brought out The Real Lady and reduced the two and three year old records of Peter Volo. She has a place of honor over the piano on which Murphy was drumming out a snatch from an opera while I was looking at the paintings. These are, however, only a few of the performers that decorate the walls of Murphy's home. At every turn some celebrity which he has driven peeps out from a frame, many of them being snapshots in action. On the porch near a door George Gano, winner of the Chamber of Commerce, is looking over his driver's shoulder while Baroness Virginia, his first Kentucky Futurity winner, has been assigned a place near Innerguard, Don Derby, Leland Onward, Copa de Oro, the sire of Oro Fino now making his presence felt on the Circuit, Pan Michael, one of Dr. McCoy's products, the old standby Brace Gordle, and Locanda slipping through at the pole at Lexington when he defeated Nathan Straus in 2:02. These with scores of photographs of racing scenes on many tracks where the Murphy colors have appeared in front form the warp and woof of this remarkable reinman's surroundings when he is at home preparing his stable for another campaign and which also make an appropriate setting for the cups and trophies that were won by his mounts.

In this respect Directum I. appears to have been the most fortunate. His Pittsburg admirers presented Murphy with a gold cup to remind him of the mile in 1:59¾ over the Brunot Island track in 1916 while the preceding year he was awarded a cup at Hartford for cutting the track record to 1:58½, another at Syracuse when he made his record of 1:56¾, while the New York State Fair Commission went still further and presented him with a silver tea service. Directum I. was also awarded still another trophy when he defeated Peter Stevens over the half-mile track at Allentown, Pa.

The annual visits of the Murphy stable to Cleveland are recalled by the cup awarded Independence Boy for winning the fastest heat paced at the meeting in 1911 as well as the trophies which went with the races won by Longworthy B. and Marigold in 1913, Peter Scott in 1915, Expressive Lou and Maple Tree in 1916, and Royal Mac last year. Peter Volo's victory in the Horseman and Spirit of the Times stake is recalled by one of the splendid trophies which D. J. Campau always presented to the winner. It has been assigned a place near the one awarded J. Malcolm Forbes, the half- brother of his sire, at the National Horse Show the preceding year.

A Walnut Hall Cup bears silent testimony of R. T. C.'s last victory. It stands near the massive piece of plate which the Pastime Stable gave Murphy in 1916 for his assistance in connection with the speed trials of Lee Axworthy but none of them are valued as highly by their owner as the trophy which the citizens of Poughkeepsie gave him in 1911 when he returned from one of his most successful campaigns or the cup awarded Hetty G. after she won at Island Park, Albany N. Y., away back in 1904, when his star was beginning to be seen on the horizon.

RIVERSIDE FAIR AND RACES

One of the most successful Fairs given in Southern California in some years was held at Riverside, Oct. 8 to 12. The agricultural and live stock exhibits were large and varied the racing excellent and well conducted. Large and enthusiastic crowds were in attendance every day of the meeting. The success of the Fair demonstrates properly exploited county Fairs and race meetings can be made popular and successful even under present adverse conditions.

THE CALIFORNIA STATE FAIR

Notwithstanding the adverse conditions that exist at the present time the California State Fair this year was from every point of view a success and credit to the management.

The Industrial and Agricultural exhibits were on a par with those of previous years, and the maneuvers of the soldiers from the encampments and the sailors from the Naval Training Station were not only very entertaining but also instructive.

About all the horse racing in California this year was given at the State Fair, while the fields were small the racing was excellent. The following is a summary of the events:

August 31

Stanford Occident Stake, three-year-old trotters; $3,000.

Edith Carter, b f (T. E. Ward), owner C. Silva	1	1	1
Barbara D., b f (D. H. Smith), D. H. Smith	2	2	3
Sequoia, ch f (W. T. Tryon), H. S. Cowell	3	3	4
Esmeralda, b f (C. A. Durfee), C. J. Berry	4	4	2

Time—2:13¼, 2:14½, 2:13½.

2:14 class pacers; $1,500.

J. C. L., b g (F. Townsend), M. L. Moy	1	1	1
Roma D., g m (J. E. Montgomery), F. Malcom	3	4	2
Harry Mc, b g (M. Leggett), J. Leggett	4	2	3
Bradmont, b g (H. Frellson), Mrs. P. Kohn	5	3	4
Surety, b h (A. Schwartz), J. J. Ryan	2	5	5
Emma M., b m (M. Malough), W. Malough	D		
Silver Tips, b g (J. Boillar), C. W. Short	D		

Time—2:05½, 2:07¾, 2:08.

Five and one-half furlongs, running—Hindla, b m (W. A. Wells), won; Coreen b m (Hall), Covan, second; Apache Kidd, blk g, third. Also ran. Onota, Kildo, Isom, Aina. Time—1:08.

Three-fourths mile, running—Emilda ch m (J. L. Glenn), won; Lady St. Patrick, ch m (W. A. Wells), second; Klickatatt Blossom, b m (J. D. Kenyon), third. Also ran. Frank G. Hogan, Moonlighter, Duke Vansain. Time—1:15.

One mile, running—Afternight br g (W. H. Barnes), won; McClelland, ch g (C. E. Jones), second; Louis Irene, br m (Lee Williams), third. Also ran. Spangled Duchess, Marguerite W., Right Smart. Time—1:42¼.

September 2

2:09 class trotting, purse $1,000.

Grattan Boy, b g (H. Smith), Bailey	1	1	2
San Felipe, b g (W. Gallup), C. F. Silva	6	2	1
Miss Frisco, br m (Al. Schwartz), J. J. Ryan	4	3	3
Pegasus, b h (C. A. Durfee), I. I. Borden	3	4	4
Ella M. R., b m (G. Machado), G. J. Giannini	2	5	5
Elbaloma, b g (W. Tryon), Lapanza Stable	5	6	6

Time—2:07¼, 2:10¼, 2:09¾.

State Fair futurity, three-year-olds, pacing, purse $2,000:

Hemet Queen, ch f (F. E. Ward), F. E Ward	1	1	2
My Sweetheart, b f (C. A. Durfee), I. L. Borden	2	2	1
Tennessee Bill, b c (J. Montgomery), J. Montgomery	3	3	3

Time—2:16, 2:12¼, 2:13¾.

Selling, handicap three-fourths mile—Hindla, b m (W. A. Fells), won; Moonlighter, b g (W. H. Barnes), second; Klickitat Blossom, b m (J. D. Kenyon), third. Time 1:14½. Quay, Aina, Louise Irene and San Diego White also ran.

Five and a half furlongs—Onota, b m (C. E. Jones),won; Skyball, ch g (F. Becknell), second; Apache Kidd, blk g (E. W. Schute), third. Time—1:08. Muriels-Pets, Ida Levina, Perch and Applieto also ran.

One mile, handicap—Afternight, br g (W. H. Barnes), won; Emilda, ch m (J. L. Glenn), second; Antrim, ch m (Hall-Covan) third. Time—1:41¾. McClellan also ran.

Special performance against time to beat 2:23 pacing—Varolyn, b m (J. E. Montgomery). Time—2:07¼.

September 3rd.

2:20 class trot, $1,500.

Raisin Express, b g (C. M. Clark)	1	1	1
Pfister's Linwood s g (W. Howell)	2	4	2
By Pass, b g (W. Gallup)	3	2	4
Yoncalla, choc g (Al Schwartz)	4	5	3
Skyrocket, b g (C. W. Durfee)	5	3	5
Trigone, b g	d		

Time—2:13¼, 2:14, 2:14½.

2:07 class pace, purse $700.

O. U. C. b g (H. Smith)	1	1	1
Directus Mac., br m (Al Schwartz)	2	2	2
Julia M., br. m (A. M. Allen)	3	3	3
Silver Tips, br g (C. W. Shaw)	4	4	4

Time—2:08¾, 2:10¼, 2:10¼.

One mile running—Afternight br g (Hill), won; Emilda, ch m (Gitchell), second; Spangled Dutchess, b m (Rapeje), third. Time—1:42.

Special performance against time to beat 2:30—Electric Forbes, b h owned by J. E. Montgomery (Montgomery). Time—2:17¼.

September 4

State Fair Futurity No. 7, three-year-old trotters:

Edith Carter (C. F. Silva)	1	1	1
Barbara D., b f (D. H. Smith)	3	2	2
Sequoia, ch f (W. Tryon)	2	3	3
Esmeralda, b f (C. A. Durfee)	4	4	4

Time—2:14¾, 2:16¼, 2:17¼.

2:29 class pace, purse $1,500:

J. C. L., b g (F. Townsend)	1	1	1
Roma D., b m (J. E. Montgomery)	2	2	2
Emma M., b m (W. Malough)	3	3	3
Surety, b g (A. Scnwartz)	4	4	4

Time—2:05¾, 2:08½, 2:09.

One-half mile dash for maiden two-year-olds—Shamrock Green, ch f (Becknell), won; Tambien II., ch f (Campbell), second; Frank Dayton, b g (B. Sanders), third. Lady Campbell, Lady Worth and El Primo also ran. Time—:50 4-5.

Five-eights mile dash for three-year-olds and up—Louise Irene, br m (J. D. Kenyon), won; Kildo, b g (L. Williams), second; Borel, b g (J. Evans), third. Valley V., Tell, Sir Victor, Ida Lavina, Ray San Sain and P. Perch also ran. Time—1:02.

Three-quarter mile dash for three-year-olds—Frank G. Hogan, b g (W. H. Brown), first; Cruzados Jr., b g (E. Evans), second; Spangled Dutchess, b m (Sapeja), third. San Diego White, Moonlighter and Quay also ran. Time—1:15.

September 5

Governor's stake, 2:20 class trot, purse $2,000.

Gratten Boy, br g (H. Smith)	1	1	1
Little Jack, ch h (C. F. Silva)	3	2	2
Ella M. R., b m (Machado)	4	3	2
The Raisin Express br g (J. Broiller)	2	4	d

Time—2:00½, 2:08½, 2:14.

Special free-for-all pace, $500 purse and cup:

Bret Hale, br g (W. Tryon)	1	1	1
Bondalene, br m (C. F. Silva)	2	2	2
Rastus, br g (La Penza stables)	3	3	3

Time—2:05½, 2:07¼, 2:07½.

Jastrow handicap, selling five and one-half furlongs—Mazie Barber, choc f (W. Schute), won; Cruzados Jr., br g (J. Evans), second; Onota, br m (J. McBride), third.

Ben Ruch handicap, three-fourths of a mile, purse, $500—Master Franklin, b g (C. E. Jones), won; Skyball, choc g (F. Becknell), second; Hindla, br m (W. A. Wells), third.

One mile and one-sixteenth, purse $500—Afternight, br g (J. Hill), won; Emilda, choc. m. (Ed Gitchell), second; Coreen, br m (W. H. Debolt), third.

September 6

2:15 class trotting, purse $700.

Miss Frisco, (J. J. Ryan)	3	1	1
Sky Rocket, b g (C. A. Durfee)	1	2	3
Little Jack (W. W. Gallup)	4	3	4
Kate Gingle (Williams)	2	4	2

Time—2:12½, 2:13¾, 2:14½.

Half mile dash for maiden two-year-olds—El Primo, ch c (L. L. Allen), won; Tambien II., ch f (H. C. Campbell), second; Frank Dayton, b g (B. Sanders), third. Lady Worth and Lady Campbell also ran. Time—0:51.

Beaten non-winners, five and a half furlongs—Apache Kid, blk g (S. A. Passey), won; Borel, b g (J. Evans), second; Perch, b m (G. Faulkner), third. Time—1:08½.

Dudley handicap, three-fourths mile—McClelland, ch g (J. McBride), won; Von Dillon, b g (B. Powers), second; Spangle Dutchess, b m (Rapeje), third. Time—1:15.

Special pace to beat 2:15—Vesta Vernon, br f (McKinney). Time—2:11¼.

Special pace to beat 2:25¼—Vini McKinney, by McKinney, dam by Oso. Time—2:19¼.

Stanford Oxford Futurity for pacing three-year-olds—My Sweetheart, b f (C. A. Durfee). Time—2:37.

September 7th

2:11 pace, purse $1,000.

J. C. L., b g (F. Townsend)	1	3	1
Roma D., g m (J. E. Montgomery)	5	2	2
Harry Mc., b g (M. Leggett)	4	1	3
Emma M. b m (W. Malough, owner-driver	2	4	8
Surety, b g (A. Schwartz)	6	9	5
Bradmount, b g (H. Freilsen))	8	6	4
Silver Tips, b g (C. W. Short)	7	7	6
Julia M., b m (A. M. Allen)	8	6	4
Dixon Boy, b g (W. Gallup)	3	5	d

Time—2:06¾, 2:09½, 2:07¾.

Free-for-all trot, purse $1,000.

Allie Lou, b m (F. E. Ward)	1	1	1
San Felipe, b g (W. Gallup)	2	3	2
Gratton Boy b g (H. Smith)	3	2	3
Ella M. R., b m (Machado)	5	5	5
Pegasus, b h (C. A. Durfee)	2	4	d

Time—2:09, 208¾, 2:11¾.

One half mile, running—Harry D., ch g (J. B. Watkins), won; Onota, b m (C. E. Jones), second; Mazie Barber, ch f (C. W. Schute), third. Also ran—King Dick, Bundy Doon, Perch, Lady St. Patrick, Ida Levine, Tell. Time—:49.

One mile, running—Spangled Duchess, b m (H. B. Rapeje), won; Antrim, ch m (Hall and Covan), second; Moonlighter, b g (H. W. Barnes), third. Also ran—Cruzados Jr., McClelland, Right Smart, Ruthland Arms, Frank Dayton, Isom, Aina. Time—1:43.

One mile, running—Emelida, ch m (J. L. Green), won; Louis Irene, br m (Lee Williams), second; Hindla, b m (W. A. Wells), third. Also ran—Coreen, Marguerite W. Time— 1:42½.

Performances against time:

To beat 2:30¼.

Vanna, 2:31½.

To beat 2:17¼.

Electric Forbes, 2:16¾.

THE BIG MEETING AT LEXINGTON

The big meetings on the Grand Circuit in the east are not only drawing big fields of horses but a big attendance and increased interest in harness races. The meeting of Lexington opened most auspiciously with perfect weather conditions. The equine stars from all over the United States were present and brilliant crowds in attendance to watch them race.

A new system of betting was introduced at the track for the first time. The mutual machines had been installed since last year, many thinking them more liberal and fair than the regular books. Whether they will prove more popular than the old-fashioned method of wagering will not be known until after the meeting is over, but it seems sure that they will. The plan of racing has also been altered, as nearly all races, excepting the futurities, are on the three-heat plan. This is the forty-sixth annual meeting, and the $90,000 to be disbursed this year will make $2,422,280 that has been paid out at Lexington to date.

SUMMARIES

Sept. 30—2:07 pace; purse $1,000.

Belle Ancantara, b m, by Sir Alcantara—Belle Starr, p. 2:07¼, by Reno's Baby....McMahon 1 1 1
Tommy Direct, b g, by Director Joe..McDonald 3 2 4

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Sportsmen's Row

The run of salmon in the Sacramento river this year is said to be the largest in the last 18 seasons.

Mountain quail are plentiful in Nevada county, fishing is excellent and larger fish are being caught in mountain streams.

* * *

Always carry your hunting and angling license with you. By doing so you may avoid trouble and lengthy explanation.

Gray Eagle Rexine, bred by J. C. Netz of Los Angeles, and considered one of the best of American bred Airedales has just taken the winner's ribbon at the Detroit and Louisville shows. Some honor for a California bred.

* * *

Every man in America should keep up his trapshooting, for who knows but what before long he may get his chance at shooting at hand grenades in France, which is some bully little sporting proposition and should appeal to all sportsmen who are lovers of the clay bird.

W. J. Green, deputy, recently transferred 100,000 black bass, striped bass, cat fish, shad and other fishes from the land-locked holes of Paradise Cut, in Sa Joaquin county, to the tidewaters of the San Joaquin and Old rivers. The fish would have all died had they not been saved by being transferred.

Miss Jean Forgeus, well known for many years as the leader in Russian wolfhounds, is now located at Santa Cruz and is devoting her time to Red Cross work. She has an animal annex to the salvage shop and wants a donation of a litter of fox terrier pups to sell for the Red Cross. Any fox terrier fancier who has a litter or maybe a lone pup cannot do better than devote them or it to this purpose.

The stock of a shotgun or rifle is a lot more important that most shooters realize. Many hunters, who take great pride in the bore of their rifle barrel and in keeping the slightest speck of rust from any metal parts, do not seem to care a hang what happens to the wood parts on a gun so long as they do not fall off entirely. The scratched, loose, warped and dried-out stock is an all-too-frequent sight.

Women trapshooters on the Pacific coast are mighty capable performers and seem to have the edge on their Eastern sisters. Take, for instance, the shooting of Mrs. A. C. O'Connor, of Spokane, Wash., in the Inland Empire Handicap, which she won from a field of 100 men by breaking 49 out of 50 targets. And then we find Mrs. C. E. Groat shooting through the Pacific Coast Handicap with an average of better than 93 on 600 targets. And there are a number of other fair Dianas on the west coast who are just as proficient as the two mentioned above.

Annie Oakley, the greatest of all women trapshooters, and one of the greatest shots with any kind of a firearm the world has ever known, is giving instructions in the art of shooting at the Wentworth Gun Club, Portsmouth, N. H., daily and recently gave an exhibition for the benefit of the men connected with Forts Stark, Foster and Constitution. Miss Oakley has visited every camp and cantonment in the East and given exhibitions of her prowess with firearms, and is willing to spend all of her time instructing soldiers in the fine art of shooting.

The Hun "boody-traps," of which we are hearing again now that he is in retreat, are many and various, but none is so fiendish, surely, as that described in an exchange the other day. A kitten was discovered nailed by the forepaws to the door of a house, and was when discovered mewing piteously and struggling to get free. A British soldier rushed up, and with the natural instinct of pity for the dumb animal, and pulled out the nails. There was immediately an explosion, which flung his mutilated and dismembered body across the street. The kitten was merely the bait on a "trap," and advantage was taken of the humane instincts of the British Tommy in devising it. I should say that this very humorous device will cost the Germans many men for that one.

Oregon issues free hunting licenses to veterans of the Indian and civil wars and to pioneers.

All shore birds, with the exception of Jacksnipe, are protected throughout the year in California.

It is more than likely that the Grand American Handicap trapshooting tournament will be staged by the South Shore Country Club of Chicago, Ill., in 1919, 1920 and 1921.

A new Gun Club has been organized at Gridley, Cal., the grounds adjoining the grounds of the Wild Goose Club where mallard and sprig are reported very plentiful. In that vicinity a limit bag will not be hard to obtain for some time.

The best trapshooting since Lester German bowled over 349 targets at the Westy Hogans three years ago was done by Harry Lorenson, of Newman, Cal., at the Los Angeles Club tournament, of recent date, when he broke 345 straight. Later in the California State shoot Mr. Lorenson had a run of 204.

Now that professional trapshooting championships are being promoted in every State it would be a wise move on the part of the Interstate Trapshooting Association to make the professional championship at the Grand American Handicap a real one by making it open to only the State champions. The amateur championship is settled this way, and there is no bigger or better event in trapdom today than the National Amateur Trapshooting Championship.

Annie Oakley (Mrs. Frank E. Butler), the greatest of all women shooters and one of the best shots that ever handled a firearm, and her dog, "Dave," have been doing great work for the Red Cross at Portsmouth, N. H., this summer. At all of Miss Oakley's exhibitions it was announced that "Dave" would find any piece of money above a quarter, that would be hidden within 100 yards. To the credit of "Dave," it may be said that he has not missed a bet and one day found $1,625. All the money collected in this manner has been turned over to the Red Cross.

E. I. du Pont de Nemours & Company of Wilmington, Delaware, which is ever to the forefront in displaying initiative and progressiveness, has sprung an innovation in advertising circles by equipping an immense office building solely for the use of its Advertising Division. In the columns of Kaiser Wilhelm's subsidized press considerable space has been devoted of late to gloating over the alleged abandonment of foreign advertising and curtailment of home advertising by American manufacturers. The Du Pont Company, however, instead of reducing its advertising expenditures has doubled its appropriation for the present year over that of the previous year and is planning to increase the sum still further for 1919.

SICK DUCKS IN THE RICE FIELDS

Reports from the rice fields to the State Fish and Game Commission declare that the ducks feeding in that section are afflicted with "duck disease." Deputies in the northern part of the State report 300 limit bags of ducks abandoned by hunters on opening day, being thrown away as they were not fit to eat.

The sick ducks are found on the drainage lakes near the rice fields. The water is alkali and is fatal to the birds. The rice land is strongly alkali, and after the rice is planted the land is flooded. This water is run off into drainage lakes, and the ducks that gathered there got the disease.

Three sick ducks were brought to San Francisco alive for examination, and two of them died soon after reaching here. They were examined by Dr. H. C. Bryant of the University of California and Dr. Wilbur of the Department of Agriculture, and they quickly diagnosed the disease. It is a recurrence of the trouble of 1912 and 1913, when thousands of ducks died of this disease.

Ducks around Buena Vista lake and Tulare lake are badly affected according to reports.

The hunting around Wingo is very poor this year. The marshes there are being filled in and the ducks have hiked out. A deputy held up twenty-three parties on opening day and found only six ducks.

Reports from members of hunting clubs are beginning to come in and most of them got the limit on opening day.

HUNTERS MUST OBSERVE BOTH FEDERAL AND STATE GAME LAWS

In making their plans to shoot migratory waterfowl, hunters will do well to note the dates of open season under both Federal and State laws.

The Federal law and regulations limit the seasons before and after which no one may shoot these birds. If a State law opens the season later or closes it earlier than the dates prescribed by the Federal regulations, the season in that State is just so much further shortened. Special attention is called to the fact that the Federal regulations do not authorize anyone to hunt or kill migratory birds contrary to the State law.

Under the migratory bird treaty act regulations it is lawful to hunt waterfowl (except wood ducks, eider ducks, and swans for which there is no open season), rails, coot, gallinules, Wilson snipe or jacksnipe, black-bellied and golden plovers, yellowlegs, woodcock and mourning or white-winged doves during the open seasons prescribed by the regulations. The several States, however, are authorized under the treaty act still further to protect migratory birds.

Under the treaty act and regulations the sale of all migratory birds, other than propagated waterfowl, is prohibited throughout the United States except for scientific or propagating purposes. Maximum bag limits are also prescribed and, when permitted by State law, two days limit of migratory birds may be shipped or transported from one State to another in a calendar week. Hunters are especially advised to familiarize themselves with the provisions of the new act and regulations, copies of which or other information concerning which may be had by communicating with the Bureau of Biological Survey, United States Department of Agriculture, Washington, D. C.

The organization of the department for enforcing the provisions of the new law is practically completed throughout the country, and the act grants the necessary police powers for its proper enforcement. The maximum penalties prescribed for violation of the provisions of the new act are $500 fine or 6 months imprisonment, or both.

PUBLICATION ISSUED ON MOUNTAIN BEAVER

The California mountain beaver or Aplodontia, first discovered on the Pacific coast by the Lewis and Clark expedition, is the subject of a paper just written by C. L. Camp, research worker for the University of California Museum of Vertebrate Zoology. The publication forms part of the University of California series in Zoology, issued by the University Press. The pamphlet is based upon personal observations of the author in a recent expedition.

Unlike the common species of beaver, Aplodontia is credited with a real voice. He is said to be a timid animal under ordinary conditions but a fierce fighter when caught in a trap. When in pain, milky white tears cover his eyes. He is not a hardy type and does not live long in captivity.

Copies of the paper may be obtained from the University of California Press, Berkeley. It is entitled "Excavations of the Burrows of the Rodent Aplodontia, with Observations on the Habits of the Animal."

In connection with a campaign in the interests of food conservation and the protection of insectivorous and game birds, the Du Pont Company plans to conduct during 1919 a national crow shooting contest. Appropriate State and national prizes will probably be offered for those who kill the largest number of these destructive birds. Full details of the plan have not been worked out yet and any suggestions from interested shooters addressed to the Sporting Powder Division, Wilmington, Del., will be given careful consideration.

The crow is one of the greatest destroyers of our bird life found on this continent. It is an arch enemy of game birds and crops. The Pennsylvania Game Commission is of the opinion that each crow destroys more wild life annually than any fox, weasel, wild cat, mink or human hunter. During the first several weeks of their existence the young of game birds and of perching birds are fed on animal food, partly in the form of insects, and each will consume daily an amount equal to its own weight.

A young crow while in the nest will consume an amount of food equal to three or four times its own weight and only a small part of this food consists of insects. Most of it is made up of the eggs and the young of other birds, which, if left alive, would be of benefit in the protection of crops. In addition to the harm done in destroying useful birds, crows spread contagion and infectious diseases, such as foot and mouth disease and scab incident to live stock.

Crow shooting is a fascinating as well as useful sport. What can be accomplished when the sport is properly organized is illustrated by the activities of the "Crow Shooters and Would-Be Crow Shooters" of Canton, South Dakota. Each year they hold a crow hunt. In the last two hunts a total of 158 shooters took part and a total of 516 crows were killed.

Watch for future announcements and get ready to do your part to save the crops.

MILLIONS OF DUCKS POT-HUNTED

Unless the co-operation of Mexico is obtained in preventing the wholesale and unsportsmanlike slaughter of wild ducks says the Daily News, it is little use for laws to be enacted in the United States to prevent these fowls from being exterminated, it is claimed by men in this country who are familiar with the enormous destruction of the birds each year, a Monterey (Mexico) correspondent of the St. Louis Republic writes. The wild ducks which begin flocking into Mexico early in November come from their nesting places in the far north, stopping in their southern flight at various places along the route.

There are no game laws in Mexico. The beautifully plumaged birds of the tropics are being rapidly killed off by commercial hunters. Deer is becoming scarce in some parts of the country, where the animals were formerly plentiful. Venison, bear meat and other wild game is still sold upon the markets of the cities and towns at remarkably low prices.

During the wild duck season these fowls may often be purchased dressed as low as three cents each. The low price is due to the wholesale way in which they are slaughtered. It is upon the lakes of the valley of Mexico and adjacent to the capital that the duck market hunters operate most extensively. Lake Shapala, the beautiful resort near Guadalajara, is another favorite slaughtering place of the professional pot shooter.

The work of killing is carried on systematically and is made a regular business. There is one at least, of the Indian villages located on the outskirts of the City of Mexico, the main source of income of whose inhabitants comes from a small lake, which in the right season is swarming with ducks and which they kill by the thousand.

Sport does not enter into the method of the Indian duck shooters; they will not permit single birds to be killed by sportsmen, even if they be given all the birds which are bagged. Shooting of that sort is too slow and drives off many birds which by their methods are brought to market.

From the month of November, with which commences the arrival of ducks, until March or April, carefully concealed blinds are constructed along the edge of the lakes, in which are placed regular batteries, consisting of shotguns heavily loaded and leveled in two divisions, one so as to sweep the surface of the water and the other so as to catch the birds after they rise. Strings are then fastened to the triggers of each of the guns so that by a sudden jerk a single person can discharge the whole battery at the same instant. The whole battery is then very carefully concealed with green branches and rushes.

When the ducks commence to arrive, in November, the Indians station various of their number here and there near the place prepared, in order to stop the passing of travelers or the firing of occasional shots by poaching hunters, as well as remove to a safe distance anything that might tend to frighten away the birds from the reception prepared for them. With great care and skill the Indians endeavor to get the birds so bunched that the greatest possible number may be slaughtered by the impending discharge. In this work they exhibit almost inexhaustible patience, sometimes waiting an entire day for the proper moment to arrive. When it comes the masked battery is turned loose with the most deadly effect. A slight noise is made so as to cause the birds to rise a trifle, one set of guns being then discharged and the other as the birds are in the air.

The slaughter thus occasioned is something amazing. It is estimated from a single discharge of a battery of 500 guns there is brought down $1,000 worth of ducks. The total number of ducks kiled in the valley of Mexico each year by these batteries is said to be more than 2,000,000.

OPENING OF THE COURSING SEASON

The official opening of coursing season for 1918, takes place on Oct. 20th, with a sixteen-dog champion stake and derby of sixteen dogs whelped in 1917. The first meeting will take place at Bunker Station, Cal., on the Oakland and Antioch line. From the number of entries that have been received and from the number of first-class hounds entered, it will be one of the best opening meetings of any season held in California for some time.

Next in order of coursing events is the big Golden State championship cup stake at Merced for three days' running, November 21, 22 and 23. From the east several prize winners will be shipped here for competition and the entries are expected to run well up into the hundreds. J. H. Rosseter recently had imported two of England's famous hounds, "Martinette" and "Gingham." Last year "Martinette" was the fastest dog in England. "Gingham" is only a young female hound that has had very little experience in competitive racing. Dr. Clark, another of San Francisco's coursing sportsmen, has imported from England "Martlow," a young dog that has done very little running in championship events.

THE DANGER OF WILD LIFE EXTINCTION

(By James A. McGuire.)
